

**Colin Cunliff, Ph.D.**

Colin Cunliff is a senior policy analyst with the Information Technology and Innovation Foundation, where he focuses on improving national and global energy innovation systems to address climate change. He is also currently serving on the National Academies of Sciences, Engineering, and Medicine (NASEM) committee for *Accelerating Decarbonization of the U.S. Energy System*. In 2020, he co-authored book *Energizing America: A Roadmap to Launch a National Energy Innovation Mission*, which charts a course to triple U.S. clean energy research by 2025.

Prior to joining ITIF, he worked at the U.S. Department of Energy (DOE) Office of Energy Policy and Systems Analysis (EPSA), with a portfolio focused on energy sector resilience and emissions mitigation. At DOE, he supported the Quadrennial Energy Review and other agency reports. He previously served as the American Institute of Physics / American Association for the Advancement of Science (AIP/AAAS) Congressional Fellow, where he served as a staff science adviser on energy, climate, and transportation. He holds a Ph.D. in physics from the University of California, Davis, and a bachelor's degree in physics and mathematics from the University of Texas at Austin.
