“(B) UH–60 Black Hawk Utility Helicopters;
“(C) Abrams Main Battle Tanks;
“(D) Bradley Infantry Fighting Vehicles;
“(E) Stryker Combat Vehicles; and
“(F) any other items of equipment identified as high priority by the Chief of Staff of the Army or the Chief of the National Guard Bureau.”.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to reports required to be submitted under section 10541 of title 10, United States Code, after the date of the enactment of this Act.

SEC. 112. LIMITATION ON AVAILABILITY OF FUNDS FOR M27 INFANTRY AUTOMATIC RIFLE PROGRAM.

(a) LIMITATION.—Of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2019 for the M27 Infantry Automatic Rifle program of the Marine Corps, not more than 80 percent may be obligated or expended until the date on which the Commandant of the Marine Corps submits to the Committees on Armed Services of the Senate and the House of Representatives the assessment described in subsection (b).
(b) ASSESSMENT.—The assessment described in this subsection is a written summary of the views of the Marine Corps with respect to the Small Arms Ammunition Configuration Study of the Army, including—

(1) an explanation of how the study informs the future small arms modernization requirements of the Marine Corps; and

(2) near-term and long-term modernization strategies for the small arms weapon systems of the Marine Corps, including associated funding and schedule profiles.

Subtitle C—Navy Programs

SEC. 121. INCREASE IN NUMBER OF OPERATIONAL AIRCRAFT CARRIERS OF THE NAVY.

(a) FINDINGS.—Congress finds the following:

(1) The aircraft carrier can fulfill the Navy’s core missions of forward presence, sea control, ensuring safe sea lanes, and power projection as well as providing flexibility and versatility to execute a wide range of additional missions.

(2) Forward airpower is integral to the security and joint forces operations of the United States. Carriers play a central role in delivering forward airpower from sovereign territory of the United States in both permissive and nonpermissive environments.
(3) Aircraft carriers provide our Nation the ability to rapidly and decisively respond to national threats, as well as conducting worldwide, on-station diplomacy and providing deterrence against threats to the United States allies, partners, and friends.

(4) Since the end of the cold war, aircraft carrier deployments have increased while the aircraft carrier force structure has declined.

(5) Considering the increased array of complex threats across the globe, the Navy aircraft carrier is operating at maximum capacity, increasing deployment lengths and decreasing maintenance periods in order to meet operational requirements.

(6) To meet global peacetime and wartime requirements, the Navy has indicated a requirement to maintain two aircraft carriers deployed overseas and have three additional aircraft carriers capable of deploying within 90 days. However, the Navy has indicated that the existing aircraft carrier force structure cannot support these military requirements.

(7) Despite the requirement to maintain an aircraft carrier strike group in both the United States Central Command and the United States Pacific Command, the Navy has been unable to generate sufficient capacity to support combatant com-
manders and has developed significant carrier gaps in these critical areas.

(8) Because of the continuing use of a diminished aircraft carrier force structure, extensive maintenance availabilities result which typically exceed program costs and increase time in shipyards. These expansive maintenance availabilities exacerbate existing carrier gaps.

(9) Developing an alternative design to the Ford-class aircraft carrier is not cost beneficial. A smaller design is projected to incur significant design and engineering cost while significantly reducing magazine size, carrier air wing size, sortie rate, and on-station effectiveness, among other vital factors, as compared to the Ford-class. Furthermore, a new design will delay the introduction of future aircraft carriers, exacerbating existing carrier gaps and threatening the national security of the United States.

(10) The 2016 Navy Force Structure Assessment states “A minimum of 12 aircraft carriers are required to meet the increased warfighting response requirements of the Defense Planning Guidance Defeat/Deny force sizing direction.”
(b) Sense of Congress.—It is the sense of Congress that—

(1) the United States should expedite delivery of 12 aircraft carriers; and

(2) an aircraft carrier should be authorized every three years.

(c) Increase in Number of Operational Aircraft Carriers of the Navy.—

(1) Increase.—Section 5062(b) of title 10, United States Code, is amended by striking “11 operational aircraft carriers” and inserting “12 operational aircraft carriers”.

(2) Effective date.—The amendment made by paragraph (1) shall take effect on September 30, 2022.

SEC. 147. FINDINGS AND SENSE OF CONGRESS REGARDING KC–46 AERIAL REFUELING TANKERS.

(a) Findings.—Congress makes the following findings:

(1) Aerial refueling tankers provide an essential foundation for our nation’s ability to project power and deter adversaries, enabling the global reach of our joint force.

(2) 87 percent of the legacy aerial refueling fleet is comprised of KC–135 aircraft with an average age of 56 years.
The Commander of United States Transportation Command has identified the aerial refueling fleet as the “most stressed of our air mobility forces” and stated that “delaying KC–46 production puts the Joint Force’s ability to effectively execute war plans at risk”.

As directed by the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115–91), the Air Force is undertaking an updated mobility capability and requirements study that will reflect guidance articulated in the 2018 National Defense Strategy and reassess the current tanker requirement of 479 aircraft.

The fixed-price contract for KC–46A calls for 179 aircraft to be delivered by 2028.

The KC–46 is a multirole platform that will bring enhanced capabilities to both the aerial refueling and strategic airlift missions. The aircraft provides the ability to refuel joint and coalition aircraft by both boom and drogue systems in the same sortie; improved cargo, passenger and aeromedical evacuation capabilities; and enhanced survivability with multiple layers of protection enabling it to operate safely in a broader range of threat environments than legacy tankers.
(7) The Government Accountability Office has stated: “The KC–46 program’s total acquisition cost estimate remained stable over the past year at $44,400,000,000, which is about $7,300,000,000 less than the original estimate.”

(8) The Commander of Air Mobility Command has stated that the KC–46 “will bring tremendous capability to our joint warfighter”.

