## TITLE III—OPERATION AND MAINTENANCE

### ITEMS OF SPECIAL INTEREST

#### ENERGY ISSUES

##### Energy Resilience of Overseas Military Installations

As noted elsewhere in this report, the committee continues to assert that the Department of Defense must have the ability to sustain operations during energy supply disruptions, especially in the case of overseas military locations that rely on foreign-sourced energy. For example, the committee notes that a number of European countries that host permanent and rotational U.S. Armed Forces rely extensively on natural gas and oil from the Russian Federation. The committee believes that a policy of energy reliance through diversification is critical to maintaining a resilient U.S. overseas defense posture and presence.

Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services by March 1, 2018, on potential vulnerabilities to energy supply disruptions at overseas locations that host permanent and rotational U.S. Armed Forces and on mitigation efforts aimed at protecting mission resiliency. The briefing must, at a minimum, assess the operational risk of energy supply disruptions, identify mitigation measures to sustain mission-critical operations, and assess the feasibility and cost and schedule impacts of including diversified energy solutions for future overseas military construction projects.

#### LOGISTICS AND SUSTAINMENT ISSUES

##### Corrosion Control and Prevention Executives for the Military Departments

The committee continues to be concerned that the military departments have not adequately addressed corrosion control and prevention in the military departments' sustainment plans for weapon systems. The committee believes that corrosion control and prevention must be addressed early in system design. To facilitate education, awareness, and prioritization of corrosion control and prevention, section 903 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417) required each military department to identify a corrosion control prevention executive (CCPE). The committee has observed that the CCPEs are most effective when they have the time and seniority to manage corrosion control policy and resources across the military department, consistent with the requirements of section 903 of Public Law 110-417. The committee believes the Departments of the Navy and the Air Force have been most

effective in corrosion control and prevention and notes they have assigned individuals whose primary responsibility is to perform the functions of the CCPE. The committee also notes that the Department of the Army has used a different model and implemented the requirements of section 903 of Public Law 110-417 by appointing a Deputy Assistant Secretary of the Army for Acquisition, Logistics, and Technology as the CCPE and having action-officer level individuals assist in those duties.

The committee directs the Secretaries of the military departments to provide a briefing to the House Committee on Armed Services, not later than September 30, 2017, on the steps the military departments have taken to comply with section 903 of Public Law 110-417. The briefing should describe the service corrosion executives' technical qualifications, duties, and responsibilities, including coordination with the Department of Defense Director of Corrosion Policy and Oversight and formulation of service-level guidance and policy regarding corrosion control and prevention as part of the development, procurement, and sustainment of the military services' weapon systems and infrastructure. Finally, the briefing should include the Secretaries' assessments as to the effectiveness of their corrosion control and prevention policies and the extent to which the CCPEs are taking steps to improve prioritization of this issue early in the planning of weapon systems.

#### Inventory Management and Demand Planning Software Pilot Program

The committee is aware that the Army completed a small test program using commercial-off-the-shelf (COTS) software on 27 various Army Black Hawk helicopter parts. This small-sample study showed significant cost savings and increased readiness when leveraging the Army's enterprise resource planning system, the Logistics Modernization Program (LMP), to manage inventory, particularly unserviceable assets. The committee remains interested in not only the cost savings and readiness increases found in the Army's Black Hawk inventory management, demand planning, and readiness-based sparing software application to LMP, but also cost savings and readiness increases if the Army were to apply this tool across Army Materiel Command's (AMC's) spare parts management portfolio.

The committee also seeks information on Naval Sea Systems Command's (NAVSEA's) views regarding the benefits of COTS product lifecycle management software to help with its growing challenge in managing its critical databases across the NAVSEA enterprise. Currently, two NAVSEA databases, the Naval Ships Engineering Drawing Repository (NSED) and the Naval Logistics Technical Data (NAVLOGTD), are growing faster than the antiquated and expensive system that manages them can handle.

The committee directs the commander of Army Materiel Command and the commander of Naval Sea Systems Command to provide briefings to the House Committee on Armed Services not later than February 7, 2018, on separate initial assessments of following:

(1) the extent to which AMC explored the use of COTS software as an add-on to LMP to improve its spare parts and inventory control management;

(2) the extent to which NAVSEA has explored the use of COTS product lifecycle management software to improve managing its NSEDR and NAVLOGTD databases; and

(3) the extent to which AMC and NAVSEA have found cost savings and readiness improvements for their programs by using this software and believe these cost savings and readiness increases could be expanded.

### Logistics Management Business Systems Modernization

The committee is aware of the military services' challenges in developing, acquiring, and fielding integrated supply, maintenance, logistics and financial resource planning systems that work across the enterprise. The committee notes that the Department of the Army has achieved a measureable level of success with the Logistics Modernization Program (LMP), a commercially developed enterprise resource planning system (ERP) used by the Army to integrate its Working Capital Fund missions. The committee encourages the Secretaries of the Navy and the Air Force to explore alternative resource planning systems associated with Working Capital Fund operations and consider future implementation of LMP. The committee directs the Secretary of the Navy and the Secretary of the Air Force to provide a briefing to the committee, no later than December 1, 2017, on the following in regard to Navy, Marine Corps, and Air Force Working Capital Fund ERPs:

(1) The ERP or other systems the military services are currently using to integrate their Working Capital Fund business systems across the services' logistics enterprises;

(2) The annual cost of modernizing and maintaining their current Working Capital Fund business systems;

(3) How the three military services' current ERPs are contributing to the national security of the United States or to the efficient management of the Department of Defense, including auditability compliance;

(4) Options the military services have explored to find alternatives to their current systems which would provide equal or greater capability at a lower cost, including consideration of the Army LMP; and

(5) Whether the existing acquisition management structure for the military services' current ERPs is adequate to manage and control program costs into the future.

### Opportunities to Consolidate Printing Services

The committee notes that the Department of Defense requested funding for printing services that totaled more than \$440.0 million in the fiscal year 2017 budget request. Department of Defense Instruction 5330.03 establishes the Defense Logistics Agency (DLA) Document Services as the preferred provider for document

automation services to the Department, which includes printing services, scanning and conversion, office device support, and electronic content management. In addition, the Defense Business Board's February 2015 report "Transforming DOD's Core Business Processes for Revolutionary Change" noted that actions such as moving to managed printing services and consolidating print management services could achieve significant savings in related activities. Furthermore, the committee has noted that the printing budgets for active service components are excessive and that portions of these budgets should be realigned to address unfunded readiness priorities of the Department and the military services.

In light of the above, the committee directs the Comptroller General of the United States to assess the following:

- (1) what is the nature and scope of printing activities financed by Department components, including the military services and DLA;
- (2) how have estimated costs for printing activities compared to actual costs since fiscal year 2012;
- (3) what options, if any, has the Department considered in adjusting its approach to printing services to achieve greater efficiencies or reduced costs for related activities; and
- (4) any other issues the Comptroller General determines appropriate with respect to consolidation of printing services.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than December 1, 2017, on the Comptroller General's preliminary findings and to submit a final report to the Senate Committee on Armed Services and House Committee on Armed Services on a date agreed to at the time of the briefing.

