20 vides the fastest charging rates, an assessment of
21 supporting utilities infrastructure, potential gaps,
22 and required improvements.

23 (4) The costs and benefits of using a single
24 connector versus multi-connector units.

ENERGY ISSUES

Operational Energy

The committee remains concerned about the logistics challenges our armed services will encounter in a contested environment. In particular, the committee is cognizant of the obstacles related to energy that could lead to disruptions in operations due to potential intermittent energy availability.

While the committee is aware of the Department of Defense's nascent efforts to address these issues, the lack of coordination and the focus on addressing both supply- and demand-side element of the problem is concerning. The committee observes that some of the Department's policies, such as a preference for a single drop-in fuel type, may not be the only option for meeting certain requirements of the National Defense Strategy.

The committee notes that industry, as well as our allies and partners, have been investing in hydrogen fuels, electric propulsion systems, and other systems that increase the range and on-station time of fossil fuel vehicles and that these systems could be selectively applied to reduce the risk in a contested environment. Therefore, the committee directs the Assistant Secretary of Defense for Energy, Installations, and Environment, in coordination with the Director of Logistics for the Joint Staff, the Assistant Service Secretaries of the military departments for Energy, Installations, and Environment, the Commander of U.S. Indo-Pacific Command, and the Director of the Defense Logistics Agency, to submit a report to the House Committee on Armed Services by March 15, 2022, that identifies and evaluates viable operational energy architectures including but not limited to the above for their value in reducing the demand on the contested logistics enterprise. The report shall include at a minimum the following:

(1) an assessment of alternate-fuel-based commercial platforms and products, and the level of suitability, effort, and risk associated with adapting them for Department of Defense use;

(2) a general discussion about potential performance benefits and corresponding operational benefits of platforms powered by alternate fuels, with a specific focus on the feasibility, benefits, and risks of using hydrogen fuels and cached hydrogen fuel feedstock for operational energy in expeditionary advanced base operations;

(3) a discussion of current and future production capacity by U.S. allies and partners for fuel alternatives that could address demand in a contested environment, with a specific focus on the commercial availability of hydrogen and

hydrogen fuel feedstocks within the U.S. Indo-Pacific Command area of responsibility;

(4) a review of transportation safety and storage capacity for fuel alternatives, with a focus on the feasibility, benefits, and risks of transporting hydrogen gas in bulk as well as storing hydrogen fuel feedstocks; and

(5) a list of recommendations for Department of Defense research and development investments to address the demand side of the contested logistics environment.

LOGISTICS AND SUSTAINMENT ISSUES

Air Force Mobility Sustainment and Modernization

The committee recognizes the importance of a strong Air Force Reserve Component that can provide needed surge capability to the Active Component during times of peak demand. The Reserve Component is an especially critical force provider of inter- and intra-theater mobility assets to United States Transportation Command, via the Air Force Air Mobility Command. To that end, the committee is concerned that the Air Force continues to divest legacy aircraft from the Reserve Component while it modernizes the Active Component.

Therefore, the committee directs the Secretary of the Air Force to provide a briefing to the House Committee on Armed Services not later than March 1, 2022, on the Air Force's sustainment and modernization plans for the global fleet of C-17 and C-130 aircraft, broken out by Active and Reserve Components, including an assessment of the need for standardized fielding allocations and permanent aircraft tail number assignments for Reserve Component airlift squadrons.

Army Futures Command Depot-Level Maintenance

While the committee is encouraged by the ongoing work of Army Futures Command to modernize Army platforms, it is concerned about how these future systems will be maintained. The committee believes that there must be planning and infrastructure in place for the sustained maintenance of these systems, and that depot-level maintenance will be particularly important. It is also critical that the introduction of new equipment maintenance obligations be effectively integrated with existing capabilities to ensure that Army Futures Command can meet delivery schedule requirements. Therefore, the committee directs the Secretary of the Army to submit a report to the House Committee on Armed Services not later than January 31, 2022, that includes the following:

(1) an analysis of the ability of the Army to perform depot-level sustained maintenance of any future systems developed by Army Futures Command; and

(2) recommendations for additional maintenance capabilities that will need to be established to sustain such systems.