(9) The Assistant Secretary of the Air Force for Acquisition has stated: “Stability of requirements and funding are the keys to KC–46 program success and will enable the Air Force to deliver this new tanker ready for employment on day one.”

(10) The Military Deputy to the Assistant Secretary of the Air Force for Acquisition has identified the KC–46 as the Air Force’s second highest combat aviation acquisition priority “for the role that it plays in being able to power project”.

(11) With the support of Congress, the Air Force has executed three low rate initial production contracts for a total of 34 aircraft. In fiscal year 2018, Congress provided funding for a fourth production lot totaling 18 aircraft.

(12) A steady production rate of 1.3 aircraft per month has been maintained through independent
investment by industry in order to expedite deliveries
to the Air Force upon completion of developmental
testing and certification.

(b) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) the Air Force and industry should dedicate
the resources and manpower necessary to ensure the
first KC–46 is delivered in fiscal year 2018;

(2) the Air Force should maximize efficiency in
the test and certification process to ensure that—

(A) test points are not redundant;

(B) test plans are approved expeditiously;

(C) receiver aircraft are available to sup-
port test flights; and

(D) Air Force inputs necessary for Federal
Aviation Administration and military airworthi-
ness certifications are expedited; and

(3) the Assistant Secretary of the Air Force for
Acquisition and the Director of the Defense Con-
tract Management Agency should develop and imple-
ment a plan enabling the Air Force to accept and
field KC–46 aircraft at a rate higher than three air-
craft per month after the delivery of the first air-
craft.

**SEC. 333. SURFACE WARFARE TRAINING IMPROVEMENT.**

(a) **Findings.**—Congress makes the following findings:

(1) In 2017, there were three collisions and one grounding involving United States Navy ships in the Western Pacific. The two most recent mishaps involved separate incidents of a Japan-based United States Navy destroyer colliding with a commercial merchant vessel, resulting in the combined loss of 17 sailors.
(2) The causal factors in these four mishaps are linked directly to a failure to take sufficient action in accordance with the rules of good seamanship.

(3) Because risks are high in the maritime environment, there are widely accepted standards for safe seamanship and navigation. In the United States, the International Convention on Standards of Training, Certification and Watchkeeping (hereinafter in this section referred to as the “STCW”) for Seafarers, standardizes the skills and foundational knowledge a maritime professional must have in seamanship and navigation.

(4) Section 568 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328; 130 Stat. 2139) endorsed the STCW process and required the Secretary of Defense to maximize the extent to which Armed Forces service, training, and qualifications are creditable toward meeting merchant mariner licenses and certifications.

(5) The Surface Warfare Officer Course Curriculum is being modified to include ten individual Go/No Go Mariner Assessments/Competency Check
Milestones to ensure standardization and quality of the surface warfare community.

(6) The Military-to-Mariner Transition report of September 2017 notes the Army maintains an extensive STCW qualifications program and that a similar Navy program does not exist.

(b) Sense of Congress.—It is the sense of Congress that—

(1) the Secretary of the Navy should establish a comprehensive individual proficiency assessment process and include such an assessment prior to all operational surface warfare officer tour assignments; and

(2) the Secretary of the Navy should significantly expand the STCW qualifications process to improve seamanship and navigation individual skills training for surface warfare candidates, surface warfare officers, quartermasters and operations specialists to include an increased set of courses that directly correspond to STCW standards.

(c) Report.—Not later than March 1, 2019, the Secretary of the Navy shall submit to the congressional defense committees a report that includes each of the following:
(1) A detailed description of the surface warfare officer assessments process.

(2) A list of programs that have been approved for credit toward merchant mariner credentials.

(3) A complete gap analysis of the existing surface warfare training curriculum and STCW.

(4) A complete gap analysis of the existing surface warfare training curriculum and the 3rd mate unlimited licensing requirement.

Such report shall include—

(1) an audit of all surface Navy vessel inspections, certifications, and required and recommended assist visits;
(2) an analysis of such inspections, certifications, and visits for redundancies, as well as any necessary items not covered;

(3) recommendations to streamline surface vessel inspections, certifications, and required and recommended assist visits to optimize effectiveness, improve material readiness, and restore training readiness; and

(4) recommendations for congressional action to address the needs of the Navy as identified in the report.

(b) CONGRESSIONAL BRIEFING.—Not later than January 31, 2019, the Secretary of the Navy shall provide to the Senate Committee on Armed Services and the House Committee on Armed Services an interim briefing on the matters to be included in the report required by subsection (a).

SEC. 880. DEFENDING UNITED STATES GOVERNMENT COMMUNICATIONS.

(a) FINDINGS.—Congress makes the following findings:

(1) In its 2011 “Annual Report to Congress on Military and Security Developments Involving the People’s Republic of China”, the Department of Defense stated that, “China’s defense industry has benefitted from integration with a rapidly expanding civilian economy and science and technology sector, particularly elements that have access to foreign technology. Progress within individual defense sectors appears linked to the relative integration of each, through China’s civilian economy, into the global production and R&D chain . . . Information technology companies in particular, including Huawei, Datang, and Zhongxing, maintain close ties to the PLA.”.

(2) In a 2011 report titled “The National Security Implications of Investments and Products from the People’s Republic of China in the Telecommunications Sector”, the United States China Commission stated that “[n]ational security concerns have
accompanied the dramatic growth of China’s telecom sector. Additionally, large Chinese companies—particularly those ‘national champions’ prominent in China’s ‘going out’ strategy of overseas expansion—are directly subject to direction by the Chinese Communist Party, to include support for PRC state policies and goals.”.

(3) The Commission further stated in its report that “[f]rom this point of view, the clear economic benefits of foreign investment in the U.S. must be weighed against the potential security concerns related to infrastructure components coming under the control of foreign entities. This seems particularly applicable in the telecommunications industry, as Chinese companies continue systematically to acquire significant holdings in prominent global and U.S. telecommunications and information technology companies.”.

