

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG
ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS BILL, 2025

JUNE XX, 2024.—Committed to the Committee of the Whole House on the State of
the Union and ordered to be printed

Mr. HARRIS, from the Committee on Appropriations,
submitted the following

R E P O R T

[To accompany H.R. XXXX]

The Committee on Appropriations submits the following report in explanation of the accompanying bill making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies for fiscal year 2025.

Title I—Agricultural Programs	2
Title II—Farm Production and Conservation Programs	45
Title III—Rural Development Programs	56
Title IV—Domestic Food Programs	68
Title V—Foreign Assistance and Related Programs	74
Title VI—Related Agencies and Food and Drug Administration	76
Title VII—General Provisions	93

OVERVIEW

The Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Subcommittee has jurisdiction over the U.S. Department of Agriculture (USDA) except for the Forest Service, the Food and Drug Administration (FDA), the Commodity Futures Trading Commission (CFTC), and the Farm Credit Administration (FCA). The Subcommittee’s responsibility covers matters of importance to Americans every day of the year.

The fiscal year 2025 allocation is \$25,873,000,000 which is \$355,000,000 below the fiscal year 2024 enacted level and

\$2,688,497,000 below the President’s budget request for fiscal year 2025.

The funding levels provided in this appropriations bill continue to demonstrate how seriously this Committee takes its responsibility to fund the highest priority programs and activities while helping to address the nation’s debt, deficit, and economic challenges and rein in regulatory overreach at USDA, FDA, and CFTC.

The Committee does not include funding to begin new programs and, except where specifically noted, does not provide additional funding for pay increases.

In this report, “the Committees” refers to the Committees on Appropriations of the House of Representatives and the Senate.

The Subcommittee held five hearings related to the agencies it funds. Those hearings were:

- The FY 2025 Budget Request for the Department of Agriculture—March 21, 2024
- Member Day—April 11, 2024
- The FY 2025 Budget Request for the Food and Drug Administration—April 18, 2024
- The FY 2025 Budget Request for the Department of Agriculture’s Farm Production and Conservation Mission Area—May 1, 2024
- Oversight Hearing on Nutritious Foods in the Supplemental Nutrition Assistance Program—May 22, 2024

TITLE I

AGRICULTURAL PROGRAMS

PROCESSING, RESEARCH AND MARKETING

OFFICE OF THE SECRETARY

(INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	\$58,292,000
2025 budget estimate	103,025,000
Provided in the bill	40,457,000
Comparison:	
2024 appropriation	– 17,835,000
2025 budget estimate	– 62,568,000

The following table reflects the amount provided by the Committee for each office and activity:

[Dollars in thousands]

	FY 2024 enacted	FY 2025 estimate	Committee provision
Office of the Secretary	\$7,000	\$20,669	\$5,051
Office of Homeland Security	1,896	3,174	2,146
Office of Tribal Relations	5,190	6,613	5,190
Office of Partnerships and Public Engagement	7,500	9,339	4,711
Office of the Assistant Secretary for Administration	1,706	1,737	875
Departmental Administration	23,500	45,207	15,984
Office of the Assistant Secretary for Congressional Relations and Intergovernmental Affairs	4,500	4,709	3,000
Office of Communications	7,000	11,577	3,500
Total, Office of the Secretary	58,292	103,025	40,457

COMMITTEE PROVISIONS

For the Office of the Secretary, the Committee provides an appropriation of \$40,457,000.

Similar to prior years, the Committee does not include direct funding for activities that are currently funded through other resources, such as the Working Capital Fund, or that have historically been funded through other means.

Commodity Credit Corporation (CCC) Report.—The Committee directs the Secretary to provide a report on November 15, 2024, and May 15, 2025, on planned uses of funding under the authorities of Section 4 and Section 11 of the CCC Charter Act.

CCC Obligations and Commitments.—The Secretary is directed to notify the Committees in writing 15 days prior to any announcement on the use of funds from the CCC or the obligation or commitment of any emergency funds from the CCC.

Communication from USDA.—A collaborative working relationship between the Committee and USDA is necessary to ensure efficient and effective implementation of Congress' funding decisions. USDA is directed to ensure that the Committee is notified of major changes to existing policies and any significant developments in its operations before providing non-governmental stakeholders such information, before making the changes public, and before implementing them.

Communication Services for Limited English Proficient Communities.—The Committee is supportive of efforts the Department is taking to improve communications to reach limited English proficient (LEP) communities. The Committee encourages the Department to review the communication practices and create uniform applications across all Department agencies to strengthen communication practices to include digital, television and radio advertising when working with limited English proficient communities. The Committee further directs each agency funded by this Act with annual advertising budgets to include a report on expenditures related to local media advertising to include digital, television and radio no more than 60 days after the enactment of this Act.

Critical Inputs.—The Committee directs the Secretary to provide a report within 180 days of enactment on the dependency on the People's Republic of China on critical agricultural inputs such as animal feed, including vitamins, minerals, and amino acids, crop protection chemicals, and veterinary drugs and vaccines, and recommend legislative or regulatory actions to reduce barriers to on-shore production and mitigate potential supply chain disruptions that could be exploited by the People's Republic of China.

Customer Service.—The Committee continues to support the Department's efforts to improve customer service. The Committee directs the Secretary to develop standards to improve customer service, incorporate the standards into the performance plans required under 31 U.S.C. 1115, and submit a report on these efforts within 60 days of enactment of this Act.

Explanatory Notes.—The Committee appreciates the Department's work to restore the Explanatory Notes to the same format as they had been presented in prior to fiscal year 2021 and directs that this format be maintained for fiscal year 2026 and beyond.

Fruit Fly Quarantine Areas.—The Committee is aware of quarantines in California as a result of detections of Oriental fruit fly and Queensland fruit fly. The Committee recognizes the importance of Animal Plant and Health Inspection Service Plant Protection and Quarantine in safeguarding crops and forests against the entry, establishment, and spread of pests. However, with very few treatment options available for crops located within the California quarantine areas, farmers have faced devastating losses. The Committee urges APHIS to take the necessary steps to resolve the infestation so that the quarantine may be lifted. Further, the Department is directed through all agencies, including within Farm Production and Conservation, to evaluate available financial assistance for producers impacted by the quarantines and provide a report of its findings to the Committee within 120 days of enactment of this Act. Within the report, the Department is encouraged to provide recommendations of program changes that would make them more accessible and beneficial to producers negatively impacted by quarantines.

Improving Tribal Consultation.—The Committee continues to encourage the Office of Tribal Relations and the Office of Budget and Program Analysis (OBPA) to establish a regular tribal consultation process when formulating budget requests and multi-year program reauthorizations that have budgetary impacts.

Intermediate Crops.—The Committee is aware of a burgeoning industry of nonfood crops, such as camelina, that can be grown on existing farmland between primary crops to produce feedstock for renewable biofuels and chemicals. The Committee encourages USDA to consider opportunities to utilize existing programs and resources to support intermediate crop production in the United States. Further, the Committee encourages USDA to establish a standard definition for the term “intermediate crop” as an oilseed crop of renewable biomass, such as camelina, carinata, and domesticated pennycress, or any other crop as determined by the Secretary, that otherwise meets the definition of a cover crop and is planted and harvested on land that would otherwise be idle in a rotation pattern between main crops or in a fallow rotation and is primarily intended to provide feedstocks for the production of renewable biofuels and chemicals.

Liability Protections for Food Donation.—The Committee directs USDA to update the guidance documents related to liability protections provided through the Bill Emerson Act and the Food Donation Improvement Act to clarify how food companies can donate excess food.

Loan and Grant Programs.—The Committee directs that if an estimate of loan activity for any program funded in Titles II and III of this bill indicates that a limitation on authority to make commitments for a fiscal year will be reached before the end of that fiscal year, or in any event when 75 percent of the authority to make commitments has been utilized, the Secretary shall promptly notify the Committees through OBPA. The Committee directs the Department, through OBPA, to provide quarterly reports to the Committees on the status of obligations and funds availability for the loan and grant programs provided in this bill.

National Finance Center.—The National Finance Center (NFC) is the largest designated Federal Government Payroll Shared Service

Provider, and it provides integrated payroll and personnel services for over 640,000 Federal employees. To ensure that thousands of Federal employees' pay and human resources services are not interrupted or adversely impacted by major organizational changes, the Committee continues requirements under current law relating to NFC payroll and shared services operations, missions, personnel, and functions. The Committee also directs USDA to provide quarterly reports on full-time equivalent (FTE) levels for each of the current NFC divisions, operations, and functions, as well as each of the Office of the Chief Financial Officer (OCFO) and Office of the Chief Information Officer (OCIO) divisions, operations, and functions currently co-located with the NFC. The reports also are to include a detailed breakdown of the FTEs for each and any of these same divisions, functions, or operations for the NFC and the co-located OCFO and OCIO functions compared to those during FY 2017 and 2018.

Natural Capital Accounting.—The Committee notes that no funding is provided to implement Executive Order 14072 (87 Fed. Reg. 24851).

New Initiatives.—The Committee directs USDA, no later than 120 days after enactment, to submit an execution plan for each new initiative funded in this Act. This strategy should include, but is not limited to, the steps necessary to make funding available, the timeline thereof, targeted beneficiaries, and expected results. The Committee requests quarterly reports on these initiatives until the initiative has been fully implemented.

Notification Requirements.—The Committee reminds the Department that the Committee uses the definitions for transfer, reprogramming, and program, project, and activity as defined by the Government Accountability Office (GAO). As noted in the fiscal year 2024 Joint Explanatory Statement, a program, project, or activity (PPA) is an element within a budget account. PPAs are identified by reference to include the most specific level of budget items identified in the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Act, 2024, accompanying Committee reports, explanatory statements, and budget justifications. The Committee notes that the most specific level of budget items in USDA budget justifications is not limited to tables titled "Project Statement".

Persistent Poverty Areas.—The Committee supports targeted investments in impoverished areas. The Committee directs the Department to develop and implement measures to increase the share of investments in persistent poverty counties, distressed communities, and other impoverished areas. The Committee directs the Department to submit a report to the Committee that includes the total amount of Federal investments targeted toward such areas; a list of the programs under which the amount of Federal investments to such areas were increased in fiscal year 2025; the percent change in the amount of funds that were targeted to such areas from fiscal year 2024; and to the extent practicable, an assessment of the economic impact of departmental programs in these areas.

Spending Plans.—The bill continues a provision in Title VII that requires USDA to submit spending plans to the Committee within 30 days of enactment. Previous versions of these plans have not included adequate details that would be useful for Committee over-

sight. The Committee requests that USDA spending plans include for each program, project, or activity: (1) a comparison between the budget justification funding levels, the most recent Congressional directives or approved funding levels, and the funding levels proposed by the department or agency; and (2) a clear, concise, and informative description/justification. The Committee reminds USDA of notification requirements, also included in Title VII, for all applicable changes.

Status of House and Senate Report Language.—The Department is directed to include in its fiscal year 2026 Congressional Justification, as a single exhibit, a table listing all deliverables, with a column for due dates if applicable. OBPA is directed to provide updates on the status of House and Senate reports upon request from the Committees.

USDA BioPreferred Program.—The Committee recognizes the importance of work to expand biobased manufacturing. The Committee directs the Secretary to submit a report detailing the status of the USDA BioPreferred Program, including a list of biobased products that have been certified; a list of BioPreferred products that are currently included in the federal procurement catalogues; a list of BioPreferred products that are receiving support from USDA at any phase of development, including research, development, piloting, or the build out of manufacturing facilities; and any other matters the Secretary determines appropriate.

USDA Domestic and International Commodity Procurement Review.—The COVID–19 pandemic and resulting supply chain disruptions revealed fragilities in America’s food supply, to the detriment of farmers, producers, and consumers across America. The Committee directs Agricultural Marketing Service and Economic Research Service to review USDA’s application and enrollment procedures, required commodity quality, best and most available commodities for purchase regionally, and outreach practices to small and local farmers for all available domestic and international USDA procurement programs. This will help increase understanding of programs and purchasing to elevate fair participation of America’s small and local farmers. Within 180 days of enactment of this Act, AMS and ERS shall report back on their findings and efforts on improving small and local farmer procurement for relevant USDA programs.

USDA Farm Delivery Systems Modernization.—The Committee directs the Secretary within 60 days of enactment of this Act to provide an IT modernization plan that accelerates the continued implementation and expansion of the Farmers.gov system using the Enterprise Data Analytics Platform and Toolset (EDAPT) to enable USDA customers to: (1) view their information, complete transactions, quickly review the status, and update tabular customer information; (2) submit applications for Farm Production and Conservation (FPAC) programs and receive program payments for all USDA farm programs; (3) to complete their own applications, including electronic signatures and submissions, for all farm programs that require direct application; (4) enable electronic income reporting between USDA and the Internal Revenue Service; and (5) access and manage acreage reporting, farm records mapping, and farm records information within Farmers.gov. The agreement further directs the FPAC Business Center to provide a roadmap for

systems to make customer information available within Farmers.gov and EDAPT including, but not limited to, the Agriculture Risk Coverage and Price Loss Coverage programs, the Dairy Margin Coverage program, and the Farm Service Agency Emergency Relief Program.

USDA Office of Homeland Security.—The Committee provides \$225,000 for the Office of Homeland Security to fulfill its co-Sector Risk Management Agency (SRMA) responsibilities. As demonstrated by recent ransomware attacks, cybersecurity threats to the food and agriculture sector have far-reaching and highly disruptive effects. SRMA is responsible for coordinating efforts across the food and agriculture sector to address and mitigate these threats.

EXECUTIVE OPERATIONS

OFFICE OF THE CHIEF ECONOMIST

2024 appropriation	\$30,500,000
2025 budget estimate	31,504,000
Provided in the bill	31,025,000
Comparison:	
2024 appropriation	+525,000
2025 budget estimate	–479,000

COMMITTEE PROVISIONS

For the Office of the Chief Economist, the Committee provides an appropriation of \$31,025,000, including \$500,000 for the food loss coordinator position, and \$3,000,000 for the Office of Pest Management Policy.

Data Collection for Religiously Informed Diets.—The Committee appreciates the Department’s efforts to improve access to kosher and halal food for Americans with religiously informed diets. However, the Committee notes that gaps remain between the need and the products currently available. The Committee encourages the Office of the Chief Economist to track and report on the scope, scale, and location of the needs of Americans with religiously informed diets, to address the lack of data on the national level.

Policy Research.—The Committee provides \$10,225,000 for policy research under 7 U.S.C. 3155 for entities with existing institutional capacity to conduct complex economic and policy analysis and which have a lengthy and well-documented record of conducting policy analysis for the benefit of USDA, the Congressional Budget Office, or Congress. Of the amounts provided for policy research activities, \$3,000,000 is provided for the Department to focus on entities that have developed models, databases, and staff necessary to conduct in-depth analysis of the impacts of agriculture or rural development policy proposals on rural communities, farmers, agribusiness, taxpayers, and consumers, including an analysis of irrigation water supplies coming from Mexico to the U.S, per the 1944 Water Treaty, specifically Article 4, Section B, subparagraph (c). Of the amounts provided for policy research, \$1,500,000 shall be for the Department to focus efforts on entities that have information, analysis, research, and staff necessary to provide objective, scientific information to support and enhance efficient, accurate implementation of Federal drought preparedness and drought response programs, including interagency thresholds used to deter-

mine eligibility for mitigation or emergency assistance. The Committee also encourages the Department to fund regional and State-level baseline projections in addition to currently available national and international outlooks.

OFFICE OF HEARINGS AND APPEALS

2024 appropriation	\$16,703,000
2025 budget estimate	17,127,000
Provided in the bill	12,222,000
Comparison:	
2024 appropriation	-4,481,000
2025 budget estimate	-4,905,000

COMMITTEE PROVISIONS

For the Office of Hearings and Appeals, the Committee provides an appropriation of \$12,222,000.

OFFICE OF BUDGET AND PROGRAM ANALYSIS

2024 appropriation	\$14,967,000
2025 budget estimate	17,321,000
Provided in the bill	11,337,000
Comparison:	
2024 appropriation	-3,630,000
2025 budget estimate	-5,984,000

COMMITTEE PROVISIONS

For the Office of Budget and Program Analysis, the Committee provides an appropriation of \$11,337,000.

OFFICE OF THE CHIEF INFORMATION OFFICER

2024 appropriation	\$91,000,000
2025 budget estimate	95,871,000
Provided in the bill	66,814,000
Comparison:	
2024 appropriation	-24,186,000
2025 budget estimate	-29,057,000

COMMITTEE PROVISIONS

For the Office of the Chief Information Officer, the Committee provides an appropriation of \$66,814,000.

Service Delivery Modernization.—The Committee continues to support the Chief Information Officer's Service Delivery Modernization effort, which is being carried out pursuant to the CIO's strategic plan, consistent with the National Cybersecurity Strategy, Executive Order 14058, Executive Order 14028, the Federal Information Security Management Act, and the Federal Information Technology Acquisition Reform Act.

OFFICE OF THE CHIEF FINANCIAL OFFICER

2024 appropriation	\$6,867,000
2025 budget estimate	8,225,000
Provided in the bill	6,028,000
Comparison:	
2024 appropriation	-839,000
2025 budget estimate	-2,197,000

COMMITTEE PROVISIONS

For the Office of the Chief Financial Officer, the Committee provides an appropriation of \$6,028,000.

OFFICE OF THE ASSISTANT SECRETARY FOR CIVIL RIGHTS

2024 appropriation	\$1,466,000
2025 budget estimate	1,501,000
Provided in the bill	901,000
Comparison:	
2024 appropriation	- 565,000
2025 budget estimate	- 600,000

COMMITTEE PROVISIONS

For the Office of the Assistant Secretary for Civil Rights, the Committee provides an appropriation of \$901,000.

OFFICE OF CIVIL RIGHTS

2024 appropriation	\$37,000,000
2025 budget estimate	38,362,000
Provided in the bill	22,789,000
Comparison:	
2024 appropriation	- 14,211,000
2025 budget estimate	- 15,573,000

COMMITTEE PROVISIONS

For the Office of Civil Rights, the Committee provides an appropriation of \$22,789,000.

HAZARDOUS MATERIALS MANAGEMENT

2024 appropriation	\$3,000,000
2025 budget estimate	7,615,000
Provided in the bill	2,000,000
Comparison:	
2024 appropriation	- 1,000,000
2025 budget estimate	- 5,615,000

COMMITTEE PROVISIONS

For Hazardous Materials Management, the Committee provides an appropriation of \$2,000,000.

OFFICE OF SAFETY, SECURITY, AND PROTECTION

2024 appropriation	\$20,800,000
2025 budget estimate	21,952,000
Provided in the bill	5,000,000
Comparison:	
2024 appropriation	- 15,800,000
2025 budget estimate	- 16,952,000

COMMITTEE PROVISIONS

For the Office of Safety, Security, and Protection, the Committee provides an appropriation of \$5,000,000.

The Committee does not include direct funding for activities currently funded through other resources such as the Working Capital Fund or have historically been funded through other means.

OFFICE OF INSPECTOR GENERAL

2024 appropriation	\$111,561,000
2025 budget estimate	114,024,000
Provided in the bill	106,561,000
Comparison:	
2024 appropriation	- 5,000,000
2025 budget estimate	- 7,463,000

COMMITTEE PROVISIONS

For the Office of Inspector General (OIG), the Committee provides an appropriation of \$106,561,000.

Animal fighting.—The Committee is concerned about illegal animal fighting activity that subjects animals to cruel conditions and has the potential to spread illnesses such as virulent Newcastle disease and avian flu. OIG is encouraged to increase its efforts to combat this illegal activity and to investigate animal fighting as soon as there is any evidence of such illegal activity.

OFFICE OF THE GENERAL COUNSEL

2024 appropriation	\$60,537,000
2025 budget estimate	66,581,000
Provided in the bill	45,146,000
Comparison:	
2024 appropriation	- 15,391,000
2025 budget estimate	- 21,453,000

COMMITTEE PROVISIONS

For the Office of the General Counsel, the Committee provides an appropriation of \$45,146,000.

OFFICE OF ETHICS

2024 appropriation	\$4,500,000
2025 budget estimate	7,229,000
Provided in the bill	4,136,000
Comparison:	
2024 appropriation	- 364,000
2025 budget estimate	- 3,093,000

COMMITTEE PROVISIONS

For the Office of Ethics, the Committee provides an appropriation of \$4,136,000.

OFFICE OF THE UNDER SECRETARY FOR RESEARCH, EDUCATION, AND ECONOMICS

2024 appropriation	\$1,884,000
2025 budget estimate	4,221,000
Provided in the bill	1,800,000
Comparison:	
2024 appropriation	- 84,000
2025 budget estimate	- 2,421,000

COMMITTEE PROVISIONS

For the Office of the Under Secretary for Research, Education, and Economics, the Committee provides an appropriation of \$1,800,000.

1862, 1890, and 1994 Land-Grant Institutions.—The Committee directs USDA to make every effort to strengthen partnerships and

expand cooperation between 1862, 1890, and 1994 land-grant institutions, wherever regionally appropriate, to help close gaps in extension and leverage joint collaborative efforts.

1890 Capacity Building.—The Committee recognizes the importance of the 1890s in providing technical assistance and outreach to underserved farming populations and directs ARS and NIFA to collaborate with agencies in the Rural Development and Farm Production and Conservation Mission Areas to help increase awareness of USDA farm programs and rural development funding opportunities through 1890 extension programs.

Agriculture Advanced Research and Development Authority (AGARDA).—The Committee provides \$1,000,000 to continue implementing AGARDA. The Department is directed to report back to the Committee within 60 days of enactment of this act outlining how previous appropriated funds for AGARDA have been utilized.

Animal Microbiome.—The Committee recognizes that there are persistent gaps in research on the food animal microbiome. The Committee requests a report within 180 days of enactment on the current federal research efforts related to the food animal microbiome and the current gaps in animal microbiome research.

Artificial Intelligence in Precision Agriculture.—The Committee urges collaboration between USDA and the National Science Foundation to pursue advances in precision agriculture and food system security using artificial intelligence.

Controlled Environment Agriculture (CEA) Labor Shortages.—The Committee recognizes the labor challenges facing the agricultural industry in recent years, especially in the greenhouse and CEA industry. The Committee requests a report within 180 days of enactment on best practices for attracting and retaining greenhouse and CEA labor, as well as processes and systems to increase labor efficiency in this agricultural sector.

Food Prescriptions.—The Committee encourages USDA to work with local farmers, hospitals, and clinics to build or improve upon food prescription programs to better facilitate a patient's ability to attain a food prescription and fill it with a local farmer.

Foreign Research Funding.—The Committee is concerned about USDA funding for animal research in the People's Republic of China and the Russian Federation. The Committee directs USDA submit a report within 120 days of enactment that details all direct or indirect funding or other USDA support for research conducted in collaboration with the People's Republic of China and the Russian Federation over the last 5 years. This report should include the cost of each project, a list of collaborating institutions, an explanation of the research, and the level of oversight USDA provides over the foreign research.

Innovative Technologies.—The Committee directs USDA to submit a report on the needs and benefits of USDA providing public financing to support new or significantly improved food and agricultural technologies. This report should include a discussion of the projected long-term economic impacts that may arise from the use of these products.

Lifecycle Analysis of Soybean Based Biodiesel.—The Committee directs USDA to submit a report within 180 days of enactment on the lifecycle analysis of soybean biomass-based diesel, including biodiesel, renewable diesel, and sustainable aviation fuel utilizing

the most recent direct emissions estimates conducted by the Department of Energy’s Argonne National Lab’s Greenhouse Gases, Regulated Emissions, and Energy Use in Transportation (GREET) model. This report should include a compilation of current and potential soybean farming practices and an estimate of direct and indirect greenhouse gas emissions related to the production and consumption of soybean based biodiesel.

Reuse of Produced Water.—The Committee directs USDA to submit a report within 120 days of enactment on the potential beneficial reuses of produced water from upstream oil and gas operations in agriculture.

Sensor Technologies.—The Committee encourages ARS and NIFA to work cooperatively with land-grant universities, non-profit institutions, and consortia to conduct research on advanced sensor manufacturing techniques and to develop techniques for the manufacture of a variety of agricultural sensor products.

ECONOMIC RESEARCH SERVICE

2024 appropriation	\$90,612,000
2025 budget estimate	98,068,000
Provided in the bill	85,612,000
Comparison:	
2024 appropriation	– 5,000,000
2025 budget estimate	– 12,456,000

COMMITTEE PROVISIONS

For the Economic Research Service (ERS), the Committee provides an appropriation of \$85,612,000.

Agricultural Trade Imports.—The Committee awaits the report as directed in House Report 118–124.

Agroforestry Data.—The Committee encourages ERS, in coordination with the National Agroforestry Center and AMS, to conduct an analysis of the economic opportunities and challenges faced by widespread adoption of a variety of agroforestry practices. This analysis should evaluate challenges to widespread agroforestry adoption given the multiyear maturation period for agroforestry systems, including for land insecure and small farmers.

Biofuels Supply Chain.—The Committee directs ERS to prepare a 5-year and 10-year forecast study that evaluates the expected growth of biofuels, the feedstock necessary to produce those fuels, the forecasted demand for those feedstocks from other industries, and the estimated production of those feedstocks. The Committee directs ERS to provide this study within 1 year of enactment.

Supply Chain Resiliency.—The Committee is concerned about the rising cost of manufactured inputs to farms and the impact on farm profitability and the rest of the economy. The Committee encourages USDA to review the performance of industries and markets for manufactured inputs which have seen significant increases in prices and to assess options for improving input supply chain performance and resiliency in these domestic markets.

NATIONAL AGRICULTURAL STATISTICS SERVICE

2024 appropriation	\$187,513,000
2025 budget estimate	195,964,000
Provided in the bill	187,513,000
Comparison:	
2024 appropriation	---
2025 budget estimate	- 8,451,000

COMMITTEE PROVISIONS

For the National Agricultural Statistics Service (NASS), the Committee provides an appropriation of \$187,513,000, of which \$46,850,000 is for the Census of Agriculture.

Despite numerous bipartisan and bicameral Congressional efforts, NASS ignored congressional intent by refusing to reinstate the July Cattle Report, the Cotton Objective Yield Survey, and all County Estimates for Crops and Livestock for the 2024 production year. The Committee is deeply concerned by the lack of communication and transparency surrounding NASS' decision to cancel several critical market reports in fiscal year 2024. Therefore, the Committee includes bill language that limits NASS' flexibilities to only core mission activities. This language ensures that NASS has the necessary funding for fiscal year 2025 to reinstate all reports that NASS chose to cancel or discontinue in 2024. Further, bill language ensures that the Committees are notified of all major changes to existing activities before providing non-governmental stakeholders such information, before making the changes public, and before implementing them, including any plans to cancel or discontinue NASS surveys or reports.

The Committee expects NASS to continue its ongoing activities at the frequency levels assumed in fiscal year 2023, including barley acreage and production estimates; the Bee and Honey Program; the Chemical Use Data Series; the Floriculture Crops Report; and Fruit and Vegetable Reports, including in-season forecasts for non-citrus fruit and tree nut crops such as pecans. For fiscal year 2025 the Committee directs NASS to reinstate the July Cattle report, the Cotton Objective Yield Survey, and all County Estimates for Crops and Livestock.

Alfalfa Price Reporting.—The Committee encourages NASS to explore the possibility of reporting the “premium grade alfalfa price” in addition to the “all alfalfa hay price” currently being reported for all states. Additionally, the Committee encourages NASS to consider including the Southeast in its alfalfa crop production reporting.

Census of Agriculture Underreporting.—The Committee directs NASS to submit a report within 180 days of enactment on the potential underreporting of animals to the Census of Agriculture.

Farming With Trees Survey.—The Committee is encouraged by the important ongoing agroforestry analysis that NASS is conducting. NASS shall brief the Committee on the survey results and any conclusions on scope and shall indicate its plans to make that survey data widely available.