C-130 Depot Maintenance Capacity

The committee is aware that Air Force, Navy, and Marine Corps C-130 depot maintenance is performed at multiple locations and Air Force Air Logistics Centers, and it has concerns about potential capacity and capability shortfalls to execute overflow or surge C-130 depot maintenance. Accordingly, the committee directs the Secretary of the Air Force to provide a briefing to the House Committee on Armed Services not later than March 1, 2022, on the Air Force's efforts to ensure that adequate capacity and capability exists to complete all current and forecast C-130 depot maintenance. The briefing should include an explanation of C-130 depot work performed, by location; a description of the workforce composition at each location, broken down between government and contractor employees; and a description of each location's existing additional capability and capacity to meet surge or overflow C-130 depot maintenance. If capability or capacity shortfalls are identified, the briefing should include the Air Force's plans to mitigate these shortfalls.

Defense-Wide Working Capital Fund Cash Management Actions

The committee is aware that the Defense-Wide Working Capital Fund has faced cash management challenges due to the COVID-19 pandemic and subsequent reduced operational tempos of the individual services, and that the Defense Logistics Agency has executed multiple near-term actions to maintain adequate cash balances, including purchase order reductions, reprogramming actions, and rate increases. However, the committee is concerned with the potential longer-term impacts to readiness and supply chain resilience as a result of these cash management actions. Therefore, the committee directs the Director, Defense Logistics Agency to submit a report to the House Committee on Armed Services not later than March 1, 2022, on the overall solvency of the Defense-Wide Working Capital Fund. At a minimum, the report shall address the following elements:

(1) a review of monthly fiscal years 2020 and 2021 cash balances compared to upper and lower limits, and cash management actions taken to ensure adequate balances;

(2) an assessment of the impact to the supply base from cash management actions taken in fiscal years 2020 and 2021;

(3) a review of strategies implemented to lessen the impact on the supply base, especially smaller vendors, due to fiscal year 2020-2021 cash management actions;

(4) an assessment of what impact reduced purchase order actions in fiscal years 2020 and 2021 will have on future readiness over 6-month, 12-month, 18-month, and 24-month time horizons;

(5) A review of actions taken in the President's budget request for fiscal year 2022 that will allow for the normalization of purchase orders in execution year 2022;

- (6) an identification of the percentage of fluctuation related to long-range forecasting and demand requirements for troop support end items, and an assessment of specific processes used to track and reduce such fluctuations; and
- (7) a recommendation as to whether shifting from a long-range forecasting model to a consumption pull model would create a more consistent purchase order environment and facilitate cost reductions as a result of greater certainty for contractors in the supply chain, and whether reducing the range of minimum and maximum contract obligations to a range of plus or minus 20 percent of annual estimated quantities would relieve ordering fluctuation and improve supply chain resilience.

F-35 Organic Maintenance Capability

The committee recognizes the importance of the F-35 Lightning II program to our national defense and its foreign partners. The committee is concerned that the program faces affordability challenges for the services, and that organic repair capability could play a large role in reducing sustainment costs.

Given the significance of the F-35 program to the future of tactical air for the military, the Department of Defense's need to operate and deploy the F-35 on a widespread basis in the coming years, the involvement of international partners and foreign military sales customers, and the importance of maintaining affordability, the committee directs the Comptroller General of the United States to review organic maintenance capability of the F-35. At minimum, the review shall address the following elements:

- (1) depot standup, including prospects for moving some aspects from contract-led to organic repair capability; F-35 Joint Program Office efforts to speed up the establishment of depot maintenance capability; technical data rights and unique tooling requirements associated with an expanded organic depot repair capability; prime and sub-prime contractor efforts to provide required technical data and unique tooling in accordance with organic repair requirements; and an assessment of the actual versus forecast complexity for scheduled and unscheduled depot-level repair actions, as well as planned efforts to account for expanded complex repair requirements;
- (2) options, progress, and impact for organic supply chain management; options and efforts to make supply chain management an organic task, as well as assessment of potential cost savings in doing so;
- (3) field-level maintenance challenges including Autonomic Logistics Information System (ALIS), ALIS to Operational Data Integrated Network transition, lack of technical data and unique tooling, and reliability and maintainability problems; assessment of key drivers of Not Mission Capable for Maintenance (NMC-M) rates; assessment of Department efforts to address key drivers to NMC-M rates; and
- (4) other items the Comptroller General determines appropriate.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than March 1, 2022, on the Comptroller General's preliminary findings and to present final results in a format and timeframe agreed to at the time of the briefing.

