Amendment to H.R. 2500
National Defense Authorization Act for Fiscal Year 2020

Offered by: Mr. Garamendi

In the appropriate place in the report to accompany H.R. 2500, insert the following new Directive Report Language:

Reducing Reliance on Foreign-Flagged Vessels

The committee notes the Center for Strategic and Budgetary Assessment issued a report warning that “decades of downsizing and consolidation with the goal of achieving greater efficiency have left U.S. defense maritime logistics forces brittle while simultaneously contributing to the decline of the U.S. shipbuilding industry and the Merchant Marine. Failing to remedy this situation when adversaries have U.S. logistics networks in their crosshairs could cause the United States to lose a war and fail its allies and partners in their hour of need.” The committee shares this concern. Elsewhere in this Act, the committee includes several provisions that would help the Navy address its existing sealift shortfall by reauthorizing the Maritime Security Program, creating a Tanker Security Program to address the shortfall in US-flagged, US-crewed tankers, and requiring the Navy to initiate an affordable, domestic built sealift ship. While these provisions will help address the sealift shortfall in the long term, the committee remains concerned about near-term mitigations and the reliance on foreign built and foreign flagged vessels to support U.S. sealift requirements.

Therefore, the committee directs the Secretary of Defense to provide a report to the House Committee on Armed Services, not later than March 1, 2020, that outlines near-term actions being taken to reduce the Department of Defense’s reliance on foreign-flagged vessels.
AMENDMENT TO H.R. 2500

At the appropriate place in title II, insert the following new section:

SEC. 2. POLICY ON THE TALENT MANAGEMENT OF DIGITAL EXPERTISE AND SOFTWARE PROFESSIONALS.

(a) POLICY.—

(1) IN GENERAL.—It shall be a policy of the Department of Defense to promote and maintain digital expertise and software development as core competencies of civilian and military workforces of the Department, and as a capability to support the National Defense Strategy, which policy shall be achieved by—

(A) the recruitment, development, and incentivization of retention in and to the civilian and military workforce of the Department of individuals with aptitude, experience, proficient expertise, or a combination thereof in digital expertise and software development;

(B) at the discretion of the Secretaries of the military departments, the development and
maintenance of civilian and military career tracks related to digital expertise, and related digital competencies for members of the Armed Forces, including the development and maintenance of training, education, talent management, incentives, and promotion policies in support of members at all levels of such career tracks; and

(C) the development and application of appropriate readiness standards and metrics to measure and report on the overall capability, capacity, utilization, and readiness of digital engineering professionals to develop and deliver operational capabilities and employ modern business practices.

(2) DEFINITIONS.—For purposes of this section, “digital engineering” is the discipline and set of skills involved in the creation, processing, transmission, integration, and storage of digital data, (including but not limited to data science, machine learning, software engineering, software product management, and artificial intelligence product management).

(b) RESPONSIBILITY.—
(1) APPOINTMENT OF OFFICER.—Not later than 270 days after the date of enactment of this Act, the Secretary of Defense shall appoint a civilian official responsible for the development and implementation of the policy set forth in subsection (a). The official shall be known as the “Chief Digital Engineering Recruitment and Management Officer of the Department of Defense” (in this section referred to as the “Officer”).

(2) EXPIRATION OF APPOINTMENT.—The appointment of the Officer under paragraph (1) shall expire on September 30, 2029.

c) DUTIES.—In developing and providing for the discharge of the policy set forth in subsection (a), the Officer shall work with the Assistant Secretaries of the military departments for Manpower and Reserve Affairs to carry out the following:

(1) Develop for, and enhance within, the recruitment programs of each Armed Force various core initiatives, programs, activities, and mechanisms, tailored to the unique needs of each Armed Force, to identify and recruit civilian employees and members of the Armed Forces with demonstrated aptitude, interest, and proficiency in digital engineering, and in science, technology, engineering, and
mathematics (STEM) generally, including initiatives, programs, activities, and mechanisms to target populations of individuals not typically aware of opportunities in the Department of Defense for a digital engineering career.