(4) In its 2011 Annual Report to Congress, the United States China Commission stated that “[t]he extent of the state’s control of the Chinese economy is difficult to quantify . . . There is also a category of companies that, though claiming to be private, are subject to state influence. Such companies are often in new markets with no established SOE leaders and
enjoy favorable government policies that support their development while posing obstacles to foreign competition. Examples include Chinese telecoms giant Huawei and such automotive companies as battery maker BYD and vehicle manufacturers Geely and Chery.”.

(5) General Michael Hayden, who served as Director of the Central Intelligence Agency and Director of the National Security Agency, stated in July 2013 that Huawei had “shared with the Chinese state intimate and extensive knowledge of foreign telecommunications systems it is involved with.”

(6) The Federal Bureau of Investigation, in a February 2015 Counterintelligence Strategy Partnerships Intelligence Note stated that, “[w]ith the expanded use of Huawei Technologies Inc. equipment and services in U.S. telecommunications service provider networks, the Chinese Government’s potential access to U.S. business communications is dramatically increasing. Chinese Government-supported telecommunications equipment on U.S. networks may be exploited through Chinese cyber activity, with China’s intelligence services operating as an advanced persistent threat to U.S. networks.”.
(7) The Federal Bureau of Investigation further stated in its February 2015 counterintelligence note that, “China makes no secret that its cyber warfare strategy is predicated on controlling global communications network infrastructure.”.

(8) At a hearing before the Committee on Armed Services of the House of Representatives on September 30, 2015, Deputy Secretary of Defense Robert Work, responding to a question about the use of Huawei telecommunications equipment, stated, “In the Office of the Secretary of Defense, absolutely not. And I know of no other—I don’t believe we operate in the Pentagon, any [Huawei] systems in the Pentagon.”.

(9) At such hearing, the Commander of the United States Cyber Command, Admiral Mike Rogers, responding to a question about why such Huawei telecommunications equipment is not used, stated, “as we look at supply chain and we look at potential vulnerabilities within the system, that it is a risk we felt was unacceptable.”.

(10) In March 2017, ZTE Corporation pled guilty to conspiring to violate the International Emergency Economic Powers Act by illegally shipping United States-origin items to Iran, paying the
United States Government a penalty of $892,360,064 dollars for activity between January 2010 and January 2016.

(11) The Treasury Department’s Office of Foreign Assets Control issued a subpoena to Huawei as part of a Federal investigation of alleged violations of trade restrictions on Cuba, Iran, Sudan, and Syria.

(12) In the bipartisan Permanent Select Committee on Intelligence of the House of Representatives “Investigative Report on the United States National Security Issues Posed by Chinese Telecommunication Companies Huawei and ZTE” released in 2012, it was recommended that “U.S. government systems, particularly sensitive systems, should not include Huawei or ZTE equipment, including in component parts. Similarly, government contractors—particularly those working on contracts for sensitive U.S. programs—should exclude ZTE or Huawei equipment in their systems.”.

(13) Christopher Wray, who serves as Director of the Federal Bureau of Investigation, stated in February 2018 during a hearing of the Select Committee on Intelligence of the Senate that he was “deeply concerned about the risks of allowing any
company or entity that is beholden to foreign governments that don’t share our values to gain positions of power inside our telecommunications networks. That provides the capacity to exert pressure or control over our telecommunications infrastructure. It provides the capacity to maliciously modify or steal information. And it provides the capacity to conduct undetected espionage.” Admiral Mike Rogers, who served as Director of the National Security Agency, agreed with Director Wray’s characterization, and added that Government programs need “to look long and hard at companies like this”.

(14) Director of National Intelligence Dan Coats, Federal Bureau of Investigation Director Christopher Wray, Director of the Defense Intelligence Agency General Robert Ashley, Director of the National Geospatial-Intelligence Agency Robert Cardillo, Director of the National Security Agency Admiral Michael Rogers, and Director of the Central Intelligence Agency Michael Pompeo all indicated by show of hands in February 2018 at a hearing of the Select Committee on Intelligence of the Senate that they would not “use products or services from Huawei or ZTE”.
(15) General Paul Nakasone, who served as the
Commanding General of United States Army Cyber
Command, stated during his confirmation hearing to
be National Security Agency director in March 2018
before the Select Committee on Intelligence of the
Senate that he “would not” use any Huawei, China
Unicom, or China Telecom products nor would he
recommend his family do so.

eliminate such covered telecommunications equipment or services from its systems;

(C) does not permit real-time access to its networks to an entity located or substantially located in a covered foreign country; and

(D) provides a written guarantee to the head of the agency that it will not procure such covered telecommunications equipment or services again.

(4) COVERED COMPONENTS.—With respect to a covered component of an entity for which such entity reasonably believes will not need to be replaced during the 5-year period beginning on the date of the enactment of this Act, such entity shall provide a written assurance to the head of the agency for which such covered component is in use that such entity shall replace such covered component, at the end of such covered component’s reasonable lifecycle, with a comparable component that is manufactured by a person other than Huawei Technologies Company or ZTE Corporation (or any subsidiary, successor entity, or affiliate of such entities).

(A) in subsection (a), by adding at the end the following:

“(3) ALLOCATION OF ADDITIONAL AMOUNTS.—

Of the amount apportioned to a State for any fiscal year under section 4(b), the State may elect to allocate not more than 10 percent, to be combined with the amount apportioned to the State under paragraph (1) for that fiscal year, for acquiring land for, expanding, or constructing a public target range.”;

(B) by striking subsection (b) and inserting the following:
“(b) Cost Sharing.—

“(1) In general.—Except as provided in paragraph (2), the Federal share of the cost of any activity carried out using a grant under this section shall not exceed 75 percent of the total cost of the activity.