Ground Combat Vehicle Maintenance Modernization Report

The committee is aware that while Army rotary-wing aviation has digitized their systems to increase efficiency, those in ground combat vehicle maintenance are still using paper records for multiple processes including ordering parts and standard checks. The committee is concerned that such techniques slow the maintenance process down and increase the risk of human error. The committee notes that recent reports have highlighted Army Materiel Command's efforts to modernize and invest in technologies that will speed up and improve the maintenance process. The committee applauds these efforts and believes there is room to investigate further modernization efforts involving ground combat units force-wide.

Therefore, the committee directs the Assistant Secretary of the Army for Acquisition, Logistics, and Technology to provide a report to the House Committee on Armed Services by February 15, 2022, assessing at a minimum the following:

- (1) a description of current field-level maintenance procedures for ground combat vehicles;
- (2) a review of current efforts that the Department of the Army has taken to digitize items including, but not limited to, procedures and manuals;
- (3) a discussion of the options available for further digitization and the expected efficiencies that can be gained from these possible changes;
- (4) a cost estimate for procuring said capabilities; and
- (5) an estimated implementation plan and timeline for doing so.

Landing Gear System Management

The committee is aware of seven landing gear related Air Force flight mishaps between June 2020 and May 2021, involving seven different aircraft (A-10, C-17, F-15, F-16, F-22, F-35, and MQ-9), and has concerns about landing gear systems management across the total Air Force inventory. Therefore, the committee directs the Secretary of the Air Force to provide a briefing to the House Committee on Armed Services not later than March 1, 2022, on the Air Force's efforts to reduce landing gear related mishaps and discrepancies across its entire inventory of aircraft. The briefing should include a 10-year historical review of landing gear related mishaps; identification of any trend data across platforms; and an assessment of the need to consolidate management of total inventory landing gear systems to one organization within the Air Force as a means to identify trend data across platforms, develop common solutions, and reduce Air Force landing gear systems malfunctions and mishaps.

Predictive Maintenance

The committee notes that the Department of Defense has in recent years undertaken various initiatives to determine the most effective and efficient way to plan and perform maintenance on its weapon systems, including through preventive maintenance performed on a regular schedule and conditions-based maintenance performed at predetermined trigger events. The military services have begun developing predictive maintenance programs that rely on sensor technology, data analytics, and algorithms, rather than calendars and current conditions, to better plan what maintenance is needed when. If performed effectively, predictive maintenance can reduce weapon system downtime, ensure adequate supply of needed parts, and decrease costs.

The committee directs the Comptroller General of the United States to review the incorporation of predictive maintenance into the military services' weapon system sustainment. The review should address the following elements:

- (1) the extent to which the Department and the military services have incorporated predictive maintenance into the sustainment of ground combat systems, ships and submarines, and aircraft;
- (2) the extent to which the Department and the military services have set goals, resourced, tested, and executed their predictive maintenance efforts; and
- (3) the extent to which the Department and the military services have established policies and implemented processes to track and manage predictive maintenance efforts.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than March 1, 2022, on the Comptroller General's preliminary findings and present final results in a format and timeframe agreed to at the time of the briefing.

READINESS ISSUES

Body-Worn Cameras for Military Law Enforcement

The committee recognizes the expansive use of body cameras by law enforcement personnel around the nation, along with the positive benefits that result from their use. However, the committee also notes that there are differences between some of the tasks that military law enforcement and civilian law enforcement are called to perform. Therefore, the committee directs the Assistant Secretary of Defense for Energy, Installations, and Environment to submit a report to the House Committee on Armed Services by February 15, 2022, assessing the use of body cameras by military law enforcement. The committee believes that local community stakeholders should also be engaged during the production of this report, to make sure their thoughts and suggestions are taken into consideration and incorporated into any final report recommendations. The report shall include at a minimum the following:

- (1) an assessment of the viability of using body cameras by military law enforcement personnel;
- (2) a description of the duties where their use would be the most appropriate and impactful;
- (3) a discussion of what policies would need to be in place to govern the storage, release, and distribution of camera recordings to address accountability, transparency, and national security concerns;
- (4) a cost estimate of deployment and storage of camera equipment; and
- (5) to the extent that body cameras are deemed appropriate and necessary for use by military law enforcement personnel, an implementation plan for their deployment and use.

Navy Optimized Fleet Response Plan

The committee notes that in order to address its persistently low readiness levels, the Navy implemented a revised operational schedule, the Optimized Fleet Response Plan (OFRP), in November 2014. OFRP was intended to address several problems that had developed as the Navy coped with heavy operational demands. These included increased ship deployment lengths, reduced or deferred maintenance, decreased predictability for sailors and the ship repair industrial base, declining ship conditions across the fleet, and longer maintenance periods. The Navy's implementation of the OFRP—and readiness recovery more broadly—is premised on adherence to more sustainable deployment, training, and maintenance schedules.