#### Report on Operation of the Transportation Working Capital Fund

The committee notes that the Airlift Readiness Account (ARA), which maintains military airlift capacity during peacetime to be prepared for the higher level of activity needed during contingency operations, has received varying levels of funding in past years. The committee is concerned about how the Transportation Working Capital Fund (TWCF) can effectively operate and set reasonable rates with such fiscal uncertainty. Therefore, the committee directs the Comptroller General of the United States to submit a report to the congressional defense committees by August 1, 2018, regarding allocation of the ARA in conjunction with the TWCF during fiscal years 2007 to 2016, inclusive. The report should include:

- (1) a review of the U.S. Transportation Command (TRANSCOM) oversight of the TWCF, including the command's adherence to statutory authorities related to the TWCF and ARA;
- (2) a review of the rate-setting procedure used by TRANSCOM, including procedures to lower the TWCF rate once fixed costs of the program are covered and how ARA funding is used to fund airlift capacity not being fully utilized during peacetime but required to support contingency operations;

(3) how the Air Force pays its ARA bill during years in which ARA funding is not requested, authorized, or appropriated or years in which ARA funding is cut; and

(4) what steps the Air Force has taken to ensure the Air Force Working Capital Fund receives the appropriate funding if a cash shortfall occurs because of a lack of fiscal year ARA funding.

### Revising Depot Carryover Calculations

Department of Defense regulations limit the amount of carryover allowable at the military depots at the end of a fiscal year. These regulations require that carryover be calculated in a way that routinely exceeds allowable carryover ceilings, resulting in decrements to the military services' appropriations. While the committee believes there should be limits on the amount of carryover workload held by a depot, the committee is concerned that the current calculation of allowable carryover has indirectly affected military readiness and the ability of the depots to sustain core workload as required by section 2464 of title 10, United States Code. As a result, the committee would like to understand the Department's calculation of allowable carryover.

Therefore, the committee directs the Secretary of Defense, in consultation with the Secretaries of the military departments, to submit a report to the House Committee on Armed Services by December 31, 2017, on workload carryover to include:

(1) an explanation of how the carryover formula is currently calculated, and how each military service manages carryover;

(2) what exclusions from carryover are currently in place and how they were determined;

(3) how carryover has been affected by the late receipt of funds;

(4) the level of carryover of parts and materiel needed to support depot maintenance programs compared to direct labor hours;

(5) what portion of total carryover is for inter-service workload;

(6) recommendations to modify the existing carryover formula.

The Secretary of Defense may also include other related matters as deemed appropriate in order to provide a comprehensive examination of carryover policies.

The committee further directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than October 31, 2017, on preliminary findings of the Secretaries' evaluation.

### READINESS ISSUES

#### Advanced Foreign Language Proficiency Materials

The committee recognizes the importance of advanced foreign language and cultural proficiency and is concerned that the Department of Defense allowed access to authentic, copyrighted foreign language broadcast services media to lapse in

2015. Despite the continued need, the committee understands that a competitive request for proposal has not yet been released to begin the process of contracting for a suitable solution. Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than December 1, 2017, on the status of whether access to authentic, copyrighted foreign language content should be restored for the joint force.

#### Alternative-Source F/A-18 Depot-Level Maintenance

The committee understands that the Department of the Navy awarded an alternative-source contract for F/A-18A/B/C/D depot-level maintenance in February 2016. This award is another step toward addressing the backlog of F/A-18A/B/C/D depot-level maintenance requirements in a manner that leverages the range of relevant resources within the national technology and industrial base, and the committee encourages the Navy to induct aircraft to meet this contract's maximum authorization within each contract year. While the committee expects the Department of the Navy to workload its organic aviation depots to the maximum extent possible and in accordance with Federal law, the committee encourages the Navy to make maximum use of this contract to help eliminate the remaining backlog of F/A-18A/B/C/D depot-level maintenance requirements. Additionally, to improve efficiency of the aircraft maintenance process under this contract, the committee encourages the Navy to provide authorizations for engineering disposition and alternate supply chain as appropriate, with accompanying contractual changes.

The committee directs the Secretary of the Navy to submit a report to the House Committee on Armed Services not later than September 15, 2017, that includes, but is not limited to, plans to maximize the F/A-18A/B/C/D workload at its organic aviation depots; an evaluation of ongoing F/A-18A/B/C/D alternative-source depot-level maintenance efforts; plans for maximizing the number of aircraft authorized under the existing contract by contract year; plans for establishing a follow-on multiple-award contract for F/A-18A/B/C/D depot-level maintenance, as required to address the maintenance backlog; and confirmation that Navy officials are providing engineering disposition and other improvements to allow for optimal efficiency and throughput of aircraft.

#### Expediting the Security Clearance Process

The committee notes that the Department of Defense and the Office of Personnel Management have undertaken significant steps to improve the security clearance review process. While some progress has been made, the security clearance backlog continues to prevent the Federal Government and the national security industrial base from hiring otherwise qualified personnel. The committee believes more needs to be done to address this backlog, including reviewing current security clearance procedures. For example, the Questionnaire for Public Trust Positions Standard Form 85 requires nearly the same information as the Standard

Form 86, Questionnaire for National Security Positions. The committee believes positions requiring access to classified information are inherently positions of public trust, and requiring an individual with a favorably adjudicated security clearance based on the Standard Form 86 to undergo an additional nearly identical background check based on the Standard Form 85 is redundant, and likely adds to the significant backlog of background investigations throughout the U.S. Government.

The Department risks losing new hires, particularly qualified linguists, engineers, computer scientists, and cyber professionals, who find jobs elsewhere while their security clearance review takes months to complete. However, the committee does note that the Federal Government already has options to expedite the security clearance process to bring in personnel that have linguistic and cultural competencies that are critical to the warfighter. Authority under title 5, United States Code, allows the government, in certain circumstances, to expedite hiring persons with specialized skills.

The committee directs the Secretary of Defense, in consultation with the Office of Personnel Management, to provide a briefing to the Senate Committee on Armed Services and the House Committee on Armed Services by December 1, 2017, on efforts to shorten the security clearance review process. The briefing shall address potential time-savers such as using Standard Form 86 in lieu of Standard Form 85, allowing industry to provide certified initial background materials, reducing the number of contractors who require a clearance, returning to interim secret clearances for low-risk hires, standardizing the process to allow civilians and contractors to move to new jobs within an agency without a lengthy wait for an additional security review, and standardizing adjudication measures. The briefing provided should also include information about how the Federal Government uses other authorities to hire linguists and cultural experts where there are workforce gaps.