“(2) Public target range construction or expansion.—The Federal share of the cost of acquiring land for, expanding, or constructing a public target range in a State on Federal or non-Federal land pursuant to this section or section 8(b) shall not exceed 90 percent of the cost of the activity.”;

and

(C) in subsection (c)(1)—

(i) by striking “Amounts made” and

inserting the following:

“(A) In general.—Except as provided in subparagraph (B), amounts made”; and

(ii) by adding at the end the following:

“(B) Exception.—Amounts provided for acquiring land for, constructing, or expanding a public target range shall remain available for expenditure and obligation during the 5-fiscal-year period beginning on October 1 of the first
fiscal year for which the amounts are made available.”

(c) LIMITS ON LIABILITY.—

(1) DISCRETIONARY FUNCTION.—For purposes of chapter 171 of title 28, United States Code (commonly referred to as the “Federal Tort Claims Act”), any action by an agent or employee of the United States to manage or allow the use of Federal land for purposes of target practice or marksmanship training by a member of the public shall be considered to be the exercise or performance of a discretionary function.

(2) CIVIL ACTION OR CLAIMS.—Except to the extent provided in chapter 171 of title 28, United States Code, the United States shall not be subject to any civil action or claim for money damages for any injury to or loss of property, personal injury, or death caused by an activity occurring at a public target range that is—

(A) funded in whole or in part by the Federal Government pursuant to the Pittman-Robertson Wildlife Restoration Act (16 U.S.C. 669 et seq.); or

(B) located on Federal land.
(d) Sense of Congress Regarding Cooperation.—It is the sense of Congress that, consistent with applicable laws and regulations, the Chief of the Forest Service and the Director of the Bureau of Land Management should cooperate with State and local authorities and other entities to carry out waste removal and other activities on any Federal land used as a public target range to encourage continued use of that land for target practice or marksmanship training.

(e) Definition of Public Target Range.—In this section, the term “public target range” means a specific location that—

(1) is identified by a governmental agency for recreational shooting;

(2) is open to the public;

(3) may be supervised; and

(4) may accommodate archery or rifle, pistol, or shotgun shooting.

SEC. 1080. SENSE OF CONGRESS ON ADVERSARY AIR CAPABILITIES.

SEC. 1081. SENSE OF CONGRESS REGARDING ORGANIC ATTACK AVIATOR TRAINING CAPABILITY.

It is the sense of Congress that—

(1) retaining attack rotary wing aviation assets in the Army National Guard continues to be important;

(2) the National Guard should retain organic attack aviation training capacity; and

(3) the Western and Eastern Army Aviation Training Sites have proven invaluable in maintaining Army National Guard aviation readiness.

SEC. 1082. SENSE OF CONGRESS ON THE LEGACY, CONTRIBUTIONS, AND SACRIFICES OF AMERICAN INDIAN AND ALASKA NATIVES IN THE ARMED FORCES.

(1) The United States celebrates Native American History Month each November to recognize and honor the history and achievements of Native Americans.

(2) American Indian and Alaska Natives serve in all branches of the Armed Forces, attend all service academies, and defend our country with valiance, pride, and honor.
(3) More than 30,000 active duty, reserve, and National Guard members of the Armed Forces identify as Native American.

(4) American Indian and Alaska Natives have served and continue to serve in the highest proportions to population than any other ethnic group.

(5) American Indian and Alaska Natives have served in every war, from the Revolutionary War to current overseas conflicts.

(6) Native American veterans are Congressional Medal of Honor, Congressional Gold and Silver Medals, Purple Heart, and Bronze Star Medal recipients.

(7) American Indian and Alaska Native women serve in Armed Forces in higher proportions than any other ethnic group.

(8) Native American Code Talkers and their languages proved an invaluable asset during World Wars I and II.

(9) Ira Hayes, Akimel O'odham (Pima) helped to raise the American flag on Iwo Jima;

(10) Dr. Joseph Medicine Crow, Apsáalooke (Crow), served in WWII and became a war chief.

(11) Numerous present and past military aircraft, helicopters, and munitions programs bear the
names of Native American tribes and tribal leaders
to honor their legacy of martial prowess, including
the Apache, Kiowa, Black Hawk, Lakota, Chinook,
Huron, Iroquois, Comanche, Cayuse, Chickasaw,
Ute, Gray Eagle, Mescalero, Tomahawk, and more.

(12) Native American tribes commonly take
part in ceremonies alongside military units to bless
new aircraft and mark successful inception of new
fleets.

(13) More than 140,000 veterans across the
United States identify as Native American.

(14) Each November, the Department of De-
defense honors the unique and special relationship with

Month.

gress that Congress—

tributions of American Indian and Alaska Natives
and tribal communities to the military of the United
States; and

(2) commits to ensuring progress for American
Indian and Alaska Native members of the Armed
Forces and veterans with regard to representation in
senior military leadership positions, improving access
to culturally competent resources and services, and
supporting families and tribal communities.

SEC. 1083. AMATEUR RADIO PARITY.

(a) FINDINGS.—Congress finds the following:

(1) More than 730,000 radio amateurs in the
United States are licensed by the Federal Commu-
ications Commission in the amateur radio services.

(2) Amateur radio, at no cost to taxpayers, pro-
vides a fertile ground for technical self-training in
modern telecommunications, electronics technology,
and emergency communications techniques and pro-
tocols.

(3) There is a strong Federal interest in the ef-
effective performance of amateur stations established
at the residences of licensees. Such stations have
been shown to be frequently and increasingly pre-
cluded by unreasonable private land use restrictions,
including restrictive covenants.