However, the Navy has faced persistent challenges in implementing OFRP since its inception and Navy readiness declined between 2017 and 2019. In addition, the Navy has experienced continued difficulties with ship maintenance timeliness, implementing training for the high-end fight, limiting deployment lengths, maintaining ship readiness after deployment to provide for surge capacity, meeting “fit and fill” crewing goals across the fleet, and maintaining carrier air wing readiness. In October 2020, the Navy updated its OFRP instruction to implement additional changes and address lessons learned. The committee remains concerned about the Navy's implementation of OFRP and its effect on the Navy's readiness recovery.

Therefore, the committee directs the Comptroller General of the United States to assess the following:

- (1) the extent to which the Navy has been successful in achieving OFRP goals for maintenance completion, timeliness, training certifications, personnel fit/fill rates, operational availability, and others;
- (2) the extent to which OFRP implementation impacted carrier air wing maintenance, training, and readiness;
- (3) the extent to which the Navy has taken action to improve OFRP and the challenges it faces in maximizing the fleet's operational availability; and

(4) any other related matters the Comptroller General considers appropriate.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than November 1, 2021, on the Comptroller General's preliminary findings and to present final results in a format and timeframe agreed to at the time of the briefing.

Next Generation 911

The committee recognizes the importance of quick response times in responding to emergencies on military installations. Incidents at Naval Air Station Corpus Christi, Joint Base Pearl Harbor-Hickam, and Washington Navy Yard show the importance and need for rapid alert systems and responses. The committee is aware of Department of Defense's ongoing efforts to upgrade their public safety communications ecosystem, taking advantage of innovative technological solutions in the emergency services space to increase efficiency and save lives. The committee is encouraged by these steps by the Department and looks forward to further progress in this realm as their planning continues.

The committee directs the Director of the Defense Information Systems Agency to provide a briefing to the House Committee on Armed Services by February 15, 2022, including at a minimum the following:

- (1) an update of ongoing efforts and plans to modernize emergency alert systems on domestic installations;
- (2) a discussion on the specific challenges to modernizing emergency alert systems on domestic installations;
- (3) an assessment of the possible use of an outside project manager or consulting service to assist in Department efforts to modernize emergency alert systems on domestic installations; and
- (4) a description of next steps for the implementation of this program.

Parachute Management System

The committee continues its interest in updating the way in which the Army manages parachute systems. In the committee report accompanying the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (H. Rept. 116-442), the committee required a report on Personnel Parachute and Cargo Management Inventory which the Army provided to the committee on January 8, 2021. The report concluded that the existing paper-based system used by parachute riggers is inadequate. As a result, the Army is developing an interim parachute management system that is slated to be replaced by a program of record in the 2027 timeframe.

The committee is concerned that the Army has decided to forgo suitable commercially available parachute management systems, and instead develop a government solution to bridge the gap between today and the program of record replacement. The committee notes that the report does not conclude that the

commercially available systems do not meet the Army's requirements. The committee therefore directs the Secretary of the Army to submit a report to the House Committee on Armed Services by February 1, 2022, containing at a minimum an analysis of the ability of commercial parachute management solutions to meet Army requirements and the cost of developing a government solution versus deploying an interim solution for parachute management with a commercial-off-the-shelf system.

Preserving Military Training Routes

The committee commends the Military Aviation and Installation Assurance Siting Clearinghouse (the Clearinghouse) for its efforts in ensuring that compatible energy development for energy security does not present an undue national security risk or undermine readiness. The committee notes that the Clearinghouse has conducted considerable analysis related to potential wind energy projects on military training routes and ensuring that adequate mitigations are in place to avoid any adverse impact on military operations and readiness. Further, the committee encourages the Department of Defense to engage with all stakeholders as part of its process to assess and make a determination of whether an individual project is compatible. As such, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services by March 1, 2022, to include, at a minimum the following:

- (1) an update on the process by which the Clearinghouse reviews and seeks stakeholder input on proposed wind energy projects with the potential to impact military training routes;
- (2) a review of available mitigations to include technological mitigations being used to avoid any negative impact to readiness;
- (3) any ongoing research and development programs to mitigate readiness impacts of wind turbines and how emerging technologies are factored into the Clearinghouse's compatibility analysis;
- (4) a discussion of how the Clearinghouse assesses the cumulative impacts of wind projects on the viability of a military training route; and
- (5) a list of military training routes that are no longer in use due to wind energy projects, and what training mitigations were put in place to counter the readiness impacts of those routes not being available for use.