#### Explosive Ordnance Disposal Organization and Support to Operational Plans

Improvised explosive devices (IEDs) have been the enemy's weapon of choice in the Republic of Iraq, the Syrian Arab Republic, and the Islamic Republic of Afghanistan and, according to the Department of Defense, will probably be a mainstay in any future conflict, given their low cost to develop coupled with their potential for strategic impact. Since 2003, under the aegis first of the U.S. Army's Improvised Explosive Device Task Force, then of the Joint Improvised Explosive Device Defeat Organization, and now of the Joint Improvised-Threat Defeat Organization, the Department of Defense has sought to counter IED threats to U.S. forces. Integral to this effort, among other things, are explosive ordnance disposal (EOD) units which, despite a spike in growth since 2002, remain in high demand relative to the limited number of units throughout the Department. Moreover, the committee is concerned about the degree to which EOD requirements and capabilities have been integrated into standing operational plans. In light of the

above, the committee directs the Comptroller General of the United States to assess the following:

(1) the extent to which EOD requirements and capabilities are integrated into operational plans, including those for potential support of civil authorities;

(2) the extent to which the Department's EOD capabilities, including manning and equipment, are sufficient to meet combatant commander requirements;

(3) what, if any, steps are being taken to identify and mitigate any EOD capability gaps in operational plans;

(4) the extent to which the Department conducts oversight of Department-wide EOD functions; and

(5) any other issues the Comptroller General determines appropriate with respect to EOD capability support to operational plans.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than December 1, 2017, on the Comptroller General's preliminary findings and to submit a final report to the congressional defense committees on a date agreed to at the time of the briefing. The committee also directs the Secretary of Defense, the Secretaries of the military departments, and the combatant commanders, to share any pertinent information about EOD units, requirements, and capabilities, including EOD units required to support operational plans, with designated representatives of the Government Accountability Office assigned to this review commensurate with applicable classification guidance.

### Naval Shipyard Development Plans

The Department of the Navy operates and maintains four public shipyards in the United States: Norfolk Naval Shipyard, Virginia; Portsmouth Naval Shipyard, Maine; Puget Sound Naval Shipyard, Washington; and Pearl Harbor Naval Shipyard, Hawaii. The committee recognizes the vital role these shipyards play in generating readiness, supporting the Navy's surface and submarine fleet by performing depot- and intermediate-level maintenance, modernization, emergent repairs, and inactivations. However, the committee notes that the infrastructure at these shipyards has not been properly sustained, modernized, or configured to efficiently and effectively support the Navy's future force structure and shipyard workload. The committee believes that long-term underfunding of the Navy's infrastructure investment accounts has created capability gaps in shipyard infrastructure that will result in the public shipyards being unable to properly complete assigned and projected work. In fact, disturbing delays in ship overhaul work have already occurred.

The committee also notes that the public shipyards are supported by more than 34,000 employees and the Navy is planning to expand the workforce by another 2,000 employees by 2020 to accommodate anticipated workload. The committee notes that almost half of the entire public shipyard workforce has less

than 5 years of experience and lacks the journeyman skills associated with a more experienced workforce. The Navy has testified that the manpower shortfall and inexperience in the public shipyard workforce may result in extended maintenance availabilities, thus affecting operational availability of combat-ready ships. This comes at a time when existing maintenance backlogs have expanded due to the increased operational tempo of the fleet, and continuing delays in receipt of appropriations have further affected the public shipyards' ability to execute work on time.

The shortage of journeyman-level experience and the insufficient industrial capacity have led to severe throughput issues at the public shipyards, highlighted by six nuclear attack submarines languishing in the shipyards for years beyond their scheduled completion date. As a result, some crews have spent their entire submarine assignment rotation pier-side, which degrades military personnel readiness and operational effectiveness. Further, insufficient capacity has led the Navy to decertify the USS Boise (SSN 764) for diving operations until this submarine can be inducted for its engineered overhaul. Other attack submarines are likely to experience similar operational limitations until sufficient public-sector throughput can be provided. The committee is disappointed by the Navy's failure to respond in a timely and effective manner to growing backlogs and to implement corrective actions. The committee believes that significant workforce, workload planning, and infrastructure management changes should occur to enable more efficient planning and execution of maintenance availabilities.

While the public sector is expanding to accommodate the growing maintenance requirements, the committee also notes that private-sector shipyards currently have infrastructure and workforce capacity to help mitigate the shortfalls in nuclear maintenance availabilities. The committee believes that the Naval Sea Systems Command has moved away from the "One Naval Shipyard" concept that it had previously embraced at a time when it should be fully leveraging the entire industrial base. Furthermore, the committee notes that a significant private-sector workload expansion is programmed in conjunction with the start of the Columbia-class program. To reduce risk associated with the delivery of the Columbia-class ballistic missile submarine, the committee believes that the Navy should analyze the feasibility of moving additional workload to the private sector until the public sector can establish a higher workload throughput baseline. At the same time, the Navy must not divert funding from or delay the public shipyards' modernization and workforce expansion that are necessary to meet future Navy requirements. This will allow the private sector to build up its workforce gradually prior to commencing work on the first Columbia-class submarine rather than rapidly expanding its workforce in 2021. The committee further believes that this temporary move may lead to a more efficient private-sector workforce and eventually lower program costs associated with the Columbia-class program, which, at a cost of \$100.2 billion, is the second largest acquisition program in the Department of Defense. Naval Sea Systems Command should examine ways to eliminate the barriers between the public- and private-sector nuclear shipyards and

consider innovative ways to share resources and infrastructure across the enterprise while the public yards recapitalize.

Finally, the committee notes that the deficiencies within the public shipyard enterprise will be further exacerbated by the Navy's goal to expand ship force structure. The committee believes that the growth in the public shipyard enterprise should be paced by the anticipated growth in the Navy force structure, as detailed by the administration's 30-year shipbuilding plan, required annually pursuant to section 231 of title 10, United States Code.

Therefore, the committee directs the Secretary of the Navy to provide a report to the congressional defense committees, by March 1, 2018, on a comprehensive plan to address shortfalls in the public shipyard enterprise. Specifically, this plan shall address the following elements:

(1) **Personnel Roadmap:** Prepare an employment development plan by shipyard that estimates resourcing shortfalls and full-time equivalent allotments, including overtime and contracting support, workforce hiring targets, and the numbers and types of employees needed. To the degree possible include the number of apprentices by trade skill, the number of engineers, and the number of overhead disciplines; and the training initiatives and time needed to meet the emerging workload requirements for fiscal year 2019 and beyond.

(2) **Infrastructure Development Plan:** Identify current infrastructure deficiencies at U.S. naval shipyards and prepare a detailed master plan for each shipyard that includes a list of specific infrastructure projects, scope of work, cost estimates, and schedule associated with the current and 30-year force structure projections.

(3) **Metrics Assessment Plan:** Develop holistic workload metrics to better assess the efficiency of the entire shipyard versus a narrow review by maintenance availability.

