“(II) in clause (I), by substituting ‘seven-year’ for ‘five-year’.”.
SEC. 317. DEPARTMENT OF DEFENSE ENVIRONMENTAL
RESTORATION PROGRAMS.

(a) FINDINGS.—Congress makes the following find-
ings:

(1) The Department of Defense has identified
nearly 39,500 sites that fall under the installation
restoration program sites and munitions response
sites.

(2) The installation response program addresses
contamination from hazardous substances, pollut-
ants, or contaminants and active military installa-
tions, formerly used defense site properties, and base
realignment and closure locations in the United
States.

(3) Munitions response sites are known or sus-
pected to contain unexploded ordnance, discarded
military munitions, or munitions constitutes are ad-
dressed through the military munitions response
program.

(4) The installation restoration program sites
and munitions response sites have had significant
impacts on state and local governments that have
had to bear the increased costs of environmental
degradation, notably groundwater contamination,
and local populations that have had to live with the
consequences of contaminated drinking, including in-
creased health concerns and decreasing property val-
ues.

(5) Through the end of fiscal year 2017, the 
Department of Defense had achieved response com-
plete at 86 percent of installation restoration pro-
gram sites and munitions response sites, but 
projects that it will fall short of meeting its goal of 
90 percent by the end of fiscal year 2018.

(6) The fiscal year 2019 budget request for en-
vironmental restoration and base realignment and 
closure amounted to nearly $1,318,320,000, a de-
crease of $53,429,000 from the amount authorized 
in the National Defense Authorization Act for Fiscal 
Year 2018 (Public Law 115–91).

(b) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) the environmental restoration and base re-
alignment and closure programs are important for 
the protection of the environment, the health of the 
military and civilian personnel and their families 
who live and work on military installations, to en-
sure that current and legacy military operations do 
not adversely affect the health or environments of 
surrounding communities;
(2) the Department of Defense and the Armed Forces should seek to reduce the financial burden on state and local government who are bearing significant costs of cleanup stemming from defense related activities;

(3) the Department of Defense and the Armed Forces should expedite and streamline cleanup at locations where contamination is having a direct impact on civilian access to clean drinking water;

(4) the Department of Defense and the Armed Forces should continue to engage with and help allay local community concerns about the safety of the drinking water due to environmental degradation caused by defense related activities; and

(5) the Department of Defense should seek opportunities to accelerate environmental restoration efforts where feasible, to include programming additional resources for response actions, investing in technology solutions that may expedite response actions, improving contracting procedures, increasing contracting capacity, and seeking opportunities for partnerships and other cooperative approaches.
SEC. 318. JOINT STUDY ON THE IMPACT OF WIND FARMS ON WEATHER RADARS AND MILITARY OPERATIONS.

(a) IN GENERAL.—The Secretary of Defense shall enter into an arrangement with the National Oceanic and Atmospheric Administration to conduct a study on how to improve existing National Oceanic and Atmospheric Administration and National Weather Service tools to reflect the latest data and policies to improve consistency in weather radars, with a focus on a research and development and field test evaluation program to validate existing mitigation options and develop additional options for weather radar impact, in collaboration with the National Weather Service, the Department of Energy, and the Federal Aviation Administration, and with input from academia and industry.

(b) ELEMENTS.—The study required pursuant to subsection (a) shall include the following:

(1) The potential impacts of wind farms on NEXRAD radars and other Federal radars for weather forecasts and warnings used by the Department of Defense, the National Oceanic and Atmospheric Administration, and the National Weather Service.

(2) Recommendations to reduce, mitigate, or eliminate the potential impacts.
(3) Recommendations for addressing the impacts to NEXRADs and weather radar due to increasing turbine heights.

(4) Recommendations to ensure wind farms do not impact the ability of the National Oceanic and Atmospheric Administration and the National Weather Service to warn or forecast hazardous weather.

(5) The cumulative impacts of multiple wind farms near a single radar on the ability of the National Oceanic and Atmospheric Administration and the National Weather Service to warn or forecast hazardous weather.

(6) An analysis of whether certain wind turbine projects, based on project layout, turbine orientation, number of turbines, density of turbines, proximity to radar, or turbine height result in greater impacts to the missions of Department of Defense, the National Oceanic and Atmospheric Administration, and the National Weather Service, and if so, how can those projects be better cited to reduce or eliminate NEXRAD impacts.