Readiness Modeling

The committee is encouraged by the Under Secretary of Defense for Acquisition and Sustainment's efforts to improve readiness and control lifecycle costs. The committee encourages the Department of Defense to expand these efforts across the enterprise and look at the potential for using modeling for all complex defense systems, performing simulation and analytically optimizing readiness and lifecycle cost outcomes. The committee notes that this methodology could reliably redefine readiness not as a single measure, but as a cost-optimized curve that could

provide Congress and the Department with multiple support options across an array of budgetary scenarios thereby increasing understanding of the steps required to reduce lifecycle costs and improve system performance. Therefore, the committee directs the Under Secretary of Defense for Acquisition and Sustainment to submit a report to the House Committee on Armed Services by December 1, 2021, on efforts to standardize readiness modeling for major weapon systems across the Department of Defense enterprise.

OTHER MATTERS

Briefing on Progress of Cleanup Actions Related to Department of Defense-Caused Per- and Polyfluoroalkyl Substances Contamination

The committee remains concerned about the progress of environmental remediation at sites contaminated with perfluorooctanesulfonic acid (PFOS) and perfluorooctanoic acid (PFOA) caused by the Department of Defense. The committee recognizes the concerns of communities impacted by this contamination and their frustration with poor communication by the Department. Accordingly, the committee directs the Under Secretary of Defense for Acquisition and Sustainment to provide a briefing not later than February 1, 2022, on the progress of all ongoing environmental remediation actions to clean up PFOS- and PFOA-contaminated sites. The briefing shall at a minimum include the following:

- (1) a list of contaminated sites by service;
- (2) the status of environmental remediation at each site;
- (3) for sites that have completed the preliminary assessment or site inspection phase, the number that have been assessed to require no further action and the justification for this finding;
- (4) for sites that have proceeded to the remedial investigation or feasibility study phase, the timeline for completion of this phase;
- (5) for sites that have completed the remedial investigation or feasibility study phase, a discussion of next steps to include, where appropriate, the justification for a finding that no further action is required;
- (6) a discussion of any site where duly promulgated State standards or regulations have been assessed as applicable or relevant and appropriate requirements; and
- (7) the means by which the Department is communicating with community stakeholders about the progress of environmental remediation actions.

Continuing Foreign Language Education

The committee recognizes the importance of providing ongoing foreign language instruction to maintain linguists' highly perishable skills after they transition from education or training settings to operational environments. In addition, given the importance of frequently updating language and cultural awareness training content, it is also critical that the Department of Defense

monitor the quality and suitability of its post-schoolhouse language training programs and establish metrics to ensure training effectiveness. Therefore, the committee directs the Under Secretary of Defense for Personnel and Readiness to submit a report to the House Committee on Armed Services, not later than March 1, 2022, that includes the following:

- (1) a summary of the Department's in-person and virtual offerings for language professionals to sustain their proficiency, including information on these platforms' online and mobile accessibility;
- (2) a description of the Department's utilization of both organic and commercially available advanced foreign language tools;
- (3) a description of the extent to which the Department's current tools and programs include multimedia content, including video, audio, print, and interactive features; and
- (4) information on the oversight and management of these programs, including an assessment of the necessity and feasibility of establishing an executive agent for continued foreign language education.

Fire Detection and Monitoring

The committee is aware of past Department of Defense efforts to assist the State of California in the initial detection and monitoring of wildfires through a pilot program known as Firefly. In recent years, wildfires have burned millions of acres, causing economic damage and the displacement of thousands of people. The committee is also aware that this pilot program is scheduled to expire on September 30, 2021, and of the Department of Defense's efforts to transition the program to the National Interagency Fire Center. As the Department executes its transition, the committee is concerned about whether Department-provided resources and support will be made available to the National Interagency Fire Center. Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services by February 15, 2022, that will include at a minimum the following:

- (1) a history of the Firefly program, examples of the types of data it provides, and how that data is ultimately used by the State;
- (2) a full review of what resources will and will not be transferred from the Firefly program to the National Interagency Fire Center and why; and
- (3) an assessment of what other resources could be made available to the States to assist in the detection and monitoring of wildfires.