Fur Farms.—The Committee is concerned about the mounting evidence that fur farms are potential vectors for zoonotic diseases, including the SARS-CoV-2 virus and avian influenza, and the lack of directives from USDA to mitigate disease transmission to, from,

and within such farms. The Committee is also concerned that NASS is not making publicly available farm data that is vital to understand the potential risks that fur farms pose to public health and to inform policy decisions. The Committee urges NASS to make public the data collected in its annual mink survey.

Tenure, Ownership, and Transition of Agricultural Land (TOTAL) Survey.—The Committee notes that the next TOTAL survey is part of planned NASS activities in the next Census of Agriculture. The Committee expects the next TOTAL survey to provide comprehensive data on land ownership, tenure, landowners' transition plans, and lease agreements available to beginning and socially disadvantaged farmers to understand the trends that lead to secure land tenure and thriving farm businesses. The Committee encourages the survey to evaluate emerging trends in land acquisition connected to innovations in farming on small acreage. The Committee also encourages collaboration with ERS so that new data provided on the economics of the farm of the future can be better utilized.

Vineyard and Orchard Acreage Study.—The Committee encourages NASS to reinstate the 5-year Vineyard and Orchard Acreage Study and resume data collection and reporting so grape, wine, and juice producers can remain competitive and respond to challenges in the industry.

AGRICULTURAL RESEARCH SERVICE

SALARIES AND EXPENSES

2024 appropriation	\$1,788,063,000
2025 budget estimate	1,755,512,000
Provided in the bill	1,793,829,000
Comparison:	
2024 appropriation	+5,766,000
2025 budget estimate	+38,317,000

COMMITTEE PROVISIONS

For Salaries and Expenses of the Agricultural Research Service (ARS), the Committee provides an appropriation of \$1,793,829,000.

The Committee expects that extramural and intramural research will be funded at no less than the fiscal year 2024 levels, unless otherwise specified. The Committee rejects the research program terminations proposed in the fiscal year 2025 budget request.

1890s Partnerships.—The Committee recognizes the importance of 1890s land-grant Institutions and the collaborative relationships that have developed with ARS research facilities over the years. The Committee directs ARS to expand coordination of research efforts with 1890s, wherever ARS facilities and 1890s are in the same region, to the greatest extent possible. The Committee notes the longstanding partnerships that exist where 1862s and ARS facilities are in the same area. In addition, the Committee recommends ARS hold research workshops, establish cross-institutional faculty mentorships, and invest in leadership and capacity-building efforts for 1890s.

6p-phenylene-diamine (6PPD).—The Committee provides an increase of \$500,000 to develop, assess, and analyze potential 6PPD alternatives that do not pose an environmental risk or compromise vehicle safety and tire performance.

Aerial Application.—The Committee recognizes the importance of aerial application to control crop pests and diseases and to fertilize and seed crops and forests. Aerial application is useful not only to ensure overall food safety and food security, but also to promote public health through improved mosquito control and public health application techniques. The Committee urges ARS to prioritize research focused on optimizing aerial spray technologies for on-target deposition and drift mitigation and to work cooperatively with the Environmental Protection Agency to update their pesticide review methodology.

Aflatoxin Research.—The Committee recognizes the increasing economic and food safety threat that aflatoxin poses to corn and other affected agricultural crops and products. The Committee encourages ARS to expand research into methods of mitigating the risk of aflatoxin, particularly regarding responsive agriculture, human nutrition, and food safety. The Committee provides an increase of \$1,000,000 to support these efforts.

Agricultural Data Security.—The Committee recognizes the critical need for agricultural data security advancements alongside increased use of autonomous systems and new technologies. To prepare for these needs, the Committee provides no less than the fiscal year 2024 level for ARS to research these data security needs and solutions.

Alfalfa Research.—The Committee recommendation includes no less than the fiscal year 2024 level to support research focused on alfalfa improvement.

Alternative Protein Research.—The Committee supports research focused on alternative proteins, including the characteristics of animal meat using plants, animal cell cultivation, and fermentation. The Committee provides no less than the fiscal year 2024 level to support alternative protein research encompassing all stages of the production process, including optimizing ingredient processing techniques and developing new manufacturing methods. The Committee encourages ARS to collaborate with other relevant programs, including but not limited to NIFA and the National Science Foundation.

Animal Research.—The Committee directs ARS to ensure that each of its facilities housing animals is adhering to the Animal Welfare Act at all times and to submit quarterly reports that include both all violations found by APHIS during that quarter and the specific actions that will be taken to prevent their recurrence.

Artificial Intelligence Research.—The Committee provides no less than the fiscal year 2024 level for ARS to continue to conduct research that supports state of the art artificial intelligence tools for agricultural applications that improve productivity, sustainability, and precision agriculture for growers.

Avocado Lace Bug.—The Committee encourages ARS to coordinate research efforts with NIFA and APHIS to address the impact of the avocado lace bug and the Queensland longhorn beetle.

Axis Deer.—The Committee is concerned about the impact of axis deer and other ungulates on native forests and encourages ARS to coordinate with NIFA and APHIS to develop strategies to mitigate their impact on native forests.

Barley Pest Initiative.—The Committee recognizes that insects and viral, bacterial, and fungal diseases inflict substantial yield

and quality losses to the barley crop throughout the U.S., resulting in significant economic losses to growers and end-users. The Committee provides an increase of \$250,000 to support research through the Barley Pest Initiative to address these major threats to sustainable and profitable barley production and utilization.

Binational Agricultural Research and Development (BARD).—The Committee provides an increase of \$500,000 to support BARD's historical grant-making functions and to expand programming for food and nutrition, technology acceleration, and artificial intelligence.

Biochar Research.—The Committee is aware that biochar provides recalcitrant carbon to soils that can improve carbon sequestration and crop yields. The Committee provides an increase of \$250,000 to support research to advance the understanding of the impact of diverse types of biochar in varying soils and circumstances on soil health, productivity, and carbon sequestration in order to help inform farmers and ranchers which types of biochar have the most positive impacts in their soils.

Broiler Breeder Reproduction and Hatchery Management.—The Committee provides an increase of \$500,000 for research focused on improving the reproductive capabilities of broiler parent physiology and hatchery management.

Carpophilus Truncates Beetle.—The Committee encourages ARS to collaborate with state agricultural universities and industry stakeholders to focus on developing and enhancing pest detection, surveillance, identification, and threat mitigation strategies related to the carpophilus truncates beetle, along with implementing necessary safeguards for the domestic tree nut industry.

Carrot Research Initiative.—The Committee recognizes that nitrogen is essential to the production of carrots. ARS is encouraged to research nitrogen usage in carrots to determine possible alternatives.

Catfish Aquaculture.—The Committee provides an increase of \$500,000 to support improved efficiency in catfish aquaculture, including catfish reproduction sciences and hatchery technology to increase catfish farming production rates.

Child Nutrition Research.—The Committee includes an increase of \$500,000 to expand research regarding the growth, health promotion, microbiome, disease prevention, diet, and immune function of the developing child, especially the rural child.

Citrus Breeding Research.—The Committee includes an increase of \$1,000,000 for citrus breeding research to develop and evaluate high-quality, superior citrus selections for use in the citrus production regions and scion where citrus is commercially grown for the fresh fruit market.

Citrus Greening Disease Research.—The Committee commends ARS' research efforts on citrus greening disease and encourages the agency to continue working to develop methods to reduce transmission and enhance immunity in citrus trees and to work with industry, universities, growers, and other partners to develop effective control mechanisms. The Committee also encourages ARS to coordinate its efforts with the Huanglongbing Multi-Agency Coordination (HLB MAC) group.

Coffee Leaf Rust.—The Committee provides no less than the fiscal year 2024 level to support coffee plant health research.

Controlled Environment Agriculture Energy Costs.—The Committee encourages ARS to conduct joint research in collaboration with the Department of Energy on controlled environment agriculture to optimize resource use, especially energy use, while maintaining food safety and quality, and to develop technologies to advance agricultural communities and domestic manufacturing.

Cranberry Research.—The Committee provides no less than the fiscal year 2024 level for the improvement of cranberry yields, pest and disease management, and water resource management.

Energy-Water Nexus.—The Committee recognizes the importance of the Energy-Water Nexus, and, as part of that effort, encourages USDA to work with the Department of Energy to further research collaborations to improve water and soil quality in and around impaired water resources through advanced environmental imaging and agricultural waste management technologies.

Floriculture and Nursery Research Initiative (FNRI).—The Committee provides an increase of \$500,000 to support the goals of the FNRI to secure a more efficient and productive floriculture and nursery industry. The Committee encourages ARS to work collaboratively with NIFA on research that includes breeding programs to increase tolerance from insect pests, diseases, and other environmental impacts; testing of new organic and non-organic pesticides; implementing integrated pest management and biological control programs; and innovations in unmanned aerial systems.

Forest Products Research.—The Committee supports research on wood quality improvement and improvement in forest products evaluation standards and valuation techniques.

Fortifying Biological Defenses.—The Committee continues to support pivotal research to advance veterinary biologics for African swine fever and classical swine fever. Within the available funds for NBAF, the Committee encourages ARS to engage critical and emerging new technologies in veterinary biologics to enhance animal production and protection to ensure a secure and efficient food supply.

Fumigant Alternatives Research.—The Committee supports ARS collaborating with NIFA and industry stakeholders to develop innovative soilborne pest control and eradication commercial-scale tools to replace fumigants and provides no less than the fiscal year 2024 level to support these activities.

Genetic Oat Research.—The Committee recognizes the potential of genetic oat research to improve disease resistance, especially rusts and viruses, advance genetics, increase yields, and develop crop rotation systems that include oats, which will enhance the value of oats and provide benefits to producers and consumers. The Committee provides an increase of \$750,000 for ARS to expand existing research focused on oat improvement.

Germplasm Enhancement of Maize.—The Committee provides an increase of \$250,000 to support germplasm enhancement of maize projects and encourages continued cooperation between existing ARS maize germplasm programs, industry, and large-scale public sector efforts to investigate the interaction of maize genome variation and environments.

Grape Genomics.—The Committee understands the importance of the National Grape Improvement Center and that, when complete, it will be the world's leading facility for grape genomics and gene

expression research. The Committee encourages ARS to continue to recruit and hire the necessary scientists.

Herbicide Resistance Initiative.—The Committee continues to support the Herbicide Resistance Initiative for the Pacific Northwest and provides an increase of \$500,000 for ARS to continue to identify and overcome herbicide resistance associated with the crop production pathway.

High-Resolution Data Analysis.—The Committee recognizes the tremendous value that daily high-resolution thermal data provides to our national agriculture producers. The Committee notes that cutting-edge commercially available solutions can improve resolution and accuracy needed for precision agriculture, crop yield forecasting, and irrigation solutions. The Committee provides an increase of \$500,000 for ARS to use commercially available daily high-resolution thermal data analysis solutions to supplement its research.

Hops Research.—The Committee recognizes that the U.S. hops industry has experienced unprecedented expansion due to the brewing industry's economic growth over the past decade. To sustain this growth, new varieties of hops are needed to prevent disease and expand production throughout the country. The Committee directs ARS to continue to focus on these efforts to advance new disease-resistant public hop varieties and provides no less than the fiscal year 2024 level for this purpose.

Human Nutrition Research.—The Committee notes that maintenance of health throughout the lifespan, along with prevention of obesity and chronic diseases via food-based recommendations, are the major emphases of human nutrition research. The Committee recognizes the vital role that research at the intersection of human nutrition and aging plays in our understanding of public health and encourages ARS to expand research regarding life stage nutrition and metabolism. The Committee provides no less than the fiscal year 2024 funding level for existing human nutrition centers.

Innovative Greenhouse Research.—The Committee provides an increase of \$750,000 for ARS engineering research units and academic institutions working on greenhouse production research.

Little Cherry Disease.—The Committee provides no less than the fiscal year 2024 level to support research on little cherry disease.

Livestock Applied Reproduction and Genomics.—The Committee is aware of the potential livestock genomics holds for addressing livestock diseases, welfare, and production. The Committee provides an increase of \$250,000 to maintain partnerships in livestock genomics.

Livestock Protection.—The Committee recognizes the challenges caused by infectious disease problems arising from wildlife-domestic animal agriculture interactions, particularly between domestic sheep and wild bighorn sheep. The Committee encourages ARS to pursue research to determine the role of domestic sheep in causing die-offs of bighorn sheep from respiratory disease and to develop methods to reduce transmission and enhance immunity in domestic and bighorn sheep.

Long-Term Agroecosystem Research (LTAR) Network.—The Committee provides an increase of \$500,000 to improve agricultural sustainability, develop technology and solutions that increase efficient use of soil and water resources, and enhance forage and crop

production through the LTAR network. The Committee strongly encourages ARS to include more geographic and crop diversification in the selection of additional LTAR sites.

Macadamia Tree Health Initiative.—The Committee provides no less than the fiscal year 2024 level to support implementation of the Macadamia Tree Health Initiative.

Mycotoxin Research.—The Committee recognizes the increasing economic and food safety threat that mycotoxins pose to corn and other affected agricultural crops and products. The Committee encourages ARS to expand research into methods of mitigating the risk of mycotoxins and provides an increase of \$250,000 for this purpose.

National Agricultural Library (NAL).—The Committee encourages ARS to maintain a focus on agriculture-related legal issues within NAL. The Committee notes that as the agriculture sector faces financial stress, agriculture-related legal issues need to be addressed on an increasingly frequent basis. Further, agriculture-related legal issues are complex. The Committee provides an increase of \$1,000,000 and recommends that NAL continue to play an important role in assisting all stakeholders with understanding these agriculture-related legal issues. Further, the Committee encourages ARS and NAL to engage in multi-year cooperative agreements to enhance NAL's ongoing work.

National Arboretum Public Access.—The Committee is aware of ongoing efforts to develop a new strategic plan for the National Arboretum to carry out its missions of research, education, and public display gardens. The Committee expects that such plan will address necessary security and safety enhancements and improve public access to the National Arboretum. In addition, the Committee directs ARS to explore entering into agreements with the District of Columbia and private sector partners to fulfill these public access improvements.

National Bonsai and Penjing Museum Maintenance.—The Committee directs ARS to submit a report to the Committee on the maintenance needs of the National Bonsai and Penjing Museum and the costs to address these needs.

Navel Orangeworm (NOW).—The Committee encourages ARS to collaborate with APHIS and industry stakeholders on the APHIS NOW sterile moth pilot program to help reduce NOW moth populations.

Organic Agriculture Research.—The Committee provides an increase of \$500,000 for organic agriculture research in the Northern Drylands regions and encourages ARS to consider breed and cultivar development, food safety, and the economic and ecological impacts of the organic production system when conducting this research.

Peanut Nutrition Research.—The Committee recognizes the need for more research to identify how peanut consumption contributes to overall health and wellness and reduces chronic disease risk in various groups and across the lifespan. The Committee provides an increase of \$500,000 to support peanut nutrition research. Research topics should include chronic diseases, nutrition and wellness across the lifespan, health disparities, dietary patterns for optimal health, and nutrition for the future.

Peanut Research.—The Committee provides no less than the fiscal year 2024 level to support research activities to mitigate aflatoxin contamination in peanuts. The Committee directs ARS to enhance ongoing collaborations with land-grant institutions to further advance research efforts.

Pecan Genetic Research.—The Committee provides an increase of \$500,000 to support research into sufficient cold hardiness in pecans grown in northern regions.

Pecan Processing Research.—The Committee recognizes the need for new pecan processing technologies, in particular pasteurization and cracking/shelling technologies, and the importance of pasteurization processes for food safety and in continuing export growth. The Committee provides an increase of \$250,000 to support pecan processing research activities to address these issues.

Pest Management Efforts.—The Committee recognizes the value of ARS in supporting the greenhouse industry with research on pest management and plant nutrients, as well as the importance of reducing energy costs for greenhouse and controlled environment agriculture. The Committee directs ARS to continue work on pest management and plant nutrients and to develop plans for controlled environment demonstration projects aligned with existing ARS technical units focused on greenhouse agriculture to provide data on savings and productivity resulting from these projects.

PFAS Research.—Though there is some evidence regarding which crops may be more or less prone to take up PFAS from soil, there are still significant knowledge gaps related to PFAS and its impacts on agriculture. The Committee supports further investment in research investigating PFAS movement in soils and water, plant uptake, remediation options, and livestock feed amendments and directs USDA to provide a report within 180 days of enactment identifying knowledge gaps in this space.

Pickled Vegetable Research.—The Committee supports ARS research regarding pickled vegetables.

Pollinator Research.—The Committee encourages ARS to prioritize funding for pollinator research in areas pertaining to the breeding of honeybees with the goal of improving their resilience and resistance to pests, pathogens, and toxins to help mitigate the effects of disease and environmental changes that are causing significant colony losses at the local, national, and global scale.

Potato Research.—The Committee encourages ARS to continue to support research in potato breeding in the U.S. This research allows for the rapid identification of new desirable traits in potatoes and promotes varietal development. The Committee provides no less than the fiscal year 2024 level to support these efforts.

Pulse Crop Health Initiative.—The Committee supports the expansion of pulse crop research and provides an increase of \$500,000 for research into the health and nutritional benefits of dry peas, lentils, chickpeas, and dry beans.

Precision Aquaculture.—The Committee provides no less than the fiscal year 2024 level to continue developing solutions for resilient inland aquaculture in conjunction with a land-grant university with established expertise in trout aquaculture, nutrient management, and selective breeding.

Precision Management of Live Broiler Production.—The Committee provides an increase of \$1,000,000 to support ARS research

focused on novel broiler chicken live production approaches and methods that drive transformational innovation in intelligent systems, automation, robotics, data science, and artificial technologies that could enable greater efficiencies, better resilience, and viable poultry enterprises at various scales of production.

Recirculating Aquaculture Systems.—The Committee remains concerned with the significant trade deficit in consumed seafood and aquaculture products and provides no less than the fiscal year 2024 level to support research into recirculating aquaculture systems, an emerging land-based technology to expand production and add resilience to domestic finfish aquaculture.

Regenerative and Precision Agriculture for Orchards.—The Committee directs ARS to compile currently available research data on the effect of regenerative and precision agriculture on conserving water, sequestering carbon, increasing soil health, and minimizing or eliminating chemistries within the context of applicability to fruit and nut orchards and to identify data gaps on the application of these research goals to fruit and nut orchards.

Resilient Barley Initiative.—The Committee recognizes the need to build resiliency within the barley production system in order to maintain a sustainable and high-quality supply for its many value-added end uses. The Committee encourages ARS to coordinate research efforts focused on strengthening barley's resilience to environmental stressors through improved genetics and management.

Shellfish Breeding Research.—The Committee is aware of the significant vulnerabilities associated with rapidly changing aquatic conditions for cultured shellfish farms. The Committee provides \$500,000 for ARS to support breeding programs to develop resilient shellfish stocks.

Small Fruits Research.—The Committee provides no less than the fiscal year 2024 level to support the ability to forecast pest and disease spread, implement precision management strategies, mitigate invasive insects, and to improve the overall quality of fruit.

Small Grain Genomics.—The Committee supports research on barley and wheat high-throughput genomics and phenotyping and recognizes its importance in improving crop traits and developing new cultivars.

Sorghum.—The Committee acknowledges the increased need for producing drought-tolerant crops, like sorghum, particularly where water is limited and rainfall is unpredictable. The Committee provides an increase of \$500,000 to support the necessary research to complete key lifecycle quantification models that capture the dynamics of semi-arid crop systems.

Southern Regional Research Center (SRRC).—The Committee provides no less than the fiscal year 2024 level for the SRRC crop adaptive resilience food program to conduct collaborative research with research universities by exploring the value-added enhancement of State-grown crops, to define the role for novel approaches in crop biological signaling and modification to yield adaptive and resilient crop varieties and interventions.

Specialty Crop Mechanization.—The Committee recognizes the economic importance of the fresh produce sector and notes that harvesting these crops is labor intensive. Accordingly, the Committee encourages ARS to increase focus and funding on projects designed to improve harvest efficiencies of specialty crops and pro-

vides an increase of \$500,000 for this purpose. The Committee notes that this should include projects that pursue mechanical or automated technologies and systems.

Spittle Bug.—The recent introduction of invasive insect species such as *Prosapia bicincta* has substantially impacted tropical grazing lands. The Committee encourages ARS to coordinate research efforts with NIFA and APHIS to address the impact of the spittle bug.

Stone Wool.—The Committee recognizes the numerous potential benefits that can result from incorporating stone wool as a growing medium in the indoor cultivation of plants and supports ARS' work related to the use of stone wool.

Strawberry Production Research.—The Committee recognizes that the highly perishable, delicate, and labor-intensive nature of strawberry production makes this crop an ideal test bed for innovative automation technologies. The Committee provides no less than the fiscal year 2024 level to research innovative automation technologies to enhance strawberry production.

Sugarcane Research.—The Committee provides an increase of \$250,000 for the sugarcane breeding program to support genomic and bioinformatic development, computational biology, and the apurtenant collection and evaluation of plant material as part of a new genomic selection strategy.

Sunflower Research.—The Committee supports efforts within ARS to encourage the study of sunflower breeding to generate knowledge and plant genetics that will assist in the development of sunflower hybrids adapted for various growing regions.

Sustainable Aquaculture.—The Committee provides no less than the fiscal year 2024 level for research on sustainable marine aquaculture for coldwater and warmwater production coastal environment, with special emphasis on workforce education.

Sweet Potato Research.—The Committee provides an increase of \$250,000 to support the continuation and enhancement of sweet potato varieties with high nutrient content and that produce desirable fresh and processed sweet potato products. The Committee encourages ARS to support food science and product development research that would enhance the consumption and marketability of the U.S. sweet potato domestically and globally.

Table Grape Breeding Research.—The Committee recognizes the strategic value of ARS' future-oriented initiatives focused on the economic sustainability and global competitiveness of table grapes and is supportive of these efforts.

Tropical and Subtropical Research.—The Committee encourages ARS to continue research on Tropical and Subtropical crops. The Committee notes that this research is critical, as the presence of and destruction by invasive pests such as fruit flies, coffee berry borer, felted macadamia nut coccid, and plant viruses and funguses increase, threatening crop security in Florida, the Pacific, and insular areas.

U.S. Sheep Experiment Station (USSES).—The Committee provides an increase of \$500,000 to enhance the viability and multi-species health resulting from wildlife and domestic sheep interaction on shared landscapes. The Committee continues to encourage ARS to engage directly with stakeholders and State and Federal agencies with biological expertise to expand research programs

and urges ARS to continue engaging collaborators to ensure the station functions as an agricultural research facility while also evaluating opportunities through a domestic livestock/wildlife collaboration.

U.S. Wheat and Barley Scab (USWBS).—The Committee continues to recognize the importance of the research carried out through the USWBS Initiative. Fusarium head blight is a major threat to agriculture, inflicting substantial yield and quality losses throughout the U.S.

Wheat Resilience.—The Committee provides an increase of \$500,000 for the Wheat Resiliency Initiative which supports additional research into Wheat Stem Sawfly and Hessian Fly.

Whitefly.—The Committee recognizes that whiteflies (*Bemisia tabaci*) are an emerging pest resulting from both developing resistance to many pesticides, making chemical control difficult, and weather variability resulting in warmer winters and lower seasonal die-off. The Committee remains concerned with the whitefly epidemic, which is severely impacting vegetable and cotton production in the southeastern U.S. The Committee provides an increase of \$500,000.

Wildfire Smoke Taint Research on Winegrapes.—The Committee supports research to identify the compounds responsible for smoke taint, establish a reliable database of background levels of smoke taint compounds occurring naturally in wine grapes, develop mitigation methods to reduce or eliminate smoke taint, and study compounds that can act as a barrier between the grapes and smoke compounds. In addition, the Committee supports research to establish standard methodologies for sampling and testing of smoke exposed grapes and smoke affected wines. The Committee provides an increase of \$1,000,000 to support these research efforts.

Woody Biomass.—The Committee recognizes the potential for biobased thermoplastics made from woody biomass as more recyclable packaging material and encourages dedicated research and technology deployment.

BUILDINGS AND FACILITIES

2024 appropriation	\$57,164,000
2025 budget estimate	28,405,000
Provided in the bill	26,900,000
Comparison:	
2024 appropriation	– 30,264,000
2025 budget estimate	– 1,505,000

COMMITTEE PROVISIONS

For Agricultural Research Service Buildings and Facilities, the Committee provides an appropriation of \$26,900,000.

The Committee requests that ARS provide a report on progress in addressing the backlog of outstanding ARS infrastructure projects as well as future plans to address these challenges.

Beltville Agricultural Research Center (BARC).—The Committee requests that ARS provide a report on the use of funds for the improvement of facilities at BARC. The report should include details on the progress made to repair and improve BARC infrastructure, including buildings and structures, steam pipes and other internal systems, roads and access points, and other facility improvements.

NATIONAL INSTITUTE OF FOOD AND AGRICULTURE
RESEARCH AND EDUCATION ACTIVITIES

2024 appropriation	\$1,075,950,000
2025 budget estimate	1,106,070,000
Provided in the bill	1,071,900,000
Comparison:	
2024 appropriation	- 4,050,000
2025 budget estimate	- 34,170,000

COMMITTEE PROVISIONS

For National Institute of Food and Agriculture (NIFA) Research and Education Activities, the Committee provides an appropriation of \$1,071,900,000.

Agricultural Research Enhancement Awards.—The Committee continues to direct that not less than 15 percent of competitive research grant funds be used for USDA’s agriculture research enhancement awards program, including USDA—EPSCoR, in accordance with 7 U.S.C. 3157.

Agriculture and Food Research Initiative (AFRI).—The Committee rejects the proposed changes to the distribution of funds within AFRI program priority areas outlined in the President’s budget request. Within the funds provided for AFRI, the Committee directs NIFA to prioritize funding for projects addressing plant and animal health, emerging pest and disease issues, food safety, plant and animal breeding, improved productivity, precision agriculture, biosecurity, and workforce development.

In addition, the Committee notes that projects which focus on researching enhanced rock weathering and biochar, assess any environmental or health risks, and identify ways to minimize the environmental impact of silicate rock mining, grinding, and transport are also eligible for AFRI awards.

AI—Empowered Specialty Crop Resilience.—The Committee supports research on early detection and solution management tools to prevent threats to specialty crops from pests, diseases, and extreme weather events. The Committee encourages NIFA to prioritize the development of innovative, high-throughput screening and advanced sensing technologies powered by artificial intelligence and machine learning designed to protect crop quality and deliver increased yields. The Committee urges NIFA to provide funding to support research on early problem detection and resilience solutions for specialty crops.

Alfalfa Research.—The Committee notes that research into alfalfa seed and alfalfa forage systems holds the potential to increase alfalfa and forage yields, increase milk production, and improve genetics. The Committee recommendation includes funding to support research into the improvement of yields, water conservation, creation of new uses, and other research areas holding the potential to advance the alfalfa seed and alfalfa forage industry.

Artificial Intelligence Research Institutes.—The Committee supports the collaboration between USDA and the National Science Foundation to pursue advances in precision agriculture and food system security. The ability to meet the critical needs of the future agricultural workforce and provide tools for agriculture and food security are within the mission of the agency in providing opportunity through innovation. The Committee encourages NIFA to

continue supporting the work of the Artificial Intelligence Research Institutes funded through USDA.

Blockchain Technology.—The Committee is interested in how blockchain technology can be utilized to accurately trace food and mitigate the risks associated with food contaminated outbreaks and to develop effective strategies for controls. The Committee urges NIFA to coordinate research to reduce the risks of foodborne illness through the application of blockchain technology. The Committee commends the work that has already been completed by FDA in this field and encourages the coordination between NIFA and the FDA.

Citrus Disease Research Program.—The Emergency Citrus Disease Research and Extension Program is intended to discover and develop tools for early detection, control, and eradication of diseases and pests that threaten domestic citrus production and processing. The program receives \$25,000,000 per year in mandatory funding through the Specialty Crop Research Initiative. The Committee believes that research projects funded under this authority should be prioritized based on the critical threat of citrus greening and encourages NIFA, to the maximum extent practicable, to follow the recommendations of the National Agricultural Research, Extension, and Education Advisory Board's citrus disease subcommittee and to collaborate with the HLB MAC group. A report shall be submitted to the Committee on these efforts within 60 days of enactment.