(7) Case studies where the Department of Defense, the National Weather Service, and industry have worked together to implement solutions.
(8) Mitigation options, including software and hardware upgrades, which the National Oceanic and Atmospheric Administration and the National Weather Service have researched and analyzed, and the results of such research and analysis.

(a) REVIEWS REQUIRED.—For each of calendar years 2018 through 2021, the Comptroller General of the United States shall conduct an annual review of the readiness of the Armed Forces to conduct each of the following types of full spectrum operations:
(b) ELEMENTS OF REVIEW.—In conducting a review under subsection (a), the Comptroller General shall—

SEC. 334. SURFACE WARFARE TRAINING IMPROVEMENT.

(a) FINDINGS.—Congress makes the following find-
ings:

(1) In 2017, there were three collisions and one 
grounding involving United States Navy ships in the 
Western Pacific. The two most recent mishaps in-
volved separate incidents of a Japan-based United 
States Navy destroyer colliding with a commercial 
merchant vessel, resulting in the combined loss of 17 
sailors.

(2) The causal factors in these four mishaps 
are linked directly to a failure to take sufficient ac-
tion in accordance with the rules of good seaman-
ship.

(3) Because risks are high in the maritime envi-
ronment, there are widely accepted standards for 
safe seamanship and navigation. In the United 
States, the International Convention on Standards 
of Training, Certification and Watchkeeping (herein-
after in this section referred to as the “STCW”) for

Subtitle A—Committee on Foreign
Investment in the United States

SEC. 1701. SHORT TITLE: FOREIGN INVESTMENT RISK RE-
VIEW MODERNIZATION ACT OF 2018.

This subtitle may be cited as the “Foreign Investment Risk Review Modernization Act of 2018”.

SEC. 1702. FINDINGS; SENSE OF CONGRESS.

(a) FINDINGS.—Congress makes the following find-
ings:

(1) According to a February 2016 report by the
International Trade Administration of the Depart-
ment of Commerce, 12,000,000 United States work-
ers, equivalent to 8.5 percent of the labor force, have
jobs resulting from foreign investment, including
3,500,000 jobs in the manufacturing sector alone.

(2) In 2016, new foreign direct investment in
United States manufacturing totaled
$129,400,000,000.

(3) The Bureau of Economic Analysis of the
Department of Commerce concluded that, in 2015—

(A) foreign-owned affiliates in the United
States—
(i) contributed $894,500,000,000 in value added to the United States economy;
(ii) exported goods valued at $352,800,000,000, accounting for nearly a quarter of total exports of goods from the United States; and
(iii) undertook $56,700,000,000 in research and development; and

(B) the 7 countries investing the most in the United States, all of which are United States allies (the United Kingdom, Japan, Germany, France, Canada, Switzerland, and the Netherlands) accounted for 72.1 percent of the value added by foreign-owned affiliates in the United States and more than 80 percent of research and development expenditures by such entities.

(4) According to the Government Accountability Office, from 2011 to 2016, the number of transactions reviewed by the Committee on Foreign Investment in the United States (commonly referred to as “CFIUS”) grew by 55 percent, while the staff of the Committees assigned to the reviews increased by 11 percent.
(5) According to a February 2018 report of the Government Accountability Office on the Committee on Foreign Investment in the United States (GAO–18–249): “Officials from Treasury and other member agencies are aware of pressures on their CFIUS staff given the current workload and have expressed concerns about possible workload increases.”. The Government Accountability Office concluded: “Without attaining an understanding of the staffing levels needed to address the current and future CFIUS workload, particularly if legislative changes to CFIUS’s authorities further expand its workload, CFIUS may be limited in its ability to fulfill its objectives and address threats to the national security of the United States.”.

(6) On March 30, 1954, Dwight David Eisenhower—five-star general, Supreme Allied Commander, and 34th President of the United States—in his “Special Message to the Congress on Foreign Economic Policy”, counseled: “Great mutual advantages to buyer and seller, to producer and consumer, to investor and to the community where investment is made, accrue from high levels of trade and investment.”. President Eisenhower continued: “The internal strength of the American economy has evolved
from such a system of mutual advantage. In the
press of other problems and in the haste to meet
emergencies, this nation—and many other nations of
the free world—have all too often lost sight of this
central fact.”. President Eisenhower concluded: “If
we fail in our trade policy, we may fail in all. Our
domestic employment, our standard of living, our se-
curity, and the solidarity of the free world—all are
involved.”.

