Statement of Carla Hayden  
The Librarian of Congress  
Before the  
Subcommittee on the Legislative Branch  
Committee on Appropriations  
U.S. House of Representatives  

Fiscal 2022 Budget Request  
March 3, 2021  

Chairman Ryan, Ranking Member Herrera Beutler, and Members of the Subcommittee:

Thank you for the opportunity to provide testimony in support of the Library’s fiscal 2022 budget.

The Library of Congress has built one of the largest collection of human knowledge ever assembled in support of its mission to engage, inspire, and inform Congress and the American people with a universal and enduring source of information and creativity. My top priority as Librarian of Congress remains expanded user access to the Library’s resources and services. We are an authoritative source of knowledge that can enrich users in innumerable ways. We constantly strive to find new ways to share our extraordinary riches more broadly, deeply, and transparently.

One year ago, when we had to close the Library’s doors as the pandemic began, we had to open other avenues that allowed us to serve Congress and the American people in new and innovative ways. The Library needed to move quickly to adopt new approaches to continue its mission of serving the Congress and the American people, while at the same time ensuring that employees and contractors were able to work in safety. Thanks to congressional support for investments in IT infrastructure over the past several years, the Library’s network was able to handle an 800 percent increase in the remote workforce. Essential services, including CRS and the United States Copyright Office, were able to operate largely as normal. In light of the challenges presented by COVID-19, the Library transformed its public outreach by pivoting to virtual events, creating new digital programs and continued to provide public access by creating new programs, reimagining others, and offering them virtually, which has developed new audiences for the Library beyond those who could have visited the Library in person. The 20th National Book Festival was hosted entirely online. When many schools closed, the Library created teacher webinars, virtual student workshops, and a loc.gov/engage page with
information about resources, activities and programs. Planned digital initiatives, such as the LC Collections mobile app and innovator-in-residence projects, moved forward quickly to provide new ways for Congress and the public to engage with the Library. In addition, with congressional support and private philanthropy, we remained on schedule to unveil the Library’s new Visitor Experience in phases beginning in late calendar 2022. Although planning is ongoing for a phased return to in-person operations and reopening to visitors and on-site researchers, it is clear that the Library needs to ensure that digital innovations can be sustained and even accelerated to meet evolving expectations.

Despite the challenges created by the pandemic, I am pleased to report that we continued to make progress in sharing more of the Library’s collections, programming, and staff expertise. Today, the Library holds more than 171 million items, including special collections consisting of audio materials, maps, moving images, sheet music and much more. Over 6.8 million preservation actions were performed on the physical collections. The Library responded to 802,676 reference requests from Congress, the public, and other federal agencies, including direct use of CRS reports. The Copyright Office issued over 443,911 copyright registrations and recorded 7,098 documents containing 233,694 titles. In fiscal 2020, Library web properties experienced the largest volume of traffic in Library history. Those properties (excluding congress.gov and copyright.gov) recorded more than 117 million visits and 647 million page views — increases of 39 percent and 58 percent, respectively. Mobile visits made up 46 percent of those visits, an increase of nine percentage points over the previous fiscal year. And before the mid-March closing to the public, the Library welcomed 565,388 in-person visitors.

The Library also continued direct services to the public with the Veterans History Project and Teaching with Primary Sources, a program that allows teachers in local school districts to create curricula and develop apps using the Library’s digitized primary sources.

Of special note is the National Library Service for the Blind and Print Disabled (NLS) and its network of state and local libraries, which circulated more than 20.3 million copies of braille, audio and large print items to patrons. I would like to recognize NLS Director Karen Keninger, who joined the Library in 2012 after serving as director of the Iowa Department for the Blind and as regional librarian for the Iowa Library for the Blind and Physically Handicapped. Ms. Keninger’s priorities for NLS at the outset were to leverage advancing technology and expand content for all print-disabled persons. Under her leadership, NLS embraced innovative technology, in just one example, by providing braille digitally with new refreshable braille technology. Working with the communities, Ms. Keninger expanded eligibility for NLS programs and advocated for a name change to highlight service to the print disabled. She made a special commitment to working with veterans’ groups. She also developed partnerships with
major audiobook producers that doubled the output of new talking books and implemented international partnerships to enable the cross-border exchange of materials. Karen Keninger will retire at the end of May.

I would like to express my sincere gratitude for the outstanding support that this committee and the entire Congress give to the Library. In particular, I appreciate the funding you have provided for our fiscal 2021 requests to meet high-priority needs such as cybersecurity enhancements to protect sensitive information from CRS, the Law Library, the Copyright Office, and other high-value assets. Modernization efforts funded in fiscal 2021 also supported state-of-the-art shelving for Law Library collections in Quad B and enhanced science and technology research capacity in CRS. I also thank you for your continued support for the collections storage modules at Fort Meade, as part of the Architect of the Capitol’s budget. Construction is underway for Storage Module 6, the first double-wide unit, and initial designs for Storage Module 7 are complete.

I come before you today to discuss the Library’s fiscal 2022 appropriations request. The funding request aligns with the strategic goals set forth in the Library’s Strategic Plan: expand access, enhance services, optimize resources, and measure impact.