(4) Federal Communications Commission regu-
lations have for three decades prohibited the applica-
tion to stations in the amateur service of State and
local regulations that preclude or fail to reasonably
accommodate amateur service communications, or
that do not constitute the minimum practicable reg-
ulation to accomplish a legitimate State or local pur-
pose. Commission policy has been and is to require
States and localities to permit erection of a station
antenna structure at heights and dimensions suffi-
cient to accommodate amateur service communica-
tions.

(5) The Commission has sought guidance and
direction from Congress with respect to the applica-
tion of the Commission’s limited preemption policy
regarding amateur service communications to private
land use restrictions, including restrictive covenants.

(6) There are aesthetic and common property
considerations that are uniquely applicable to private
land use regulations and the community associations
obligated to enforce covenants, conditions, and re-
strictions in deed-restricted communities. These con-
siderations are dissimilar to those applicable to State
law and local ordinances regulating the same resi-
dential amateur radio facilities.

(7) In recognition of these considerations, a
separate Federal policy than exists at section
97.15(b) of title 47, Code of Federal Regulations, is
warranted concerning amateur service communica-
tions in deed-restricted communities.

(8) Community associations should fairly ad-
minister private land use regulations in the interest
of their communities, while nevertheless permitting
the installation and maintenance of effective outdoor
amateur radio antennas. There exist antenna de-
signs and installations that can be consistent with
the aesthetics and physical characteristics of land
and structures in community associations while ac-
commodating communications in the amateur radio
services.

(b) APPLICATION OF PRIVATE LAND USE RESTRI-
CTIONS TO AMATEUR STATIONS.—

(1) AMENDMENT OF FCC RULES.—Not later
than 120 days after the date of the enactment of
this Act, the Federal Communications Commission
shall amend section 97.15 of title 47, Code of Fed-
eral Regulations, by adding a new paragraph that
prohibits the application to amateur stations of any
private land use restriction, including a restrictive
covenant, that—

(A) on its face or as applied, precludes
communications in an amateur radio service;

(B) fails to permit a licensee in an ama-
teur radio service to install and maintain an ef-
fective outdoor antenna on property under the
exclusive use or control of the licensee; or
(C) does not constitute the minimum practicable restriction on such communications to accomplish the lawful purposes of a community association seeking to enforce such restriction.

(2) ADDITIONAL REQUIREMENTS.—In amending its rules as required by subsection (a), the Commission shall—

(A) require any licensee in an amateur radio service to notify and obtain prior approval from a community association concerning installation of an outdoor antenna;

(B) permit a community association to prohibit installation of any antenna or antenna support structure by a licensee in an amateur radio service on common property not under the exclusive use or control of the licensee; and

(C) subject to the standards specified in paragraphs (1) and (2) of subsection (a), permit a community association to establish reasonable written rules concerning height, location, size, and aesthetic impact of, and installation requirements for, outdoor antennas and support structures for the purpose of conducting communications in the amateur radio services.
(c) Affirmation of Limited Preemption of State and Local Land Use Regulation.—The Federal Communications Commission may not change section 97.15(b) of title 47, Code of Federal Regulations, which shall remain applicable to State and local land use regulation of amateur service communications.

(d) Definitions.—In this section:

(1) The term “community association” means any non-profit mandatory membership organization composed of owners of real estate described in a declaration of covenants or created pursuant to a covenant or other applicable law with respect to which a person, by virtue of the person’s ownership of or interest in a unit or parcel, is obligated to pay for a share of real estate taxes, insurance premiums, maintenance, improvement, services, or other expenses related to common elements, other units, or any other real estate other than the unit or parcel described in the declaration.

(2) The terms “amateur radio services”, “amateur service”, and “amateur station” have the meanings given such terms in section 97.3 of title 47, Code of Federal Regulations.
SEC. 1084. SENSE OF CONGRESS REGARDING THE INTERNATIONAL BORDERS OF THE UNITED STATES.

It is the sense of Congress that—

(1) gaining and maintaining situational awareness and operational control of the international borders of the United States is critical to national security;

(2) the United States Government must devote adequate resources to securing the border, both at, and between, ports of entry, and the agency tasked with that mission, the Department of Homeland Security, should be adequately resourced to conduct such mission; and

(3) the Department of Defense must ensure that when it acts in support of that mission, such as when mobilized by the President to conduct homeland defense activities, or when military facilities are adjacent to an international border of the United States, it has adequate resources, capabilities, and authorities to carry out the mission while maintaining combat readiness.

SEC. 1085. PROGRAM TO COMMEMORATE 75TH ANNIVERSARY OF WORLD WAR II.

(a) COMMEMORATIVE PROGRAM AUTHORIZED.—The Secretary of Defense shall conduct a program to commemorate the 75th anniversary of World War II. In con-

(2) To educate the public about the history of World War II and highlight the service of the Armed Forces during World War II and the contributions of Federal agencies and governmental and non-governmental organizations that served with, or in support of, the Armed Forces.

(3) To pay tribute to the contributions made on the home front by the people of the United States during World War II.

(4) To recognize the contributions and sacrifices made by the allies of the United States during World War II.
(c) NAMES AND SYMBOLS.—The Secretary of Defense shall have the sole and exclusive right to use the name “The United States of America 75th Anniversary of World War II Commemoration”, and such seal, emblems, and badges incorporating such name as the Secretary may lawfully adopt. Nothing in this section may be construed to supersede rights that are established or vested before the date of the enactment of this Act.

(d) COMMEMORATIVE FUND.—

(1) ESTABLISHMENT AND ADMINISTRATION.— Upon the Secretary establishing the commemorative program under subsection (a), the Secretary of the Treasury shall establish in the Treasury of the United States an account to be known as the “Department of Defense World War II Commemoration Fund” (in this section referred to as the “Fund”). The Fund shall be administered by the Secretary of Defense.