Reducing the Risk of Flash Fire

The committee is aware of the ongoing risks of flash fire to members of the Armed Forces and National Guard and encourages the implementation of enhanced protections against this significant category of injury. The committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services

by February 1, 2022, on the risk of flash fire to members of the Armed Forces and National Guard of the United States which shall include at a minimum:

- (1) an assessment of the risk to members of the Armed Forces and National Guard presented by flash fire in combat and non-combat operations;
- (2) a review of existing criteria for determining in what circumstances combat uniforms of the Armed Forces and National Guard are required to be flame-resistant;
- (3) the potential benefits of flame-resistant combat uniforms on operational safety and force protection; and
- (4) plans for enhancing protections for members of the Armed Forces and National Guard against flash fire.

Research and Development of New and Emerging Technologies for the Remediation and Disposal of PFAS

The committee commends the Defense Strategic Environmental Research and Development Program and Environmental Security Technology Certification Program for their work on the research and development of new technologies to aid in the environmental remediation of soils and water contaminated with per- and polyfluoroalkyl substances (PFAS), and the safe disposal of aqueous film-forming foam and other PFAS-contaminated items. However, the committee is aware that there is still significant work to be done in the development and field-testing of these technologies. Accordingly, the committee directs the Under Secretary of Defense for Acquisition and Sustainment to provide a briefing to the House Committee on Armed Services by February 1, 2022, on its continuing efforts to develop and field remediation and disposal technologies to address PFAS contamination. The briefing shall at a minimum address the following:

- (1) a description of completed and ongoing work in PFAS sampling and analysis technologies;
- (2) a description of completed and ongoing work in in situ and ex situ treatment for PFAS to include work or planned work in the following areas: super-critical water oxidation technology, granulated active carbon filter alternatives, and thermal destruction; and
- (3) a description of completed and ongoing work on incineration alternatives for disposal to include non-thermal plasma technologies, various thermal and hydrothermal technologies, chemical and photo/electric reduction technologies, and electron beam technologies.

Sufficiency of Current Special Operations Force Language Capabilities to Meet Great Power Competition Challenges

The shift in focus by the Department of Defense on strategic competition with near-peer adversaries necessitates a force that is not simply proficient in foreign languages such as Chinese and Russian, but also regional dialects and the languages of relevant foreign partners. Proficiency and sufficiency of foreign

language skills are a necessity for the joint force to conduct irregular warfare (IW), and the Department must maintain an expandable baseline level of institutional readiness, to include that of foreign language proficiency, to meet the full range of enduring IW requirements. While the conduct of IW is a whole-of-government effort in which the Department plays an important role, U.S. Special Operations Forces (USSOF) are an integral part of those military activities carried out below the level of armed conflict and therefore must maintain a high degree of proficiency in those languages critical to enable strategic competition.

The committee is concerned that the last two decades of combatting violent extremism has impacted USSOF's ability to access and participate in foreign language training and thus led to an atrophy of such skills across the formation. Further, the committee is aware that foreign language readiness of the formation is an element that is not well documented nor assessed.

Therefore, the committee directs the Comptroller General of the United States to conduct a review of the foreign language skills of special operations forces. The review shall assess:

- (1) the required number of SOF personnel trained and proficient in foreign languages;
- (2) the current number of SOF personnel trained and proficient in foreign languages;
- (3) the distribution of SOF personnel with language skills by military occupational specialty;
- (4) the ways in which proficiency of foreign languages is determined;
- (5) the accessibility of such foreign language programs by SOF personnel;
- (6) how the Department determines the sufficiency of existing foreign language training, education, and testing programs to address current and emergent threats;
- (7) any gaps in foreign language readiness to include specific shortfalls in critical languages and mitigations to address those gaps; and
- (8) any other areas the Comptroller General deems appropriate.

The committee directs the Comptroller General to provide a briefing to the House Committee on Armed Services by March 4, 2022, on the initial findings and to submit a final report on a date agreed to at the time of the briefing.

Waikoloa Maneuver Area

The committee is aware that Waikoloa Maneuver Area is a formerly used defense site on the island of Hawaii that extends to over 100,000 acres on the northwest side of the island. The committee notes that two surface cleanup actions were taken shortly after the end of the Second World War to clean up unexploded ordnance and that additional contracts have been completed to clear areas planned for development. The United States Army Corps of Engineers has assessed certain areas of the site as moderate to high risk areas. To date, 28,000 acres have been cleared. The committee is concerned that munitions continue to be found on the site,

and that there has not been sufficient progress in clearing areas planned for development. Accordingly, the committee directs the Assistant Secretary of Defense for Energy, Installations, and Environment to provide a report to the House Committee on Armed Services by February 1, 2022, that shall include at a minimum the following:

- (1) an updated estimate for the cost to complete the investigation, cleanup, and long-term monitoring of the site;
- (2) a prioritized timeline and plan for cleaning up the areas of the site planned for industrial or agricultural, and other development;
- (3) a description of ongoing communication efforts with community stakeholders on the progress and future plans for cleanup; and
- (4) the status of current and planned contract awards for remaining investigation and cleanup work.