(4) **Workload Management Plan:** Using the limitation currently imposed by the shortfall of personnel and the existing material condition of the public shipyards, prepare a 5-year workload management plan to include the entirety of the nuclear maintenance enterprise, both public- and private-sector capacities, that limits lost operational days.

(5) **Funding and Authority Plan:** Each plan shall identify the additional funding and any legislative authority needed to achieve an end state, as quickly as practicable, of elimination of all ship maintenance backlogs and a return to predictable, sustainable, and affordable ship maintenance availabilities, including for the anticipated growth in Navy force structure.

### Readiness of Coastal Riverine Forces

Following an incident involving the temporary detention of 10 U.S. Navy sailors aboard two riverine patrol boats by Iran's Revolutionary Guard in January 2016, the Comptroller General of the United States conducted a comprehensive review of the readiness of the Navy's Coastal Riverine Force, whose operational

responsibilities range from defending high-value assets and critical maritime infrastructure to conducting offensive combat operations. The Comptroller General's report on the readiness of the Coastal Riverine Force highlights manning, training, and equipping challenges the force faces in maintaining its warfighting readiness. However, the committee notes that the Navy's response to the report failed to describe the steps the Navy will take to address the challenges identified. The committee is concerned that the challenges outlined in the Comptroller General's report will continue to worsen without correction, particularly the manning challenges facing the force. Accordingly, the committee directs the Secretary of the Navy to:

- (1) develop manning strategies tailored to the Coastal Riverine Force's unique needs to address gaps in critical skills and competencies;
- (2) evaluate what human capital flexibilities the Navy could implement to support strategies to address Coastal Riverine Force's manning shortfalls; and
- (3) develop a strategic human capital plan that addresses Coastal Riverine Force manning shortfalls.

Further, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services and the Senate Committee on Armed Services not later than January 12, 2018, on the results of these efforts.

#### Remotely Piloted Aircraft Training Strategy

The committee notes with concern that the Air Force's Active and Reserve Component MQ-1 and MQ-9 aircrews within the Air Force's remotely piloted aircraft (RPA) enterprise have limited access to unit training resources such as proficiency simulators and continuation training sorties because they are stretched to meet the operational demands of combatant commanders supporting deployed forces. The committee also notes that RPA aircrews are able to meet some training and proficiency requirements during the conduct of operational missions, but believes that this practice should be exercised only when absolutely necessary.

Therefore, the committee directs the Secretary of the Air Force to brief the House Committee on Armed Services not later than September 28, 2017, on the service's approach to RPA aircrew training, with a particular focus on how the Air Force plans to field simulator capability and training capacity among Active and Reserve Component units supporting RPA operations.

#### Report on Military Training for Rotary-Wing Aviation

Ongoing readiness challenges with rotary-wing aviation in the U.S. Armed Forces have raised a number of questions around the maintenance, training, manpower, safety, and deployability of these aircraft. For example, both the Army and Marine Corps have cited a lack of funding for training and maintenance, including spare parts, as a critical concern for their rotary-wing aviation communities. Further, the military services have cited pilot shortages and the lengthy duration of new pilot training as issues affecting rotary-wing aviation

readiness. These issues have been further exacerbated by increased civilian hiring competition for experienced rotary-wing pilots. The committee has expressed concern about the effect these readiness challenges have had on the frequency of accident mishaps in rotary-wing aviation over the past 5 years and has urged the military services to prioritize funding for rotary-wing aviation in order to ensure that the United States maintains this crucial capability into the future.

Given these concerns, the committee directs the Comptroller General of the United States to assess the following:

(1) to what extent have the military services met annual training requirements for rotary-wing aircraft, and identified any factors that have limited this training;

(2) what is known about the relationship between the amount and type of training completed on rotary-wing aircraft and the number of accident mishaps;

(3) to what extent have the military services utilized virtual training devices to meet training requirements for rotary-wing aircraft; and

(4) any other issues the Comptroller General determines appropriate with respect to rotary-wing aviation training.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than February 1, 2018, on the Comptroller General's preliminary findings and to submit a final report to the Senate Committee on Armed Services and the House Committee on Armed Services on a date agreed to at the time of the briefing.

### Report on Multi-Domain Battle Concept

Over the past decade, the Russian Federation, the People's Republic of China, and other potential adversaries have developed sophisticated intelligence, surveillance, and reconnaissance; air defense; artillery; information operations; and other capabilities that pose significant challenges to U.S. ground forces entering the theater and, once in place, would leave them exposed to counterattack. In February 2017, the Army and Marine Corps published a concept paper describing an approach for ground combat operations in the face of such challenges. This approach, named "multi-domain battle," would synthesize ground maneuver, fires, and information operations capabilities to project power from the land and into the air, maritime, and cyber domains. In doing so, land forces would be able to consolidate gains, deny the adversary freedom of movement, and create temporary windows that the joint force could then exploit for decisive operations.

The committee appreciates the Army and Marine Corps publication of the multi-domain battle concept and is encouraged by the Army's forward thinking on the next steps to bring multi-domain battle to the warfighter. The committee is aware of additional, planned Army concept development, experimentation, and potential force structure changes that are intended to translate the concept into a warfighting capability. However, significant work remains. Importantly, the committee notes that multi-domain battle has implications for the Navy and Air

Force, whose involvement will be instrumental in the concept's warfighting success. Bringing the multi-domain battle concept to fruition will require changes in warfighting doctrine, organization of new warfighting formations at multiple echelons, investment in key technologies, leader education, force training, and readiness evaluation.

Therefore, the committee directs the Comptroller General of the United States to review the Army's progress and plans in developing the concept. As part of the review, the Comptroller General should examine the extent to which the Army and Marine Corps have engaged with each other and with the other services to develop multi-domain battle concepts and doctrine, and set priorities for organizing, training, and equipping the force in the concept. Additionally, the review should assess:

- (1) the services' priorities and plans for fielding new multi-domain battle capabilities over the next 2 to 5 years;
- (2) the implications for the Army's near-term and long-term modernization plans;
- (3) plans for educating, training, and evaluating the readiness of Army formations to execute multi-domain battle operations; and
- (4) any other matters related to multi-domain battle the Comptroller General determines are appropriate.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services by July 1, 2018, on preliminary findings of the review and to submit a final report to the Senate Committee on Armed Services and the House Committee on Armed Services by a date agreed to at the time of the briefing.

### Report on Unit-Level Training Costs to Build Full-Spectrum Readiness

The Department of Defense uses operation and maintenance (O&M) funding to train U.S. military forces in order to build combat readiness, among other purposes. However, in recent years, the military services have raised concerns about the level of O&M funding available to support unit-level training programs. For example, in 2016 the Assistant Commandant of the Marine Corps stated that given available resource levels, the Marine Corps was accepting prolonged readiness risks and focusing the training of some units to their more limited rotational missions versus full-spectrum training. The Vice Chief of Staff of the Army also stated that the Army took actions to enable the effective and efficient use of training resources in order to mitigate the risk posed by the fact that less than one-third of Army units were at acceptable levels of readiness.