(2) USE OF FUND.—The Secretary of Defense shall use the assets of the Fund only for the purpose of conducting the commemorative program and providing grants to State and local governments and not-for-profit organizations for commemorative activities, and shall prescribe such regulations regard-
ing the use of the Fund as the Secretary considers to be necessary.

(3) **DEPOSITS.**—The following shall be deposited into the Fund:

(A) Amounts appropriated to the Fund.

(B) Proceeds derived from the Secretary’s use of the exclusive rights described in subsection (c).

(C) Donations made in support of the commemorative program by private and corporate donors.

(D) Funds transferred to the Fund by the Secretary from funds appropriated for fiscal year 2019 and subsequent years for the Department of Defense.

(4) **AVAILABILITY.**—Subject to subsection (f)(2), amounts deposited under paragraph (3) shall constitute the assets of the Fund and remain available until expended.

(5) **BUDGET REQUEST.**—The Secretary of Defense may establish a separate budget line for the commemorative program. In the budget justification materials submitted by the Secretary in support of the budget of the President for any fiscal year for
which the Secretary establishes the separate budget line, the Secretary shall—

(A) identify and explain any amounts expended for the commemorative program in the fiscal year preceding the budget request;

(B) identify and explain the amounts being requested to support the commemorative program for the fiscal year of the budget request; and

(C) present a summary of the fiscal status of the Fund.

(e) ACCEPTANCE OF VOLUNTARY SERVICES.—

(1) Authority to accept services.—Notwithstanding section 1342 of title 31, United States Code, the Secretary of Defense may accept from any person voluntary services to be provided in furtherance of the commemorative program. The Secretary of Defense shall prohibit the solicitation of any voluntary services if the nature or circumstances of such solicitation would compromise the integrity or the appearance of integrity of any program of the Department of Defense or of any individual involved in the program.

(2) Reimbursement of incidental expenses.—The Secretary may provide for reimburs-
ment of incidental expenses incurred by a person
providing voluntary services under this subsection.
The Secretary shall determine which expenses are el-
igible for reimbursement under this paragraph.

(f) Final Report.—

(1) Report Required.—Not later than 60
days after the end of the commemorative program
established by the Secretary of Defense under sub-
section (a), the Secretary shall submit to Congress
a report containing an accounting of—

(A) all of the funds deposited into and ex-
pended from the Fund;

(B) any other funds expended under this
section; and

(C) any unobligated funds remaining in
the Fund.

(2) Treatment of Unobligated Funds.—
Unobligated amounts remaining in the Fund as of
the end of the commemorative period shall be held
in the Fund until transferred by law.

(g) Limitation on Expenditures.—Total expendi-

Department of Defense, may not exceed $5,000,000 for
fiscal year 2019 or for any subsequent fiscal year to carry

(a) FINDINGS.—Congress finds the following:

(1) James Mattis, Secretary of Defense, testified before the House Armed Services Committee on March 22, 2018, that “we have very modest expectations that they [Russia] would return to [INF] compliance. As a result, in the Nuclear Posture Review, we are looking for a way, at the lowest possible cost, to checkmate them and make it in their best interest to return to compliance.”.

(2) The Honorable Daniel Coats, Director of National Intelligence, testified before the Senate Armed Services Committee on March 6, 2018, that the Russian Federation is violating the INF Treaty because “Moscow probably believes that the new GLCM provides sufficient advantages that make it worth the risk of violating the INF Treaty.”.

(3) General Hyten, Commander of the United States Strategic Command, also testified before the Senate Armed Services Committee on March 20, 2018, about potential strategic advantages for China stemming from their lack of participation in the INF Treaty by saying that “they do not have any limitations in the INF [Treaty], and they have built
significant numbers of intermediate-range ballistic
missiles that if they were in the INF [Treaty], they
would be contrary to the treaty”.

(4) General Joseph Dunford, Chairman of the
Joint Chiefs of Staff, testified before the House
Armed Services Committee on April 12, 2018, that
“we’re not only looking for operational concepts and
ways to deal with the Russian violation, but we’re
also at least posturing ourselves to develop weapons
should they be required”. Secretary of Defense
Mattis also stated in that same hearing “our effort
will be matched at State Department by movement
on arms control and nonproliferation. There are two
thrusts to our nuclear strategy. . .and that’s why
those funds have been requested.”.

(b) STATEMENT OF POLICY.—It is the policy of the
United States as follows:

(1) The actions undertaken by the Russian
Federation in violation of the INF Treaty, including
the flight-test, production, and possession of prohib-
ited systems, have defeated the object and purpose
of the INF Treaty, and thus constitute a material
breach of the INF Treaty.

(2) In light of the Russian Federation’s mate-
rial breach of the INF Treaty, the United States is
legally entitled to suspend the operation of the INF
Treaty in whole or in part for so long as the Russian
Federation continues to be in material breach of the
INF Treaty.

(3) For so long as the Russian Federation re-
 mains in nonecompliance with the INF Treaty, the
United States should take actions to encourage the
Russian Federation to return to compliance with the
INF Treaty, including by—

(A) providing additional funds for the ca-
pabilities identified in section 1243(d) of the
Year 2016 (Public Law 114–92; 129 Stat. 1062) and the Intermediate-Range Nuclear
Forces Treaty Preservation Act of 2017 (Public
Law 115–91; 131 Stat. 1671); and

and NATO forces from ground-launched missile
systems of the Russian Federation that are in
noncompliance with the INF Treaty.

(e) IMPOSITION OF ARMS CONTROL SANCTIONS.—

(1) IN GENERAL.—An amount equal to not less
than 25 percent of the amount authorized to be ap-

(3) Article 1 of the Chemical Weapons Conven-

cumstances...use chemical weapons”.

(4) Russia’s stock of chemical weapons has
been implicated in the assassination or injuries of
the following individuals:

fective international action against Assad for
such activities.

