Charles is the Co-Founder of CuraPatient, an AI-enabled digital health platform in use at the U.S. Department of Veterans Affairs. Its primary functions are to provide intuitive care plans, patient engagement tools and automated administration. Curapatient is one of 21 companies to have been certified as FedRamp High, which indicates the highest standard of cybersecurity and government interoperability. CuraPatient also won first prize in a Tech Sprint competition hosted by the National Institute of Artificial Intelligence and was named "The Future of Healthcare."

Prior to CuraPatient, Charles was at Composite Apps, Inc., which specialized in applying Artificial Intelligence and advanced data analytics to compress inefficiencies out of its clients' operations - sectors ranging from defense to entertainment to logistics.

Prior to Composite Apps, Charles was a Co-Founder of Halio Health, which enabled primary care providers and mental health specialists to deliver better behavioral health care. Its web and mobile-based solutions integrated into primary care practices to assist in screening, diagnosing, treating and coordinating specialist care for patients.

A graduate of Stanford University, Charles is a Trustee of Historic Hudson Valley, Asia Society, and Asian Cultural Council. He is a member of The Knickerbocker Club in New York and holds master's degrees in business and education from Georgetown University and The University of Pennsylvania. Charles is married to Emily Shippee of Fond du Lac, Wisconsin.
