Mike Sicilia – Executive Vice President, Oracle Global Industries

Mike Sicilia is executive vice president of and responsible for Oracle's vertical businesses globally.

These include Oracle Communications, Engineering and Construction, Energy and Water, Financial Services, Food and Beverage, Healthcare, Hospitality, Life Sciences, Retail, and State and Local Government. Working with his leadership team, he develops and sets research and development, operating, and go-to-market strategies for the individual industries.

Mike's teams work with customers large and small to deliver world-class, cloud-based vertical operating solutions. These solutions—such as clinical trials management, energy efficiency, and 5G network modules, among others—have a profound impact on bettering human lives. Mike is passionate about using cloud technology to help Oracle's customers better serve their customers, and is a frequently requested speaker at industry events. He leads the team that manages philanthropic partnerships with governments worldwide in the fight against COVID-19 by leveraging Oracle-developed and donated clinical and citizen-facing applications.
Mike joined Oracle as part of its 2008 acquisition of Primavera Systems.