(6) The Condition 10(C) Report on Compliance
with the Convention on the Prohibition of the Devel-
opment, Production, Stockpiling and Use of Chem-
ical Weapons and on Their Destruction published by
the Department of State in March 2018 asserts that
“Based on available information, the United States
cannot certify that Russia has met its obligations
under the Chemical Weapons Convention for decl-
oration of its: (1) [chemical weapons production fa-
cilities]; (2) [chemical weapons] development facili-
ties; and (3) [chemical weapons] stockpiles. In fact,
due to Russia’s March 4, 2018, use of a military-

Russian Federation is in non-compliance with its ob-
ligations under the [Chemical Weapons Conven-

In late 2017, Russia successfully launched its latest nuclear-powered missile at the central training ground. During its flight, the nuclear-powered engine reached its design capacity and provided the necessary propulsion.”;

(3) The 2018 National Defense Strategy further states that “China is leveraging military modernization, influence operations, and predatory economics to coerce neighboring countries to reorder the Indo-Pacific region to their advantage. As China
continues its economic and military ascendance, assert-

(B) the timeline, by fiscal year, for each program of the Department conducting M-code modernization efforts; and

(C) the projected cost for each such program.

(2) Systematically collect integration test data, lessons learned, and design solutions, and share such information with other elements of the Department.

(3) Identify ways the Department can prevent duplication in conducting M-code modernization efforts, and identify, to the extent practicable, potential cost savings that could be realized by addressing such duplication.

SEC. 1608. DESIGNATION OF COMPONENT OF DEPARTMENT OF DEFENSE RESPONSIBLE FOR COORDINATION OF HOSTED PAYLOAD INFORMATION.

(a) Findings.—Congress finds the following:

(1) Using commercially hosted payloads is an option for the Department of Defense that should be considered in analyses of alternatives, as it could increase cost savings, speed up capability to orbit, and contribute to resilience through the use of disaggregated space systems by the Department.

(2) The use by the Department of commercially hosted payloads has been limited so far, using commercial satellites to host three experimental payloads
to date, though the use of hosted payloads could expand in the future.

(3) The Department does not have the knowledge the Department needs to determine if commercially hosted payloads are an acquisition approach worth pursuing.

(4) The Department faces challenges in matching payloads to commercial hosts, due to numerous logistical challenges to matching payloads to hosts, including coordinating the size, weight and power of the payload with the commercial host, and aligning acquisition and funding timelines between government and commercial programs.

(5) The Comptroller General of the United States in preliminary findings concluded that the space acquisition culture of the Department lacks sufficient knowledge, such as costs, technical parameters, and lessons learned, to determine the benefits and address the challenges of using commercially hosted payloads and that the existing knowledge is fragmented across the Department without any plans to consolidate it.

(6) Programs are not required to report data on commercially hosted payloads to any centralized office or database, and leveraging cost and technical
data from hosted payload efforts could inform future
interested programs and avoid duplication of efforts,
but currently no such comprehensive data source ex-
ists.

(b) DESIGNATION.—Not later than 30 days after the
date of the enactment of this Act, the Secretary of De-
fense, in coordination with the Secretary of the Air Force,
and other Secretaries of the military departments and the
heads of Defense Agencies the Secretary determines ap-
propriate, shall designate a component of the Department
of Defense or a military department to be responsible for
coordinating information, processes, and lessons learned
relating to using commercially hosted payloads across the
military departments, Defense Agencies, and other appro-
priate elements of the Department of Defense. The func-
tions of such designated component shall include, at a
minimum, the following:

(1) Systematically collecting information from
past and planned hosted payload arrangements to
inform future acquisition planning and space system
architecture design, including integration test data,
lessons learned, and design solutions.

(2) Creating a centralized database for cost,
technical data, and lessons learned on commercially
hosted payloads and sharing such information with other elements of the Department.

5 SEC. 1647. INDEPENDENT STUDY ON NUCLEAR WEAPONS

6 LAUNCH-UNDER-ATTACK OPTION.

7 (a) FINDINGS.—Congress finds the following:

8 (1) Maintaining a safe, effective, and reliable
9 nuclear arsenal and command and control system
10 are high priorities for ensuring national security.

11 (2) The current launch-under-attack option,
12 particularly for the intercontinental ballistic missile
13 forces, could require a quick decision, on the order
14 of minutes, on whether to use these weapons to re-
15 respond to an incoming attack.

16 (b) INDEPENDENT STUDY.—Not later than 30 days
17 after the date of the enactment of this Act, the Secretary
18 of Defense shall seek to enter into a contract with a feder-

CLEAR WEAPONS COMMAND AND CONTROL
SYSTEM.

Section 1043(a)(1) of the National Defense Author-
ization Act for Fiscal Year 2012 (Public Law 112–81; 125
Stat. 1576) is amended by striking “2019” and inserting
“2022”.

SEC. 1649. SENSE OF CONGRESS ON NUCLEAR POSTURE OF
THE UNITED STATES.