Coffee Agriculture.—The Committee recognizes the importance of public research in securing the future of coffee and supports NIFA's work to support coffee production.

Dairy Science Research and Education.—The Committee is concerned about the effects of heat stress on dairy cattle in the major milk production States in the southeastern U.S. The Committee encourages NIFA to support cooperative work with land-grant universities in the southeast through the creation of a regional dairy research center designed to support research on innovative solutions to heat stress and to create a virtual learning platform for curriculum and synchronous classes that could serve as a national platform for sharing curriculum and training in remote areas.

Data Science in Cooperative Extension.—The Committee recognizes that advances in data science, computational power, and access to transactional data have resulted in innovations in local governance which can support rural prosperity. The Committee recommends that AFRI prioritize community-based science and decision-making systems administered by land-grant universities and the Cooperative Extension System through competitive funding opportunities.

Enteric Methane Innovation.—The Committee recognizes the innovations that increased public research on enteric methane could make possible. Within the funds provided for AFRI, the Committee encourages NIFA to prioritize the advancement of enteric fermentation solutions, such as cattle feed additives, methane-inhibiting vaccines, and breeding for low-methane cattle.

Farm and Ranch Stress Assistance Network Program.—The Committee recognizes the mental health and suicide risks in rural and farm communities and the benefits of preventative care. The Com-

mittee encourages NIFA to integrate and encourage preventative care in the Farm and Ranch Stress Assistance Network Program.

Genome to Phenome.—The Committee continues to support the development of tools and datasets for the integration and analysis of phenotypic and genetic variation under different environmental conditions that can be used across multiple livestock and crop species to improve the output and efficiency of agriculture.

Grants for Insular Areas.—The Committee recognizes NIFA's efforts to strengthen capacity at land-grant institutions in the U.S. territories in the areas of instruction, distance education, facilities and equipment, and research. The Committee emphasizes the importance of continuing support for these institutions to help address plant disease and invasive species priorities in the territories.

Heavy Metals in Food Crops.—The Committee is aware of the challenges agricultural producers confront in developing crop production practices and solutions which are feasible to meet the regulatory standards under development as part of the FDA's Closer-to-Zero initiative for various heavy metals. The Committee recognizes that grants in support of these efforts must be multi-state and multi-disciplinary to provide the best opportunity for success. Therefore, the Committee recommends that AFRI prioritize funding projects focused on developing solutions for reducing heavy metals in food crops at the sufficient budgetary levels to support these efforts. The Committee also encourages AFRI to increase the number of research projects focused on heavy metals in food crops funded under AFRI.

Laying Hen and Turkey Research.—The Committee notes that research into laying hens and turkeys holds the potential to improve the efficiency and sustainability of laying hen and turkey production through integrated collaborative research and technology transfer. The Committee provides funding to support research into laying hen and turkey disease prevention, antimicrobial resistance, nutrition, gut health, and alternative housing systems under extreme weather conditions.

Minor Crop Pest Management.—The IR-4 Project has been critical to securing registrations for new plant protection products for specialty crops and the primary avenue for new reduced-risk pesticides, while improving impacts on the environment, worker safety, and more sustainable production systems for holistic wellbeing. The Committee provides funding to continue the Project's mission of food security research infrastructure and meeting consumer demands for high-quality food.

Multifaceted Tools for Controlling Harmful Algal Blooms (HABs) and Huanglongbing.—The Committee encourages NIFA to continue research into the use of potent antimicrobials through the use of environmentally-friendly integrated nano-delivery systems for the purpose of controlling both HABs and Huanglongbing.

Nanotechnology.—The Committee supports research with partners on nanotechnology which has the potential to improve plant tolerance to extreme drought and heat.

Organic Agriculture Research.—The Committee encourages NIFA to consider the USDA National Organic Standards Board organic research priorities when crafting future AFRI Requests for Applications. Given the growing demand for organic products, the Com-

mittee also encourages NIFA to continue organic research projects funded under AFRI.

Supplemental and Alternative Crops.—The Committee recognizes the importance of nationally coordinated, regionally managed canola research and extension programs. The Committee encourages NIFA to continue to seek input from stakeholders regarding canola research and to address research needs in areas with the greatest potential to expand canola production, as well as those where canola production is established and needs to be maintained.

Supply Chain Research.—The Committee encourages NIFA, in consultation with AMS, to work with institutions of higher education to conduct research on best practices on strengthening, maintaining, and securing supply chains related to agricultural products produced in the U.S., in order to lower input costs for farmers and producers and lower prices of agricultural products, including biofuels, for consumers, particularly for food insecure communities. The Committee encourages this research to include geographic and industry diversity. The Committee encourages the entities conducting research to work with extension agents through the Cooperative Extension System to provide information and technical assistance informed by the research to relevant agricultural groups and farmers and producers.

Vector Control.—The Committee encourages USDA to support research, including the work done through the Biotechnology Risk Assessment Research Grants program, to develop innovative vector control technologies targeted to combatting Zika-carrying *Aedes aegypti* mosquitos. The Committee urges USDA to utilize pest management programs and partner organizations to conduct research to develop and test effective repellents, create new molecular pesticide technologies that prevent mosquitoes from reproducing, and explore natural product remedies to deter pests.

The following table reflects the amounts provided by the Committee:

NATIONAL INSTITUTE OF FOOD AND AGRICULTURE RESEARCH AND EDUCATION ACTIVITIES
[Dollars in thousands]

Program/Activity	Authorization	Committee provision

NATIVE AMERICAN INSTITUTIONS ENDOWMENT FUND

2024 appropriation	(\$11,880,000)
2025 budget estimate	(11,880,000)
Provided in the bill	(11,880,000)
Comparison:	
2024 appropriation	---
2025 budget estimate	---

COMMITTEE PROVISIONS

For the Native American Institutions Endowment Fund, the Committee provides \$11,880,000.

EXTENSION ACTIVITIES

2024 appropriation	\$561,700,000
2025 budget estimate	610,605,000
Provided in the bill	561,164,000
Comparison:	
2024 appropriation	- 536,000
2025 budget estimate	- 49,441,000

COMMITTEE PROVISIONS

For National Institute of Food and Agriculture Extension Activities, the Committee provides an appropriation of \$561,164,000.

1862 and 1890 Partnerships.—The Committee recognizes that the goal of cooperative agricultural extension is shared by all land-grant universities—to provide farmers with information from cutting-edge agricultural research, conduct demonstrations and assist rural communities in applying new technologies and farming methods to their operations, and improve the efficiency of our American farms and ranches. Therefore, the Committee directs NIFA to make every effort to strengthen partnerships and expand cooperation between 1862 and 1890 land-grant institutions, thereby closing the gap in extension between the two systems and leveraging joint collaborative efforts. The Committee encourages NIFA to consider

establishing partnership grants for joint educational and extension activities in States where at least one 1862 institution and at least one 1890 institution are located, to foster co-creation of new opportunities and new programming to better serve producers.

Farm Animal Residue Avoidance Database (FARAD) Program.—The Committee is aware that one-year awards for FARAD make it extremely difficult for FARAD to attract and retain the professional staff needed to maintain this important food safety program. The Committee urges USDA to move to a multi-year award profile for this food safety program.

The following table reflects the amounts provided by the Committee:

COMMITTEE PROVISIONS

For the Office of the Under Secretary for Marketing and Regulatory Programs, the Committee provides an appropriation of \$800,000.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	\$1,162,026,000
2025 budget estimate	1,174,871,000
Provided in the bill	1,147,250,000
Comparison:	
2024 appropriation	- 14,776,000
2025 budget estimate	- 27,621,000

COMMITTEE PROVISIONS

For the Animal and Plant Health Inspection Service (APHIS), Salaries and Expenses, the Committee provides an appropriation of \$1,147,250,000.

The Committee provides increases for the following programs: \$2,000,000 for Animal Health Technical Services; \$1,000,000 for Cattle Health; \$1,500,000 for Specialty Crop Pests; and \$2,000,000 for Wildlife Damage Management.

Within the amount included for Specialty Crop Pests, the Committee includes \$72,446,000 for fruit fly exclusion and detection; \$72,359,000 for citrus health, including \$11,514,000 for HLB-MAC; \$21,266,000 for the glassy-winged sharpshooter; \$6,909,000 for the pale cyst nematode; \$4,043,000 for the European grapevine moth; \$9,340,000 for the navel orangeworm; \$3,022,000 for agricultural canine inspection teams; and \$18,819,000 for spotted lanternfly.

The following table reflects the amounts provided by the Committee:

**ANIMAL AND PLANT HEALTH INSPECTION SERVICE
SALARIES AND EXPENSES**

[Dollars in Thousands]

	FY 2024 enacted	FY 2025 estimate	Committee provision

Subtotal, Agency Management	65,776	48,013	46,500
Total, Direct Appropriation	\$1,162,026	\$1,174,871	\$1,147,250

Agricultural Imports.—The Committee recognizes that there is a need to update APHIS physical facilities and processes due to the increased volume of agricultural imports. The Committee requests a plan to address the needs of programs, including steps to collaborate with stakeholders on supplemental inspection and pathogen identification services and to improve the transparency of the importation process.

Agriculture Quarantine Inspections (AQI).—The Committee recognizes that prevention of infestations of pests and diseases is much more cost effective than subsequent control or eradication. This is an important Federal responsibility, and the Committee provides \$36,500,000 for the AQI function, including predeparture and interline inspections.

Agriculture Quarantine Inspection (AQI) Small Aircraft Exemption.—The Committee is concerned that the Department, in the final rule entitled “User Fees for Agricultural Quarantine and Inspection Services” that was published on May 7, 2024, removed the longstanding small aircraft exemption. The Committee is concerned about loss of air service on short haul international flights and that the removal of this exemption and the restructured commercial aircraft fees for the AQI program may not be equitable to small aircraft operators. The Committee reiterates the direction included in the fiscal year 2024 Joint Explanatory Statement that the Secretary shall provide the Committees with a detailed rationale for its decision if regulatory relief is not granted in this area and its compliance with Executive Order 13175.

Animal Welfare Act.—The Committee supports a collaborative approach between APHIS and licensees involving education, training, and outreach to improve the care of animals. The Committee reminds APHIS of the fiscal year 2024 Joint Explanatory Statement encouraging the agency to initiate a scientific evaluation of the impact of “teachable moments” on animal welfare.

The Committee continues to encourage APHIS to use its full enforcement capabilities under the AWA against chronic violators of the AWA. The Committee directs the agency to update the Committee within 60 days of enactment of the Act on AWA enforcement activities, including referring cases to the Office of the General Counsel, the Department of Justice, or both, when appropriate.

APHIS Inspections of ARS Facilities.—The funding provided for the Animal Welfare program includes funding to support the agreement between APHIS and ARS, under which APHIS conducts compliance inspections of ARS facilities to ensure compliance with the regulations and standards of the AWA. The Committee directs APHIS to conduct inspections of all such ARS facilities and to post the resulting inspection reports online in their entirety without redactions except signatures. The Committee continues to direct APHIS to transmit to the Committees all inspection reports involving ARS facilities, including pre-compliance inspections.

Arundo Management and Control.—The Committee is concerned with the damage the invasive plant *Arundo donax* inflicts on groundwater levels in drought-prone western States. The Committee directs APHIS to work with Federal, State, and local water managers in affected areas to establish a management and control regime to prevent further water shortages in drought-stricken areas.

Asian Longhorned Tick (ALT).—The Committee is concerned about the ongoing spread of ALT, which has been identified in 17 States and represents a growing threat to domestic livestock populations. In addition to monitoring the spread of ALT, APHIS should utilize the resources necessary to enhance collaboration with ARS, NIFA, State partners, and industry stakeholders to improve preparedness, surveillance, and response capabilities. Recognizing that

public education and outreach will play an important role in reducing the spread of ALT, the Committee expects APHIS to enhance outreach and education efforts to that end. The Committee directs APHIS to submit a report within 60 days of enactment of this Act outlining the resources which would be required to establish an ALT control program within APHIS.

Avian Health.—The Committee provides no less than the fiscal year 2024 levels for the Avian Health Program, which provides surveillance, prevention, and control of avian diseases to protect the U.S. poultry industry.

Aviation Personnel Safety.—To help ensure the safety of APHIS aviation personnel, the Committee encourages APHIS to invest in leading Health and Usage Monitoring System technologies for the agency's aircraft fleet.

Aviation Training Center.—The Committee encourages APHIS to engage with the Utah Department of Agriculture and Food regarding the use of the Aviation Training and Operations Center located in Cedar City, Utah.

Blackbird Predation.—APHIS is responsible for providing Federal leadership in managing problems caused by wildlife. The Committee is aware of the economic importance of controlling blackbird depredation, which affects sunflowers and other crops. The Committee encourages APHIS to take action to reduce blackbird depredation in the Northern Great Plains.

Biotechnology Regulatory Services.—The Committee recognizes the important role the Biotechnology Regulatory Services (BRS) plays in advancing biotechnology innovation. Since APHIS published a final rule in May 2020 to update biotechnology regulations under 7 CFR Part 340 for certain organisms developed using genetic engineering, developers continue to experience significant delays when applying for regulatory status reviews and, to a lesser degree, permits. The Committee encourages BRS to complete reviews as expeditiously as possible and reduce regulatory burdens for developers of organisms that are unlikely to pose plant pest risks.

Canine Detection and Surveillance.—The Committee recognizes the important role APHIS' canines program plays in invasive species and disease detection and provides \$3,022,000 to support these efforts. The Committee requests that APHIS keep it apprised of program activities, including how the agency uses funding provided.

Cattle Health.—The Committee provides \$112,000,000 for Cattle Health to continue to fund initiatives related to eradication of fever ticks for livestock and wildlife hosts, including but not limited to research, data management, infrastructure, and treatment. The Committee is concerned that the cattle fever tick quarantine area is expanding despite efforts to constrain spread. To prevent movement of livestock and game animals outside of the quarantined or high-risk premises, the Committee encourages APHIS to use available funds for a cost-share program for the construction and repair of livestock or game fencing on private lands. The Committee directs USDA, in conjunction with State animal health commissions, to develop a strategy to exclude wildlife from areas at highest risk of tick spread and identify areas that qualify for funds within these areas.

The Committee also notes that large, dense stands of non-native Carrizo cane occupy the banks and floodplains of the Rio Grande River, providing favorable habitat for agriculturally damaging cattle fever ticks and threatening water supplies for agriculture due to its high evapotranspiration capacity. The Committee understands that APHIS has been working with ARS on biological controls and the U.S. Customs and Border Protection (CBP) for mechanical controls. The Committee encourages APHIS to continue to coordinate with ARS, CBP, Department of the Interior, the International Boundary and Water Commission, the Texas State Soil and Water Conservation Board, and other stakeholders on control efforts. The Department is requested to keep the Committee apprised of progress made in this regard.

Cervid Health.—The Committee provides \$17,500,000 for APHIS to implement the Chronic Wasting Disease (CWD) Research and Management Act, of which \$12,500,000 shall be for APHIS to allocate funds directly to State departments of wildlife, State departments of agriculture, Native American Tribes, and research institutions and universities to further develop and implement chronic wasting disease (CWD) surveillance, testing, management, and response activities. Within the remaining \$5,000,000 provided, APHIS should consider indemnity payments and associated costs to remove infected and exposed animals as expeditiously as possible.

In addition, the Committee maintains the 2024 funding level for Wildlife Services Methods Development for CWD work at the National Wildlife Research Center.

Citrus Health Response Program (CHRP).—CHRP is a national effort to protect the U.S. industry from the ravages of invasive pests and diseases. These funds are designed to partner with State departments of agriculture and industry groups to address the challenges of citrus pests and diseases. In addition to the funds provided in this account, the Committee encourages APHIS to utilize the funds available in the Plant Pest and Disease Management and Disaster Prevention Programs to the greatest extent possible to sustain the economic viability of the citrus industry.

Cotton Pests.—The bill provides \$15,500,000 for the joint Cotton Pests Program. The Committee encourages APHIS and the cotton industry to make every effort to ensure the boll weevil does not reinfest areas of the U.S. where it has been successfully eradicated.

Depopulation.—APHIS uses defined methods for depopulation as described in the 2019 American Veterinary Medical Association (AVMA) Guidelines for Depopulation of Animals, based on the species and to meet specific depopulation timelines and on-site conditions. The AVMA definition stresses the importance of considering animal welfare when determining the best approach to depopulation. Given the nationwide outbreak of HPAI and growing concerns over African swine fever, the Committee directs USDA to ensure that the National Veterinary Stockpile has adequate supplies and equipment to assist producers in utilizing more rapid, humane, and effective depopulation methods when necessary, as laid forth in the AVMA guidelines.

Education and Outreach on Avian Influenza.—The Committee remains deeply concerned by the spread of HPAI. The Committee encourages APHIS to continue to provide increased training, public outreach, and educational materials to areas threatened by HPAI.

Electronic Identification (EID).—The Committee recognizes the importance of the APHIS Animal Disease Traceability (ADT) framework to protect livestock producers and the domestic food supply. The Committee does not support the costs of requiring EID tags for interstate movement of cattle and bison falling onto producers, livestock markets, veterinarians, or others in the livestock industry. The Committee maintains fiscal year 2024 levels of \$15,000,000 for the purchase of EID tags and related infrastructure, such as EID readers, software, and other technological upgrades needed for the industry to comply with the final rule, “Use of Electronic Identification Eartags as Official Identification in Cattle and Bison” (89 FR 39540). In addition to the annual cost of purchasing EID tags, the Committee encourages APHIS to include in the cost-benefit analysis the full cost of related EID infrastructure in any future rulemakings.

Emergency Outbreaks.—The Committee continues to include specific language relating to the availability of funds to address emergencies related to the arrest and eradication of contagious or infectious diseases or pests of animals, poultry, or plants. The Committee expects the Secretary to continue to use the authority provided in this Act to transfer funds from the CCC for the arrest and eradication of animal and plant pests and diseases that threaten American agriculture. By providing funds in this account, the Committee is enhancing, not replacing, the use of CCC funding for emergency outbreaks.

Emergency Preparedness and Response.—The Committee continues to provide funding for the Animal Care Program to coordinate with the Federal Emergency Management Agency on the National Response Plan and to support State and local governments’ efforts to plan for protection of people with animals and incorporate lessons learned from previous disasters. The Committee maintains the 2024 funding levels to support hazard preparedness and response for zoos and aquariums, and implementation of emergency contingency plans for all facilities regulated under the AWA.

Feral Swine.—The Committee provides a \$1,000,000 increase for feral swine eradication efforts. The Committee encourages APHIS Wildlife Services to use all approved measures as a force multiplier and to prioritize States with the highest population of feral swine.

Fruit Fly Exclusion and Detection.—The Committee provides an increase of \$1,000,000 for exotic fruit fly detection, response, and prevention. The Committee requests a report, in consultation with the Department of Defense, on plans for repairs, improvements, maintenance, and construction of the Sterile Insect Release Facility at Joint Forces Training Base, Los Alamitos, California.

Glassy Winged Sharpshooter.—The Committee maintains fiscal year 2024 levels and urges USDA to consider all appropriate funding resources to rapidly respond to areas where increasing numbers of the pest glassy winged sharpshooter are occurring in California.

Glossy Buckthorn.—The Committee is concerned about the spread of glossy buckthorn, an invasive shrub species that thrives in forests and wetlands. Glossy buckthorn is easily spread by birds and animals and can establish itself in any environment that has sufficient moisture. Its spread presents a direct threat to the biodiversity of forests and wetlands across the country, including the Allegheny National Forest. The Committee requests a report on

possible mitigation strategies to limit the impacts of glossy buckthorn.

Grasshopper Suppression.—The Committee is aware of current grasshopper suppression efforts and encourages APHIS to increase treatment of acres in Montana based on the grasshopper population, damage, and requests for treatments from land managers.

Highly Pathogenic Avian Influenza (HPAI).—The Committee is supportive of USDA and industry efforts to develop a HPAI Initiative to assist the poultry industry in managing the ongoing HPAI outbreak and its subsequent market impacts through collaborative research among institutions with HPAI expertise. The Committee encourages USDA to continue vaccine related research, coordinate with industry and researchers on alternate vaccine administration techniques to minimize bird handling and maximize animal welfare, work to develop surveillance methods of differentiating infected from vaccinated birds, develop new advanced biosecurity practices, wild bird mitigation and research, and work with the U.S. Trade Representative to accelerate negotiations with trading partners to permit poultry and egg trade to continue under pre-negotiated terms in the event that vaccination for HPAI must be used to prevent or mitigate future outbreaks.

The Committee is also concerned by the emerging and ongoing outbreak of HPAI in dairy herds across the United States that has resulted in a sharp drop in feed intake and milk production by infected cows. Continued spread of HPAI will impact dairy producers, milk production and utilization of foodgrains nationwide, and lead to increased milk prices for consumers. The Committee recognizes and is sensitive to the effects a voluntary vaccine may have on international trade relationships, however, the Committee is also aware that USDA has used vaccines against low pathogenic avian influenza, and deployment of a HPAI vaccine may address concerns from the scientific community about transmission, future variants, and mortality rates. In fact, the Committee is aware of private companies' investment in vaccine development for H5N1 in dairy herds. The Committee directs USDA to report on the status of vaccine research, development, and approvals and engage with other relevant agencies to evaluate the potential for use of vaccines for dairy cattle. USDA should also describe strategies to mitigate concerns of international trading partners and align with applicable international standards and agreements for potential vaccine use.

Further, the Committee understands that there is concern among some dairy producers about data collection efforts to confirm infections in the absence of indemnity assistance assurances. Data collection and testing efforts must take into consideration the importance of a producer's future ability to market milk and meat. The Committee will continue monitoring the situation and encourages USDA to consider providing indemnity assistance to producers where appropriate.

Horse Protection Act Inspections.—The Committee has consistently recognized the need for APHIS and the Tennessee Walking Horse industry to communicate and work together to eliminate the sorling of horses. The Committee is concerned the final rule, Horse Protection Amendments, published May 8, 2024 (89 FR 39194), ignores the strong concerns of and comments submitted by industry experts, is based on out-of-date and unreliable data, and exceeds

the agency's legal authority under the Horse Protection Act. Further, the cost-benefit analysis accompanying the rule relies on data that is over a decade old and severely underestimates the impact the rule will have on the 20,000 jobs supported by the Tennessee Walking Horse industry. The Committee reiterates that an objective, science-based inspection system would provide assurance for both accuracy and fairness. Therefore, the Committee directs APHIS to withdraw the final rule and work with the industry to eliminate sourcing using objective, science-based protocols.

Huanglongbing Emergency Response.—The Committee encourages APHIS to allocate sufficient resources to continue the activities necessary to effectively prevent or manage HLB. The disease, for which there is no cure, has caused a significant decline in Florida's citrus production since 2007. All citrus producing counties in Texas are under quarantine, and in California there have been over 3,000 confirmed cases of HLB in backyard citrus trees. HLB threatens the sustainability of the entire domestic citrus industry. If HLB continues to spread, it will cost thousands of additional jobs and millions in lost revenue. The agency is encouraged to support the priorities and strategies identified by the HLB-MAC group. The agency should appropriately allocate resources based on critical need and the maximum benefit to the citrus industry.

Imported Dogs.—The Committee is aware that USDA issued a report that showed that over one million dogs are imported into the U.S. each year. Of that number, however, less than one percent are subject to thorough health screenings to show that they are healthy, vaccinated, and free of disease prior to entering the country. The limited health requirements and inspection has resulted in the importation of animals that, tragically, arrive in poor health or die during travel, as well as the importation of animals carrying various diseases from rabies to canine influenza to leptospirosis, among others. As the connection between human and animal health becomes clearer, it is imperative that imported animals, including dogs, are healthy, vaccinated, and of an appropriate age to travel. Therefore, the Committee maintains the fiscal year 2024 levels for APHIS to strengthen its oversight of imported dogs, including stronger interagency coordination to better protect animal and public health.

In- and Out-Bound Market Access Report.—The Committee requests that APHIS continue submitting the report on U.S. out-bound and foreign in-bound agricultural market access. The report should provide data for the last three years, including the date access was granted and the in-bound and out-bound volumes shipped by country and commodity.

National Animal Health Laboratory Network (NAHLN).—The laboratories within the NAHLN network are on the frontline for detection of newly identified and reemerging animal diseases. NAHLN laboratories provide a critical contribution to animal and human health, as demonstrated during the pandemic. Therefore, the Committee continues to provide funding for NAHLN through both APHIS and NIFA at no less than \$18,500,000 for fiscal year 2025. This amount is in addition to mandatory funding provided through the 2018 Farm Bill for Animal Disease Prevention and Management. The Committee encourages the Department to provide robust funding from the 2018 Farm Bill for NAHLN.

National Clean Plant Network (NCPN).—The Committee recognizes the importance of the NCPN, which was created to protect U.S. crops, including berries, grapes, nuts, fruit trees, roses, sweet potatoes, and citrus, from the spread of economically devastating plant pests and diseases.

National Honeybee Disease Survey Report.—The Committee continues funding the survey at the 2024 level. Since 2009, a national survey of honeybee pests and diseases has been funded annually by APHIS along with other Federal and non-Federal partners to document which bee diseases, parasites, or pests of honeybees are present and/or likely absent in the U.S. This information will help place current and future epidemiological studies in context and thus may indirectly help investigations of emerging conditions.

M-44 Sodium Cyanide Devices.—The Committee supports the purchase, deployment, and training of third parties on the use of M-44 sodium cyanide ejector devices (M-44s). These devices are an important tool for the control of predators preying on livestock, poultry, or federally designated threatened and endangered species. The Committee directs APHIS to fully incorporate M-44s in the agency's wildlife damage management strategy as appropriate.

Mormon Crickets.—The Committee provides a \$500,000 increase for the suppression and control of Mormon crickets.

Pale Cyst Nematode Eradication.—The Committee includes funding to maintain resources for the pale cyst nematode eradication program at the 2024 level to continue successful efforts to eradicate this pest. If left untreated, this pest could spread, affecting other crops.

Paraguay Beef.—The Committee is concerned about the final rule titled “Importation of Fresh Beef From Paraguay” (88 Fed. Reg. 77883). The rule is based on a risk assessment that relies on potentially outdated data from in-country site visits that occurred in 2008 and 2014. The conclusions drawn from a science-based risk assessment are only as reliable as the data included in the assessment. Therefore, it is critical for APHIS to use current data to confirm Paraguay's animal health and inspection systems can provide an equivalent level of safety compared to the United States prior to allowing fresh beef imports from Paraguay. The Committee directs APHIS, as expeditiously as possible, to conduct an additional in-country site visit in Paraguay and provide the Committee an updated risk analysis that incorporates data from the visits.

Scrapie Eradication Program.—The Committee maintains funding at the 2024 level for the National Scrapie Eradication Program.

Spotted Lanternfly.—The Committee remains concerned about the recent Spotted Lanternfly outbreak and provides an increase of \$500,000 to support efforts to combat this pest. The Committee requests that APHIS keeps it apprised of the program's strategy and progress.

Sulfuryl Fluoride.—The Committee encourages APHIS to consider adding sulfuryl fluoride treatments for logs, wood products and solid wood packing material to its Treatment Manual to facilitate the export of U.S. forestry products and other goods and to provide additional options for the protection of tree nut and stored grain commodities.

Swine Health Improvement Program.—The Committee notes that USDA announced in 2020 the establishment of a joint Federal,

State, and industry project to develop a certification program for high-consequence swine diseases. Given the outbreak of African Swine Fever in the Hispaniola region, the Committee recognizes the importance of reassuring foreign trading partners of the status of the American swine herd's health and the measures the American swine industry has taken to prevent an introduction of African swine fever and classical swine fever. The Committee maintains the fiscal year 2024 levels for USDA to continue advancing the work of the Swine Health Improvement Program.