The Library of Congress fiscal 2022 budget request is for approximately $845.982 million, which represents a 5.5 percent increase over the Library’s fiscal 2021 enacted appropriation. This request includes $24.28 million in mandatory pay and price level increases. The balance of the increase represents critical program investments necessary to fulfill the Library’s role and to continue to modernize our operations and technology, ensure the safety and security of Library collections and our workforce, and adjust to rapidly changing needs.

The budget seeks to modernize the legacy Integrated Library System (ILS) and several related systems that provide access to the Library’s collections. The existing ILS is 25-year-old technology that the Library put into place in 1999 in preparation for Y2K. The ILS is at the end of its life, with systems that cannot interface, and is likely to fail within the next few years. The replacement, a modern Library Collections Access Platform (L-CAP), used in major academic libraries, will be the heart of Library collections management, physical and digital, for the next generation. Designed to be closely integrated with a wide range of Library systems, L-CAP will employ the latest technology to manage the acquisition, description and inventory of Library collections and facilitate access for Library employees, Congress and the public. The Library is ready for the L-CAP now because substantial IT infrastructure improvements are in place and we have gained experience with other major IT modernization efforts. We will use continuous integration and continuous delivery development practices to sustain the system to allow
L-CAP to meet the Library’s evolving needs, including management of exponentially growing
digital collections and advancements in technology.

In another move toward modernization, in this case to take the next step in beginning to
optimize and modernize financial management and planning in the Financial Services
Directorate and across the Library, we are requesting funding to establish a new Enterprise
Planning & Management (EPM) program. Financial modernization is an iterative process that
must continue to stabilize current accounting activities and at the same time move forward to
introduce new capabilities and principles. To meet audit findings concerning cost estimating
and cost accounting, this initial EPM funding request will build a base of expertise in the
Library in cost management as well as data science and data architecture, and develop
processes necessary to optimize cost management practices and lay the foundation necessary
for the implementation of more advanced financial planning capabilities and technology.
Ultimately, the EPM program will use the Library’s financial management and planning data to
drive decision making to improve performance in programs, projects, and activities
surrounding the Library’s investments.

Pandemic operations, as well as heightened physical security threats for U.S. government
agencies, particularly legislative branch agencies, have focused attention on necessary
enhancements to ensure the safety and security of the Library’s workforce and its collections.
The Library is working closely with the U.S. Capitol Police (USCP) and the Architect of the
Capitol (AOC) to ensure that safety and security measures are appropriately implemented.

The budget request includes a funding request to modernize the Library’s nearly 20-year-old
Integrated Electronic Security System (IESS), which is used by both the Library and the USCP
for physical security monitoring of Library facilities and access from the Library to the broader
Capitol Complex. The system is at the center of a complex network of more than 10,000
cameras, motion sensors, electronic door locks, and other controls that regulate access to Library
facilities and safeguard staff, visitors, collections, and high-value assets. The request will allow
the Library to completely overhaul the security system components with a sustainable life-cycle
management program, and modernize the IESS IT network infrastructure, bringing it into
compliance with Library IT security standards.

Funding is also requested to allow the Library to replace its outdated and inadequate 3G
Cellular Distributed Antenna System. The current 3G system, installed in 2004, did not cover
more than 50 percent of Library facilities. It is at the end of its service life and is incompatible
with advanced 5G connectivity. The request will allow the Library to implement a modern
cellular solution that will ensure connectivity, and by extension, improve safety for the USCP, Architect of the Capitol and Library staff, and congressional and Library visitors.

The budget requests increased funding to allow the Library to implement the same advanced level of IT security across both its on-premises data centers and cloud hosting environments. This will ensure that Library data, including congressional and copyright information, are secured at all times, leveraging artificial intelligence to identify anomalous and malicious behavior.

Remote work during the pandemic highlighted the need to better support Library employees with work-anywhere-anytime functionality and advanced virtual collaboration tools. The budget requests funding to expedite the transition of the Library from legacy Microsoft Office tools to the Microsoft 365 cloud for all staff. The request aligns the Library with congressional adoption of Microsoft 365 and ensures a smooth transition away from the Office suite, which Microsoft has announced will no longer be supported after 2025.

Finally, this budget requests the funding required to fully implement the Copyright Alternative in Small-Claims Enforcement (CASE) Act with the creation of a “small claims court” within the Copyright Office. The Copyright Claims Board (CCB) will work to resolve civil copyright claims, counterclaims, and defenses in the CCB as an efficient and inexpensive alternative to using the federal courts. The request will support the necessary staffing for the CCB and the implementation of an electronic filing and case management system with electronic acceptance of claims filings, fees, and litigation pleadings.

In closing, the Library’s 2022 Congressional Budget Justification continues a sequence of strategically planned modernization efforts across the enterprise. The Library’s budget request supports the security of our vast collections and the safety of our workforce and visitors and helps the Library meet quickly changing needs. Chairman Ryan, Ranking Member Herrera Beutler, and Members of the Subcommittee, thank you again for supporting the Library of Congress and for your consideration of our fiscal 2022 request.