(2) Identify and share with the military departments best practices around the development of flexible career tracks and identifiers for digital engineering and related digital competencies and meaningful opportunities for career development, talent management, and promotion within such career tracks.

(3) Develop and maintain education, training, doctrine, rotational opportunities, and professional development activities to support the civilian and military digital engineering workforce.

(4) Coordinate and synchronize digital force management activities throughout the Department of Defense, advise the Secretary of Defense on all matters pertaining to the health and readiness of digital forces, convene a Department-wide executive steering group, and submit to Congress an annual report on the readiness of digital forces and progress toward achieving the policy set forth in subsection (a).

(6) Assist the military departments in designing, developing, and executing programs and incentives to retain, track, and oversee digital expertise among civilian employees of the Department and members of the Armed Forces on active duty.

(7) At the request of the Chief of Staff of an Armed Force, or the head of another component or element of the Department, undertake an executive search for key leadership positions in digital engineering in such Armed Force, component, or element, and develop and deploy agile hiring processes to fill such positions.

(1) An assessment of progress of the Secretary in recruiting an individual to serve as the Officer required to be appointed under subsection (b).

(2) A timeline for implementation of the requirements of this section, including input from each military department on its unique timeline.

(3) Recommendations for any legislative or administrative action required to meet the requirements of this section.
Amendment to H.R. 2500
National Defense Authorization Act for Fiscal Year 2020

Offered by: Mr. Wilson of South Carolina

In the appropriate place in the report to accompany H.R. 2500, insert the following new Directive Report Language:

Assessment of air combat maneuvering instrumentation and collision awareness systems

The committee understands that despite numerous safety procedures designed for safe, effective training – such as assignment of different block altitudes, low-altitude training rules, and dive recovery rules – the majority of midair collisions and terrain crashes involving combat aircraft occur during training exercises, not combat operations. These mishaps have repeatedly and tragically resulted in losses of life and aircraft. To mitigate the current risk for midair collision and controlled flight into terrain during air combat training, the committee encourages the Air Force, Navy, and Marine Corps officials to consider a collision awareness system that can leverage existing infrastructure and systems that would allow range training officers and pilots to receive notifications in the event a potential midair or terrain crash is assessed.

Therefore, the committee directs the Secretaries of the Air Force and Navy, not later than November 29, 2019, to provide to the congressional defense committees a report of the utilization of air combat maneuvering instrumentation systems for these purposes. This report shall include detailed analyses on the costs, benefits, and feasibility of building out this capability on air combat maneuver instrumentation equipment on all combat aircraft as the basis for a collision awareness system at all relevant training ranges.
Amendment to H.R. 2500
National Defense Authorization Act for Fiscal Year 2020

Offered by: Mrs. Gabbard of Hawaii

In the appropriate place in the report to accompany H.R. 2500, insert the following new Directive Report Language:

Military Munitions Response Program (MMRP)

The committee notes that in 2014, DOD established goals to implement Interim Risk Management (IRM) at Formerly Used Defense Sites (FUDS) Military Munitions Response Program (MMRP) sites but the program has struggled to reach its goals. The committee further notes that the management challenges facing MMRP have been longstanding dating back to at least 2010, when the Government Accountability Office (GAO) issued a report which found that the Department had not established clear criteria for prioritizing its work or established clear performance goals for work done at FUDS. Most concerning, the GAO expressed concern about DOD recording sites as “complete” in cases where the Department took no action at the site, which could be misleading to the Committee and the public. Therefore, the committee directs the Comptroller General to conduct a review and provide a report to the House Armed Services Committee by June 1, 2020 that examines the following:

(1) the management of the MMRP program including its staffing and funding levels,
(2) progress DOD has made in cleaning up munitions response sites,
(3) resources allocation across MMRP sites in the last 5 years;
(4) program priorities for the next five years, and
(5) MMRP protocols for communicating with stakeholders and the public.

(2) CONTENTS.—The report required under paragraph (1) shall—

(A) assess and identify steps that could be taken to improve the competitive hiring process at the Department and ensure that direct hiring is conducted in a manner consistent with ensuring a merit based civil service and a diverse workforce in the Department and the rest of the Federal Government; and