(b) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) foreign investment provides substantial eco-

nomic benefits to the United States, including the
promotion of economic growth, productivity, com-
petitiveness, and job creation, thereby enhancing na-
tional security;

(2) maintaining the commitment of the United
States to an open investment policy encourages
other countries to reciprocate and helps open new
foreign markets for United States businesses;

(3) it should continue to be the policy of the
United States to enthusiastically welcome and sup-
port foreign investment, consistent with the protec-
tion of national security;
(4) at the same time, the national security landscape has shifted in recent years, and so has the nature of the investments that pose the greatest potential risk to national security, which warrants an appropriate modernization of the processes and authorities of the Committee on Foreign Investment in the United States and of the United States export control system;

(5) the Committee on Foreign Investment in the United States plays a critical role in protecting the national security of the United States, and, therefore, it is essential that the member agencies of the Committee are adequately resourced and able to hire appropriately qualified individuals in a timely manner, and that those individuals’ security clearances are processed as a high priority;

(6) the President should conduct a more robust international outreach effort to urge and help allies and partners of the United States to establish processes that are similar to the Committee on Foreign Investment in the United States to screen foreign investments for national security risks and to facilitate coordination;
(7) the President should lead a collaborative effort with allies and partners of the United States to strengthen the multilateral export control regime;

(8) any penalties imposed by the United States Government with respect to an individual or entity pursuant to a determination that the individual or entity has violated sanctions imposed by the United States or the export control laws of the United States should not be reversed for reasons unrelated to the national security of the United States; and

(9) the Committee on Foreign Investment in the United States should continue to review transactions for the purpose of protecting national security and should not consider issues of national interest absent a national security nexus.

(e) SENSE OF CONGRESS ON CONSIDERATION OF COVERED TRANSACTIONS.—It is the sense of Congress that, when considering national security risks, the Committee on Foreign Investment in the United States may consider—

(1) whether a covered transaction involves a country of special concern that has a demonstrated or declared strategic goal of acquiring a type of critical technology or critical infrastructure that would
affect United States leadership in areas related to national security;

(2) the potential national security-related effects of the cumulative control of, or pattern of recent transactions involving, any one type of critical infrastructure, energy asset, critical material, or critical technology by a foreign government or foreign person;

(3) whether any foreign person engaging in a covered transaction with a United States business has a history of complying with United States laws and regulations;

(4) the control of United States industries and commercial activity by foreign persons as it affects the capability and capacity of the United States to meet the requirements of national security, including the availability of human resources, products, technology, materials, and other supplies and services, and in considering “the availability of human resources”, should construe that term to include potential losses of such availability resulting from reductions in the employment of United States persons whose knowledge or skills are critical to national security, including the continued production in the United States of items that are likely to be acquired
by the Department of Defense or other Federal de-
partments or agencies for the advancement of the
national security of the United States;

(5) the extent to which a covered transaction is
likely to expose, either directly or indirectly, person-
ally identifiable information, genetic information, or
other sensitive data of United States citizens to ac-
cess by a foreign government or foreign person that
may exploit that information in a manner that
threatens national security; and

(6) whether a covered transaction is likely to
have the effect of exacerbating or creating new cy-
bersecurity vulnerabilities in the United States or is
likely to result in a foreign government gaining a
significant new capability to engage in malicious
cyber-enabled activities against the United States,
including such activities designed to affect the out-
come of any election for Federal office.

PART I—AUTHORITY AND ADMINISTRATION OF CONTROLS

SEC. 1751. SHORT TITLE.

This part may be cited as the “Export Controls Act of 2018”.

SEC. 1752. STATEMENT OF POLICY.

The following is the policy of the United States:

(1) To use export controls only after full consider-
    ation of the impact on the economy of the
    United States and only to the extent necessary—
    
    (A) to restrict the export of items which
    would make a significant contribution to the
    military potential of any other country or combi-
    nation of countries which would prove detri-
    mental to the national security of the United
    States; and
    
    (B) to restrict the export of items if nec-
    essary to further significantly the foreign policy
    of the United States or to fulfill its declared
    international obligations.