It is the sense of Congress that—

(1) for more than 70 years, the nuclear deter-
rent of the United States has played a central role
in the national security of the United States and
international stability;

(2) the nuclear forces of the United States have
and will continue to play a fundamental role in de-
terring aggression against the interests of the
United States and the allies of the United States in
an increasingly dangerous world;

(3) strong, credible, and flexible nuclear forces
of the United States assure the allies of the United
States that the extended deterrence guarantees of
the United States are credible and that the resolve
of the United States remains strong even in the face of nuclear provocations, including nuclear coercion and blackmail;

(4) the 2017 National Security Strategy and the 2018 National Defense Strategy correctly assess that, due to increased global disorder and complexity, the decline of the international rules-based order and security environment, and the erosion of the competitive advantages of the United States, interstate strategic competition must now be the primary focus of the national security strategy of the United States;

(5) the 2018 Nuclear Posture Review aligns with these conclusions, and recognizes that deterrence is dynamic, not static, and that while the nuclear posture and policies of the United States are underpinned by enduring consistency, such posture and policies must also undergo measured adjustments to remain credible as threats evolve;

(6) the Russian Federation has elevated the role of nuclear weapons in its strategies, is developing and deploying new nuclear capabilities (including a recently announced nuclear-powered cruise missile and high-speed, nuclear-powered underwater drone), is violating many arms control agreements
(including the INF Treaty), and has made explicit nuclear threats against the United States and the allies of the United States;

(7) the United States remains committed to its full range of nuclear arms control and nonproliferation obligations and seeks continued engagement for prudent and verifiable agreements, however, the policies and actions of the United States must also hold states that violate arms control treaties accountable for such violations and take such violations into account when considering further arms control agreements;

(8) the North Atlantic Treaty Organization (NATO) plays an essential role in the national security of the United States and NATO should continue to strengthen and align its nuclear and conventional deterrence posture, planning, and exercises to align with modern threats, including modernizing its dual-capable aircraft, command and control networks, nuclear-related facilities, and conventional capabilities;

(9) to deter large-scale, catastrophic war with Russia, the People’s Republic of China, and other potential adversaries, as well as reassure allies, the United States requires reliable, diverse, and tailorable nuclear forces that are able to respond to
a variety of current threats while preparing for future uncertainty;

(10) the 2018 Nuclear Posture Review reconfirms the value of the nuclear triad and dual-capable aircraft of the United States, directs the continuation of the comprehensive nuclear modernization program initiated by the previous administration, and proposes two supplemental capabilities (a lower-yield submarine-launched ballistic missile warhead and a sea-launched cruise missile) that will strengthen deterrence and assurance and reduce the chances that nuclear weapons are used in conflict;

(11) three successive Secretaries of Defense across two administrations have stated that nuclear deterrence is the highest priority mission of the Department of Defense; and

(12) in light of this prioritization, the age of the current nuclear forces and infrastructure of the United States, and the small percentage of the defense budget that will be expended on the recapitalization of the nuclear deterrent of the United States, the modernization of the nuclear forces, command and control systems, and supporting infrastructure of the United States is affordable and a national imperative.
SEC. 1650. SENSE OF CONGRESS ON EXTENDED NUCLEAR DETERRENCE IN THE INDO-PACIFIC REGION.

It is the sense of Congress that—

(1) the nuclear program of the Democratic People’s Republic of Korea poses a critical national security threat not only to the United States, but to the security and stability of the entire Indo-Pacific region, including South Korea, Japan, and Australia;

(2) the nuclear and conventional forces of the United States continue to play a fundamental role in deterring aggression against its interests and the interests of its allies in the Indo-Pacific region and beyond;

(3) the United States stands unwaveringly behind its treaty obligations and assurances, including those related to defense and extended nuclear deterrence, to South Korea, Japan, and Australia;

(4) the complete, verifiable, and irreversible denuclearization of the Democratic People’s Republic of Korea remains a central foreign policy objective of the United States;

(5) the status of any denuclearization or end-of-conflict agreement with the Democratic People’s Republic of Korea should not supersede such treaty ob-
ligations and assurances described in paragraph (3);

and

(6) the presence of United States Forces on the
Korean Peninsula should remain strong and endur-
ing.

Subtitle E—Missile Defense

Programs

SEC. 1661. DEVELOPMENT OF PERSISTENT SPACE-BASED
SENSOR ARCHITECTURE.

(a) FINDINGS.—Congress finds the following:

(1) Absent a missile defense review, the budget
of the President submitted to Congress under sec-
tion 1105(a) of title 31, United States Code, for fis-
cal year 2019 did not propose funding for efforts
within the Missile Defense Agency to further develop
the Missile Defense Tracking System (a future space
sensor architecture) and instead funds were provided
to the Air Force to determine the plan of the De-
partment of Defense for future missile warning and
tracking capabilities.

(2) Delaying development and deployment of a
space-based missile tracking capability further places
the United States at a disadvantage against
hypersonic threats.
(b) Development Required.—Subsection (a) of section 1683 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115–91; 131 Stat. 1777) is amended by striking “If consistent with the direction or recommendations of the Ballistic Missile Defense Review that commenced in 2017, the Director of the Missile Defense Agency” and inserting “Beginning fiscal year 2019, the Director of the Missile Defense Agency, in coordination with the Director of National Intelligence, the Commander of the Air Force Space Command, and the Commander of the United States Strategic Command,”.

(c) Plan.—

(1) Limitation.—Of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2019 for the Department of Defense for the development of the space-based sensor architecture under subsection (a) of section 1683 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115–91; 131 Stat. 1777), not more than 25 percent may be obligated or expended until the date on which the Director of the Missile Defense Agency submits the plan under subsection (e) of such section.

(2) Clarification of Roles.—Section 1683(e) of the National Defense Authorization Act
for Fiscal Year 2018 (Public Law 115–91; 131 Stat. 1777) is amended by striking “the Director shall submit” and inserting “the Director of the Missile Defense Agency, in coordination with the Director of National Intelligence, the Commander of the Air Force Space Command, and the Commander of the United States Strategic Command shall submit”.

(d) REPORT ON USE OF OTHER AUTHORITIES.—Such section 1683 is further amended—

(1) by redesignating subsection (f) as subsection (g); and

(2) by inserting after subsection (e) the following new subsection (f):

“(f) REPORT ON USE OF OTHER AUTHORITIES.—Not later than January 31, 2019, the Director of the Missile Defense Agency shall submit to the appropriate congressional committees a report on the options available to the Director to use other transactional authorities pursuant to section 2371 of title 10, United States Code, to accelerate the development and deployment of the sensor architecture required by subsection (a).”.