The military service chiefs have identified rebuilding the readiness of the armed forces to prevail across a full range of potential contingencies as a top priority and, in recent budget requests, have recommended funding for training that had been cut due to budget constraints. The committee is aware that the military services use various approaches and models to determine funding requirements for

training as part of the Department's planning, programming, budgeting, and execution processes. The committee is further aware that the Department's annual budget requests include some information about the military services' O&M funding estimates for training. However, this information is not sufficiently detailed to determine unit training costs and the amount of readiness that is expected to be generated by annual O&M expenses. Therefore, it is difficult to determine the benefits that would be gained from additional O&M funding for unit-level training.

To better understand the military services' budgeting processes to build unit-level training readiness, and to achieve greater transparency over the military services' O&M funding requests, the committee directs the Comptroller General of the United States to assess the following:

(1) how the military services determine annual O&M budget estimates for unit-level training;

(2) the extent to which the Department of Defense and the military services established mechanisms to monitor the amount of O&M obligations for unit-level training and used data on actual O&M costs to develop future funding requests; and

(3) the extent to which the military services established processes and metrics to systematically evaluate unit training costs and the amount of readiness that is generated from O&M training expenditures.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than February 1, 2018, on the Comptroller General's preliminary findings and to submit a final report to the congressional defense committees on a date agreed to at the time of the briefing.

### Small Arms Weapons Simulation Training

The committee recognizes the benefits gained from the use of simulation and synthetic training systems to maximize military training and readiness requirements. As the use of such systems increases to supplement live training exercises and to meet critical warfighter readiness requirements, the committee is concerned that the Department of Defense has not implemented clear performance evaluation metrics, data collection requirements, and validation standards to accurately assess and document whether each command's chosen training system is transferring required skills proficiency to live fire and real-world combat scenarios.

Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services by December 1, 2017, that includes, at a minimum: a detailed description of the evaluation metrics that each service plans to use to ensure all new small arms simulation training systems and programs of instructions are tested to demonstrate clear and repeated live fire transfer proficiency and combat readiness prior to system acquisition; an assessment of the live fire performance results of existing simulation and synthetic small arms training systems being utilized; a plan to ensure future systems are capable of data collection that gives commands the ability to maintain and track individual and squad-level training records, provide trend analysis and forecast

models to reduce training time and accurately determine live fire transfer readiness, and train to multiple proficiency levels and threat evolutions; and, examples of current simulation and synthetic small arms training systems that are documenting cost savings in ammunition, travel, training time, and expedited and improved qualification and remediation rates.

### Training Range Inventory, Capacity, and Configuration in Europe

As the committee asserts elsewhere in this report, the committee believes there is operational and strategic value in maintaining forward presence of United States military forces by providing rapid response capabilities to geographic combatant commanders, serving as a deterrent to potential adversaries, assuring partners and allies, and facilitating cooperative efforts to build and develop partnership security capabilities. The committee notes that permanently stationed U.S. forces presently are located primarily at legacy, enduring locations in Western Europe, while rotational U.S. forces have primarily been deployed to support exercises and assurance activities in the Baltic countries, as well as Central and Eastern Europe. With these rotational forces exercising in new locations, the committee is concerned that training requirements to build and sustain readiness may not be adequately met by current training range capabilities in the region.

Therefore, the committee directs the Secretary of Defense, in coordination with the Commander, U.S. European Command, to provide a report to the congressional defense committees by April 1, 2018, on the location, capabilities, and capacities of air and ground ranges, range complexes, military training routes, and special-use areas in the European Command's area of responsibility. At a minimum, the report should address the following:

- (1) an inventory of current air and ground ranges, range complexes, military training routes, and special-use areas the U.S. Armed Forces currently utilize or have access to in the U.S. European Command's area of responsibility;
- (2) an overview of the current capabilities and capacity of these training areas to support permanent and rotational forward presence of U.S. military forces;
- (3) an assessment of any capability gaps at these training areas that limit the ability to meet training requirements to U.S. standards; and
- (4) details of current or planned investments in training infrastructure to mitigate identified capability gaps, help meet U.S. training requirements, or required to support additional permanent or rotational forces in Europe, funded either by the United States, NATO, or foreign partners.

### OTHER MATTERS

#### Consideration of the Domestic Textile Industrial Base in Contracting for Uniforms

The committee is aware of an August 2016 Department of the Navy directive altering mandatory seabag requirements, including elimination of the wool peacoat and the all-weather coat. The committee is concerned this decision was

made without considering upgrades or alternatives to the traditional peacoat or the impact to the nation's domestic textile industrial base. As the Department of the Navy works to streamline military uniforms, the committee notes the importance of a stable domestic textile industrial base to produce garments such as these and encourages the Department to take into consideration, when making decisions about uniform changes, such an impact upon the domestic textile industrial base, including the small businesses that provide critical contributions.

The committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than October 1, 2017, that addresses the following:

- (1) an explanation of why the Navy removed the peacoat from the mandatory seabag requirements;
- (2) what consideration of alternatives was given to upgrades or improvements to the peacoat;
- (3) any evaluation of the costs of the cold-weather parka compared to both the peacoat and the all-weather coat; and
- (4) an assessment of the impact to the domestic textile industrial base of these changes.

#### Dioxin-Based Herbicides Review Related to Guam

Agent Orange, a dioxin-based herbicide now known as a carcinogen, was used by the United States during the Vietnam war to defoliate trees and shrubs that provided cover for opposition forces. The committee is concerned that additional exposures to Agent Orange may have occurred in the U.S. Territory of Guam, where persistent questions have been raised about the use of locations on Guam as a transshipment point for Agent Orange intended for use in Vietnam. The committee therefore directs the Comptroller General of the United States to conduct a review of the Federal Government's handling of Agent Orange on Guam and submit a report of the findings to the House Committee on Armed Services by March 22, 2018. The Comptroller General's study should address the following:

- (1) what is known about where the Federal Government stored, transferred, and used Agent Orange or its components on Guam, and what is known about related contamination at these locations, including what is known about the storage or transfer of Agent Orange on Guam;
- (2) the number of known and suspected environmental "hot spots" from dioxin contamination associated with Agent Orange that are on Guam;
- (3) what is known about the current dioxin levels and threats to human health and the environment at these sites;
- (4) the plans that are in place to remediate these sites, and the status of these plans; and
- (5) the sum of money the Department of Defense spent to date to clean up these sites and the projected remaining costs associated with these cleanup efforts.