West Nile Virus.—The Committee is concerned with the threats to human and animal health posed by West Nile virus and other infectious diseases and recognizes that a critical strategy for addressing these threats is necessary to prevent the infection and transmission by known vectors, including farm-raised alligators. Within funding provided, the Committee maintains fiscal year 2024 levels for APHIS to enter into cooperative agreements with the affected States to further investigate West Nile virus and other infectious diseases affecting farm-raised alligators and to develop treatments and methods to prevent infection and transmission.

Wildlife Services.—The Committee is concerned with livestock predation in areas with the highest populations of sheep and goats and provides an increase of \$1,000,000 for improved predator management methods and tools in cooperation with partner agencies serving these areas.

Wildlife Services Education and Training.—The Committee is aware of the wide range of hazardous procedures and materials utilized by APHIS personnel in the conduct of daily duties. To ensure a safe working environment, the Committee provides no less than 2024 levels to maintain a National Training Academy focused on those areas of greatest concern such as pyrotechnics, firearms, hazardous materials, immobilization and euthanasia drugs, pesticides, animal care and handling, land vehicles, watercraft, and zoonotic diseases.

Wood Imports.—The Committee recognizes the majority of U.S. manufactured finished wood products require a combination of domestically grown species with international species, the latter of which cannot be grown in the United States. APHIS, Fish and Wildlife Service, and Customs and Border Protection are jointly responsible for overseeing processes with respect to the Lacey Act. The Committee supports further coordination across the agencies with respect to wood product imports and directs APHIS to provide a report within 180 days of enactment detailing USDA's current role in the wood importation declaration process and how it interacts with other agencies to help expedite shipments that are delayed.

Zoological Disaster Response.—The Committee provides not less than fiscal year 2024 levels of \$450,000 within Emergency Preparedness and Response for APHIS to support industry-led nonprofits that are comprised of a national network of zoological facilities and assist zoos, aquariums, sanctuaries, and other exotic animal businesses respond to disasters. The disaster response efforts may include but are not limited to: preparedness consultations, risk assessments, evacuation and transportation of animals, veterinary care, facility repairs, incident command and communications support, and other response and recovery efforts. The Committee notes

that these funds are in addition to, not a replacement of, existing agreements made with nonprofit organizations in previous fiscal years for zoological disaster initiatives.

AGRICULTURAL MARKETING SERVICE

MARKETING SERVICES

2024 appropriation	\$222,887,000
2025 budget estimate	234,888,000
Provided in the bill	192,200,000
Comparison:	
2024 appropriation	- 30,687,000
2025 budget estimate	- 42,688,000

COMMITTEE PROVISIONS

For Marketing Services of the Agricultural Marketing Service (AMS), the Committee provides an appropriation of \$192,200,000.

Cattle Contracts Library.—The Committee directs the Secretary to submit a report within 60 days of enactment of this Act regarding the Cattle Contracts Library pilot program. This report shall include summaries of all stakeholder feedback received by the agency, any applicable economic assessments conducted or received by the agency, and any statutes utilized to develop the regulatory framework to implement the pilot program.

Cotton Classing.—The Committee acknowledges the challenges presented during the 2021 cotton season, such as extensive delays in quality designation, contract delivery, and loan repayments. The Committee encourages AMS to continue working with producers to secure stability and dependability of the cotton classification program to timely and accurately process numerous samples of cotton bales with less reliance on seasonal staff and less disruption of market opportunities.

Dried Fruit Standards.—The Committee recognizes the need for updated dried fruit standards to meet the needs of current processors. The Committee encourages AMS to keep the Committee updated on efforts to update specifications for dried sweet cherries and dried apples.

Dried Sweet Cherries.—The Committee encourages AMS to consider purchases of dried sweet cherries, which will help reduce food waste and provide a healthy snacking option to program participants.

Dry Edible Beans.—The Committee recognizes the nutritional qualities of dry edible beans and encourages AMS to enhance the amount and frequency of dry edible bean purchases.

Olive Oil Authenticity Testing Program.—The Committee directs AMS to administer a testing program that will result in robust data sets of authenticity parameters for domestically produced olive oil to better understand the relation of various environments, soils, varieties, growing regions, and the concerns around the purity parameters in standards and compliance of U.S. oils. The testing program should include physio-chemical and organoleptic analysis of domestically produced olive oil.

Packers & Stockyards.—The Committee is concerned by the Department’s ongoing efforts to expand the scope of its regulations to implement the Packers and Stockyards Act of 1921. The Committee holds that the Department has misinterpreted Congressional intent

and mistaken its jurisdiction throughout this regulatory series. As such, the Secretary is prohibited from promulgating, implementing, or enforcing any regulations under Sections 202(a) or 202(b) of the Packers and Stockyards Act of 1921 which were first published in the Federal Register after June 1, 2022. Further, the Committee rebuts the agency’s assertions regarding harm to competition and affirms it is the intent of Congress, in accordance with the rulings of eight Federal circuit courts, that complainants must demonstrate harm or likelihood of harm to competition in order to establish a violation of the Packers and Stockyards Act of 1921.

Simplified Applications.—The Committee is aware AMS implemented a simplified, turnkey grant application in fiscal year 2023 for Farmers Market and Local Food Promotion Grants, with applications restricted to specific project types. The Committee encourages the agency to expand the turnkey application to include other common activities, such as vendor and customer outreach activities, farmers market manager staff time, regional food chain coordination, and special purpose equipment.

Vegetable Promotion.—The Committee recognizes that specialty crop vegetable growers and value-added processors are under significant pressure from the effects of inflation and increasing imports. The Committee encourages AMS to collaborate with local partners to expand marketing opportunities for domestic specialty crop vegetable growers by increasing promotion activities immediately prior to and during harvest, including for asparagus harvested April to May, carrots harvested August to October, and cucumbers harvested August to September. The Committee directs AMS to report to the Committee on the status of these efforts within 90 days of enactment of this Act.

LIMITATION ON ADMINISTRATIVE EXPENSES

2024 limitation	(\$62,596,000)
2025 budget limitation	(62,596,000)
Provided in the bill	(62,596,000)
Comparison:	
2024 limitation	---
2025 budget estimate	---

COMMITTEE PROVISIONS

The Committee provides a limitation of \$62,596,000 on Administrative Expenses of the Agricultural Marketing Service.

FUNDS FOR STRENGTHENING MARKETS, INCOME, AND

SUPPLY (SECTION 32)

(INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	(\$21,501,000)
2025 budget estimate	(22,701,000)
Provided in the bill	(22,701,000)
Comparison:	
2024 appropriation	+1,200,000
2025 budget estimate	---

COMMITTEE PROVISIONS

For the Marketing Agreements and Orders Program, the Committee provides a transfer from Section 32 funds of \$22,701,000. The following table reflects the status of this fund:

ESTIMATED TOTAL FUNDS AVAILABLE AND BALANCE CARRIED FORWARD—FISCAL YEARS 2024–2025

[Dollars in thousands]

	FY 2024 enacted	FY 2025 estimate	Committee provision
Appropriation (30% of Customs Receipts)	\$30,801,267	\$24,678,697	\$24,678,697
<i>Less Transfers:</i>			
Food and Nutrition Service	– 28,784,623	– 22,592,333	– 22,592,333
Commerce Department	– 377,363	– 377,363	– 377,363
Less FNS transfer for the Farm Bill FFVP	– – –	– 199,000	– 199,000

<i>Total Obligations</i>	\$1,518,081	\$1,423,930	\$1,423,930

PAYMENTS TO STATES AND POSSESSIONS

2024 appropriation	\$1,000,000
2025 budget estimate	1,235,000
Provided in the bill	1,000,000
<i>Comparison:</i>	
2024 appropriation	– – –
2025 budget estimate	– 235,000

COMMITTEE PROVISIONS

For Payments to States and Possessions, the Committee provides an appropriation of \$1,000,000.

LIMITATION ON INSPECTION AND WEIGHING SERVICES EXPENSES

2024 limitation	(\$55,000,000)
2025 budget limitation	(60,000,000)
Provided in the bill	(55,000,000)
<i>Comparison:</i>	
2024 limitation	– – –
2025 budget limitation	– 5,000,000

COMMITTEE PROVISIONS

The Committee includes a limitation on Inspection and Weighing Services Expenses of \$55,000,000.

OFFICE OF THE UNDER SECRETARY FOR FOOD SAFETY

2024 appropriation	\$1,117,000
2025 budget estimate	1,152,000
Provided in the bill	800,000
Comparison:	
2024 appropriation	- 317,000
2025 budget estimate	- 352,000

COMMITTEE PROVISIONS

For the Office of the Under Secretary for Food Safety, the Committee provides an appropriation of \$800,000.

FOOD SAFETY AND INSPECTION SERVICE

2024 appropriation	\$1,190,009,000
2025 budget estimate	1,244,231,000
Provided in the bill	1,223,841,000
Comparison:	
2024 appropriation	+33,832,000
2025 budget estimate	- 20,390,000

COMMITTEE PROVISIONS

For the Food Safety and Inspection Service (FSIS), the Committee provides an appropriation of \$1,223,841,000. Of this amount, \$1,000,000 is for the inspection of wild caught invasive species in the order *siluriformes* and family *Ictaluridae*.

The following table reflects the Committee’s recommendations for fiscal year 2025:

FOOD SAFETY AND INSPECTION SERVICE

[Dollars in thousands]

Federal Inspection	\$1,098,908
Public Health Data Communication Infrastructure System	35,272
International Food Safety and Inspection	22,000
State Food Safety and Inspection	67,661
<hr/>	
Total, Food Safety and Inspection Service	\$1,223,841

Food Donations.—The Committee recognizes the importance of food loss and waste reduction, and encourages FSIS, in coordination with the Food Loss and Waste Reduction Liaison, to consider updates to food donation guidelines to clarify safety protocols for food donations.

Good Commercial Practices.—The Committee recognizes that the handling of birds at slaughter according to Good Commercial Practices (GCP) improves quality and reduces the occurrence of adulterated poultry products in the marketplace.

Humane Methods of Slaughter.—FSIS shall ensure that all inspection personnel conducting humane handling verification procedures receive robust initial training and periodic refresher training

on the FSIS humane handling and slaughter regulations and directives. This includes handling of non-ambulatory disabled animals, as well as proper use of the Humane Activities Tracking System to ensure humane handling of animals as they arrive and are offloaded and handled in ante-mortem holding pens, suspect pens, chutes, stunning areas, and on the slaughter line. The Committee directs the agency to continue preparation and online publication of the Humane Handling Quarterly Reports, to include: (1) the number of humane handling verification procedures performed, (2) the number of administrative enforcement actions taken, (3) the time spent on Humane Handling Activities Tracking System activities, and (4) comparisons of these measurements by plant size and FSIS district.

Invasive Species.—The Committee encourages the FSIS to work with other agencies and stakeholders to better market food offered for sale that is the product of a wild caught, invasive species, such as northern snakehead or blue catfish.

Labeling Claims.—The Committee recognizes claims that the agency's process for verifying and approving animal raising and sustainability claims on meat and poultry product labels has led to consumer confusion and allowed unfair practices to proliferate. The agency is encouraged to work closely with the AMS to make sure that label claims submitted as part as AMS's "Process Verified Program" align closely with the FSIS guidance document.

Line speeds.—The Committee is concerned that FSIS has not established a permanent regulatory solution for evisceration line speeds above the current regulatory cap. The Committee is also concerned that FSIS imposed new requirements on plants participating in the Time Limited Trial for swine establishments, failed to provide the adequate oversight during the initial study, and has provided no timeline or plan for establishing a permanent regulatory solution. The Committee directs FSIS to provide an update to the Committee on the agency's plan for providing oversight to ensure the second study is successful and the contractor stays within the parameters of the study, establishing a permanent regulatory solution, and extending existing waivers for poultry and swine establishments in a timely manner and without disruptions while working to develop the permanent regulatory solution. The Committee also requests an explanation of the rationale for utilizing a sole source contract to hire the research firm, accounting of costs associated with the Time Limited Trial, including costs associated with the study design, employing the third-party contractor, and data collection starting in March 2022.

Salmonella.—The Committee recognizes the importance of science-based regulations and urges the USDA to ensure that any new salmonella performance standard in poultry products be based on sound scientific principles and risk assessment. The Committee directs USDA to produce a report within 90 days of enactment of this Act on the scientific basis for any proposed changes to salmonella performance standards, including an analysis of their potential impact on food safety, public health, and economic viability of the poultry industry.

State Inspections.—The Committee is aware of concerns that insufficient funding provided by FSIS to state meat and poultry inspection programs from within existing appropriations may result

in states withdrawing from this important program, leading to FSIS having to provide full inspection to those state inspected processing facilities at 100 percent cost. The Committee continues to encourage FSIS to aim for a reimbursement rate of 50 percent.

Water Regulations.—The Committee is aware of industry concerns that the Environmental Protection Agency’s (EPA) proposed rule entitled “PFAS National Primary Drinking Water Regulation Rulemaking” may trigger enforcement of FSIS regulations for water used in food manufacturing in ways not contemplated by the current rulemaking. The Committee requests FSIS provide a briefing on the potential impacts of EPA’s proposed rule on regulated food manufacturers.

TITLE II

FARM PRODUCTION AND CONSERVATION PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR FARM PRODUCTION AND CONSERVATION

2024 appropriation	\$1,527,000
2025 budget estimate	1,964,000
Provided in the bill	901,000
Comparison:	
2024 appropriation	– 626,000
2025 budget estimate	– 1,063,000

COMMITTEE PROVISIONS

For the Office of the Under Secretary for Farm Production and Conservation (FPAC), the Committee provides an appropriation of \$901,000.

Agricultural Foreign Investment Disclosure Act.—USDA is responsible for monitoring foreign purchases of agricultural land under the Agricultural Foreign Investment Disclosure Act (AFIDA) and for assessing penalties on entities that have failed to make disclosures as required. The Committee is concerned that USDA failed to assess penalties for a failure to disclose foreign investments in American agricultural land. The Committee directs the Secretary to report to the Committee within 90 days of enactment of this Act on USDA’s efforts to ensure that foreign investments are being accurately disclosed, including an analysis of any barriers USDA faces in conducting oversight of these purchases and planned steps for overcoming these challenges.

Property Damage.—The Committee encourages the Secretary to follow up on the report, as required in House Report 118–124, on how USDA may reimburse landowners along the United States’ southern border for property damages related to trespassing, and expeditiously implement a process for property damage reimbursements.

FARM PRODUCTION AND CONSERVATION BUSINESS CENTER
 SALARIES AND EXPENSES
 (INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	\$244,183,000
2025 budget estimate	246,250,000
Provided in the bill	213,671,000
Comparison:	
2024 appropriation	- 30,512,000
2025 budget estimate	- 32,579,000

COMMITTEE PROVISIONS

For the Farm Production and Conservation Business Center, the Committee provides an appropriation of \$213,671,000. This amount includes an increase of \$1,000,000 for design of a new data system to comply with the Agricultural Foreign Investment Disclosure Act, as specified by Sec. 773 of the Consolidated Appropriations Act, 2023.

FARM SERVICE AGENCY
 SALARIES AND EXPENSES
 (INCLUDING TRANSFERS OF FUNDS)

	Appropriation	Transfer from program accounts	Total, FSA S&E
2024 appropriation	\$1,209,307,000	\$305,803,000	\$1,515,110,000
2025 budget estimate	1,240,703,000	(311,546,000)	1,522,249,000
Provided in the bill	1,204,307,000	(305,803,000)	1,510,110,000
Comparison:			
2024 appropriation	- 5,000,000	- - -	- 5,000,000
2025 budget estimate	- 36,396,000	- 5,743,000	- 12,139,000

COMMITTEE PROVISIONS

For Salaries and Expenses of the Farm Service Agency (FSA), the Committee provides an appropriation of \$1,204,307,000 and transfers of \$305,803,000 for a total program level of \$1,510,110,000.

Farmers.gov.—The Committee directs USDA to continue to drive implementation and expansion of the Farmers.gov application, a single portal built around the needs of farmers, to enable USDA employees and USDA customers and producers to view their information, complete transactions, quickly review the status of and submit applications for FPAC programs, and receive program payments for all USDA farm programs including, but not limited to, loans, conservation, disaster, dairy, or other programs. All farm programs which require direct application from the farmer, rancher, or producer should be considered for expansion of the Farmers.gov application and functions.

PFAS.—The Committee is aware that PFAS contamination can cause significant financial distress for farmers and encourages FSA to provide the maximum flexibility possible to impacted borrowers as appropriate.

Staffing.—The Committee is concerned about FSA’s ability to attract and retain field staff to do FSA’s critical work in rural communities. The Committee is also concerned that local FSA offices

are often tasked with implementing new programs with little notice. The Committee directs the Secretary to report on a plan to address retention and communication between FSA offices and the national office. Additionally, the Committee encourages FSA to factor in administration of disaster assistance programming when contemplating additional staffing resources needed to successfully carry out its mission.

STATE MEDIATION GRANTS

2024 appropriation	\$6,500,000
2025 budget estimate	7,000,000
Provided in the bill	6,000,000
Comparison:	
2024 appropriation	- 500,000
2025 budget estimate	- 1,000,000

COMMITTEE PROVISIONS

For State Mediation Grants, the Committee provides an appropriation of \$6,000,000.

GRASSROOTS SOURCE WATER PROTECTION PROGRAM

2024 appropriation	\$7,000,000
2025 budget estimate	7,500,000
Provided in the bill	7,000,000
Comparison:	
2024 appropriation	---
2025 budget estimate	- 500,000

COMMITTEE PROVISIONS

For the Grassroots Source Water Protection Program, the Committee provides an appropriation of \$7,000,000.

DAIRY INDEMNITY PROGRAM

(INCLUDING TRANSFER OF FUNDS)

2024 appropriation	\$500,000
2025 budget estimate	500,000
Provided in the bill	500,000
Comparison:	
2024 appropriation	---
2025 budget estimate	---

COMMITTEE PROVISIONS

For the Dairy Indemnity Program (DIPP), the Committee provides an appropriation of such sums as may be necessary (estimated to be \$500,000 in the President’s fiscal year 2025 budget request).

PFAS chemicals.—The Committee is aware that some dairy farms are unable to sell their milk as a result of contamination from a family of synthetic chemicals, collectively known as “PFAS” chemicals. The Committee notes that USDA updated the DIPP to provide additional options to dairy producers impacted by PFAS contamination and looks forward to continuing to work with USDA, other State and Federal partners, and producers to mitigate the impacts of PFAS.

**AGRICULTURAL CREDIT INSURANCE FUND PROGRAM ACCOUNT
(INCLUDING TRANSFERS OF FUNDS)**

2024 loan level	\$10,685,584,000
2025 budget estimate	9,055,166,000
Provided in the bill	9,055,166,000
Comparison:	
2024 loan level	- 1,630,418,000
2025 budget estimate	- - -

COMMITTEE PROVISIONS

For the Agricultural Credit Insurance Fund program account, the Committee provides a loan level of \$9,055,166,000.

The following table reflects the loan levels for the Agricultural Credit Insurance Fund program account:

AGRICULTURE CREDIT PROGRAMS—LOAN LEVELS

[Dollars in thousands]

	FY 2024 enacted	FY 2025 estimate	Committee provision
Farm Loan Programs:			
Farm Ownership:			
Direct	\$3,100,000	\$1,966,970	\$1,966,970

AGRICULTURE CREDIT PROGRAMS—SUBSIDIES AND GRANTS—Continued

[Dollars in thousands]

	FY 2024 enacted	FY 2025 estimate	Committee provision
Total, ACIF Expenses	\$379,844	\$377,833	\$371,682

RISK MANAGEMENT AGENCY

SALARIES AND EXPENSES

2024 appropriation	\$65,637,000
2025 budget estimate	65,950,000
Provided in the bill	61,855,000
Comparison:	
2024 appropriation	– 3,782,000
2025 budget estimate	– 4,095,000

COMMITTEE PROVISIONS

For the Risk Management Agency (RMA), the Committee provides an appropriation of \$61,855,000.

Administrative and Operating (A&O) Expenses.—The Committee notes that the explanatory statement accompanying the Consolidated Appropriations Act, 2023 encourages RMA to provide an annual inflation adjustment to A&O expenses and to provide equitable relief for specialty crop policies, recognizing RMA’s authority to do so without a renegotiation of the Standard Reinsurance Agreement (SRA) in a manner similar to a previous inflation adjustment. The Committee notes that inflation adjustments are not mentioned in the SRA. Instead, an RMA Manager’s Bulletin from June 30, 2010 (MGR–10–007) provided for the adjustments. For each year, RMA published an Informational Memorandum announcing the adjustment for that year (see, for example, “Federal Crop Insurance: Delivery Subsidies in Brief”, CRS, August 20, 2018). Given the adjustments then were initiated outside the SRA, the Committee urges RMA to initiate the adjustments going forward in the same manner. In doing so, RMA may provide adjustments without renegotiation of the SRA and without violating 7 U.S.C. 1508(k)(8).

Alfalfa.—The Committee recognizes alfalfa to be an important domestic forage crop valued for nitrogen fixation, soil conservation, crop rotation, and as a natural habitat. From 2002 through 2023, alfalfa acreage has declined 27.8 percent. The Committee encourages RMA to explore the creation of a revenue and/or quality alfalfa crop insurance policy to ensure producers have a safety net that they need to produce this important crop.

Cover Crops.—The Committee recognizes that cover crops planted in rotation with primary crops have potential to improve soil health and to create additional revenue for farmers as feedstocks for biofuels production. The Committee is concerned, however, that existing RMA regulations classify cover crops as secondary crops when harvesting seeds for biofuel production, which affects a farmer’s ability to obtain crop insurance for their primary crops. The Committee encourages RMA to submit a report to the Committee on how the agency can streamline opportunities for farmers to insure primary and secondary crops with revenue streams resulting from biofuel use.

Pecan Revenue Policy.—The Committee encourages RMA, within existing authorities, to provide an election to exclude, with respect to 1 or more of the crop years used to establish the actual revenue history of pecans of the producer, any recorded or appraised yield for any crop year in which the per planted acre yield of pecans in the county of the producer was at least 50 percent below the simple average of the per planted acre yield of pecans in the county during the previous 10 consecutive crop years (according to 7 USC 1508g(4)(c)). The Committee directs RMA to provide a report within 180 days of enactment of this Act on the implementation of this policy election.

Quality Losses.—The Committee urges RMA to evaluate and consider additional products that will permit producers to better protect themselves from losses directly and indirectly attributed to quality losses.

Reporting Requirements.—The Committee is aware of concerns that RMA exceeded its authority under the Standard Reinsurance Agreement by issuing Bulletin No. MGR–24–003. The Committee acknowledges revisions made to the bulletin to lift the cease-and-desist action, but notes concerns continue to exist regarding the legal authority of RMA to require certain new reporting requirements.

Winegrapes.—The Committee recognizes the importance of production of premium winegrapes in San Joaquin County, California. Given the significance of the region to the winegrape industry, the Committee encourages RMA to continue efforts to expand the California counties eligible for Grapevine Crop Insurance Program.

NATURAL RESOURCES CONSERVATION SERVICE

CONSERVATION OPERATIONS

2024 appropriation	\$914,899,000
2025 budget estimate	985,203,000
Provided in the bill	902,994,000
Comparison:	
2024 appropriation	– 11,905,000
2025 budget estimate	– 82,209,000

COMMITTEE PROVISIONS

For Natural Resources Conservation Service (NRCS) Conservation Operations, the Committee provides an appropriation of \$902,994,000.

The Committee provides \$14,751,000 for the Snow Survey and Water Forecasting Program; \$10,751,000 for the Plant Materials Centers; \$86,757,000 for the Soil Surveys Program; and \$763,495,000 for Conservation Technical Assistance (CTA), which includes \$1,000,000 for Phragmite control. The Committee provides \$3,000,000 for a cost-share program for the construction and repair of perimeter fencing.

Alfalfa Utilization.—The Committee encourages NRCS to incentivize the use and integration of alfalfa in NRCS programs to capitalize on the unique conservation benefits it brings to the agricultural landscape.

Chesapeake Bay States’ Partnership Initiative.—The Committee recognizes the important role of voluntary conservation practices in protecting and restoring waterways, especially when deployed at

scale. To enhance the resiliency of farmland and reduce nutrient and sediment pollution in line with the most recent Chesapeake Bay Watershed Agreement, USDA created the Chesapeake Bay States' Partnership Initiative. The Committee supports this Initiative and directs USDA to leverage additional conservation resources for agricultural producers in the Chesapeake Bay watershed to support the implementation of the Chesapeake Bay jurisdictions' watershed implementation plans. The Committee also urges USDA to target additional CTA funds in the most effective basin areas of the watershed and to prioritize conservation practices that build on-farm.

COMET-Farm Tool.—The Committee encourages NRCS to engage with partners throughout the country to publicize the availability of the COMET-Farm tool. The Committee urges the Secretary to continue to support COMET-Farm technological improvements that would increase usage by farmers and to provide continued assistance, improvements, and outreach on the COMET-Farm tool through CTA.

Conservation Programs Timeline.—The Committee recognizes the importance of NRCS's conservation programs and their positive impact on water and soil quality. The Committee also recognizes that these programs must consist of realistic timelines and outcomes as identified by the farmers using them. The Committee encourages NRCS to review all conservation programs to ensure their funding timelines related to conservation planning and program delivery meet legislatively mandated timelines to support farmers in developing their practices and fulfilling the mission of the programs. The Committee directs NRCS to report back on its findings and efforts to improve program funding timelines within 180 days of enactment.

Critical Conservation Areas (CCAs).—The Committee supports CCAs and the collaborative regional approach to address common natural resource goals while maintaining or improving agricultural productivity. The Committee encourages NRCS to provide additional CTA funds to CCAs to address conservation planning backlogs.

Driftless Area Conservation.—The Committee recognizes the environmental and economic benefits of the Driftless Area Landscape Conservation Initiative (DALCI), which expired in 2017. The Committee supports the revitalization of this program to educate landowners, farmers, and operators on the benefits of soil health, holistic grazing, and flood resilience. The Committee directs the Secretary to report to the Committee within 90 days of enactment on existing federal resources to support locally driven conservation initiatives in the Driftless Area and gaps in support due to the DALCI program's expiration.

Environmental Evaluations.—The Committee directs USDA to provide a detailed strategy of how the CPA-52 process will be streamlined to allow partners to complete an environmental evaluation for multiple landowners across a project area while ensuring the environmental integrity of the area is accurately assessed. The Committee further urges the agency to provide formal training to both employees and partners of this streamlined process to ensure consistency and transparency.

Farmer Mentorship Program for Watersheds.—The Committee is concerned about soil and water quality near watersheds such as the Great Lakes Basin, Salton Sea, Lake Okeechobee, and the Chesapeake Bay. The Committee recognizes that farmers may be unaware of possible or necessary conservation efforts that currently exist to improve soil and water quality. The Committee encourages NRCS to leverage its recently created CAMP mentoring effort to enhance outreach efforts with dedicated farmers in watersheds with conservation expertise and to work with interested farmers who would like to learn how to implement improved conservation practices for water and soil in their operations.

Feral Hogs.—The Committee is concerned that the feral hog population is rapidly expanding despite efforts to constrain their spread. To help prevent further damages to agriculture and urban lands, the Committee provides \$3,000,000 for a cost-share program for the construction and repair of perimeter fencing. The Committee encourages NRCS, in conjunction with State soil and water conservation agencies, to develop a strategy to exclude feral hogs from agricultural and urban areas at risk of damage from localized feral hog populations with lessons learned from the existing Feral Hog Eradication Pilot Program.

Firebreaks and Fuel Breaks.—The Committee recognizes that firebreaks and fuel breaks are efficient conservation measures that can be implemented by landowners to reduce the risk or intensity of wildfires and help firefighters by creating defensible areas. The Committee continues to encourage NRCS to promote and provide assistance to design and construct firebreaks and fuel breaks in areas and communities under heightened risk of woodland fires, consistent with the directive in P.L. 117–328.