Water Banking to Support Installation Resiliency

The committee is concerned about the threat of drought and water insecurity, particularly for military installations in the western United States that are wholly or in part west of the Continental Divide. The committee contends that resiliency planning, particularly installation resiliency master planning, must be a key priority for the military departments to ensure that wise investments are made to ensure efficient management and storage of this resource and to model future requirements. Accordingly, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services not later than April 1, 2022, that shall at a minimum contain the following:

- (1) the results of a survey of water resources in the western United States providing water to military installations;
- (2) the amount of water purchased on behalf of military installations in the western United States by the Department annually;
- (3) a description of how such water (total) is stored and by what means (surface, subsurface, or by other means) by military installations;
- (4) the amount of such purchased water that is stored as emergency reserve for the installation;
- (5) risk factors that could contribute to the loss of such purchased water resources;
- (6) a discussion of alternative storage methods that could provide additional resiliency; and
- (7) the potential for regional transfers of purchased water to mitigate water insecurity or achieve resiliency.

TITLE X—GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

Defense Counterintelligence and Security Agency Working Capital Fund Operations

The committee notes that when it was responsible for Federal background investigations, the Office of Personnel Management (OPM) struggled to manage its working capital fund in accordance with best practices, project its workload, and set appropriate and transparent rates for its customers. The Defense Counterintelligence and Security Agency (DCSA) became the Government's primary investigative service provider in October 2020, and also intends to finance its background investigation activities using a working capital fund. It is critical that appropriate controls, processes, and procedures be established from the onset to ensure that DCSA management of the working capital fund amounts is in accordance with best practices.

Therefore, the committee directs the Comptroller General of the United States to review the processes, procedures, and operations of DCSA's defense working capital fund. This review should address the following elements:

(1) the transfer of funds from OPM's working capital fund to DCSA's working capital fund and the effect the loss of revenue from background investigations has had on OPM's operations;

(2) DCSA's use of different revenue streams to fund its operations and the controls, processes, and procedures it has put in place to ensure working capital fund amounts are used only for eligible activities;

(3) the extent to which DCSA has maintained its working capital fund cash balance within appropriate upper and lower thresholds and the drivers behind increases or decreases in the DCSA working capital fund cash balance;

(4) DCSA's efforts to effectively manage its working capital fund by applying lessons learned and using best practices for working capital fund operations; and

(5) DCSA's efforts to plan for changes in costs as Trusted Workforce 2.0 and continuous vetting are implemented, as well as the effect this is expected to have on rates charged to customers, including administrative overhead costs.

The committee further directs the Comptroller General to provide a briefing on the review to the House Committee on Armed Services not later than March 1, 2022, and to submit a final report on a date agreed to at the time of the briefing.

National Background Investigation Services

The committee notes that the Defense Counterintelligence and Security Agency (DCSA) is developing the National Background Investigation Services (NBIS) system, which will be the Federal Government's primary information technology system for end-to-end personnel vetting and will replace the suite of legacy background investigation and case management systems previously operated by the Office of Personnel Management. The NBIS system will be the centerpiece of the Federal Government's transformation to a modernized personnel vetting system and will functionalize critical innovations such as continuous vetting as the background investigations enterprise moves from periodic reinvestigations to real-

time automated record checks. However, the committee is concerned by the NBIS system's cost, delayed delivery schedule, potential security vulnerabilities, and information sharing challenges with key stakeholders.

Therefore, the committee directs the Comptroller General of the United States to review the NBIS system. This review should address the following elements:

(1) the amount of funding requested, expended, and projected thus far for the NBIS system and the associated capabilities that have been delivered;

(2) the extent to which DCSA has planned for and implemented cybersecurity controls for both the NBIS system and legacy background investigation systems;

(3) the extent to which DCSA is engaging stakeholders in the development of NBIS requirements and capabilities; and

(4) any other related matters the Comptroller General considers appropriate.