## Fabric and Membrane Technology for Footwear

The committee expresses its ongoing support for Department of Defense research and testing of cutting-edge fabric and membrane technologies to improve service members' comfort, effectiveness, and mission readiness. The report (S. Rept. 114-49) accompanying the National Defense Authorization Act for Fiscal Year 2016 included a requirement for the Secretary of Defense to submit a report to the Senate Committee on Armed Services on fabric-based respiratory protective equipment, including evaluations of emerging technologies to minimize service member exposure to inhalation of particulates and pollutants. Additionally, in the report (S. Rept. 114-255) accompanying the National Defense Authorization Act for Fiscal Year 2017, the Senate Committee on Armed Services directed the Secretary of the Army to report similarly on footwear technologies that incorporate new polytetrafluoroethylene (ePTFE) and other membrane technologies. In light of these directives, the committee understands that the Army is currently evaluating the referenced technologies and that the evaluations are yielding positive results.

Recognizing the importance of these technologies to warfighter readiness, the committee directs the Secretary of the Army to provide a briefing to the House Committee on Armed Services not later December 15, 2017, on the suitability of the aforementioned technologies to military applications. Specifically, the briefing shall provide an evaluation of the fabric-based filter protective equipment technologies reviewed under the reporting requirement in S. Rept. 114-49, identification of specific applications for integration of the technology, and a plan for transitioning the technology into such applications and programs. In line with the Army's review of footwear technologies as required in S. Rept. 114-255, the briefing shall provide a detailed evaluation of new ePTFE membranes, laminates, and other membrane technologies. Additionally, the briefing shall include suggested revisions to current requirements and product descriptions that could be implemented to expand access to these membrane technology advancements. Finally, the briefing shall address a plan for transitioning membrane technologies into military applications, including Army boot modernization programs such as the jungle combat boot program, the cold-weather and extreme cold-weather boot programs, and future cold-weather clothing systems.

## Polyfluoroalkyl Substances

The committee notes that perfluorooctanesulfonic acid (PFOS) and perfluorooctanoic acid (PFOA) are part of a class of man-made chemicals that are used in many industrial and consumer products to make the products resist heat, stains, water, and grease. In the 1970s, the Department of Defense and commercial airports began using aqueous film forming foam (AFFF), which contained these chemical compounds, to extinguish petroleum fires. The committee notes that on May 19, 2016, the U.S. Environmental Protection Agency (EPA) issued new Lifetime Health Advisories (LHAs) under the Safe Drinking Water Act for combined PFOS and PFOA concentrations at 70 parts per trillion. Since EPA issued these

new LHAs, the Department of Defense has completed testing of the 480 drinking water systems at locations where the Department supplies drinking water. In addition, the Department is currently working through The Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. 9601) (CERCLA) process to conduct preliminary assessments and site inspections to identify sites where PFOS and PFOA may have been released by the Department of Defense. This activity includes performing tests of privately owned drinking water wells near military installations where warranted. These efforts will be used to inform future cleanup actions, and the Department incorporates LHA information when assessing risk to human health under CERCLA.

The committee understands that the Department of Defense spent approximately \$200.0 million through December 31, 2016, in response to PFOS and PFOA. This funding has been used to conduct preliminary assessments and site inspections, test drinking water systems, and provide mitigations such as bottled water or drinking water filtration systems where water systems tests indicate PFOS/PFOA above the LHA levels. The committee notes that the Department was unable to program funds specifically for these actions in the fiscal year 2016 or fiscal year 2017 budget requests and have been funding their response to PFOS/PFOA using existing funds originally programmed for other response actions. The committee is supportive of the Department's near-term efforts to respond to PFOS and PFOA and believes it is critical for the Department to continue its outreach and engagement with local communities with drinking water systems that have PFOS/PFOA detected above the LHAs and may have been impacted by the Department's activities. Furthermore, the committee believes it is important for the Department to fully plan, program, and budget for actions related to PFOS and PFOA in order to meet its responsibilities under the CERCLA, the Safe Drinking Water Act (42 U.S.C. 300f), and other applicable Federal statutes, rules, and regulations.

Finally, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than September 30, 2017, on the Department's response to PFOS/PFOA. The briefing should provide the following:

- (1) the locations on or in proximity to current and former military installations where the Department has conducted testing of military, public, and private drinking water systems and a summary of the results of those tests where PFOS/PFOA levels were detected in excess of the LHA levels;

- (2) the locations on or in proximity to current and former military installations where the Department has conducted groundwater testing where PFOS/PFOA may have been released and a summary of the results of those tests where PFOS/PFOA levels were detected in excess of the LHA levels;

- (3) short-term mitigations that have been funded and provided by the Department, both on military installations and in the surrounding communities, where PFOS/PFOA levels were detected in excess of the LHA levels;

(4) the process and timeline for identifying and resourcing long-term remediation on military installations or in the surrounding communities where PFOS/PFOA levels were detected in excess of the LHA levels; and

(5) research conducted in pursuit of less environmentally harmful AFFF blends containing less or no PFOS/PFOA.

### Recurrent Flooding and Sea Level Rise

The committee is aware that several Department of Defense installations and facilities are experiencing recurrent flooding events and encroachment from sea level rise. These events have the potential to adversely impact military operations, training, and readiness. The committee is aware that the Department of Defense and the military departments have initiated several studies and collaborations with academic, research, and intergovernmental institutions to model recurrent flooding and sea level rise and examine options for enhancing mission resiliency at impacted military installations. The committee supports these collaborations and encourages the Department of Defense to continue and expand these research efforts.

The committee directs the Secretary of Defense, in coordination with the Secretaries of the military departments, to provide a briefing to the House Committee on Armed Services not later than March 1, 2018, on recurrent flooding and sea level rise impacting military installations. At a minimum, the briefing should address the findings and recommendations of the research collaborations that have been undertaken to date, a discussion of areas where the Department of Defense believes additional research is needed, and ongoing and planned mitigations to ensure the continued operational viability and mission resilience of affected military installations.

### Standard-Issue Garments for Women

In the committee report (H. Rept. 114-537) accompanying the National Defense Authorization Act for Fiscal Year 2017, the committee directed the Secretary of Defense to provide a briefing to the committee outlining plans to provide personal protective equipment (PPE) and organizational clothing and individual equipment (OCIE) developed specifically for female service members. The committee notes that it has not yet received this briefing. The committee further directs the Secretary of the Army to provide a briefing to the House Committee on Armed Services not later than September 30, 2017, on efforts to ensure that standard-issue garments, such as the Army Combat Shirt, are meeting the unique body types of female service members. This briefing should include a discussion of how the Army is seeking to leverage advancements in flame-resistant technology and integrate them into standard garments.

## TITLE XIV—OTHER AUTHORIZATIONS

### ITEMS OF SPECIAL INTEREST

#### Beryllium Supply Chain

The committee notes the continuing importance of the strategic and critical material beryllium to national security. The committee understands that, starting in 2004, the Department of Defense took affirmative steps to invest in a domestic beryllium manufacturing facility in order to maintain security of supply, as well as the affordability of beryllium for defense systems. These interventions have not only provided security of supply, they have also stabilized the price for beryllium metal in recent years, and the committee is encouraged that the Department of Defense is considering additional measures that would stabilize prices at the U.S. beryllium metal facility.