Harmful Algal Blooms (HABs).—The Committee strongly supports NRCS's ongoing work to reduce nutrient loading from agricultural sources that can contribute to the growth of HABs. Funding shall be used for targeting watersheds where HABs pose a threat and implementing a variety of conservation systems to address all transport pathways of phosphorus and nitrogen from agricultural land. Conservation planning should prioritize fields or riparian areas with the highest risk of elevated phosphorus and/or nitrogen losses. The Committee encourages NRCS to use interagency agreements and cooperative agreements focused on innovative phosphorus or nitrogen removal strategies where agricultural runoff has contributed nutrients to a waterbody. Such work shall be conducted in consultation with NIFA and ARS.

Lake Erie Basin.—The Committee is aware that the Western Lake Erie Basin Initiative (WLEB) is vital to researching and conserving one of our country's precious freshwater sources, Lake Erie. Increased levels of HABs continue to plague the lake due to shallow depths, increased nitrogen and phosphorus levels, and other contributing factors. The Committee encourages NRCS to work with locally engaged academic institutions that have worked with WLEB to review the work done by WLEB, compare Lake Erie Basin's water quality, including chemical, physical, and biological characteristics, over the past decade, detail what efforts could and are being made to improve the quality, and study the point of origin of run off into the lake. Further, the Committee directs NRCS

to make research done on WLEB publicly available and to provide a briefing on its findings and efforts within 180 days of enactment.

Microbial Soil Amendments.—The Committee recognizes that research and data show that biodiverse microbial soil amendments have a positive impact on soil health. The Committee encourages USDA to support the expanded use of these biologic soil health solutions across a broad range of programs, including the Environmental Quality Incentives Program, to address soil health benefits related to yield increase, advanced root development, input efficiency, improved water efficacy, catastrophic soil damage restoration, and catalysts to other soil health practices such as reduced tillage.

National Resource Inventory (NRI).—The Committee encourages NRCS to consider the feasibility of expanding the existing NRI system to include soil sampling and analysis on an annual rotating basis.

NRCS/Conservation Operations.—The Committee recognizes that conservation of wildlife habitat on private lands is essential for the recovery of many threatened and endangered species. While Federal programs that provide direct conservation assistance can be important contributors to species recovery efforts, such programs might not be available to, or appropriate for, all private landowners. Private landowners interested in habitat conservation must be empowered with access to the full range of conservation resources that exist across the Federal government, state and local governments, non-profit organizations, and private entities. The Committee encourages NRCS to provide grants to, or enter into cooperative agreements with, non-profit organizations with expertise and experience in amalgamating and providing public access to information and resources pertaining to the conservation of wildlife habitat on private lands.

PFAS Soil Testing.—The Committee understands that soil testing for PFAS can be prohibitively expensive and encourages NRCS to utilize existing conservation practice standards for soil testing to assist producers in managing these costs.

Phragmites.—The Committee is concerned about the damage caused by phragmites in the Chesapeake Bay. The Committee provides \$1,000,000 for phragmite control and directs NRCS to work with relevant State agencies to provide funding and technical assistance to control phragmites in the Chesapeake Bay Watershed.

Resource Conservation and Development Councils (RC&Ds).—The Committee recognizes that RC&Ds have been valuable partners in conservation and encourages NRCS to continue working with local councils, as appropriate, to ensure conservation programs meet local resource needs.

Sage Grouse Initiative.—The Committee strongly supports NRCS's sage grouse conservation efforts. Through this initiative, NRCS provides technical and financial assistance to help landowners conserve sage grouse habitat on their land. The initiative is an integral part of efforts by Federal agencies, western States, and private landowners to help preclude the listing of the sage grouse as an endangered species.

White Oak Initiative.—White oak forests are critical for wildlife, biodiversity, and forest products, and without swift action by private landowners and land management agencies, there will be a

significant decline of white oak forests in the future. The Committee commends NRCS for its work to encourage white oak conservation and promote white oak reforestation practices and encourages NRCS to expand and coordinate these efforts across its programs with the U.S. Forest Service.

WATERSHED AND FLOOD PREVENTION OPERATIONS

2024 appropriation	\$35,000,000
2025 budget estimate	70,000,000
Provided in the bill	20,000,000
Comparison:	
2024 appropriation	- 15,000,000
2025 budget estimate	- 50,000,000

COMMITTEE PROVISIONS

For the Watershed and Flood Prevention Operations (WFPO), the Committee provides an appropriation of \$20,000,000.

The Committee notes that the Watershed and Flood Prevention Operations received \$500,000,000 in the Infrastructure Investment and Jobs Act (P.L. 117-58) and has significant unobligated balances available.

Watershed Backlogs.—The Committee remains concerned about delays with some Watershed and Flood Prevention Operations projects and the impact such delays have on local communities. The Committee urges NRCS to balance the needs of addressing the project backlog, remediation of existing structures, and new projects by prioritizing those projects which mitigate the greatest flood risks to public safety, consistent with the directive in P.L. 117-328.

Watershed Scale Planning.—The Committee supports expanded capacity for USDA to engage in watershed level planning and program implementation through basin and landscape scale initiatives such as the Gulf Hypoxia Action Plan, the Mississippi River Basin Healthy Watersheds Initiative, the National Water Quality Initiative, and the Regional Conservation Partnership Program. The Committee directs the Secretary to continue cooperation with other Federal agencies to improve water quality in these basins and watersheds, including the Environmental Protection Agency, the Fish and Wildlife Service, and the Army Corps of Engineers, and recognizes the importance of cooperative partnerships with non-governmental organizations and the private sector, such as those joining the American rice industry and conservation groups.

WATERSHED REHABILITATION PROGRAM

2024 appropriation	\$1,000,000
2025 budget estimate	2,003,000
Provided in the bill	10,000,000
Comparison:	
2024 appropriation	+9,000,000
2025 budget estimate	+7,997,000

COMMITTEE PROVISIONS

For the Watershed Rehabilitation Program, the Committee provides an appropriation of \$10,000,000.

The Committee notes that the Watershed Rehabilitation program received \$118,000,000 in the Infrastructure Investment and Jobs

Act (P.L. 117–58) and has significant unobligated balances available.

High-Hazard Dams.—The Committee recognizes the large backlog of community infrastructure projects eligible for financial and technical assistance through the Watershed Rehabilitation Program to address safety concerns, public health, and environmental impacts of aging dams. The Committee urges NRCS to prioritize the rehabilitation of dams that pose the greatest risk to public safety.

CORPORATIONS

FEDERAL CROP INSURANCE CORPORATION FUND

2024 appropriation	\$15,484,000,000
2025 budget estimate	14,710,000,000
Provided in the bill	14,710,000,000
Comparison:	
2024 appropriation	– 774,000,000
2025 budget estimate	– – –

COMMITTEE PROVISIONS

For the Federal Crop Insurance Corporation Fund, the Committee provides an appropriation of such sums as may be necessary (estimated to be \$14,710,000,000).

COMMODITY CREDIT CORPORATION FUND

REIMBURSEMENT FOR NET REALIZED LOSSES

(INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	\$12,438,000,000
2025 budget estimate	12,650,463,000
Provided in the bill	12,650,463,000
Comparison:	
2024 appropriation	+212,463,000
2025 budget estimate	– – –

COMMITTEE PROVISIONS

For Reimbursement for Net Realized Losses to the Commodity Credit Corporation, the Committee provides such sums as may be necessary to reimburse for net realized losses sustained but not previously reimbursed (estimated to be \$12,650,463,000).

HAZARDOUS WASTE MANAGEMENT

(LIMITATION ON EXPENSES)

2024 limitation	(\$15,000,000)
2025 budget estimate	(15,000,000)
Provided in the bill	(15,000,000)
Comparison:	
2024 limitation	– – –
2025 budget estimate	– – –

COMMITTEE PROVISIONS

For Hazardous Waste Management, the Committee provides a limitation of \$15,000,000.

The Committee directs the Hazardous Materials Management Program and the Hazardous Waste Management Program to coordinate their work to ensure there is no duplication.

TITLE III

RURAL DEVELOPMENT PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR RURAL DEVELOPMENT

2024 appropriation	\$1,620,000
2025 budget estimate	1,658,000
Provided in the bill	800,000
Comparison:	
2024 appropriation	– 820,000
2025 budget estimate	– 856,000

COMMITTEE PROVISIONS

For the Office of the Under Secretary for Rural Development (RD), the Committee provides and appropriation of \$800,000.

Coastal Infrastructure.—The Committee recognizes that severe weather, coastal erosion, and tsunami risk pose significant threats to coastal tribes’ essential infrastructure. The Committee encourages Rural Development to work across all mission areas and offices to optimize opportunities that provide technical and financial assistance to distressed rural and tribal communities to support infrastructure resilience activities and protect rural economies from environmental and natural disaster risk and vulnerabilities.

Construction Management.—The Committee intends to provide local governments and local utilities with the necessary tools to maximize federal investments and encourages USDA to allow local governments and units of local governments to utilize Construction Management services in addition to traditional design-build services within all USDA-funded construction and infrastructure projects. Construction Management services provide a level of expertise and experience that many rural communities and governmental units lack and can ensure a more efficient and cost-effective project execution during the construction process.

Persistent Poverty Areas.—The Committee supports targeted investments in impoverished areas. The Committee urges USDA to implement measures to increase the share of investments in persistent poverty counties, distressed communities, and any other impoverished areas. The Committee directs USDA to define performance measures, increase capacity to collect and analyze data, evaluate data sets, and develop a report to the Committee on how investments in persistently poor communities have improved economic outcomes.

Rural Business Investment Program.—The Committee recognizes the implementation of the Rural Business Investment Program (RBIP) and the RBIP Operational Assistance Grants for leveraged Rural Business Investment Companies (RBIC) did not meet the desired outcomes. The Committee requests the Department report to the Committee within 270 days of enactment of this Act an analysis identifying why the programs did not succeed and the potential for other avenues of similarly leveraged funds for rural businesses.

Streamlining Applications.—The Committee recognizes GAO Report 21–579, which found that HUD, EDA, and USDA have similar requirements for stakeholder engagement, strategic planning, and application requirements for State and local organizations applying for economic development programs. Per the report, while HUD and EDA have a written agreement to align requirements and issue joint guidance to streamline the application process, USDA does not have such a report. The Committee urges USDA to work with EDA and HUD to evaluate economic development programs and, where feasible, enter into such an interagency agreement. The Committee looks forward to reviewing the report requested in House Report 118–124.

Sustainable Aviation Fuel (SAF).—The Committee notes that SAF has the potential to decarbonize the aviation industry by utilizing several feedstocks such as ethanol, soy, tallow, wood biomass, agricultural residue, and cover crops. The cultivation of these feedstocks could provide a significant economic opportunity in rural communities across the nation. While there is significant demand by global air carriers, the Committee believes more volume is needed to produce 3 billion gallons by 2030. The 9003 Program at the Department has significant potential to scale up the volume of SAF by providing loans and financial support to burgeoning enterprises in rural America. The Committee directs the Secretary to provide a report to Congress that includes 9003 program loan metrics and alternative actions that could accelerate and scale SAF Research and Development and biorefinery construction.

Uninhabited Properties.—The Committee recognizes the demand for affordable rural housing and is concerned about federal funding supporting uninhabited properties. The Committee directs the agency to provide a report within 180 days of enactment of this Act outlining how many Rural Development housing properties are uninhabited and in foreclosure or real estate owned (REO), the number of foreclosure sales that have taken place within the previous three fiscal years, amount spent on taxes, mortgage, and insurance for uninhabited properties in foreclosure or REO.

RURAL DEVELOPMENT
SALARIES AND EXPENSES
(INCLUDING TRANSFERS OF FUNDS)

	FY 2024 enacted	FY 2025 estimate	Committee provision
Appropriations	\$351,087,000	\$428,206,000	\$344,087,000
Transfers from:			
Rural Housing Insurance Fund Program Account	412,254,000	412,254,000	412,254,000
Rural Development Loan Fund Program Account	4,468,000	4,468,000	4,468,000
Rural Electrification and Telecommunications Loan Program Account	33,270,000	33,270,000	33,270,000
Total, RD Salaries and Expenses	\$801,079,000	\$878,198,000	\$794,079,000

COMMITTEE PROVISIONS

For Rural Development, Salaries and Expenses, the Committee provides an appropriation of \$344,087,000. The Committee does not include any resources for the Rural Partners Network.

RURAL HOUSING SERVICE
RURAL HOUSING INSURANCE FUND PROGRAM ACCOUNT
(INCLUDING TRANSFERS OF FUNDS)

[Dollars in thousands]

	Loan level	Subsidy level	Administrative expenses
2024 Appropriation	\$26,405,000	\$152,430	\$412,254
2025 Budget Estimate	31,800,501	312,316	412,254
Provided in the Bill	26,453,500	171,486	412,254
Comparison:			
2024 Appropriation	+48,500	+19,056	---
2025 Budget Estimate	-5,347,001	-140,830	---

COMMITTEE PROVISIONS

For the Rural Housing Insurance Fund program account, the Committee provides a loan level of \$26,453,500,000. The Committee does not provide the authority or resources for ending the recapture requirement for Section 502 direct loans.

Farm Labor Housing.—The Committee urges the Secretary to better utilize available data on demand for the Farm Labor Housing program such as systematically reviewing local areas, further analyzing occupancy data on a statewide, regional, or national level, and collecting application information so that available funding is directed to areas of greatest need. The Committee also encourages the USDA, in collaboration with other relevant federal agencies including the Department of Labor, to analyze data related to the different agricultural industries on the different housing types appropriate to accommodate the housing needs of permanent or seasonal farmworkers.

Rural Housing Preservation.—The Committee appreciates RD efforts to ensure Section 515 and Section 514 properties with maturing mortgages or owners pre-paying their mortgage remain affordable. The Committee encourages RD to take additional steps to streamline the approach to housing preservation and affordability, including working closely with nonprofits and local housing authority buyers committed to preservation and affordability. The Committee recognizes the urgent need to preserve rural affordable housing units. To assist the facilitation of transfers, the Committee encourages USDA to prioritize no more than fifty percent of Section 515 and Section 514 funds for use by public bodies or non-profit organizations or their affiliates (any limited partnership in which the general partner is a nonprofit entity with a principal purpose of providing affordable housing) to acquire and rehabilitate properties financed under sections 514 and 515 to retain long-term use by eligible households.

The following table reflects the loan levels for the Rural Housing Insurance Fund program account:

[Dollars in thousands]

	FY 2024 enacted	FY 2025 estimate	Committee provision
Rural Housing Insurance Fund Loans:			
Direct	\$880,000	\$1,250,000	\$950,000
Native American Re-Lending Demonstration Program	5,000	7,501	5,000
Unsubsidized Guaranteed	25,000,000	30,000,000	25,000,000

(Dollars in thousands)

	FY 2024 enacted	FY 2025 estimate	Committee provision
Housing Repair (sec. 504)	25,000	28,000	18,000
Rental Housing (sec. 515)	60,000	70,000	48,000
Multi-family Guaranteed (sec. 538)	400,000	400,000	400,000
Site Development Loans	5,000	5,000	5,000
Credit Sales of Acquired Property	10,000	10,000	10,000
Self-help Housing Land Development Fund	5,000	5,000	5,000
Farm Labor Housing	15,000	25,000	12,500
Total, Loan Authorization	\$26,405,000	\$31,800,501	\$26,453,500

The following table reflects the costs of loan programs under credit reform:

ESTIMATED LOAN SUBSIDY AND ADMINISTRATIVE EXPENSES LEVELS

(Dollars in thousands)

	FY 2024 enacted	FY 2025 estimate	Committee provision
Single Family Housing (sec. 502):			
Direct	\$84,480	\$174,000	\$112,100
Native American Re-Lending Demonstration Program	2,288	3,704	2,469
Housing Repair (sec. 504)	4,338	5,992	3,852
Rental Housing (sec. 515)	20,988	27,713	19,003
Multifamily Housing Revitalization	34,000	90,000	28,000
Farm Labor Housing	5,222	9,690	4,845
Site Development (sec. 524)	477	491	491
Self-Help Land (sec. 523)	637	726	726
Total, Loan Subsidies	152,430	312,316	171,486
Farm Labor Housing Grants	7,500	10,000	---
RHIF Expenses:			
Administrative Expenses	\$412,254	\$412,054	\$412,254

RENTAL ASSISTANCE PROGRAM

2024 appropriation	\$1,608,000,000
2025 budget estimate	1,690,376,000
Provided in the bill	1,684,376,000
Comparison:	
2024 appropriation	+76,376,000
2025 budget estimate	-6,000,000

COMMITTEE PROVISIONS

For the Rental Assistance Program, the Committee provides an appropriation of \$1,684,376,000. This provides the estimated amount to fully fund the program. The Committee rejects the proposal to merge the housing vouchers program into this account.

RURAL HOUSING VOUCHER ACCOUNT

2024 appropriation	\$48,000,000
2025 budget estimate	54,000,000
Provided in the bill	54,000,000
Comparison:	
2024 appropriation	+6,000,000
2025 budget estimate	---

COMMITTEE PROVISIONS

For the Rural Housing Voucher Account, the Committee provides an appropriation of \$54,000,000.

MUTUAL AND SELF-HELP HOUSING GRANTS

2024 appropriation	\$25,000,000
2025 budget estimate	32,000,000
Provided in the bill	20,000,000
Comparison:	
2024 appropriation	- 5,000,000
2025 budget estimate	- 12,000,000

COMMITTEE PROVISIONS

For the Mutual and Self-Help Housing program, the Committee provides an appropriation of \$20,000,000.

RURAL HOUSING ASSISTANCE GRANTS

2024 appropriation	\$35,000,000
2025 budget estimate	46,000,000
Provided in the bill	20,000,000
Comparison:	
2024 appropriation	- 15,000,000
2025 budget estimate	- 26,000,000

COMMITTEE PROVISIONS

For the Rural Housing Assistance Grants program, the Committee provides an appropriation of \$20,000,000, including \$8,000,000 for rural housing preservation grants.

RURAL COMMUNITY FACILITIES PROGRAM ACCOUNT

(INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	\$18,000,000
2025 budget estimate	62,000,000
Provided in the bill	493,230,000
Comparison:	
2024 appropriation	+475,230,000
2025 budget estimate	+431,230,000

COMMITTEE PROVISIONS

For the Rural Community Facilities Program Account, the Committee provides an appropriation of \$493,230,000.

Workforce Housing.—The Committee understands the need for dormitories for firefighters, first responders, and rural healthcare facilities to temporarily house employees and the value this provides to communities. The Committee notes that the Community Facilities program permits the construction of congregate housing, as it is not considered standard housing, and directs USDA to examine opportunities within the Community Facilities program to permit the construction of dormitories for firefighters, first responders, and rural healthcare facilities.

The following table provides the Committee’s recommendations as compared to the budget request:

(Dollars in thousands)

	FY 2024 enacted	FY 2025 estimate	Committee provision
Loan Levels:			
Community Facility Direct Loans	(\$2,800,000)	(\$1,250,000)	(\$1,000,000)
Community Facility Guaranteed Loans	(650,000)	(650,000)	(650,000)
Subsidy and Grants:			
Direct Loan Subsidy			11,200
Community Facility Grants	5,000	32,000	472,030

(Dollars in thousands)

	FY 2024 enacted	FY 2025 estimate	Committee provision
Rural Community Development Initiative	5,000	6,000	4,000
Tribal College Grants	8,000	10,000	6,000
Total, Rural Community Facilities Program Subsidy and Grants	\$18,000	\$62,000	\$493,230

RURAL BUSINESS—COOPERATIVE SERVICE

RURAL BUSINESS PROGRAM ACCOUNT

2024 appropriation	\$66,615,000
2025 budget estimate	54,500,000
Provided in the bill	26,400,000
Comparison:	
2024 appropriation	- 40,215,000
2025 budget estimate	- 28,100,000

COMMITTEE PROVISIONS

For the Rural Business Program Account, the Committee provides an appropriation of \$26,400,000.

The Committee provides resources to operate programs under the Rural Business-Cooperative Service (RBS). RBS programs complement lending activities of the private sector by promoting economic prosperity in rural communities through improved access to capital and economic development on a regional scale.

Arts in Rural Communities.—The Committee recognizes the valuable role of the arts in the economic and community development of rural communities across the country. In providing grants and assistance under this title, RD shall continue to support individuals, nonprofits, and small businesses in the arts through these traditional economic development tools, including business incubators, and economic development planning and technical assistance.

Categorical Exclusions.—The Committee acknowledges the Fiscal Responsibility Act provided certain flexibilities designed to speed up the loan delivery process. The Committee urges the Department to review its current approach and consider that certain projects or loans are not subject to Section 106 review. Adopting these flexibilities, as other Federal agencies have, may assist in eliminating delays, undue burdens and costs on applicants.

Infant Formula.—The Committee remains concerned about infant formula shortages and supply chain fragility for sole source nutrition for babies. The Committee encourages USDA to ensure that small infant formula manufacturers in rural areas are aware of their eligibility for the Business & Industry Loan Guarantees Program and the Food Supply Chain Expansion Loan Program. This inclusion will help prevent future infant formula shortages by supporting the diversification of U.S.-based infant formula manufacturers and helping bolster domestic production capabilities.

Meat and Poultry Processing.—The Committee encourages USDA to promote geographic diversity in distributing awards through the Meat and Poultry Processing Program and to consider regions that need additional processing capacity and have yet to receive awards through the Meat and Poultry Processing Expansion Program. The Committee encourages the Department to expedite the implemen-

tation of the program, including grants to processors of invasive, wild-caught catfish as indicated in Section 755 of P.L. 118–42.

The following programs are included in the bill for the Rural Business Program account \$4,000,000 for Federally Recognized Native American Tribes, of which \$250,000 is for transportation technical assistance.

The following table provides the Committee’s recommendations as compared to the budget request:

(Dollars in thousands)

	FY 2024 enacted	FY 2025 estimate	Committee provision
Loan Levels:			
Business and Industry Guaranteed Loans	(\$1,600,000)	(\$2,250,000)	(\$2,200,000)
Subsidy and Grants:			
Business and Industry Guaranteed Loans	38,080	4,500	4,400
Rural Business Development Grants	20,535	37,000	18,000
Rural Innovation Stronger Economy Grants	---	4,000	---
Delta Regional Authority/Appalachian Regional Commission/Northern Border Regional Commission	8,000	9,000	4,000
Total, Rural Business Program Subsidy and Grants ..	\$66,615	\$54,500	\$26,400

**INTERMEDIARY RELENDING PROGRAM FUND ACCOUNT
(INCLUDING TRANSFER OF FUNDS)**

(Dollars in thousands)

	Loan level	Subsidy level	Administrative expenses
2024 Appropriation	\$10,000	\$3,035	\$4,468
2025 Budget Estimate	18,890	6,434	4,468
Provided in the Bill	9,000	3,065	4,468
Comparison:			
2024 Appropriation	- 1,000	+30	---
2025 Budget Estimate	- 9,890	- 3,369	---

COMMITTEE PROVISIONS

For the Intermediary Relending Program Fund Account, the Committee provides for a loan level of \$9,000,000.

For the loan subsidy, the Committee provides an appropriation of \$3,065,000. In addition, the Committee provides \$4,468,000 for administrative expenses.

RURAL ECONOMIC DEVELOPMENT LOANS PROGRAM ACCOUNT

2024 appropriation	\$75,000,000
2025 budget estimate	75,000,000
Provided in the bill	75,000,000
Comparison:	
2024 appropriation	---
2025 budget estimate	---

COMMITTEE PROVISIONS

For the Rural Economic Development Loans Program Account, the Committee provides for a loan level of \$75,000,000.

RURAL COOPERATIVE DEVELOPMENT GRANTS

2024 appropriation	\$24,600,000
2025 budget estimate	28,300,000
Provided in the bill	16,600,000
Comparison:	
2024 appropriation	- 8,000,000
2025 budget estimate	- 11,700,000

COMMITTEE PROVISIONS

For Rural Cooperative Development Grants, the Committee provides an appropriation of \$16,600,000.

This total includes \$2,800,000 for a cooperative agreement for the Appropriate Technology Transfer for Rural Areas program and \$5,000,000 for the Value-added Agricultural Product Market Development Grant Program under the Local Agriculture Market Program in the 2018 Farm Bill.

Value-Added Producer Grants (VAPG).—The Committee recognizes that VAPG enables small and medium-sized farms to improve farm viability by accessing growing value-added markets and encourages USDA to promote awareness among potential applicants of the availability of VAPG funds for eligible projects that modify animal housing systems to comply with state requirements or facilitate the sale of compliant products to new markets.

RURAL MICROENTREPRENEUR ASSISTANCE PROGRAM

2024 appropriation	\$5,000,000
2025 budget estimate	6,518,000
Provided in the bill	5,000,000
Comparison:	
2024 appropriation	---
2025 budget estimate	- 1,518,000

COMMITTEE PROVISIONS

For the Rural Microentrepreneur Assistance Program (RMAP), the Committee provides an appropriation of \$5,000,000.

RMAP provides loans and grants to non-profit organizations, community based financial institutions, and local economic development councils, which in turn provide technical assistance services and microloans to rural owner-operated small businesses and aspiring entrepreneurs.

RURAL ENERGY FOR AMERICA PROGRAM

2024 appropriation	(\$50,000,000)
2025 budget estimate	(1,000,000,000)
Provided in the bill	(100,000,000)
Comparison:	
2024 appropriation	+(50,000,000)
2025 budget estimate	- (900,000,000)

COMMITTEE PROVISIONS

For the Rural Energy for America Program, the Committee provides a loan authorization level of \$100,000,000 to make loans as authorized by section 9007 of the Farm Security and Rural Investment Act of 2002 (7 U.S.C. 8107) to farmers, ranchers, and rural small businesses to assist with purchasing renewable energy systems and making energy efficiency improvements.

RURAL UTILITIES SERVICE
RURAL WATER AND WASTE DISPOSAL PROGRAM ACCOUNT
(INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	\$595,972,000
2025 budget estimate	794,850,000
Provided in the bill	496,716,000
Comparison:	
2024 appropriation	- 99,256,000
2025 budget estimate	- 298,134,000

COMMITTEE PROVISIONS

For the Rural Water and Waste Disposal Program Account, the Committee provides an appropriation of \$496,716,000.

Rural areas continue to face immense needs and challenges in attaining safe and clean water, and this program provides targeted and coordinated support for these communities and is essential for the delivery of safe, dependable, and affordable water and wastewater to rural America.

The following table provides the Committee’s recommendations as compared to the budget request:

[Dollars in thousands]

<hr/>			
Loan Levels:			
Water and Waste Direct Loans	(\$860,000)	(\$1,370,000)	(\$860,000)
Water and Waste Guaranteed Loans	(50,000)	(50,000)	(50,000)
Subsidy and Grants:			
Direct Subsidy	73,670	145,850	88,924
Water and Waste Revolving Fund	1,000	1,000	1,000
Rural Decentralized Water System Grants	5,000	5,000	4,000
Grants for the Colonias and AK/HI	65,000	66,000	20,000
Water and Waste Technical Assistance Grants	35,000	38,000	30,000
Circuit Rider Program	21,817	25,000	21,817
Solid Waste Management Grants	4,000	4,000	4,000
High Energy Cost Grants	8,000	-	-
Water and Waste Disposal Grants	372,485	385,000	316,975
306A(i)(2) Grants	10,000	15,000	10,000
Total, Subsidies and Grants	\$595,972	\$794,850	\$496,716
<hr/>			

Circuit Rider Program.—The Committee encourages USDA to ensure critically needed assistance under the Circuit Rider Program is appropriately targeted to communities in persistent poverty counties.

Domestic Preference.—The bill includes language specifying that RUS’ Rural Water and Waste Disposal program account projects utilizing iron and steel shall use iron and steel products produced in the United States. RUS shall apply the EPA’s definition of public water systems while implementing the domestic preference provision.