(2) The national security and foreign policy of
    the United States require that the export, reexport,
    and in-country transfer of items, and specific activi-
    ties of United States persons, wherever located, be
    controlled for the following purposes:
    
    (A) To control the release of items for use
    in—
    
    (i) the proliferation of weapons of
    mass destruction or of conventional weap-
    ons;
(ii) the acquisition of destabilizing numbers or types of conventional weapons;

(iii) acts of terrorism;

(iv) military programs that could pose a threat to the security of the United States or its allies; or

(v) activities undertaken specifically to cause significant interference with or disruption of critical infrastructure.

(B) To preserve the qualitative military superiority of the United States.

(C) To strengthen the United States defense industrial base.

(D) To carry out the foreign policy of the United States, including the protection of human rights and the promotion of democracy.

(E) To carry out obligations and commitments under international agreements and arrangements, including multilateral export control regimes.

(F) To facilitate military interoperability between the United States and its North Atlantic Treaty Organization (NATO) and other close allies.
(G) To ensure national security controls are tailored to focus on those core technologies and other items that are capable of being used to pose a serious national security threat to the United States.

(3) The national security of the United States requires that the United States maintain its leadership in the science, technology, engineering, and manufacturing sectors, including foundational technology that is essential to innovation. Such leadership requires that United States persons are competitive in global markets. The impact of the implementation of this part on such leadership and competitiveness must be evaluated on an ongoing basis and applied in imposing controls under sections 1753 and 1754 to avoid negatively affecting such leadership.

(4) The national security and foreign policy of the United States require that the United States participate in multilateral organizations and agreements regarding export controls on items that are consistent with the policy of the United States, and take all the necessary steps to secure the adoption and consistent enforcement, by the governments of
such countries, of export controls on items that are consistent with such policy.

(5) Export controls should be coordinated with the multilateral export control regimes. Export controls that are multilateral are most effective, and should be tailored to focus on those core technologies and other items that are capable of being used to pose a serious national security threat to the United States and its allies.

(6) Export controls applied unilaterally to items widely available from foreign sources generally are less effective in preventing end-users from acquiring those items. Application of unilateral export controls should be limited for purposes of protecting specific United States national security and foreign policy interests.

(7) The effective administration of export controls requires a clear understanding both inside and outside the United States Government of which items are controlled and an efficient process should be created to regularly update the controls, such as by adding or removing such items.

(8) The export control system must ensure that it is transparent, predictable, and timely, has the flexibility to be adapted to address new threats in
the future, and allows seamless access to and sharing of export control information among all relevant United States national security and foreign policy agencies.

(9) Implementation and enforcement of United States export controls require robust capabilities in monitoring, intelligence, and investigation, appropriate penalties for violations, and the ability to swiftly interdict unapproved transfers.

(10) Export controls complement and are a critical element of the national security policies underlying the laws and regulations governing foreign direct investment in the United States, including controlling the transfer of critical technologies to certain foreign persons. Thus, the President, in coordination with the Secretary, the Secretary of Defense, the Secretary of State, the Secretary of Energy, and the heads of other Federal agencies, as appropriate, should have a regular and robust process to identify the emerging and other types of critical technologies of concern and regulate their release to foreign persons as warranted regardless of the nature of the underlying transaction. Such identification efforts should draw upon the resources and expertise of all relevant parts of the United States
Government, industry, and academia. These efforts should be in addition to traditional efforts to modernize and update the lists of controlled items under the multilateral export control regimes.

(11) The authority under this part may be exercised only in furtherance of all of the objectives set forth in paragraphs (1) through (10).

SEC. 1753. AUTHORITY OF THE PRESIDENT.

(a) AUTHORITY.—In order to carry out the policy set forth in paragraphs (1) through (10) of section 1752, the President shall control—

(c) APPLICATION OF CONTROLS.—The President shall impose controls over the export, reexport, or in-country transfer of items for purposes of the objectives described in subsections (b)(1) or (b)(2) without regard to the nature of the underlying transaction or any circumstances pertaining to the activity, including whether such export, reexport, or in-country transfer occurs pursuant to a purchase order or other contract requirement, voluntary decision, inter-company arrangement, marketing effort, or during a joint venture, joint development agreement, or similar collaborative agreement.