However, the committee is concerned that individual program managers within the Department of Defense are considering the use of foreign-owned competitors. The committee believes there is no security of supply with foreign beryllium, and there is no realistic estimate for a supplier mine to be opened in the foreseeable future. As a result, the Department of Defense should exercise care when contractors or subcontractors seek to supply national security needs through use of these foreign manufacturers.

The committee directs the Under Secretary of Defense for Acquisition, Technology, and Logistics to submit a report to the House Committee on Armed Services by November 30, 2017, on the supply chains for beryllium metal used by the Department of Defense. Such a study shall include: (1) an analysis of the economic viability and long-term supply potential of all current beryllium metal suppliers; and (2) an analysis of when foreign supplies of beryllium are expected to be exhausted.

#### Fiscal Stability of the National Defense Stockpile

The committee notes that the funds within the National Defense Stockpile (NDS) Transaction Fund have been significantly depleted due to the lack of excess materials available for disposal. The fund was designed to allow for the sale of excess materials, from which the funds in turn could be used to acquire emergent strategic and critical materials for national defense requirements. While this process has been ongoing since just after World War II, the value of the available inventory designated as "excess" is no longer sufficient to acquire the strategic and critical material requirements identified by the President. The committee believes the current manager of the NDS, the Defense Logistics Agency Office for Strategic Materials (DLA-SM), is hampered in its acquisition strategy due to the lack of funds available for the procurement of materials. The committee has observed that the DLA-SM must determine which materials are most critical for acquisition, leaving

other material requirements unfunded. The committee notes that the fund will become insolvent within the next three to seven years, despite the careful management of expenditures.

Accordingly, the committee directs the Secretary of Defense, in coordination with the NDS manager, to provide a briefing to the congressional defense committees not later than January 31, 2018, on the plan to develop and implement a funding strategy for sustaining a robust national defense stockpile inventory when current funds in the transaction fund are depleted. This strategy should include the incorporation of acquisition requirements for strategic and critical materials through the discretionary appropriations process.

#### **ITEMS OF SPECIAL INTEREST**

##### **Army Power Projection Platforms**

Army power projection platforms are critical to mission readiness. Consistent review, sustainment, and timely recapitalization are necessary to maintain airfield and rail infrastructure at the required mission functional and readiness ratings. Therefore, the committee directs the Secretary of the Army to provide a briefing to the House Committee on Armed Services, not later than March 1, 2018, detailing the Army's power projection platform infrastructure investment strategy. The briefing shall include an overview of the current mission function and readiness ratings for the Infrastructure Mobility Category at power project platforms as indicated in the Installation Status Report and a current Army Power Projection Platform Transportation Infrastructure Capability Assessment Study with the Army's recommendations and associated cost estimates for required infrastructure improvements.

### **TITLE XXII—NAVY MILITARY CONSTRUCTION**

#### **ITEMS OF SPECIAL INTEREST**

##### **Assessment of Department of Defense Equities for Operation and Maintenance of the George P. Coleman Memorial Bridge, Yorktown, VA**

The committee notes that the George P. Coleman Memorial Bridge, spanning the York River between Yorktown and Gloucester Point, Virginia, is critical to the efficient transport of cargo to and from Naval Weapons Station Yorktown. The bridge's unique double swing design allows transport vessels bound for military installations upstream to reach their destinations without delay. In

1996, the bridge became a toll bridge to support construction of a new four-lane bridge to improve traffic flow. Daily bridge commuters can pay upwards of \$500 per year in toll fees, some of which may go to operate the bridge's double swing span. The committee wishes to better understand the benefit the Department is deriving from commuter tolls and whether commuters are bearing an unfair burden. Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services, not later than March 1, 2018, that assesses the military value of the span, including details on the utilization rate of the span by the Department of Defense and other non-Department of Defense up-river traffic. In addition, the briefing should address the Department's discussions with local and State stakeholders that have fiduciary responsibility for the construction and management of the bridge, summarize any Department of Defense authorities and opportunities to help mitigate costs, and provide the Department's views whether such mitigations are appropriate.

#### Requirements for Munitions and Explosives of Concern Clearance on Guam

The committee recognizes the efforts the Navy has undertaken to improve communication with stakeholders regarding the Explosive Safety Submission (ESS) requirements for Munitions and Explosives of Concern (MEC) clearance on military construction projects on Guam. The committee is supportive of these efforts and encourages the Navy to continue to hold regular sessions with stakeholders to solicit feedback on the ESS and its exemptions, consistency of application across projects, and impacts on military construction projects. The committee believes a key element to continuing to improve communication with stakeholders is to hire a full-time civilian employee to oversee, coordinate, and administer the implementation of the ESS and its associated amendments. The committee understands that the Navy has still not filled such a position and encourages the Navy to expedite the hiring process and consider temporarily assigning military or civilian personnel to fill that role in the interim. In addition, the committee believes the establishment of a Quality Assurance Surveillance Program would help better standardize the quality assurance requirements and streamline the implementation of the written requirements related to MEC clearance in support of military construction projects on Guam.

As this process has developed, the preponderance of possible hazardous explosives found at construction sites on Guam have been determined to be nonhazardous

With that in mind, the committee believes the Navy should continue to periodically revisit the ESS and consider issuing additional exemptions that reflect stakeholder input and conditions on the ground to balance the cost, schedule, and efficacy of MEC clearance in support of military construction projects on Guam. The committee also notes that the Navy has not updated its MEC Likelihood Map for Guam to reflect data that has been gathered since the ESS was initially approved in 2010. The committee believes the Navy should update this document to better

inform the ESS and additional exemptions to better inform MEC clearance on Guam. The committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than September 30, 2017, on the status of the Navy's MEC response on Guam. Specifically the briefing should provide an update on the Navy's efforts to hire a full-time individual to oversee, coordinate, and administer the implementation of the ESS on Guam; how the Navy is addressing the Quality Assurance Surveillance Program requirements for MEC clearance on Guam; its plans to update the MEC Likelihood Map for Guam; and the data on hazardous versus nonhazardous anomalies detected, to include inoperable munitions, on Guam.

## TITLE XXIII—AIR FORCE MILITARY CONSTRUCTION

### ITEMS OF SPECIAL INTEREST

#### Air Force Dormitory Master Plan

The committee is aware that the Air Force maintains 866 permanent party dormitories world-wide and is in the process of developing an updated Dormitory Master Plan. The committee also understands the Air Force is reviewing its current unaccompanied housing strategy and policy as part of a working group led by senior Air Force enlisted personnel, with an emphasis on sustaining and improving the existing dormitory inventory. Therefore, the committee directs the Secretary of the Air Force to provide a briefing to the House Committee on Armed Services by March 1, 2018, on the results of the senior Airmen working group and the Air Force's updated Dormitory Master Plan. The briefing should include the total amount of military construction, sustainment, restoration, and modernization funding required to recapitalize unaccompanied dormitories by an Air Force determined date and the annual sustainment funding required to maintain unaccompanied dormitories. The briefing should also include an analysis of the feasibility of privatizing dormitories in some locations to speed improvements and reduce costs.