**RURAL ELECTRIFICATION AND TELECOMMUNICATIONS
LOANS PROGRAM ACCOUNT
(INCLUDING TRANSFER OF FUNDS)**

[Dollars in thousands]

	Loan level	Subsidy level	Administrative expenses
2024 Appropriation	\$7,970,000	\$42,568	\$33,270
2025 Budget Estimate	6,599,437	47,696	33,270
Provided in the Bill	8,095,000	42,140	33,270
Comparison:			
2024 Appropriation	+125,000	- 428	- - -
2025 Budget Estimate	+1,495,563	- 5,556	- - -

COMMITTEE PROVISIONS

For the Rural Electrification and Telecommunications Loans Program Account, the Committee provides a loan level of \$8,095,000. In addition, the Committee provides \$33,270,000 for administrative expenses.

The following table reflects the loan levels for the Rural Electrification and Telecommunications Loans Program Account:

[Dollars in thousands]

	FY 2024 enacted	FY 2025 estimate	Committee provision
Loan Authorizations			
Electric:			
Direct, FFB	\$2,167,000	\$2,167,000	\$2,167,000
Direct, Treasury	4,333,000	4,333,000	4,333,000

Broadband Program:			
Community Connect Grants	20,000	35,000	20,000

(Dollars in thousands)

	FY 2024 enacted	FY 2025 estimate	Committee provision
Broadband ReConnect Loans and Grants	100,385	112,500	105,842
Distance Learning and Telemedicine: Grants	49,574	60,000	35,469
Total, Loan Subsidy and Grants	\$169,959	\$207,400	\$161,311

COMMITTEE PROVISIONS

For the Distance Learning, Telemedicine, and Broadband Program, the Committee provides an appropriation of \$161,311,000.

The Committee commends USDA for providing in its most recent NOFO that funding should not be used in areas that are already largely served and should be focused in areas where at least 90% of households lack access. The Committee encourages USDA to continue to use the FCC's National Broadband Map as part of the process of identifying unserved and underserved areas. It is critical that USDA avoid efforts that could duplicate existing or planned broadband networks, including avoiding granting funding in areas where another provider already has received funding from another Federal, State or local funding program to build, has otherwise committed to a government entity to build, or has invested private risk capital to build in an area, even if construction is not yet commenced.

To avoid waste, funding should be given only to applicants that can and will follow through with their commitments, by prioritizing applications from applicants that have demonstrated the technical and financial experience required to construct and operate broadband networks.

To incentivize participation, applications should be as streamlined as possible, including allowing all providers to offer proof of financial capability through bond ratings instead of submitting financial documentation, and to offer collateral for loans as well as security for performance under grants using alternate forms of security instead of providing irrevocable letters of credit and a first lien on assets. Applications should only require the data strictly necessary to evaluate the application, and post-award burdens should be minimized.

Audit Requirements.—The Committee urges the Department to consider ReConnect awardees that are a publicly traded company and subject to the audit standards of the Public Company Accounting Oversight Board (PCAOB), accepting the financial statements audited in accordance with those standards in lieu of the requirements in 7 CFR 1773.

Broadband and Tribal Colleges and Universities.—The Committee encourages the Secretary to explore opportunities to expand broadband for 1994 Institutions (as defined in Sec. 532 of the Equity in Educational Land-Grant Status Act of 1994 (7 U.S.C. 301 note) under the Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.)). Stronger efforts are needed to support expansion and maintenance of broadband connectivity, including, but not limited to, equipment costs, maintenance of broadband systems, broadband infrastructure expansion, and ongoing broadband operations expenses directly related to 1994 Institutions broadband systems.

Evolving Broadband Technologies.—The Committee recognizes the evolving landscape in broadband deployment technology, including minimally disruptive, surface-level installation technologies that may be effective in getting service to hard-to-reach areas. The Committee urges USDA to engage with relevant stakeholders and consider all broadband installation technologies in program implementation.

Indian Country Broadband.—The Committee urges USDA to responsibly and efficiently take action to address broadband deficiencies through increased access and investments for broadband on rural tribal lands.

REAP Applications.—The Committee understands REAP applicants are supporting renewable energy projects in buildings that previously did not require insulation because prior operations generated sufficient heat, such as former mills. REAP applications currently require applicants to compare heating bills to demonstrate energy improvements have decreased bills. The Committee encourages the Agency to examine any changes to consider or support these projects.

ReConnect.—The Committee provides an additional \$100,000,000 for the ReConnect program to increase access to broadband connectivity in unserved and underserved rural communities, targeting areas of the country with the largest broadband coverage gaps, including those with mountainous terrain.

ReConnect Coordination.—The Committee recognizes the certain burdens facing small telecommunication providers in rural America that seek financial assistance through the ReConnect program. Rural broadband providers are community institutions that are leading the way to close the digital divide. Government assistance programs should not further complicate these small companies with costly applications and confusing regulatory compliance requirements. The Committee urges continued partnerships with other Federal agencies to review various Federal broadband program requirements in efforts to better understand program nuances and promote harmonization of Federal broadband application processes.

ReConnect Scoring Criteria.—The ReConnect program shall establish a scoring criterion that prioritizes serving the hardest to reach, unserved and underserved rural communities and shall not provide a scoring disadvantage based specifically upon the form of organization or commercial status of a broadband service provider

ReConnect Service Areas.—RUS Telecommunications Program funds should not be awarded in any areas, study areas or census blocks where a recipient of FCC High-Cost USF support is already subject to a buildout obligation of 25/3 Mbps or greater for fixed terrestrial broadband, except that RUS Telecommunication Program funds may be awarded in such areas to help finance construction of the network. This shall not apply in cases where the FCC has not provided for final approval of an award of such funds.

Speed Standards.—The Committee supports the Federal Communications Commission's recent action to increase its benchmark for high-speed broadband service from 25/3 megabits per second (Mbps) to 100/20 Mbps. This update recognizes that consumer bandwidth needs are growing and sets a standard that reflects household usage today. The Committee urges USDA to consider

areas lacking access to internet service of 100/20 Mbps in fiscal year 2025, to provide consistency across federal programs and ensure that all rural consumers are receiving access to high-speed internet services.

TITLE IV
DOMESTIC FOOD PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR FOOD, NUTRITION AND
CONSUMER SERVICES

2024 appropriation	\$1,127,000
2025 budget estimate	1,416,000
Provided in the bill	800,000
Comparison:	
2024 appropriation	- 327,000
2025 budget estimate	- 616,000

COMMITTEE PROVISIONS

For the Office of the Under Secretary for Food, Nutrition, and Consumer Services, the Committee provides an appropriation of \$800,000.

The Committee is aware of USDA’s work to improve customer service through language access and to ensure applications are available in multiple languages and requests an update on such activities.

Cultural Foods.—The Committee encourages FNS within 180 days of enactment of this Act to make recommendations to include more cultural food options in domestic food programs.

Local Food.—The Committee encourages all nutrition programs, to the extent feasible, to explore innovative ways to procure food directly from local producers. The Committee also encourages the Department of Defense and FNS to review current practices to identify opportunities to increase local food purchases in the Fresh Fruit and Vegetable Program.

Public Release of Information.—The Committee directs FNS to continue making all policy documents related to the WIC program, including, but not limited to, instructions, memoranda, guidance, and questions and answers, available to the public within one week of their release to WIC State administrators.

FOOD AND NUTRITION SERVICE

CHILD NUTRITION PROGRAMS

(INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	\$33,266,226,000
2025 budget estimate	31,799,851,000
Provided in the bill	31,749,468,000
Comparison:	
2024 appropriation	- 1,516,758,000
2025 budget estimate	- 50,383,000

COMMITTEE PROVISIONS

For the Child Nutrition Programs, the Committee provides an appropriation of \$31,749,468,000.

Food Waste Education.—USDA’s nutrition programs reach nearly one in four Americans every day, including approximately 30 million children through school feeding programs. This provides a significant opportunity to increase public awareness of food loss and waste and ways to prevent it. The Committee encourages USDA to include food waste education and prevention information in all nutrition education materials geared toward teachers, students, and other program recipients.

Local School Wellness Policies.—Any difficulty in having access to healthy food amongst youth can cause significant issues, including poor physical health and eating disorders. The Committee requests a report within 120 days of the enactment of this Act on FNS’ progress to work with and inform State Education Agencies that obesity and eating disorder information can be included in local school wellness policies.

Pulse Crops.—The Committee encourages FNS to evaluate the acceptability and availability of pulse crops in the National School Lunch Program.

Summer Food Service Program.—The Committee supports FNS allowing State agencies to use non-congregate meal programs where necessary and encourages USDA to provide technical assistance funding for States to implement meal delivery options for children in rural areas. The funding should be prioritized for States interested in partnering with a non-profit entity that has experience in implementing meal delivery options in rural areas and to uphold program integrity as required.

Team Nutrition.—The Committee supports the nutritional health of school children and recognizes the need for additional support for schools to meet certain nutrition standards for school meals, particularly for sodium and whole grains. The Committee encourages FNS to help schools meet these targets and directs FNS to report on the use of funds to assist schools.

The Committee provides the following for Child Nutrition Programs:

TOTAL OBLIGATIONAL AUTHORITY

(Dollars in thousands)

School lunch program	\$14,500,000
School breakfast program	6,409,860
Child and adult care food program	4,432,743
Summer food service program	878,304
Summer EBT Benefits	2,635,052
Special milk program	6,668
State administrative expenses	746,385
Commodity procurement	1,960,069
Team Nutrition	18,004
Food safety education	4,196
Coordinated review	10,000
Computer support and processing	41,238
CACFP training and technical assistance	50,996
Child Nutrition Program studies and evaluations	21,005
Child Nutrition payment accuracy	15,515
Farm to school tactical team	6,433
School meals equipment grants	10,000
Farm to School grants	3,000
Total	\$31,749,468

SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS,
AND CHILDREN (WIC)

2024 appropriation	\$7,030,000,000
2025 budget estimate	7,697,000,000
Provided in the bill	7,235,000,000
Comparison:	
2024 appropriation	+205,000,000
2025 budget estimate	-462,000,000

COMMITTEE PROVISIONS

For the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), the Committee provides an appropriation of \$7,235,000,000, which is increased to reflect the latest consumer price index.

USDA data shows WIC participation has declined since June of 2023 and remained flat in recent months. Birth rates also remain at an all-time low according to the Centers for Disease Control and Prevention (CDC). Furthermore, the Secretary has a WIC contingency reserve fund as a safety net to meet unexpected demand. The Committee will continue to monitor WIC participation, carryover funds, and food costs, and take additional action as necessary to ensure that funding provided in fiscal year 2025 remains sufficient to serve all eligible participants.

Milk Allowance in the WIC Food Package.—In the final rule entitled “Revisions to the WIC Food Packages,” USDA ignored the Congressional directive in the fiscal year 2024 explanatory statement directing the Secretary not to reduce the maximum monthly allowance for milk. The Dietary Guidelines for Americans (DGA) have identified dairy products as nutrient-dense while also noting that a high percentage of the U.S. population, including WIC’s at-risk population, are not consuming the recommended level of dairy. The Committee remains concerned about the reduction of the maximum monthly allowance with respect to milk in the final rule, and bill language is included to continue the previous recommended levels of dairy in the WIC program.

Scientific Review of the WIC Food Package.—The most recent edition of the DGAs has identified the early introduction of potentially allergenic foods to infants as a solution to prevent allergies later in life. In the next scientific review of the WIC infant food packages, the Committee directs the Secretary to include recommendations for the early introduction of potentially allergenic foods. The Committee also directs a review of WIC participant redemption data to understand the amount of nutrients being consumed across and within food categories. The Committee is concerned that there is a gap between actual nutrients consumed versus what is available through approved food packages. The Committee encourages the Department to use this information to help inform the next food package recommendations.

Zika Outreach and Education.—The Committee encourages USDA to continue its education and outreach efforts through the WIC program to provide pregnant women with the information they need to prevent Zika.

SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM

2024 appropriation	\$122,382,521,000
2025 budget estimate	123,324,961,000
Provided in the bill	123,160,159,000
Comparison:	
2024 appropriation	+777,638,000
2025 budget estimate	- 164,802,000

COMMITTEE PROVISIONS

For the Supplemental Nutrition Assistance Program, the Committee provides \$123,160,159,000. The total amount includes \$3,000,000,000 for a contingency reserve to be used only in the event and in the amount necessary. The Committee does not provide the requested increases within mandatory other program costs except for the increased support for IT infrastructure.

The Committee is aware that the Basic Allowance for Housing that members of the military receive is not excluded as income when calculating eligibility for SNAP and awaits the report on the effect of this policy.

Data Transparency.—Within the funds provided for mandatory other program costs, FNS is directed to collect a statistically significant sample of retail food store SNAP transaction data, including the cost and description of items purchased with SNAP benefits, to the extent practicable and without affecting retail food store document retention practices. The Committee notes the importance of modernizing data collection practices with verified purchase data to capture consumers natural purchase behavior. The Committee recognizes that every SNAP participant is different and that spending transparency would aid in the allocation of benefits.

National Accuracy Clearinghouse (NAC).—The Committee supports the full implementation of the NAC, which has been in operation in States since 2013 and uses a third-party electronic data matching system, data analytics, and public data to determine the correct State to issue SNAP benefits. This system enables States to efficiently and accurately identify intrastate and interstate matches of participants, preventing duplicative participation across multiple states. FNS is directed to rescind the interim final rule and enter into a single national contract to expand the real-time automated NAC to all 53 SNAP agencies.

SNAP Card Skimming.—The Committee remains concerned about the prevalence of SNAP benefit theft due to identity theft, card skimming, card cloning, and other fraudulent methods. The Committee is also concerned that Electronic Benefit Transfer (EBT) cards lack the proper security features necessary to protect against benefit theft. The Committee directs FNS to engage with State and local agencies and appropriate stakeholders to develop a more secure EBT card that contains innovative technologies to protect against benefit theft.

SNAP-Ed.—Within the funds provided for Nutrition Education and Obesity Prevention Grants, FNS is encouraged to work with Medicaid practitioners to provide nutrition education to their patients on the importance of a healthy diet to prevent negative health outcomes.

Further, when administering SNAP-Ed, the Committee encourages FNS and NIFA to prioritize evidence-based interventions that

include hands-on cooking paired with nutrition education. The Committee believes that SNAP–Ed grants should include cooking programs that deliver community-based nutrition education to SNAP-eligible families with the intention of helping households maximize their food budgets and prepare healthier meals.

SNAP Pilot.—In implementing the SNAP pilot, USDA is expected to consider proposals that restrict the purchase of non-nutritious food or beverage items based upon nutrient content rather than calories. USDA should prioritize proposals that also incentivize the purchase of fruits and vegetables with additional non-federal resources.

Territories.—The Committee recognizes the differences in assistance provided through Nutrition Assistance Program block grant funding for the Commonwealth of the Northern Mariana Islands, Puerto Rico, and American Samoa, compared to SNAP. The Committee encourages FNS to continue engaging the appropriate stakeholders and directs FNS to provide the Committee with updates on the separate plans and discussions to include these territories in SNAP.

The Committee provides the following for SNAP:

TOTAL OBLIGATIONAL AUTHORITY

(Dollars in thousands)

Benefits	\$108,730,689
Contingency reserve	3,000,000
Administrative costs:	
State administrative costs	6,040,792
Nutrition Education and Obesity Prevention Grant Program	538,000
Employment and Training	680,192
Mandatory other program costs	407,480
Discretionary other program costs	7,998
Administrative subtotal	7,674,462
Nutrition Assistance for Puerto Rico (NAP)	2,983,775
American Samoa	11,983
Food Distribution Program on Indian Reservations	242,000
TEFAP commodities	472,250
Commonwealth of the Northern Mariana Islands	35,000
Community Food Projects	5,000
Program access	5,000
Subtotal	3,755,008
Total	123,160,159

COMMODITY ASSISTANCE PROGRAM

2024 appropriation	\$480,070,000
2025 budget estimate	536,070,000
Provided in the bill	502,044,000
Comparison:	
2024 appropriation	+21,974,000
2025 budget estimate	– 34,026,000

COMMITTEE PROVISIONS

The Committee provides an appropriation of \$502,044,000 for the Commodity Assistance Program. This includes \$409,974,000 for the Commodity Supplemental Food Program, \$11,000,000 for the Farmers' Market Nutrition Program, \$80,000,000 for administrative funding for The Emergency Food Assistance Program (TEFAP),

and \$1,070,000 for the Food Donations Programs for Pacific Island Assistance.

TEFAP Handling and Distribution Costs.—In addition to grant funds supporting commodity handling and distribution costs, the bill permits States to use up to 20 percent of the funds provided for purchasing TEFAP commodities to help with the costs of storing, transporting, and distributing commodities. The Committee expects State agencies to consult with their emergency feeding organizations on the need for the conversion of such funds.

Kosher and Halal Foods in TEFAP.—USDA is encouraged to continue working to increase the purchase of Kosher and Halal food from food manufacturers with a Kosher or Halal certification and keep the Committee apprised of efforts to increase the number of kosher and halal certified products available.

Wild Game.—The Committee is aware that TEFAP regulations allow the use of administrative funds for the repackaging and processing of donated wild game. Some State agencies and eligible recipient agencies utilize a portion of annually allocated administrative funds for this purpose. The Farm to Food Bank Projects also allow funds to be used for wild game. The Committee urges FNS to ensure State agencies are aware of this option and work with State-based wild game hunger relief programs.

NUTRITION PROGRAMS ADMINISTRATION

2024 appropriation	\$177,348,000
2025 budget estimate	205,000,000
Provided in the bill	140,348,000
Comparison:	
2024 appropriation	– 37,000,000
2025 budget estimate	– 64,652,000

COMMITTEE PROVISIONS

For Nutrition Programs Administration, the Committee provides an appropriation of \$140,348,000.

Alcohol Recommendations in the Dietary Guidelines for Americans (DGA).—The Committee remains concerned about the removal of alcohol from the DGA process and allowing those without the scientific nutritional expertise to make recommendations on alcohol consumption among adults. Considering alcohol recommendations outside of the regular Dietary Guidelines Advisory Committee process, a decision made unilaterally and without any public notice or input, has significantly eroded confidence, transparency, and credibility of this separate process. Since 1980, alcohol recommendations have been included in the DGAs, and the Committee expects USDA and HHS to continue with previous practice.

TITLE V

FOREIGN ASSISTANCE AND RELATED PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR TRADE AND FOREIGN AGRICULTURAL AFFAIRS

2024 appropriation	\$932,000
2025 budget estimate	1,154,000
Provided in the bill	875,000
Comparison:	
2024 appropriation	- 57,000
2025 budget estimate	- 279,000

COMMITTEE PROVISIONS

For the Office of the Under Secretary for Trade and Foreign Agricultural Affairs, the Committee provides an appropriation of \$875,000.

OFFICE OF CODEX ALIMENTARIUS

2024 appropriation	\$4,922,000
2025 budget estimate	4,979,000
Provided in the bill	4,922,000
Comparison:	
2024 appropriation	- - -
2025 budget estimate	- 57,000

COMMITTEE PROVISIONS

For the Office of Codex Alimentarius, the Committee provides an appropriation of \$4,922,000.

FOREIGN AGRICULTURAL SERVICE

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

2024 Appropriation	\$227,330,000	\$6,063,000	\$233,393,000
2025 Budget Estimate	244,533,000	6,063,000	250,596,000
Provided in the bill	222,330,000	6,063,000	228,393,000
Comparison:			
2024 appropriation	- 5,000,000	- - -	- 5,000,000
2025 budget estimate	- 22,203,000	- - -	- 22,203,000

COMMITTEE PROVISIONS

For the Foreign Agricultural Service (FAS), the Committee provides an appropriation of \$222,330,000 and a transfer of \$6,063,000 for a total of \$228,393,000.

Outreach.—The Committee encourages FAS to conduct active outreach to HBCUs, HSIs, AANAPISIs, and any other MSI to raise awareness of FAS career opportunities. The Committee also encourages FAS to conduct listening sessions with current FAS officers from MSIs to assess any additional barriers applicants from these institutions face in entering FAS.

Ready-to-Use-Therapeutics (RUTF).—The Committee directs FAS, no later than 90 days after enactment of this Act, to provide a report on how existing funding may be used for the procurement of RUTFs to combat hunger and support domestic agriculture.

U.S. Commodities.—The Committee directs FAS to provide a report to the Committee no later than 180 days after the enactment of this Act detailing the agency’s barriers and efforts to maximize the purchase and use of U.S. commodities in the Food for Peace Title II and McGovern-Dole food programs.

FOOD FOR PEACE TITLE II GRANTS

2024 appropriation	\$1,619,107,000
2025 budget estimate	1,800,000,000
Provided in the bill	1,000,000,000
Comparison:	
2024 appropriation	– 619,107,000
2025 budget estimate	– 800,000,000

COMMITTEE PROVISIONS

For Food for Peace Title II grants, the Committee provides an appropriation of \$1,000,000,000.

The Committee notes significant unobligated balances remain available from the \$1,000,000,000 USDA transferred from the Commodity Credit Corporation for a new international food aid program that functionally will operate similar to Food for Peace Title II Grants. Further, the Committee is aware that USDA has over \$300,000,000 of unobligated carryover balances for Food for Peace Title II Grants.

Violence Against Women and Girls.—The Committee recognizes the impact of the ongoing hunger crisis on women and girls and the ways in which acute hunger and violence mutually compound each other. The Committee directs the Administrator to provide a report within 90 days of enactment on steps taken to address the increase in violence and food insecurity, including the feasibility of disaggregating data by sex and age in needs assessments and program reporting.

MCGOVERN–DOLE INTERNATIONAL FOOD FOR EDUCATION AND CHILD NUTRITION PROGRAM GRANTS

2024 appropriation	\$240,000,000
2025 budget estimate	243,331,000
Provided in the bill	240,000,000
Comparison:	
2024 appropriation	– – –
2025 budget estimate	– 3,331,000

COMMITTEE PROVISIONS

For McGovern-Dole International Food for Education and Child Nutrition Program Grants, the Committee provides an appropriation of \$240,000,000.

In addition to the donation of U.S. agricultural commodities, the Committee encourages USDA to leverage voluntary organizations, cooperatives, and intergovernmental organizations in supporting the expansion and creation of school-based feeding programs, food banks, feeding centers, and accompanying facilities and equipment.

COMMODITY CREDIT CORPORATION EXPORT (LOANS)
 CREDIT GUARANTEE PROGRAM ACCOUNT
 (INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	\$6,063,000
2025 budget estimate	6,063,000
Provided in the bill	6,063,000
Comparison:	
2024 appropriation	---
2025 budget estimate	---

COMMITTEE PROVISIONS

For administrative expenses of the Commodity Credit Corporation Export Loans Credit Guarantee Program Account, the Committee provides an appropriation of \$6,063,000.

TITLE VI

RELATED AGENCIES AND FOOD AND DRUG
 ADMINISTRATION

DEPARTMENT OF HEALTH AND HUMAN SERVICES

FOOD AND DRUG ADMINISTRATION

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

(Dollars in thousands)

	Appropriation	User fees	Total, FDA S&E
2024 Appropriation	\$3,522,150	\$3,199,632	\$6,721,782
2025 Budget Estimate	3,682,167	3,249,385	6,931,552
Provided in the bill	3,500,150	3,249,385	6,749,535
Comparison:			
2024 Appropriation	- 22,000	+49,753	+27,753
2025 Budget Estimate	- 182,017	---	- 182,017

For the Food and Drug Administration, the Committee provides \$3,500,150,000 in discretionary budget authority and \$3,249,385,000 in definite user fees for a total of \$6,749,535,000. The Committee recommendation does not include proposed user fees that are not authorized.

503A Pharmacy and 503B Outsourcing Facility Inspections.—The Committee is concerned about FDA inspection delays for pharmacies and outsourcing facilities, citing staffing and resource shortages as contributing factors. The Committee requests a report within 180 days of enactment of this Act detailing inspections and addressing resolution timelines for observation and warning letters.

Abraham Accords Region.—To help diversify and protect the American medical product and food supply chains, the FDA shall develop a plan in cooperation with the Secretary of State for expanding its international presence, including consideration of a physical office support of the Abraham Accords. FDA foreign offices provide advice and guidance on regulatory requirements for the safety and quality of FDA-regulated products for sale in the United States and, as appropriate, perform in-person inspections to verify that products exported to the United States meet the agency's re-

quirements. The plan shall consider required personnel and input from other relevant Federal agencies that would assist in facilitating interactions with nations of the Abraham Accords on issues relevant to the FDA. The Committee requests an update on the plan no later than 90 days after enactment of this Act.

Accelerated Approval Program.—The Committee continues to recognize the importance of and supports the FDA's continued use of the Accelerated Approval Pathways to provide patients with unmet medical needs access to new therapies, including ALS patients. The Committee is concerned that the application of the Accelerated Approval Pathway is not uniform between CDER and CBER. The Committee requests that FDA brief the Committee within 120 days of enactment of this Act detailing the steps the FDA can take to ensure the Accelerated Approval Pathways is being administered equally in both CDER and CBER. Further, the Committee urges FDA to clarify its guidance that when considering new therapies for Accelerated Approval, including in ALS, survivability is a clinical endpoint that will be considered, consistent with the current statute.

Access to Compounded Hormones.—As the FDA reviews recommendations from the National Academies of Sciences, Engineering, and Medicine (NASEM) report on the Clinical Utility of Compounded Hormones, the Committee urges FDA to engage with compounders and other stakeholders to help ensure access to compounded drugs for patients who need them.

Accountability for Unsafe Drug Products.—The Committee is troubled by reports of companies knowingly withholding research that showed their products had adverse health outcomes. The Committee awaits the briefing regarding the agency's surveillance and enforcement efforts to ensure accountability for companies that withhold material information concerning unsafe drug products.

Adverse Drug Events.—The Committee commends the FDA's initiatives to increase the number of women and minorities in clinical trials to represent their unique health needs, gather safety and efficacy information to inform proper product labeling, and prevent adverse drug events (ADEs), which are twice as high for women. The Committee looks forward to receiving the briefing requested in House Report 117–392 on the progress the FDA has made in examining past drug approvals with identified pharmacogenomic safety issues and developing strategies that may mitigate risks of ADE's. The Committee also looks forward to receiving the analysis of the data gathered and how it impacts clinical trials, what has and has not been effective, and recommended best practices for drug sponsors.

Allergen Labeling.—The Committee is concerned about the increase in the diagnosis of food allergies to new and emerging food allergens not currently required to be labeled as allergens, but recognizes that FDA currently lacks the authority to amend the list of major food allergens. The Committee encourages the FDA's Center for Food Safety and Applied Nutrition (CFSAN) to identify other food allergens for which labeling on food packaging as a non-major food allergen would be appropriate and implement a rule-making process toward such labeling on packaged foods.

Angelman Syndrome.—The Committee is informed of the promising research and development progress in the treatment of

Angelman syndrome (AS), a rare and devastating neurogenetic disorder. At the same time, there are significant challenges in developing sensitive outcome measures to use in clinical trials for potential therapies. The FDA advanced this field in 2017 through funding for a prospective natural history study in Angelman syndrome. The Committee strongly encourages the FDA to expand this support through rare disease grants regulatory, as appropriate. The Committee also recommends renewed FDA attention to expanding the assessment of Angelman syndrome clinical endpoints and novel biomarkers, in part based on the natural history background, and encourages broad data-sharing across the industry for this and other rare diseases in light of the limited size of patient populations.

Artificial Intelligence.—The Committee supports the steps FDA has taken to identify and oversee issues related to AI in drug development and urges the Commissioner to formalize a dedicated, cross-center team of experts in AI-enabled drug development. In establishing the AI Team, the Committee encourages the agency to engage internal and external experts with a deep understanding of machine learning algorithms, data preprocessing, predictive modeling, and model validation, and who can help inform the evaluation of the reliability and trustworthiness of AI models trained on complex biological datasets as resources permit. The Commissioner shall brief the Committee no later than 120–180 days after enactment of this act on any plans to formalize a team of experts on AI.

Alzheimer's Clinical Trials.—The Committee recognizes the need to advance innovative clinical trial designs to increase diversity in clinical trials for Alzheimer's disease. The Committee encourages FDA to increase efforts to make Alzheimer's clinical trials more inclusive and innovative and to conduct necessary outreach to under-represented populations.