SEC. 1771. SHORT TITLE.

This part may be cited as the “Anti-Boycott Act of 2018”.

SEC. 1772. STATEMENT OF POLICY.

Congress declares it is the policy of the United States—

(1) to oppose restrictive trade practices or boycotts fostered or imposed by any foreign country against other countries friendly to the United States or against any United States person;

(2) to encourage and, in specified cases, require United States persons engaged in the export of goods or technology or other information to refuse to take actions, including furnishing information or entering into or implementing agreements, which have the effect of furthering or supporting the restrictive
trade practices or boycotts fostered or imposed by
any foreign country against a country friendly to the
United States or any United States person; and

(3) to foster international cooperation and the
development of international rules and institutions
to assure reasonable access to world supplies.

SEC. 1773. FOREIGN BOYCOTTS.

(a) PROHIBITIONS AND EXCEPTIONS.—

(1) PROHIBITIONS.—For the purpose of imple-
menting the policies set forth in section 1772, the
President shall issue regulations prohibiting any
United States person, with respect to that person’s
activities in the interstate or foreign commerce of
the United States, from taking or knowingly agree-
ing to take any of the following actions with intent
to comply with, further, or support any boycott fos-
tered or imposed by any foreign country, against a
country which is friendly to the United States and
which is not itself the object of any form of boycott
pursuant to United States law or regulation:

(A) Refusing, or requiring any other per-

with any national or resident of the boycotted
country, or with any other person, pursuant to
an agreement with, a requirement of, or a re-
quest from or on behalf of the boycotting coun-
try. The mere absence of a business relationship
with or in the boycotted country with any busi-
ness concern organized under the laws of the
boycotted country, with any national or resident
of the boycotted country, or with any other per-
son, does not indicate the existence of the in-
tent required to establish a violation of regula-
tions issued to carry out this subparagraph.

(B) Refusing, or requiring any other per-
son to refuse, to employ or otherwise discrimi-
nating against any United States person on the
basis of race, religion, sex, or national origin of
that person or of any owner, officer, director, or
employee of such person.

(C) Furnishing information with respect to
the race, religion, sex, or national origin of any
United States person or of any owner, officer,
director, or employee of such person.

(D) Furnishing information about whether
any person has, has had, or proposes to have
any business relationship (including a relation-
ship by way of sale, purchase, legal or commer-

Nothing in this subparagraph shall prohibit the furnishing of normal business information in a commercial context as defined by the Secretary.

(E) Furnishing information about whether any person is a member of, has made contributions to, or is otherwise associated with or involved in the activities of any charitable or fraternal organization which supports the boycotted country.

(F) Paying, honoring, confirming, or otherwise implementing a letter of credit which contains any condition or requirement compliance with which is prohibited by regulations issued pursuant to this paragraph, and no United States person shall, as a result of the application of this paragraph, be obligated to pay or
otherwise honor or implement such letter of credit.

(2) EXCEPTIONS.—Regulations issued pursuant to paragraph (1) shall provide exceptions for—

(A) complying or agreeing to comply with requirements—

(i) prohibiting the import of goods or services from the boycotted country or goods produced or services provided by any business concern organized under the laws of the boycotted country or by nationals or residents of the boycotted country; or

(ii) prohibiting the shipment of goods to the boycotting country on a carrier of the boycotted country, or by a route other than that prescribed by the boycotting country or the recipient of the shipment;

(B) complying or agreeing to comply with import and shipping document requirements with respect to the country of origin, the name of the carrier and route of shipment, the name of the supplier of the shipment or the name of the provider of other services, except that no information knowingly furnished or conveyed in response to such requirements may be stated in
negative, blacklisting, or similar exclusionary
terms, other than with respect to carriers or
route of shipment as may be permitted by such
regulations in order to comply with pre-
cautionary requirements protecting against war
risks and confiscation;

(C) complying or agreeing to comply in the
normal course of business with the unilateral
and specific selection by a boycotting country,
or national or resident thereof, of carriers, in-
surers, suppliers of services to be performed
within the boycotting country or specific goods
which, in the normal course of business, are
identifiable by source when imported into the
boycotting country;