## TITLE XXV—INTERNATIONAL PROGRAMS

### ITEMS OF SPECIAL INTEREST

#### Infrastructure Capabilities, Capacity, and Investments

Elsewhere in this report, the committee notes its position that there is operational and strategic value in maintaining forward presence of U.S. military forces in the U.S. European Command area of responsibility. As the Department of Defense considers what infrastructure investments may be required in Europe to support enduring and rotational U.S. forces, the committee believes it is important to identify the infrastructure capacity, capabilities, and planned investments of our

North Atlantic Treaty Organization (NATO) partners. Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services by March 1, 2018, on the capability and capacity of the current and planned European infrastructure available to the Department of Defense by our NATO allies and partners. The briefing should address the current and planned capabilities and capacity of our NATO allies' and partners' infrastructure (to include transportation and logistics infrastructure); an assessment of any capability and capacity gaps that limit military exercises and operations with NATO allies and partners; and planned investments.

## TITLE XXVIII—MILITARY CONSTRUCTION GENERAL PROVISIONS

### ITEMS OF SPECIAL INTEREST

#### Collaboration with Federal Aviation Administration on Unmanned Aerial Systems

The committee believes that the significant military training demand for Unmanned Aerial Systems suggests that Federal Aviation Administration (FAA) regulations regarding line-of-sight requirements be reevaluated. The committee encourages the Secretary of Defense and the Administrator of the Federal Aviation Administration to continue to collaborate on the development of plans and policies that would allow the Department's Unmanned Aerial Systems to operate within military operating area airspace contiguous to existing restricted airspace without line-of-sight requirements. Furthermore, the committee is interested in understanding in detail the Department's current engagement on this issue with the Federal Aviation Administration. Therefore, the committee directs the Chair of the Department of Defense's Policy Board on Federal Aviation to provide a briefing to the House Committee on Armed Services, not later than March 1, 2018, detailing the board's efforts to advocate for the elimination regulatory restrictions that prevent routine access to national airspace for the Department of Defense's Unmanned Aerial Systems.

#### Financial Institutions on Military Installations

The committee is aware that the Department of Defense has not established a standardized method of calculating and considering the in-kind value of the financial education, support, and services provided by financial institutions when determining the terms of a facility lease to support the operation of financial institutions on a military installation. Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services, not later than March 1, 2018, regarding the Department's progress in establishing a standardized process. At a minimum, the briefing should address how the Department calculates the in-kind value of services provided by financial

institutions on military installations, as well as whether the in-kind value calculated for these services can be used to partially or fully satisfy the fair market value requirement for leasing non-excess property on military installations pursuant to section 2667 of title 10, United States Code. It should also address the Department's efforts to ensure appropriate policies and instructions are in place to support the consistent calculation of the in-kind value of services when negotiating facility leases to support the operation of financial institutions on military installations.

### Railroads for National Defense

The committee is aware that the Military Surface Deployment and Distribution Command Transportation Engineering Agency manages the Railroads for National Defense Program. This program helps ensure the readiness capability and capacity of the national railroad network to support defense deployment and peacetime needs. While the program has no funding to support rail infrastructure investments, the committee notes that the program helps to integrate defense rail needs into civil sector planning, policies, and standards working in concert with the Federal Railroad Administration through the establishment of the Strategic Rail Corridor Network (STRACNET). The committee notes that STRACNET is an interconnected and continuous rail line network that is supplemented by defense connector lines that serve locations that generate military rail shipments. Together STRACNET and the defense connector lines consist of over 36,000 miles of track serving over 100 defense installations.

The committee is aware that the Railroads for National Defense Program reviews, analyzes, and identifies rail line requirements to support military rail service and movement of oversize and overweight cargo. This analysis is updated every 5 years, with the most recent report published in October 2013. Therefore, the committee directs the Commander of the Military Surface Deployment and Distribution Command to provide a briefing to the House Committee on Armed Services, not later than 30 days after completion of the next updated STRACNET report, regarding the analysis and findings of the report. At minimum, the briefing should address rail networks that have been identified as part of the Strategic Rail Corridor Network or defense connector lines, identify any rail infrastructure capability or capacity gaps that impact military installations requiring rail service, and discuss mitigations or plans to address any rail infrastructure capability or capacity gaps that have been identified.

### Sentinel Landscapes Partnership Program

The committee notes the successful initial implementation of the Sentinel Landscapes Partnership Program. The interagency, intergovernmental, and public private partnership approach of the Sentinel Landscapes Partnership Program contributes to a strong rural economy, to advancing natural resource goals, and to achieving the overall goal of the Department of Defense's Readiness and

Environmental Protection Integration (REPI) program to address encroachment issues that limit or restrict military training, testing, and operations. Operating under an interagency Memorandum of Understanding since 2013, six partner landscapes at military installations around the country have been designated, which has provided additional opportunities for collaboration to achieve mutually beneficial outcomes both for the eligible landowners and agricultural producers who voluntarily choose to participate and for DoD and the other agencies participating in the Sentinel Landscapes Partnership Program. The committee encourages the Department to support the designation of additional Sentinel Landscapes in order to further enhance efforts to address current or potential restrictions on the testing and training activities that are vital to preserving military readiness.

The committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services not later than September 30, 2017:

(1) How the program has benefited the military and defense communities in terms of limiting encroachment and protecting training and other readiness development and sustainment efforts, the benefits to landowners and agricultural producers who have elected to participate;

(2) The process and criteria for designating an area as a Sentinel Landscape;

(3) Steps taken or planned to expand the number of designated Sentinel Landscapes; and

(4) Whether codifying the Sentinel Landscapes Partnership program would be beneficial

### Sustainment and Recapitalization of Utilities

The committee believes that military installations must have modern, efficient, resilient utility infrastructure. The committee notes that while some installations have undergone a modernization of their utility infrastructure, many continue to rely on aging and inefficient systems that marginally support today's missions. The committee observes that some installations have utilized utility privatization authorities to reinvest, operate, and sustain their utility systems and other installations still maintain and operate their utility systems.

The committee seeks to better understand the Department of Defense's investment strategy to ensure military installations are supported by modern, efficient, and resilient utility infrastructure. Therefore, the committee directs the Secretaries of the military departments to provide a briefing to the House Committee on Armed Services by March 1, 2018, on their plans for recapitalizing aging utility infrastructure and systems. The briefing should include a discussion of the condition of utility systems that are currently owned, sustained, and operated by the military departments and a discussion on the military departments' plans for modernization or recapitalizing aging utility systems through appropriated funds or utility privatization authorities.
