Raquel Halfond, PhD

Senior Director, Evidence-Based Practice and Health Equity

American Psychological Association

Dr. Raquel Halfond leads the American Psychological Association's (APA) efforts regarding evidence-based practice in psychology. This includes promoting access to high-quality, scientific, and equitable psychological care and the development of resources, such as clinical practice guidelines, clinical evidence briefs, APA Presidential Task Force reports, and more.

Dr. Halfond has overseen development of clinical practice guidelines for the treatment of various disorders such as posttraumatic stress disorder, depression, and more.

She has extensive training in evidence-based treatments, frequently presents on topics relevant to evidence-based practice at national conferences, and actively publishes in peer-reviewed journals and books.

Dr. Halfond serves as the liaison to various national and global external stakeholder groups focused on health promotion and best practices for guideline development in healthcare. She completed two terms serving on the Steering Group for the Guidelines International Network-North America, focusing on best practices for guideline development in promoting health for all.

Dr. Halfond is a licensed clinical psychologist in Virginia. She received her doctorate in clinical psychology from Virginia Commonwealth University, her master's degree in experimental psychology from Wake Forest University, and her bachelor's degree in psychology and Hispanic studies from the College of William and Mary. She completed her APA-approved clinical internship at Children's Hospital Los Angeles and her postdoctoral fellowship at Harbor-UCLA Medical Center.