(D) complying or agreeing to comply with
export requirements of the boycotting country
relating to shipments or transshipments of ex-
ports to the boycotted country, to any business
concern of or organized under the laws of the
boycotted country, or to any national or resi-
dent of the boycotted country;

(E) compliance by an individual or agree-
ment by an individual to comply with the immi-
gration or passport requirements of any country
with respect to such individual or any member of such individual’s family or with requests for information regarding requirements of employment of such individual within the boycotting country; and

(F) compliance by a United States person resident in a foreign country or agreement by such person to comply with the laws of that country with respect to his activities exclusively therein, and such regulations may contain exceptions for such resident complying with the laws or regulations of that foreign country governing imports into such country of trademarked, trade named, or similarly specifically identifiable products, or components of products for his own use, including the performance of contractual services within that country, as may be defined by such regulations.

(3) SPECIAL RULES.—Regulations issued pursuant to paragraphs (2)(C) and (2)(F) shall not provide exceptions from paragraphs (1)(B) and (1)(C).

(4) RULE OF CONSTRUCTION.—Nothing in this subsection may be construed to supersede or limit the operation of the antitrust or civil rights laws of the United States.
(5) APPLICATION.—This section shall apply to any transaction or activity undertaken, by or through a United States person or any other person, with intent to evade the provisions of this section as implemented by the regulations issued pursuant to this subsection, and such regulations shall expressly provide that the exceptions set forth in paragraph (2) shall not permit activities or agreements (expressed or implied by a course of conduct, including a pattern of responses) otherwise prohibited, which are not within the intent of such exceptions.

retary considers appropriate for carrying out the policies of that section. Such person shall also report to the Secretary whether such person intends to comply and whether such person has complied with such request. Any report filed pursuant to this paragraph shall be made available promptly for public inspection and copying, except that information regarding the quantity, description, and value of any goods or technology to which such report relates may be kept confidential if the Secretary determines that disclosure thereof would place the United States person involved at a competitive disadvantage. The Secretary shall periodically transmit summaries of the information contained in such reports to the Secretary of State for such action as the Secretary of State, in consultation with the Secretary, considers appropriate for carrying out the policies set forth in section 1772.

(c) PREEMPTION.—The provisions of this section and the regulations issued pursuant thereto shall preempt any law, rule, or regulation of any of the several States or the District of Columbia, or any of the territories or possessions of the United States, or of any governmental subdivision thereof, which law, rule, or regulation pertains to participation in, compliance with, implementation of, or the
furnishing of information regarding restrictive trade practices or boycotts fostered or imposed by foreign countries against other countries friendly to the United States.

SEC. 3142. SENSE OF CONGRESS REGARDING COMPENSATION OF INDIVIDUALS RELATING TO URANIUM MINING AND NUCLEAR TESTING.

(a) FINDINGS.—Congress makes the following findings:

(1) The Radiation Exposure Compensation Act (42 U.S.C. 2210 note) was enacted in 1990 to provide monetary compensation to individuals who contracted certain cancers and other serious diseases following their exposure to radiation released during atmospheric nuclear weapons testing during the Cold War or following exposure to radiation as a result of employment in the uranium industry during the Cold War.
The Energy Employees Occupational Illness Compensation Program Act of 2000 (42 U.S.C. 7384 et seq.) formally acknowledged the dangers to which some employees of sites of the Department of Energy and its vendors during the Cold War were exposed. That Act also acknowledged that, although establishing the link between occupational hazards and specific diseases can be difficult, scientific evidence exists to support the conclusion that some activities related to Cold War nuclear weapons production have resulted in increased risk of illness and death to workers. That Act established a formal process for the submission of claims for medical expenses and lump sum compensation for former employees and contractors and survivors of those former employees and contractors.

As of the date of the enactment of this Act, more than 150,231 claims have been paid out under the Radiation Exposure Compensation Act and the Energy Employees Occupational Illness Compensation Program Act of 2000, for a total of at least $17,400,000,000 in lump sum compensation and medical expenses.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the United States Government should appro-
priately compensate and recognize the employees, contractors, and other individuals described in subsection (a).