Animal Drug Compounding.—As the Agency continues to implement Guidance for Industry (GFI) #256, Compounding Animal Drugs from Bulk Drug Substances, the Committee encourages the FDA to continue collaborating with stakeholder organizations, including State boards of pharmacy, pharmacy organizations, and accreditation bodies, to develop inspectional guidelines that are shared with the inspected pharmacies and allow for consistent application. Furthermore, the Committee encourages FDA to consult with practicing veterinarians and to adequately consider their concerns when evaluating nominations and making decisions for the List of Bulk Drug Substances for Compounding Office Stock Drugs for Use in Nonfood-Producing Animals.

Blood Donor Procedures.—The Committee continues to recognize the need for scientifically sound, evidence-based policy relative to FDA blood donor recommendations. The Committee expects the FDA to complete review of the evidence obtained from the ADVANCE study and encourages FDA to issue updated evidence-based blood donor recommendations. The Committee awaits the report requested in House Report 118–124 on the ongoing review, data being utilized to update guidelines, and its outreach and education to blood donation centers relating to its updated recommendations.

Blood Safety and Pathogen Reduction.—The Committee urges the FDA to modify guidance on screening for prospective plasma and

platelet donors when scientific evidence supports the use of FDA-approved pathogen reduction technology as an alternative to certain donor deferrals to adequately and appropriately reduce the risk of certain transfusion-transmitted infections and safeguard the blood supply.

Biosimilars.—The Committee urges the FDA to consider a single, shared system Risk Evaluation and Mitigation Strategies (REMS) for biosimilars and their reference products based on the risk messaging and profile that encourages cooperation among the REMS participants, while allowing adequate flexibility for REMS with different, but comparable elements, if appropriate. This may drive increased biosimilar development, expanded patient access, and provide savings for patients and the health care system. The Committee directs the FDA to provide a report to the Committees no later than 1200 days from the date of enactment of this Act.

Blood Supply Chain Task Force.—The Committee recognizes the challenges in ensuring a safe and available blood supply, which depends on a reliable supply chain of critical supplies and equipment. The Committee directs the Secretary to establish a taskforce, in conjunction with FDA, NIH, CDC, and private stakeholders, to study, review, and evaluate the supply chain to manufacture blood and blood components. Within 180 days of enactment, the Secretary shall submit a report on its strategic plan to develop a taskforce and how it will coordinate with relevant federal agencies to address blood supply chain issues to help predict and prevent shortages of supplies and equipment that may impact the safety and availability of the blood supply.

Breakthrough Therapies.—The Committee recognizes the increased interest and need to study psychedelics and qualified plant-based alternative therapies, and their potential therapeutic effects. The Committee encourages FDA to work with the DoD on leveraging clinical trials, as authorized by title 10 United States Code, chapter 55, to improve our understanding of psychedelics. The Committee also encourages FDA and DoD to work together in developing and supporting public-private collaborations to advance psychedelic research for therapeutic purposes.

Cannabidiol Oil Enforcement.—The Committee is concerned about the proliferation of products marketed in violation of the FFDCA, including products containing derivatives of the cannabis plant. The Committee is aware that non-FFDCA-compliant products pose potential health and safety risks to consumers through misleading, unsubstantiated, and false claims that cannabis and cannabis derivatives can treat serious and life-threatening diseases and conditions, including COVID-19 and cancer. Such products may also be contaminated with harmful substances.

The Committee recognizes FDA's use of existing authorities to undertake cannabis-related efforts, including research, requests for data, consumer education, issuance of guidance and policy around cannabis-based drug product development, and enforcement against wrongdoers. The Committee expects FDA to continue and increase these efforts given the proliferation of non-FFDCA-compliant, cannabis-containing products and the risks they pose to public health. The Committee also expects FDA to take enforcement action against the manufacturers of any cannabis products marketed with unlawful therapeutic claims to preserve the integrity of the

drug development and approval processes, which ensures that products, including cannabis-containing products, marketed as drugs have undergone a rigorous scientific evaluation to assure that they are safe, pure, potent, and effective for the diseases and conditions they claim to treat. It is also imperative that FDA continue to exercise its existing authorities to preserve incentives to invest in robust clinical study of cannabis so its therapeutic value can be better understood.

Cell Cultured Meat Labeling.—The Committee is aware that FDA has completed its first pre-market consultation for a human food made from cultured animal cells, the first action completed under the Formal Agreement Between the U.S. Department of Health and Human Services Food and Drug Administration and the U.S. Department of Agriculture Office of Food Safety (the “Formal Agreement”) announced on March 7, 2019. The Committee is interested in the internal FDA protocols related to pre-market consultations for cell-cultured protein products, specifically whether or not there are special or unique considerations made for these products in pre-market consultation processes under the Formal Agreement. The Committee awaits the report outlining the pre-market consultation process for cell-cultured protein products, noting any special accommodations made to comply with the Formal Agreement and any agency plans to coordinate with its counterparts at USDA on further action regarding the same products.

Clinical Trial Diversity.—The Committee supports FDA’s continued efforts to implement legislation and policies requiring study sponsors to submit a diversity action plan for phase 3 studies of new drugs. The Committee directs FDA to consider how it can flexibly use its authorities and to provide additional guidance to study sponsors regarding mechanisms to remedy inadequate progress as those study sponsors continue to work with FDA to overcome common barriers to participation, including restrictive eligibility criteria and limited enrollment outreach, particularly in rural or underserved areas. FDA is directed to provide a report to the Committee within 180 days of enactment of this Act on steps it can take to overcome barriers.

Compounding.—The Committee is concerned about recent drug shortages and considers patient access to critical medications a patient safety issue. The Committee recognizes the important role 503A state-licensed compounding pharmacies and 503B outsourcing facilities have played during shortages of drugs needed to treat COVID patients and subsequent shortages of children’s suspension drugs. The Committee urges the FDA to continue to utilize the regulatory flexibility given to the agency by Congress to quickly respond to drug shortages in the short term by allowing pharmacies and outsourcing facilities to safely compound those drugs and protect patient access until manufacturers are able to stabilize the supply chain and meet patient needs.

COVID Vaccine.—During the COVID–19 pandemic, FDA was able to rapidly make available a variety of safe and efficacious COVID–19 countermeasures which helped to significantly reduce burden of disease. However, the evolution of SARS–CoV–2 has reduced the efficacy of several products and is requiring health authorities to continuously examine potential updates, most notably to the strain composition and presentations of COVID–19 vaccines.

FDA has followed a strain selection process with timelines for updating COVID-19 vaccine composition. FDA should continue to follow a process whereby the agency recommends modifications to vaccine composition as needed and practical to take into account viral evolution, and whenever possible to provide all vaccine manufacturers, irrespective of manufacturing technology, the essential time needed to adapt their products accordingly and scale up production to mitigate potential risks associated with over-reliance on individual producers or manufacturing technology, thereby supporting the availability of COVID-19 vaccine options for healthcare providers and consumers. This strengthens the vaccine supply by mitigating risks associated with product recalls, supply chain disruptions, or changes to clinical guidance limiting use in a given population.

Dairy Standard of Identity.—The Committee is pleased that the FDA has begun a deliberative process to review how it will enforce the standards of identity for dairy products in the Code of Federal Regulations. The Committee continues to hear concerns with the labeling of certain foods and beverages as dairy products when the products are plant-based rather than derived from an animal. As such, the Committee urges the FDA to continue its work related to standards of identity for dairy products.

Device Inspections.—The U.S. imports nearly 40 percent of its needles and syringes from China and these devices have shown to have both quality and compatibility issues. The Committee urges FDA to increase its oversight and inspection of essential medical devices, particularly drug delivery devices and accessories, made in China. FDA is directed to provide a report to the Committee with short and long-term plans on increasing inspections of Chinese essential medical device facilities.

Device Remanufacturing Safety and Awareness.—The Committee recognizes that the FDA has authority over remanufacturing of devices but is concerned that the agency needs to increase public awareness of the requirements applicable to device remanufacturing. The Committee recognizes that the agency plans to publish a final guidance document on the remanufacturing of devices.

Dietary Supplements.—The Committee supports increased inspections and enforcement for high-priority supplements with a history of being tainted and bearing illegal claims, including, but not limited to, products marketed as supplements for weight loss, muscle, arthritis or pain, or diabetes.

Domestic Infant Formula Supply.—The Committee remains concerned about the fragility of the infant formula market in the United States, especially following the 2022 infant formula shortage crisis. The Committee encourages the FDA to streamline approval processes for small domestic manufacturers to increase and diversify the domestic supply of infant formula.

Donor Human Milk.—The Committee remains concerned over the lack of Federal oversight of the donor human milk supply and continues to encourage the Department to regulate donor human milk. At present, most human milk banks rely on self-generated screening, production, safety and quality guidelines even though human milk is a human tissue and carries the inherent risks associated with human tissue. The Committee encourages the Office of Critical Foods to ensure that donor human milk banks are reg-

istered and inspected on a routine basis, and that donor human milk is meeting the nutritional and safety needs of the babies who receive it by focusing on crucial aspects of food safety such as testing and nutritional labeling.

Epilepsy Medication.—The Committee recognizes certain products have gone through and received FDA approval with a product that contains cannabidiol. Section 760 of the bill accompanying this report does not affect that drug approval.

Essential Medicines List.—The Committee is concerned by the ongoing shortage of commonly used chemotherapeutic drugs, including cisplatin and carboplatin. These shortages have hurt cancer care, including, in some cases, care rationing. Reliable access to chemotherapeutic drugs is essential to cancer care. The Committee is concerned that the FDA has only included a single chemotherapeutic drug on its FDA Essential Medicines list.

FASTER Act.—The Committee recognizes the importance of enforcing the FASTER Act in a manner consistent with Congressional intent to protect those suffering from sesame allergies and clearly label sesame as an allergen on food products. The Committee is concerned by reports of companies circumventing the intent of the law by intentionally adding sesame to food products to avoid the cost of preventing cross-contamination.

Food Advisory Committees.—The Committee urges the FDA to reestablish the Food Advisory Committee as recommended in the Reagan-Udall Report. Advisory Committees are an important method to deliver necessary external information, insight, and expertise from outside of the Agency. Any renewed Advisory Committee shall be established to elevate external input to Human Foods Program activities, including from agriculture and food industry stakeholders.

Food Packaging Health and Safety.—The Committee recognizes the critical importance of cold-ship and protective packaging that comply with FDA requirements for intended use to ensure food safety and food security, and to promote public health. Packaging materials and solutions are specifically tailored to support the domestic and international distribution of agricultural products, meat, and seafood to minimize risks to public health and safety and, to the extent practicable, to extend shelf life and reduce food waste. The Committee urges the FDA to prioritize public health and safety and food waste prevention in any review of materials used to package, ship, and distribute food and agricultural products.

Foreign Unannounced Inspections Pilots.—The Committee continues to support the pilot. The Committee reminds FDA of direction included in the fiscal year 2022 bill on the Committee's intent for the use of these funds. The Committee directs FDA to provide quarterly briefings on its efforts to implement these funds in accordance with the Committee's intent.

Homeopathy.—The Committee appreciates many Americans use homeopathic medicines. Consumer safety and access to these products are best ensured by implementing a legal pathway that includes homeopathic-specific standards for the regulation of these medicines. The Committee understands FDA now takes the position that it is limited to enforcing pharmaceutical specific standards when taking enforcement action against products labeled as

homeopathic. FDAs interpretation of the law that all homeopathic medicines are unapproved new drugs that are illegally marketed has created confusion both for the homeopathic community and enforcement officials. The Committee urges the FDA to work with the homeopathic community regarding the regulation of these medicines.

HPV Self Sampling.—One in four women in the United States do not receive regular cervical cancer screenings, with more than half of cervical cancer diagnoses occurring in women who are not screened. While there are many barriers to screening, including, but not limited to, fear of the procedure, embarrassment, or lack of time or transportation. The Committee encourages FDA to exercise the use of regulatory authorities to expedite innovation related to at-home self-collection tests that could increase and expand access to screenings for women and address a persistent cancer health disparity for women who are never screened or under-screened.

Illicit Vapor Products.—The Committee continued to be deeply concerned that the CTP has not sufficiently or effectively prioritized the removal of unauthorized tobacco products from the market, including e-cigarettes and products containing synthetic nicotine, and has relied primarily on the issuance of warning letters, which often go ignored. The Committee directs the CTP to make every effort to expeditiously remove from the market those products that have failed to file a Premarket Tobacco Application by applicable deadlines or that are subject to a final and effective Market Denial Order. The Committee further directs the agency to seek speedy appropriate judicial relief against such manufacturers, in coordination with the Department of Justice, to ensure that such products are no longer available for sale and are removed from the market as required by the Act.

Insomnia.—The Committee encourages FDA to work with the Drug Enforcement Agency (DEA) to prioritize actions to expand access to insomnia treatments that greatly reduce the risk of addiction compared to other treatments on the market. The Committee understands that our servicemembers, veterans, and first responders have a higher-than-average prevalence of insomnia, and that DEA is currently undergoing a review to potentially deschedule the DORA class of insomnia treatments. FDA is encouraged to work swiftly to complete their Eight-Factor Analysis, potentially even analyzing the class concurrently with DEA to ensure that safer insomnia treatments get to those who need.

International Device Inspections.—The Committee is concerned about the impact of imported drugs and devices on overall health product availability and safety. The Committee encourages FDA to increase the frequency and rigor of international drug and device manufacturer inspections to be consistent with domestic manufacturer inspections.

International Mail Facilities.—The Committee supports continued efforts at International Mail Facilities on preventing controlled, counterfeit, or otherwise dangerous pharmaceuticals from entering the U.S. The Committee requests a report on all products refused import at international mail facilities by classifying such products as controlled or non-controlled drugs and further

classifying controlled or non-controlled drugs as counterfeit, misbranded, or unapproved.

Interstate Commerce.—The Committee is concerned that state legislative activity to ban FDA-approved food and color additives threatens both the FDA’s unified, science-based federal food safety system, and the interstate commerce of agricultural, food, and beverage goods. The Committee reaffirms the essential role the FDA plays in determining the safety of food and color additives in the nation’s food and beverage supply and encourages the FDA to clearly and actively communicate with the public and state legislatures the efforts it undertakes to protect public health from unsafe chemicals and the risks to the food supply and interstate commerce that would result without a unified, federal, science-based food safety system. The Committee requests that FDA provide a report 90 days after the enactment of this Act that details food and color additives that are under current FDA review and that FDA is otherwise prioritizing for future review, including the basis of potential safety concerns, the current status of the review, and a timeline of review for each additive.

Intoxicating Cannabidiols.—The Committee directs the FDA to evaluate the safety implications of ingestible, inhalable, or topical products on the market that contain intoxicating cannabinoids. FDA should provide a briefing to the committee within 180 days of the passage of this bill on the authorities needed to adequately regulate cannabinoid hemp products, including authorities to support consumer safety, such as labeling and adverse event reporting.

Listeria.—The Committee emphasizes reducing incidence of foodborne illness as an important public health goal and believes that coordinated and targeted resources are required to appropriately assess and combat the public health risks of foodborne pathogens. The Committee is aware that FDA is in the process of finalizing industry guidance regarding *Listeria monocytogenes* (Lm) in foods under their jurisdiction. The Committee directs FDA to apply a risk-based approach and direct its regulatory efforts toward high risk ready-to eat foods, those that support the growth of Lm. Additionally, the Committee expects FDA to incorporate current scientific knowledge regarding the public health impact of foods that do not support growth of Lm. Recently published scientific research from food safety and public health experts recommends a regulatory action level of Lm for these low-risk foods. This regulatory approach will encourage industry to adopt quantitative Lm testing schemes and facilitate robust environmental monitoring programs, ultimately resulting in reductions in disease incidence. The Committee directs FDA to work with industry stakeholders to gather supporting information and data to assist with implementation of this Lm approach. Policies reflecting these regulatory approaches align with other international regulatory standards and restore a level playing field for U.S. food processors in the global marketplace.

Laboratory Developed Tests.—The FDA’s final rule on Laboratory Developed Tests (LDTs) puts forth a proposed regulatory framework that is a significant shift in the way LDTs are regulated and changes expectations for patients, doctors, and laboratories for the first time since the Clinical Laboratory Improvement Amendments Act was passed in 1988 at the risk of greatly altering the United

States' laboratory testing infrastructure and reducing patient access to information that informs their healthcare decision making. The Committee directs the FDA to suspend its efforts to implement the rule and continue working with Congress to modernize the regulatory approach for LDTs.

Lupus.—The Committee is aware of barriers that have long affected the development of therapeutics for Lupus, a disease that primarily targets women and disproportionately impacts African Americans, Latinas, Native Americans, and Asian Americans. The Committee is pleased that potential Lupus treatments to address these barriers are now in clinical trials. The Committee urges FDA to expedite its ongoing work with the Lupus community to develop solutions to identified barriers that will accelerate development of new therapies.

Maternal Substance Use Disorders.—The Committee remains concerned about increasing numbers of overdose deaths of pregnant and postpartum women. The Committee encourages FDA to collaborate with the Substance Abuse and Mental Health Services Administration and relevant stakeholders on efforts to address maternal substance abuse disorder.

Marijuana Rescheduling.—The Committee is concerned about deviations from established drug scheduling evaluation standards in the FDA 2023 marijuana scheduling review. The Committee directs the HHS Inspector General to complete a report on the 2023 marijuana scheduling review including but not limited to: deviations from the established five-factor currently accepted medical use test, justification for a new, two-factor currently accepted medical use test and whether this will be the standard for all future reviews, use of a limited number of hand-selected comparator substances, and inclusion of research results that are not statistically significant or inconclusive. The Committee is concerned about reports of the mental health hazards of regular use of high-potency marijuana, particularly among adolescents. The Committee encourages the FDA to support research on high-potency marijuana and its effects on the adolescent brain, specifically regarding addiction and mental illness such as schizophrenia or psychosis.

Natural Cheese.—The Committee encourages FDA to clarify and define the category of natural cheese as cheese produced from animal milk or certain dairy ingredients and in accordance with established cheesemaking standards.

Neurological Conditions.—The Committee recognizes the important work to bring innovative treatments to people living with neurological conditions such as Guillain-Barre Syndrome (GBS), Chronic Inflammatory Demyelinating Polyneuropathy (CIDP), and Multifocal Motor Neuropathy (MMN) through strategic partnerships. The Committee notes the recent externally led patient-focused drug development meeting on CIDP and encourages FDA to continue its collaboration with relevant stakeholders and key regulators.

New Alternative Methods.—The Committee directs FDA to efficiently and expeditiously utilize existing funds to reduce animal testing and advance alternative methods in a measurable and impactful way. The Committee awaits the report requested in House Report 118–124 providing details on the status of forming

the New Alternative Methods Program in the Commissioner's office.

Opioid Abuse.—The Committee continues to be pleased that, with the Opioids Action Plan, Opioid Policy Steering Committee, and several significant regulatory actions, FDA is doing its part to help stem the tide of abuse. The use of opioids as first-line therapies for any form of pain has led to over-prescribing, and the CDC has made clear that clinicians should consider opioid therapy only if expected benefits for both pain and function are anticipated to outweigh the risks to the patient. The Committee hopes that FDA will continue to support the development of alternative and non-addictive alternatives to opioid analgesics and, when opioids are medically necessary, will continue to incentivize development and use of abuse-deterrent formulations. The Committee notes that every patient's treatment regimen should be tailored by his or her doctor to his or her unique needs. The Federal government, therefore, should promote the full suite of available treatment options, including abstinence-based models and non-opioid medications. Finally, the Committee continues to be supportive of naloxone distribution among trained, licensed healthcare professionals and emergency responders.

Optimal Timing and Sequencing of Cancer Immunotherapy.—The Committee commends the FDA for supporting the rapid implementation of life-saving immunotherapies into the clinic. New data suggest the administration of immunotherapies early in the treatment timeline may be able to prevent or intercept cancers before they develop into serious diseases, thus improving patient outcomes. To support continued research, the field must develop novel tools to efficiently run early-stage clinical trials, including biomarkers that can detect early disease, inform appropriate treatments, and serve as surrogates for clinical endpoints. In addition, determination of early-stage clinical trial endpoints at large that can characterize patient benefit are necessary for continued momentum. The Committee urges FDA to provide guidance on the development of early disease clinical trial tools, including early-stage biomarkers and clinical endpoints.

Orange Juice.—The Committee is concerned that pests, disease, and hurricanes are having a devastating impact on Florida's citrus growers and processors. These circumstances have resulted in a natural decline in the Brix level for Florida's mature oranges, with no known adverse health consequences for consumers. The Committee believes it is necessary to provide for analytical deviation in the minimum Brix level for pasteurized orange juice to account for these naturally occurring growing conditions. The Committee encourages USDA and FDA to expedite work with Florida citrus growers and processors and other stakeholders as necessary to consider additional flexibility by modernizing requirements for pasteurized orange juice that better account for naturally-occurring Brix variation.

Orphan Products Grants Program (OPGP).—The Committee continues to support the Orphan Products Grants Program at FDA.

OTC Acetaminophen Dosing Information for Children.—The Committee continues to be concerned that Over-the-Counter (OTC) single-ingredient acetaminophen does not contain weight-based dosing instructions for children ages 6 months to 2 years, despite

the recommendations of the FDA Nonprescription Drugs Advisory Committee and Pediatric Advisory Committee in 2011, which held that data supported this information being added to the labeling. The Committee is concerned that the lack of dosing information for this vulnerable population may lead to dosing errors, adverse events, and inadequate treatment of fever and pain. While the Committee is encouraged that FDA has included this important issue among its annual forecast of planned monograph activities, this list is nonbinding and the issue remains pending after multiple decades, despite its importance for public health. As such, the Committee directs FDA to provide an update to the Committee no later than 90 days after enactment of this Act on the timing of amending the monograph label for acetaminophen to include weight-based dosing instructions for children ages 6 months to 2 years.

OTC Oral Contraception.—The Committee encourages the FDA to issue guidance to pharmaceutical manufacturers on how to submit a successful prescription to OTC oral contraception products.

Outreach to Small Farmers.—The Committee expects CFSAN to provide funding for critical outreach and training services at not less than the level specified in the fiscal year 2024 agreement.

Ovarian Health.—The Committee recognizes that ovarian health impacts a woman's whole health throughout her lifetime, affecting health of her heart, immune system, metabolic function, among other systems. When ovarian function declines or ceases due to menopause, various medical conditions, or following surgery, women are at increased risks for developing many chronic conditions, including heart disease, osteoporosis, dementia, and autoimmune diseases. Advancing knowledge and research on ovarian health could reduce many of these chronic conditions, especially as women age.

Over-the-Counter Diagnostic Tests.—The Committee remains concerned for Americans lacking equitable access to healthcare. Diagnostics have proven to be a critical component in protecting public health mitigating the spread of infectious disease, as well as informing treatment options—still access remains limited. The Committee is aware of existing OTC diagnostic tests that would improve accessibility for Americans, and encourage more frequent testing of common infections, providing an overall benefit to public health. Additionally, the Committee directs that no later than 180 days after the passage of this Act, the Agency provides a briefing on the FDA's efforts to expand access to OTC diagnostics, including an update on the pipeline in general for these tests, with special attention to products that address infections for which there is no OTC diagnostic currently authorized.

Patient Experience Data.—The Committee supports the FDA's efforts to identify patient experience data standards to inform clinical research design and regulatory review under the patient-focused drug development process and to accept such data as a part of new drug applications. The Committee also encourages FDA to make every effort to incorporate relevant patient experience and preference data into product labeling to better inform patients, caregivers and providers.

Pediatric Devices.—The Committee is aware of the success of the FDA's Pediatric Device Consortia (PDC) program and appreciates

FDA's plans to incorporate real-world evidence demonstration projects into the program.

Plant Based Product Labeling.—The Committee is concerned that the current labeling and marketing practices of some plant-based alternatives to animal derived foods have the potential to cause consumer confusion. The Committee directs the FDA to complete the study requested in House Report 118–124 to better understand consumers' attitudes, beliefs, perceptions, feelings, and motivations relative to product composition, health attributes, and labeling and to assess consumer perceptions of different terms used on labeling of plant-based alternative products.

Pet Food Packaging.—The Committee encourages the FDA to review the potential health effects of PFAS migration from pet food packaging on animals and take any needed action to protect households from PFAS. The Committee recognizes the FDA has already taken some steps to reduce PFAS in human food packaging and should take further action to eliminate PFAS in animal food packaging.

Polycystic Ovary Syndrome (PCOS).—The Committee commends the FDA for supporting the Externally-led Patient-Focused Drug Development (EL–PFDD) meeting on PCOS but remains concerned that there has not been an FDA-approved treatment specific to PCOS. The Committee encourages the FDA, based on the findings of the EL–PFDD meeting, to support incentives for investigators and industry to develop safe new evidence-based therapies, diagnostics, devices, and technologies in collaboration with patients, practitioners, and researchers that address the identified needs and treatment priorities of PCOS patients.

Pregnancy and Lactation Registries.—The Committee recognizes the FDA's efforts to develop consensus standards for pregnancy and lactation registries, including common data elements, so that registry data can be interoperable within and between such registries. The Committee directs the FDA to continue to develop these consensus standards by convening a forum including participants from federal agencies with experience in patient registries, including the Agency for Healthcare Research and Quality, the Centers for Disease Control and Prevention, the National Institutes of Health, and others. The Forum should also include representatives of health care professionals who serve pregnant and lactating people, the pharmaceutical industry, electronic medical record companies, and other organizations with registry experience.

Pregnant Women in Clinical Research.—The Committee remains concerned about FDA's failure to issue final regulations relating to the protection of human subjects, including parts 50 and 56 of title 21, Code of Federal Regulations, with the latest regulations of the Department of Health and Human Services relating to the inclusion of pregnant women as subjects in clinical research, as required by 21st Century Cures Act (P.L. 114–255). Despite, 90 percent of pregnant women taking prescription medication during their pregnancy, 70 percent of medications approved by the FDA have no human pregnancy data, and 98 percent have insufficient data to determine the risk to the infant, leaving both the mother and infant at risk to adverse health events. Following recommendations of the Task Force on Research Specific to Pregnant Women and

Lactating Women, the Committee urges the agency to issue final regulations.

Premarket Tobacco Applications.—The Committee is concerned that various willfully non-compliant products containing non-tobacco nicotine remain on the market, despite provisions in the Consolidated Appropriations Act (the Act), 2022 (P.L. 117–103) requiring these products to undergo premarket review by FDA. Many timely filed tobacco-derived nicotine products still await review by FDA and this delay in the review of filed applications is confusing consumers, distributors, and manufacturers. The Committee urges FDA to publish and regularly update guidance to communicate to manufacturers, distributors, and retailers an enforcement discretion policy for products with timely-filed and pending Premarket Tobacco Applications (PMTAs), and to prioritize any enforcement actions against products without pending PMTAs or that did not file timely applications.

Quality Management Maturity (QMM).—The Committee is concerned about the ongoing impacts of drug shortages, particularly those for generic sterile injectable drugs, on patients and believes that a key driver of these shortages is the lack of resilient supply chains. While the FDA has piloted a QMM program and launched a voluntary QMM Prototype Assessment Protocol Evaluation Program, the Committee believes a robust QMM program is essential to ensuring product quality and enhancing supply chain reliability. The Committee is eager to learn the results of the current evaluation program and requests an update on this evaluation and an estimate of the cost to support a QMM program within 180 days of enactment.

Rare Diseases.—The Committee recognizes the unique barriers to developing innovative therapies for rare diseases. Approximately 25 to 30 million Americans suffer from a rare disease, yet only 500 out of the 7,000 known rare conditions have an FDA-approved treatment. The Committee commends FDA for its efforts to modernize and expedite the regulatory environment for rare disease drug development. However, the Committee is concerned that disparate approaches to similar rare disease treatment applications between centers pose risks to innovation. While acknowledging the autonomy of both the Center for Drug Evaluation and Research (CDER) and the Center for Biologics Evaluation and Research (CBER), particularly in their restructuring efforts tailored to the products they review, the Committee underscores the necessity of a more aligned approach specifically for rare diseases. The alignment of novel approaches to rare disease drug development helps expedite timely access to innovative safe and effective therapies to address the urgent, unmet needs of patients living with rare diseases. Therefore, the Committee urges CDER and CBER to align their approach to rare disease drug approvals, to the greatest extent possible.

Shrimp Import Testing.—The Committee remains concerned about the threats that farm-raised shrimp imports contaminated with illegal antibiotics continue to pose to U.S. consumers, and about the low rate of testing the FDA performs on such imports. The Committee urges FDA to complete additional testing on these products.

Skin Lightening Products.—The Committee continues to be concerned about the dangers of mercury and hydroquinone in skin

lightening products, particularly those that disproportionately target men, women, and girls of color. The Committee continues to be concerned about the accessibility of skin-lightening products in stores around the United States. The Committee urges FDA to more quickly identify unauthorized products that already exist, and new products that enter the market, and pursue all legally authorized remedies to remove unauthorized products from the market. The Committee continues to provide resources to OMHHE to educate the public on the dangers of skin-lightening products containing mercury, hydroquinone, and other toxic chemicals, including partnering with community-based organizations that have historically provided services to ethnic communities on the issue of skin-lightening and chemical exposures in the past. The FDA is directed to report back to the Committee within 180 days of enactment of this Act detailing how the funds provided for this work in fiscal year 2024 were spent, including the community-based organizations and vulnerable communities they partnered with and how those determinations were made, the specific actions taken to educate the public about these products, how they are evaluating the impact and success of this public education, and any lessons learned.

Sodium.—The Committee recognizes the importance of reducing sodium in the food supply. The Committee encourages FDA to develop an overall sodium monitoring and evaluation plan detailing how industry compliance with the short-term voluntary targets will be monitored and evaluated, including how FDA will identify data sources, collect and analyze data, create a timeline for assessments, and work with industry on voluntary compliance. As part of this plan, the Committee encourages FDA to coordinate with other government agencies, such as USDA and the CDC, on these monitoring efforts and instructs the FDA to set a timeline for the establishment of interim and long-term voluntary targets that would aim to fully bring sodium in the food supply to align with DGA recommendations.

Smoking Cessation Treatment Innovation.—The Committee recognizes the important work of advancing smoking cessation treatment innovation to help adult smokers be more successful in quitting and the critical role of the Center for Drug Evaluation and Research (CDER) in this work. The Committee is concerned that the HHS Smoking Cessation Framework released on March 8, 2024, as an update to a 2023 draft, does not acknowledge the importance of bringing forward new pharmacotherapies for smokers seeking to quit and the critical role of CDER in modernizing the regulatory framework for these products to reflect the real-world experience risk-benefit considerations and address unnecessary barriers to advancing vitally needed new cessation therapies for patients. The Committee requests an update from CDER on new actions the Center will take to address the sustained unmet public health needs in this space not later than 90 days after enactment of this act.

State and Local Inspection Programs.—The Committee supports the collaboration between FDA and state and local inspection programs, noting that the majority of food processing, produce safety, retail, and animal feed inspections occur through state and local programs. FDA is directed to maintain funding for these programs,

which are critical to protecting the human and animal food supply and more cost-effective than FDA providing these services.

Sunscreen Regulation.—The Committee is concerned that Americans are falling behind the rest of the world when it comes to access to sunscreen even though skin cancer is the most common cancer in the U.S. According to the Surgeon General, more than five million Americans each year are treated for skin cancer at a cost of over eight billion dollars per year. As a result, the Committee encourages the FDA to work with stakeholders to harmonize its approach with international testing standards to the extent possible and to ensure Americans have access to the broadest spectrum of sunscreens as possible recognizing the benefit of currently marketed sunscreens as a proven preventative tool against skin cancer when used as directed along with other sun protection measures. In addition, the Committee urges FDA to utilize its authorities provided under the CARES Act to evaluate new sunscreen ingredients already approved for use around the world and to educate stakeholders about the administrative order process to encourage research and development of new sunscreen technology.

State Regulatory Frameworks.—The Committee directs FDA to improve data sharing and coordination between state and federal authorities, such as by expanding on the Cannabinoid Hemp Product 20.88 Information Sharing Agreement initiative.

Traceback.—The Committee recognizes that the ability to prevent, identify, and trace back contaminated products is critical to containing food safety outbreaks but that challenges associated with tracing these products through the supply chain continue to persist. The Committee is concerned of lead contamination specifically in certain applesauce and ground cinnamon products imported into the United States and urges the FDA to modernize data systems to receive, track, and process information and ensure timely notification of significant public health threats. This ability is critical to more proactively identify or prevent threats of contamination with toxic chemicals that can lead to long-term adverse health effects.

Ultra-Processed Foods.—The Committee recognizes more research is required to better understand the health impacts of ultra-processed foods, and how to best define ultra-processed foods. The Committee encourages the agency, in coordination with the Centers for Disease Control and National Institutes of Health, to conduct additional research on ultra-processed foods.

Unauthorized Tobacco Products.—The Committee is deeply concerned that many tobacco products that lack the legally required marketing authorization from FDA remain on the market, including flavored products that are attractive to youth. The wide availability of these unauthorized products is hindering efforts to reduce youth use of e-cigarettes and other tobacco products. The Committee urges FDA to more quickly identify unauthorized tobacco products that enter the market and pursue all legally authorized remedies, including civil money penalties and injunctions, to remove unauthorized products from the market. The Committee is also concerned that FDA continues to miss deadlines for completing its premarket review of e-cigarettes and other deemed tobacco products and urges FDA to promptly complete these reviews and deny authorization for any product that does not meet the statu-

tory standard of “appropriate for the protection of the public health.

Youth E-Cigarette Use.—The Committee remains deeply concerned about data from the National Youth Tobacco Survey showing more than 2 million youth use e-cigarettes and urges FDA to use its full authority to address this serious public health problem. The Committee urges FDA to promptly complete its required pre-market review of e-cigarettes and other deemed tobacco products that remain on the market. The Committee also urges FDA to take enforcement action against all companies that failed to file a pre-market tobacco product application or received a marketing denial order.

FDA INNOVATION ACCOUNT, CURES ACT
(INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	\$50,000,000
2025 budget estimate	55,000,000
Provided in the bill	55,000,000
Comparison:	
2024 appropriation	+5,000,000
2025 budget estimate	---

COMMITTEE PROVISIONS

For the FDA Innovation Account as authorized in the 21st Century Cures Act, the Committee provides an appropriation of \$55,000,000.

INDEPENDENT AGENCIES

COMMODITY FUTURES TRADING COMMISSION
(INCLUDING TRANSFERS OF FUNDS)

2024 appropriation	\$365,000,000
2025 budget estimate	374,000,000
Provided in the bill	345,000,000
Comparison:	
2024 appropriation	− 20,000,000
2025 budget estimate	− 29,000,000

COMMITTEE PROVISIONS

For the Commodity Futures Trading Commission, the Committee provides an appropriation of \$345,000,000.

FARM CREDIT ADMINISTRATION

LIMITATION ON ADMINISTRATIVE EXPENSES

2024 limitation	\$(94,300,000)
2025 budget estimate	(100,430,000)
Provided in the bill	(100,430,000)
Comparison:	
2024 limitation	+6,130,000
2025 budget estimate	---

COMMITTEE PROVISIONS

For the limitation on the expenses of the Farm Credit Administration, the Committee provides \$100,430,000.

Public/Private Partnerships.—The Committee recognizes the value of public/private partnerships in financing rural communities and facilities and also recognizes that the Farm Credit Act of 1971, as amended, provides authority for Farm Credit System institutions to make investments in vital rural community facilities. The Committee recognizes that the FCA's current approach to approving these types of Farm Credit System investments on an individual basis does not meet the needs of rural communities. The FCA is encouraged to change its current process to create a clear, programmatic approval process which enables timely, comprehensive, and cost-effective rural community facilities financing packages by allowing and expediting Farm Credit System institutions' partnerships with community banks, other financial institutions, and USDA.

TITLE VII

GENERAL PROVISIONS

(INCLUDING RESCISSIONS AND TRANSFERS OF FUNDS)

Section 701.—The bill includes language regarding passenger motor vehicles.

Section 702.—The bill includes language regarding the Working Capital Fund of the Department of Agriculture.

Section 703.—The bill includes language limiting funding provided in the bill to one year unless otherwise specified.

Section 704.—The bill includes language regarding indirect cost share.

Section 705.—The bill includes language regarding the availability of loan funds in Rural Development programs.

Section 706.—The bill includes language regarding new information technology systems.

Section 707.—The bill includes language regarding fund availability in the Agriculture Management Assistance program.

Section 708.—The bill includes language regarding Rural Utilities Service program eligibility.

Section 709.—The bill includes language regarding funds for information technology expenses.

Section 710.—The bill includes language prohibiting first-class airline travel.

Section 711.—The bill includes language regarding the availability of certain funds of the Commodity Credit Corporation.

Section 712.—The bill includes language regarding funding for advisory committees.

Section 713.—The bill includes language regarding IT system regulations.

Section 714.—The bill includes language regarding Section 32 activities.

Section 715.—The bill includes language regarding user fee proposals without graphics.

Section 716.—The bill includes language regarding the re-programming of funds and notification requirements.

Section 717.—The bill includes language regarding fees for the guaranteed business and industry loan program.

Section 718.—The bill includes language regarding the appropriations hearing process.

Section 719.—The bill includes language regarding government-sponsored news stories.

Section 720.—The bill includes language regarding details and assignments of Department of Agriculture employees.

Section 721.—The bill includes language regarding spend plans.

Section 722.—The bill includes language regarding certain devices.

Section 723.—The bill includes language regarding Rural Development programs.

Section 724.—The bill includes language regarding USDA loan program levels.

Section 725.—The bill includes language regarding credit card refunds and rebates.

Section 726.—The bill includes language regarding the definition of the term “variety” in SNAP.

Section 727.—The bill includes language regarding the Secretary’s authority with respect to the 502 guaranteed loan programs.

Section 728.—The bill includes language regarding new user fees.

Section 729.— The bill includes language regarding Packers and Stockyards.

Section 730.—The bill includes language relating to overtime and holiday pay for FSIS inspectors.

Section 731.—The bill includes language regarding country or regional audits.

Section 732.—The bill includes language regarding a pilot program.

Section 733.—The bill includes language regarding the tobacco regulation.

Section 734.—The bill includes language regarding U.S. iron and steel products in public water or wastewater systems.

Section 735.—The bill includes language regarding lobbying.

Section 736.—The bill includes language related to persistent poverty counties.

Section 737.—The bill includes language related to investigational use of drugs or biological products.

Section 738.—The bill includes language related to the growing, harvesting, packing, and holding of certain produce.

Section 739.—The bill includes language related to the school breakfast program.

Section 740.—The bill includes language regarding hemp.

Section 741.—The bill includes language related to matching fund requirements.

Section 742.—The bill includes language regarding milk.

Section 743.—The bill includes language regarding housing efficiency standards.

Section 744.—The bill includes language regarding Critical Race Theory.

Section 745.—The bill includes language regarding FDA regulations.

Section 746.—The bill includes language regarding Food for Peace.

Section 747.—The bill includes language relating to the use of raw or processed poultry products from the People's Republic of China in various domestic nutrition programs.

Section 748.—The bill includes language related to certain school food lunch prices.

Section 749.—The bill includes language related to biotechnology risk assessment research.

Section 750.—The bill includes language related to certain reorganizations within the Department of Agriculture.

Section 751.—The bill includes language related to the Agriculture Conservation Experiences Services Program.

Section 752.—The bill includes language related to the ReConnect program.

Section 753.—The bill includes language regarding official flags.

Section 754.—The bill includes language regarding a rescission of funds.

Section 755.—The bill includes language regarding executive orders.

Section 756.—The bill includes language regarding listeria.

Section 757.—The bill includes language regarding sodium.

Section 758.—The bill includes language regarding discrimination.

Section 759.—The bill includes language regarding an ARS facility.

Section 760.—The bill includes language regarding hemp regulations.

Section 761.—The bill includes language Animal and Plant Health Inspection Service pay.

Section 762.—The bill includes language related to the Federal Meat Inspection Act.

Section 763.—The bill includes language regarding the Dietary Guidelines.

Section 764.—The bill includes language regarding genetically engineered salmon.

Section 765.—The bill includes language regarding a rescission of funds.

Section 766.—The bill includes language regarding land purchases.

Section 767.—The bill includes language regarding the Office of the General Counsel.

Section 768.—The bill includes language regarding food traceability.

Section 769.—The bill includes language regarding an FDA office plan.

Section 770.—The bill includes language regarding Livestock Mandatory Reporting.

Section 771.—The bill includes language regarding the Spending Reduction Account.

HOUSE OF REPRESENTATIVES REPORT REQUIREMENTS

FULL COMMITTEE VOTES

Pursuant to the provisions of clause 3(b) of rule XIII of the House of Representatives, the results of each roll call vote on an amend-

ment or on the motion to report, together with the names of those voting for and those against, are printed below:

[TO BE INSERTED]

STATEMENT OF GENERAL PERFORMANCE GOALS AND OBJECTIVES

Pursuant to clause 3(c)(4) of rule XIII of the Rules of the House of Representatives, the following is a statement of general performance goals and objectives for which this measure authorizes funding:

The Committee on Appropriations considers program performance, including a program's success in developing and attaining outcome-related goals and objectives, in developing funding recommendations.

PROGRAM DUPLICATION

No provision of this bill establishes or reauthorizes a program of the Federal Government known to be duplicative of another Federal program, a program that was included in any report from the Government Accountability Office to Congress pursuant to section 21 of Public Law 111-139, or a program related to a program identified in the most recent Catalog of Federal Domestic Assistance.

TRANSFERS OF FUNDS

Pursuant to clause 3(f)(2) of rule XIII of the Rules of the House of Representatives, the following list includes the transfers included in the accompanying bill:

- *Office of the Secretary.*—The bill allows funds within the account to be transferred among the offices included in the account, as well as reimbursements for certain expenses and transfers outside the account for certain activities.

- *Animal and Plant Health Inspection Service.*—Authority is included to enable the Secretary of Agriculture to transfer from other appropriations or funds of the Department such sums as may be necessary to combat emergency outbreaks of certain diseases of animals and plants.

- *Funds for Strengthening Markets, Income, and Supply.*—The bill limits the transfer of section 32 funds to purposes specified in the bill.

- *Farm Production and Conservation (FPAC) Business Center.*—The bill allows certain funds to be merged with the salaries and expenses account for the FPAC Business Center. The bill also provides that funds provided to other accounts in the agency shall be transferred to and merged with the salaries and expenses account of the Farm Service Agency.

- *Dairy Indemnity Program.*—The bill authorizes the transfer of funds to the Commodity Credit Corporation, by reference.

- *Agricultural Credit Insurance Fund Program Account.*—The bill provides funds to be transferred to the Farm Service Agency and for certain funds to be transferred within the account.

- *Commodity Credit Corporation.*—The bill includes language allowing certain funds to be transferred to the Foreign Agricultural Service Salaries and Expenses account for information resource management activities.

- *Rural Development, Salaries and Expenses.*—The bill allows funds for the Rural Partners Network to be transferred to other agencies of the Department.
- *Rural Housing Insurance Fund Program Account.*—The bill includes language allowing funds to be transferred from the Multi-Family Housing Revitalization Program Account to this account and for funds to be transferred from this account to the Rural Development Salaries and Expenses account.
- *Rental Assistance Program.*—The bill includes language allowing funds to be transferred from the Multi-Family Housing Revitalization Program Account to this account.
- *Intermediary Relending Program Fund Account.*—The bill provides funds in this account to be transferred to the Rural Development Salaries and Expenses account.
- *Rural Electrification and Telecommunications Program Account.*—The bill provides funds in this account to be transferred to the Rural Development Salaries and Expenses account.
- *Child Nutrition Programs.*—The bill includes authority to transfer section 32 funds to these programs.
- *Foreign Agricultural Service, Salaries and Expenses.*—The bill allows for the transfer of funds from the Commodity Credit Corporation Export Loan Program Account.
- *Commodity Credit Corporation Export Loans Program.*—The bill provides for transfer of funds to the Foreign Agricultural Service and to the Farm Production and Conservation Business Center, Salaries and Expenses account.
- *Food and Drug Administration, Salaries and Expenses.*—The bill allows funds to be transferred among certain activities.
- *Food and Drug Administration, FDA Innovation Account, Cures Act.*—The bill allows funds to be transferred from the 21st Century Cures Act to the Food and Drug Administration, Salaries and Expenses account.
- *Commodity Futures Trading Commission.*—The bill allows certain funds to be transferred to a no-year account in the Treasury.
- *General Provisions.*—Section 702 of the bill allows unobligated balances of discretionary funds to be transferred to the Working Capital Fund.

RESCISSIONS

Pursuant to clause 3(f)(2) of rule XIII of the Rules of the House of Representatives, the following lists the rescissions included in the accompanying bill:

Program or Activity	Amount
USDA FNS (unobligated balances)	\$40,000,000
USDA NRCS (unobligated balances)	50,000,000
USDA AMS	195,000,000

COMPLIANCE WITH RULE XIII, CL. 3(e) (RAMSEYER RULE)

In compliance with clause 3(e) of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italics, existing law in which no change is proposed is shown in roman):

[TO BE INSERTED]

CHANGES IN THE APPLICATION OF EXISTING LAW

Pursuant to clause 3(f)(1)(A) of rule XIII of the Rules of the House of Representatives, the following statements are submitted describing the effect of provisions in the accompanying bill that directly or indirectly change the application of existing law.

The bill includes a number of provisions which place limitations on the use of funds in the bill or change existing limitations and that might, under some circumstances, be construed as changing the application of existing law:

Office of the Secretary.—Language is included to limit the amount of funds for official reception and representation expenses, as determined by the Secretary and to reimburse Departmental Administration for travel expenses incident to the holding of hearings.

Agricultural Research Service.—Language is included that allows the Agricultural Research Service to grant easements at the Beltsville, MD, agricultural research center and to grant easements at any facility for the construction of a research facility for use by the agency.

National Institute of Food and Agriculture, Integrated Activities.—The bill includes language limiting indirect costs.

Animal and Plant Health Inspection Service.—Language is included to limit the amount of funds for representational allowances.

Animal and Plant Health Inspection Service.—The bill includes language regarding State matching funds and the brucellosis control program.

Animal and Plant Health Inspection Service.—Language is included to allow APHIS to recoup expenses incurred from providing technical assistance goods, or services to non-APHIS personnel, and to allow transfers of funds for agricultural emergencies.

Agricultural Marketing Service, Limitation on Administrative Expenses.—The bill includes language to allow AMS to exceed the limitation on administrative expenses by up to 10 percent with notification to the Appropriations Committees.

Agricultural Marketing Service, Inspection and Weighing Services.—The bill includes authority to exceed the limitation on inspection and weighing services by up to 10 percent with notification to the Appropriations Committees.

Food Safety and Inspection Service.—Language is included to limit the amount of funds for representational allowances.

Dairy Indemnity Program.—Language is included by reference that allows the Secretary to utilize the services of the Commodity Credit Corporation for the purpose of making dairy indemnity payments.

Agricultural Credit Insurance Fund Program Account.—Language is included that deems the pink bollworm a boll weevil for the purposes of administering the boll weevil loan program.

Risk Management Agency.—Language is included to limit the amount of funds for official reception and representation expenses.

Commodity Credit Corporation Fund.—Language is included to allow certain funds transferred from the Commodity Credit Corporation to be used for information resource management.

Hazardous Waste Management.—Language is included which limits the amount of funds that can be spent on operation and maintenance costs of CCC hazardous waste sites.

Rural Development Salaries and Expenses.—Language is included to allow funds to be used for advertising and promotional activities.

Rental Assistance Program.—Language is included that provides that agreements entered into during the current fiscal year be funded for a one-year period. Language also is included to renew contracts once during any 12-month period.

Rural Electrification and Telecommunications Loans Program Account.—The bill includes language related to loan rates on renewable energy loans.

The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC).—Language notwithstanding section 17(h)(10)(B)(ii) of the Child Nutrition Act of 1966 (42 U.S.C. 171786), as it relates to management information systems. Language is included to purchase infant formula except in accordance with law and pay for activities that are not fully reimbursed by other departments or agencies unless authorized by law.

Office of Codex Alimentarius.—Language is included to limit the amount of funds for official reception and representation expenses.

Foreign Agricultural Service.—Language is included to enable the agency to use funds received by an advance or by reimbursement to carry out its activities. The bill also limits the amount of funds for representation expenses.

McGovern-Dole International Food for Education and Child Nutrition Program Grants.—Language is included to specify the amount of funds available to purchase commodities described by subsection 3107(a)(2) of the Farm Security and Rural Investment Act of 2002.

Food and Drug Administration, Salaries and Expenses.—Language is included to limit the amount of funds for official reception and representation expenses and to limit the usage of certain user fees.

FDA Innovation Account.—The bill provides additional transfer authority.

Commodity Futures Trading Commission.—Language is included to limit the amount of funds for official reception and representation expenses. Language is also included to allow the Commission to record prior year lease obligations and to liquidate certain obligations.

Farm Credit Administration.—The bill includes authority to exceed the limitation on assessments by 10 percent with notification to the Appropriations Committees and to allow certain banks to exceed the statutory cap on export financing.

General Provisions.—

Section 701.—The bill includes language regarding passenger motor vehicles.

Section 702.—The bill includes language regarding the Working Capital Fund of the Department of Agriculture.

Section 703.—The bill includes language limiting funding provided in the bill to one year unless otherwise specified.

Section 704.—The bill includes language regarding indirect cost share.

Section 705.—The bill includes language regarding the availability of loan funds in Rural Development programs.

Section 706.—The bill includes language regarding new information technology systems.

Section 707.—The bill includes language regarding fund availability in the Agriculture Management Assistance program.

Section 708.—The bill includes language regarding Rural Utilities Service program eligibility.

Section 709.—The bill includes language regarding funds for information technology expenses.

Section 710.—The bill includes language prohibiting first-class airline travel.

Section 711.—The bill includes language regarding the availability of certain funds of the Commodity Credit Corporation.

Section 712.—The bill includes language regarding funding for advisory committees.

Section 713.—The bill includes language regarding IT system regulations.

Section 714.—The bill includes language regarding Section 32 activities.

Section 715.—The bill includes language regarding user fee proposals without graphics.

Section 716.—The bill includes language regarding the reprogramming of funds and notification requirements.

Section 717.—The bill includes language regarding fees for the guaranteed business and industry loan program.

Section 718.—The bill includes language regarding the appropriations hearing process.

Section 719.—The bill includes language regarding government-sponsored news stories.

Section 720.—The bill includes language regarding details and assignments of Department of Agriculture employees.

Section 721.—The bill includes language regarding spend plans.

Section 722.—The bill includes language regarding certain devices.

Section 723.—The bill includes language regarding Rural Development programs.

Section 724.—The bill includes language regarding USDA loan program levels.

Section 725.—The bill includes language regarding credit card refunds and rebates.

Section 726.—The bill includes language regarding the definition of the term “variety” in SNAP.

Section 727.—The bill includes language regarding the Secretary’s authority with respect to the 502 guaranteed loan programs.

Section 728.—The bill includes language regarding new user fees.

Section 729.—The bill includes language regarding Packers and Stockyards.

Section 730.—The bill includes language relating to overtime and holiday pay for FSIS inspectors.

Section 731.—The bill includes language regarding country or regional audits.

Section 732.—The bill includes language regarding a pilot program.

Section 733.—The bill includes language regarding the tobacco regulation.

Section 734.—The bill includes language regarding U.S. iron and steel products in public water or wastewater systems.

Section 735.—The bill includes language regarding lobbying.

Section 736.—The bill includes language related to persistent poverty counties.

Section 737.—The bill includes language related to investigational use of drugs or biological products.

Section 738.—The bill includes language related to the growing, harvesting, packing, and holding of certain produce.

Section 739.—The bill includes language related to the school breakfast program.

Section 740.—The bill includes language regarding hemp.

Section 741.—The bill includes language related to matching fund requirements.

Section 742.—The bill includes language regarding milk.

Section 743.—The bill includes language regarding housing efficiency standards.

BUDGETARY IMPACT OF THE AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION AND RELATED AGENCIES APPROPRIATIONS BILL, 2025, PREPARED IN CONSULTATION WITH THE CONGRESSIONAL BUDGET OFFICE PURSUANT TO SECTION 308(A) OF THE CONGRESSIONAL BUDGET ACT OF 1974

[IN MILLIONS OF DOLLARS]

COMPARISON WITH BUDGET RESOLUTION

Pursuant to clause 3(c)(2) of rule XIII of the Rules of the House of Representatives and section 308(a)(1)(A) of the Congressional Budget Act of 1974, the following table compares the levels of new budget authority provided in the bill with the appropriate allocation under section 302(b) of the Budget Act.

[TO BE INSERTED]

FIVE-YEAR OUTLAY PROJECTIONS

Pursuant to clause 3(c)(2) of rule XIII and section 308(a)(1)(B) of the Congressional Budget Act of 1974, the following table contains five-year projections associated with the budget authority provided in the accompanying bill as provided to the Committee by the Congressional Budget Office.

[TO BE INSERTED]

FINANCIAL ASSISTANCE TO STATE AND LOCAL GOVERNMENTS

Pursuant to clause 3(c)(2) of rule XIII and section 308(a)(1)(C) of the Congressional Budget Act of 1974, the Congressional Budget Office has provided the following estimates of new budget authority and outlays provided by the accompanying bill for financial assistance to State and local governments.

[TO BE INSERTED]

COMMITTEE HEARINGS

Pursuant to clause 3(c)(6) of rule XIII of the Rules of the House of Representatives, the following hearings were used to develop or consider the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2025:

The Subcommittee held a budget hearing on March 21, 2024, entitled “FY 2025 Budget Request for the Department of Agriculture.” The Subcommittee received testimony from:

- The Honorable Thomas J. Vilsack, Secretary, the Department of Agriculture
- Mr. John Rapp, Director of the Office of Budget and Program Analysis, Department of Agriculture

The Subcommittee held a hearing on April 11, 2024, entitled “Member Day.” The Subcommittee received testimony from:

- The Honorable James P. McGovern
- The Honorable Gwen Moore
- The Honorable Mike Flood

The Subcommittee held a budget hearing on April 18, 2024, entitled “The FY 2025 Budget Request for the Food and Drug Administration.” The Subcommittee received testimony from:

- Robert M. Califf M.D., MACC, Commissioner, Food and Drug Administration

The Subcommittee held a budget hearing on May 1, 2024, entitled “The FY 2025 Budget Request for the Department of Agriculture’s Farm Production and Conservation Mission Area.” The Subcommittee received testimony from:

- The Honorable Robert Bonnie, Under Secretary of Farm Production and Conservation, U.S. Department of Agriculture
- Mr. Zach Ducheneaux, Administrator, Farm Service Agency, U.S. Department of Agriculture
- Mr. Terry Cosby, Chief, Natural Resources Conservation Service, U.S. Department of Agriculture
- Ms. Marcia Bunger, Administrator, Risk Management Agency, U.S. Department of Agriculture

The Subcommittee held an oversight hearing on May 22, 2024, entitled: “Nutritious Foods in the Supplemental Nutrition Assistance Program.” The Subcommittee received testimony from:

- Mr. Michael Gay, Independent Grocer, on behalf of National Grocers Association
- Dr. Robert Lustig, Emeritus Professor, Department of Pediatrics, University of California San Francisco.
- Dr. Angela Rachidi, Senior Fellow and Rowe Scholar, American Enterprise Institute
- Mr. Robert Seligson, Chief Executive Officer, The Physicians Foundation

DISCLOSURE OF EARMARKS AND CONGRESSIONALLY DIRECTED
SPENDING ITEMS

The following table is submitted in compliance with clause 9 of rule XXI, and lists the congressional earmarks (as defined in paragraph (e) of clause 9) contained in the bill or in this report. Neither the bill nor the report contain any limited tax benefits or limited tariff benefits as defined in paragraphs (f) or (g) of clause 9 of rule XXI.
