

Association of VA Psychologist Leaders

Psychologists have been in the top 5 VA professions suffering staffing shortages since at least 2013. Continued attention to Veterans' mental health services has brought to the forefront the difficulties VHA has in recruiting, hiring, and retaining quality mental health professionals, specifically doctoral-level psychologists.

With the increase in demands for psychological care resulting from the growing Veteran population who served in Iraq and Afghanistan as well as the increases in problems now experienced by Korea and Vietnam Veterans, psychologists must be hired and retained to meet those treatment demands.

Psychologists' training encompasses a unique combination of assessment, therapy, and research skills needed to develop and implement new and effective treatments. Veterans receiving services in VA frequently have highly complex mental health problems, including posttraumatic stress disorder and traumatic brain injury with multiple comorbidities as well as the more common problems such as substance abuse and depression. VA psychologists have become particularly adept at treatments at a level above that which is generally available elsewhere, utilizing state-of-the-art, evidence-based approaches to treatment of mental illnesses. Retaining psychologists who demonstrate excellence in treating Veterans is a more critical issue than ever before. Title 38 would allow for appropriate compensation to retain this talented workforce.

So that we can better recruit and retain psychologists and meets the demands of the Veterans we serve, the undersigned VA psychologists fully support moving to full Title 38 pay authority. Signatories as of 7/7/19, 5 pm:
