Chair McCollum, Ranking Member Joyce, and Honorable Members of the Subcommittee, for the record my name is Ed Johnstone and I am Treasurer of the Northwest Indian Fisheries Commission (NWIFC). The NWIFC is comprised of the twenty tribes in western Washington that are party to United States v. Washington, which upheld the tribes’ treaty-reserved right to harvest and manage natural resources on and off-reservation, including salmon and shellfish. On behalf of the NWIFC, I am here today to speak specifically to our natural resources management and environmental program funding requests for the Bureau of Indian Affairs (BIA), Fish & Wildlife Service (FWS) and Environmental Protection Agency (EPA) Fiscal Year 2020 appropriations. These programs support tribes to carry out their natural resource management responsibilities including the management of Pacific salmon fisheries, which contribute to a robust natural resource-based economy and the continued exercise of tribal treaty rights.

SUMMARY OF FISCAL YEAR (FY20) APPROPRIATIONS REQUESTS

**Bureau of Indian Affairs**
- Provide $57.258 million for Rights Protection Implementation (collective request)
  - Provide $17.146 million for Western Washington Fisheries Management
  - Provide $3.207 million for Washington State Timber-Fish-Wildlife
  - Provide $5.958 million for U.S./Canada Pacific Salmon Treaty
  - Provide $2.4 million for Salmon Marking
  - Provide $4.5 million for Evaluation and Research Activities – Climate
- Provide $15.0 million for Fish, Wildlife & Parks Projects (non-TPA)
- Provide $830,000 for the Salmon and Steelhead Habitat Inventory and Assessment Program within the Tribal Management/Development Program Subactivity
- Fully Fund Contract Support Costs
- Provide $2.0 million for Western Washington Treaty Tribes’ Wildlife Management
- Provide $30.355 million for Tribal Climate Resilience

**Fish & Wildlife Service**
- Provide $8.0 million for Tribal Wildlife Grants

**Environmental Protection Agency**
- Provide $96.4 million for General Assistance Program
- Provide $50.0 million for Puget Sound Geographic Program

**Multiple Agency Request**
- Provide $1.2 million for an Automatic Salmon Fin Clipping and Tagging Trailer
JUSTIFICATION OF REQUESTS

Bureau of Indian Affairs

- Provide $57.258 million for BIA Rights Protection Implementation Subactivity
  The 41 tribes in the Great Lakes and Pacific Northwest with similar treaty-reserved rights have collectively identified that no less than $52.0 million for Rights Protection Implementation (RPI) is necessary to support essential tribal treaty-reserved resource management. The NWIFC has also identified an additional need of $4.5 million for RPI Climate Change, bringing our total request for RPI to $57.258 million; $16.985 million above the FY19 enacted level of $40.273 million. A summary of the accounts of interest to us within RPI are further identified below. However, please note that a breakdown of these accounts for FY18 is not provided in the Indian Affairs FY19 Budget Justification.

  - Provide $17.146 million for BIA Western Washington Fisheries Management
    We respectfully request $17.146 million; an increase of $7.142 million over the FY17 enacted level of $10.004 million. Funding for this program supports the tribes to co-manage their treaty-reserved resources with the state of Washington, and to continue to meet court mandates and legal responsibilities. For example, funding supports harvest planning, population assessments, data gathering for finfish, shellfish, groundfish, and other natural resource management needs.

  - Provide $3.207 million for BIA Washington State Timber-Fish-Wildlife (TFW)
    We respectfully request $3.207 million, which would maintain the FY17 enacted level. Funding for this program is provided to improve forest practices on state and private lands, while providing protection for fish, wildlife and water quality. This funding supports the tribes’ participation in the Timber, Fish and Wildlife Agreement – a collaborative intergovernmental and stakeholder process between the state, industry and tribes.

  - Provide $5.958 million for BIA U.S./Canada Pacific Salmon Treaty
    We respectfully request $5.958 million; an increase of $941,000 over the FY17 enacted level of $5.017 million. However, this request does not reflect the new funding package of the Pacific Salmon Commission’s (PSC) request related to tribes. A newly revised Pacific Salmon Treaty (PST) agreement is in the final stages of completion, and additional funding requests to implement the agreement are expected for this and other accounts. The Pacific Salmon Treaty Act of 1985 charges the PSC with the responsibility for implementation of the bilateral treaty with Canada. Tribes assist the U.S. federal government in meeting its obligations to implement the treaty by participating in fisheries management exercises including cooperative research and data gathering activities. This funding supports tribes’ participation in the bilateral PST process.

  - Provide $2.4 million for BIA Salmon Marking
    We respectfully request $2.4 million; an increase of $1.148 million over the FY17 enacted level of $1.252 million. Since 2003, Congress has required that all salmon released from federally funded hatcheries are marked for conservation management purposes and has provided funding to implement this mandate. This funding allows tribes to mark salmon at tribal hatcheries and to use these marked fish to scientifically monitor salmon populations in western Washington.
- **Provide $4.5 million for BIA Evaluation and Research Activities – Climate**
  We respectfully request $4.5 million for Evaluation and Research Activities – Climate for our member tribes. The BIA has not released details regarding the status or funding for this program in FY18, however there were many successful tribal projects and programs in FY16 and 17. Funding for this program will provide tribes the capacity to identify, respond and adapt to the impacts of our changing climate.

- **Provide $15.0 million for BIA Fish, Wildlife & Parks Projects (Non-TPA) for Hatchery Operations and Maintenance**
  We respectfully request $15.0 million for Hatchery Operations and Maintenance within the Fish, Wildlife and Parks Projects account; an increase of $5.075 million over the $9.925 million provided for these programs in FY17. More specifically, we request $8.0 million for Hatchery Operations and $7.0 million for Hatchery Maintenance. This funding is provided to tribal hatcheries to support the rearing and releasing of salmon and steelhead for harvest by Indian and non-Indian fisheries in the U.S. and Canada. Without hatcheries, tribes would lose their most basic ceremonial and subsistence fisheries that are central to our tribal culture.

- **Provide $830,000 for BIA Salmon and Steelhead Habitat Inventory and Assessment Program (SSHIAP) (within the Tribal Management/Development Program)**
  We respectfully request $830,000 within the Tribal Management/Development Program for SSHIAP; $475,000 above the FY18 enacted level. SSHIAP is a vital program to the western Washington tribes because it provides essential environmental data management, analysis, sharing and reporting to support tribal natural resource management. It also supports our tribes’ ability to adequately participate in watershed resource assessments and salmon recovery work.

- **Fully Fund BIA Contract Support Costs**
  We respectfully request that Congress fully fund Contract Support Costs. We also support the reclassification of Contract Support Costs (CSC) as mandatory funding. Funding for this function ensures tribes and tribal organizations have the capacity to manage federal programs under self-determination contracts and self-governance compacts.

- **Provide $2.0 million for Western Washington Treaty Tribes’ Wildlife Management**
  We respectfully request $2.0 million for western Washington treaty tribes’ wildlife management programs from an account within the Bureau of Indian Affairs Trust – Natural Resources Management Activity. The treaty tribes, as co-managers of the wildlife resource, work cooperatively with the State of Washington and others to manage wildlife. Requested funding will support the development of wildlife management plans, development and enhancement of tribal hunting codes, the design and implementation of applied research projects, and capacity to participate in state-tribal co-management forums. These capabilities are necessary to help protect tribes’ treaty-reserved rights and resources.

- **Provide $30.355 million for BIA Tribal Climate Resilience**
  We respectfully request $30.355 million; an increase of $20.399 million over the FY19 enacted levels of $9.956 million. Funding for this program will support tribes to participate in climate change issues that impact treaty-reserved resources, as well as promote resiliency to change.
**Fish & Wildlife Service**

- **Provide $8.0 million for FWS Tribal Wildlife Grants**
  We respectfully request $8.0 million for the nationwide Tribal Wildlife Grants program; an increase of $3.791 million over the FY19 enacted of $4.209 million. Funding from this competitive grant program supports the conservation of wildlife and their habitat, including species that are culturally or traditionally important to tribes.

**Environmental Protection Agency**

- **Provide $96.4 million for EPA General Assistance Program (GAP)**
  We respectfully request $96.4 million; an increase of $30.924 million over the FY19 enacted level of $65.476 million. We also respectfully request: 1) accompanying bill or report language that would improve flexibility in the GAP to ensure individual tribal priorities and implementation activities would be eligible; and 2) $5.0 million for a regional pilot project that would demonstrate how flexibility to implement individual tribal priorities through a self-governance model can benefit tribes, EPA and the environment. The GAP builds tribal program capacity to begin to address environmental issues, which impact tribes’ health, safety, and treaty-reserved resources.

- **Provide $50.0 million for EPA Puget Sound Geographic Program**
  We respectfully request $50.0 million; an increase of $22.0 million above the FY19 enacted level of $28.0 million. This Geographic Program provides essential funding that will help protect and restore Puget Sound – an estuary of national significance. Funding for this program is essential for tribes because it supports our participation in a broad range of Puget Sound recovery work, including, scientific research, resource recovery planning, and policy discussions that affect our treaty rights.

**Multiple Agency Request**

- **Provide $1.2 million for an Automatic Salmon Fin Clipping and Tagging Trailer**
  We respectfully request $2.0 million for an automatic salmon fin clipping and tagging trailer. The NWIFC uses automated trailers to provide effective and efficient centralized services to our 20-member tribes. Our services help the tribes meet federal salmon marking requirements and generate essential data to support fisheries management (coded wire tags). An increasing demand for these important services exceeds our current capacity. An additional automatic trailer is needed to ensure we meet the requirements of salmon marking and tagging at tribal hatcheries. This request is part of the new Pacific Salmon Treaty agreement but the details regarding which agency or account should fund the request is unknown.

**CONCLUSION**

We respectfully urge the Subcommittee to continue to support our efforts to protect and restore treaty-reserved resources and the communities and economies dependent upon them. We greatly appreciate your attention to our requests and we thank you for your continued commitment to tribes.