The committee further directs the Comptroller General to provide preliminary observations to the House Committee on Armed Services not later than March 1, 2022, and to submit a final report on a date agreed to at the time of the briefing.

TITLE XI—CIVILIAN PERSONNEL MATTERS

ITEMS OF SPECIAL INTEREST

Civilian Personnel in the Office of the Secretary of Defense

The committee notes that civilian oversight and control of the Armed Forces is essential to ensure accountability, readiness, and the deployment of the Armed Forces in the national interest. A strong civilian workforce in the Office of the Secretary of Defense (OSD), particularly in the Office of the Under Secretary of Defense for Policy (OUSDP), is essential to maintain this principle of civilian control of the military. However, hiring freezes and attrition in OUSDP have led to a manpower reduction of almost 27 percent over the last 11 years. This has resulted in an inappropriate reliance on contractors and undermined OUSDP's ability to carry out robust civilian control and oversight of the Armed Forces. The committee encourages the Department of Defense to undertake an assessment of the civilian billets in OUSDP and consider increasing the size of the OUSDP civilian workforce to better reflect mission needs and reduce reliance on contracted personnel.

Further, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services not later than January 31, 2022, that includes the following:

(1) the number of military and civilian personnel assigned to or employed by each OSD component in each of the previous 10 fiscal years;

(2) the number of contractor personnel supporting each OSD component, including contractor personnel performing “inherently governmental functions,” “closely associated with inherently governmental functions,” “critical functions” (as defined in sections 129a and 2463 of title 10, United States Code), as well as the number of staff augmentation contractors supporting each component in each of the previous 10 fiscal years;

(3) the share of civilian OSD personnel allocated to OUSDP in each of the previous 10 fiscal years; and

(4) an assessment of whether the number of civilian billets has kept pace with changes in OUSDP’s mission over time and whether an increase to the personnel cap established by section 143 of title 10, United States Code, is necessary to ensure sufficient civilian staffing in OUSDP and enable corrective action for any inappropriate contracting.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

TITLE XXVIII—MILITARY CONSTRUCTION GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

Air Purification Assessment

The committee remains concerned about airborne environmental and public health hazards inside buildings on military installations. The committee notes that there is a wide range of potential hazards including infectious diseases, mold spores, and other airborne pollutants. The committee believes that some commercial, off-the-shelf air purification devices are capable of capturing and destroying viruses, bacteria, mold spores, and other microscopic airborne pollutants, such as volatile organic compounds, and these positive attributes have recently been highlighted as part of an effective response to COVID-19. Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services by February 1, 2022, on an assessment of the Unified Facilities Criteria with respect to air purification standards and whether more widespread deployment of portable air purification technology should be considered to improve the air quality of base housing and other on-base facilities.

Arresting Further Science and Technology Infrastructure Decline

The committee notes that the science and technology sector of the Department of Defense is facing an accelerating infrastructure degradation and that these increasingly inadequate facilities require frequent updates to keep pace with modern standards, increase secure processing capability, and ensure safe operation. The committee further notes that in the last 5 years there have been

several authorities including the ability to use up to \$6.0 million in operations and maintenance funding for available military construction not otherwise authorized by law. The committee observes that these authorities have been underutilized.

The committee encourages the Secretary of Defense to develop policies, guidelines, and procedures for authorized innovative alternative financing mechanisms to share construction and maintenance costs with the private sector to reduce risks, provide greater flexibility, generate cost savings; and, to leverage the existing lease authorities in section 2667 of title 10, United States Code, for potential out-lease of existing property on Federal land to the private sector.

Therefore, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services by December 1, 2022, that addresses the use of existing authorities to prevent further degradation of laboratory facilities. The report should address at a minimum the following:

(1) the potential increase in funding streams for maintenance by charging a 4 percent fee for service under section 2363 of title 10, United States Code, by service;

(2) the amount of projects obligated using operations and maintenance funds through section 2805 of title 10, United States Code, over the last 5 years, by service;

(3) opportunities to out-lease defense real estate to generate further funds for recapitalization;

(4) an assessment of statutory and policy impediments to executing leasing options to arrest further decline of the science and technology sector; and

(5) an assessment of the existing science and technology sector facilities condition and the impact of that condition on mission requirements, by service.

Assessment of Childcare Facilities Needs

The committee is cognizant of the critical need among service men and women and Department of Defense civilians for child care. The committee notes that a lack of child care can impact retention and therefore is an important readiness issue. With approximately 200,000 children under the Department's purview, availability of child care is a topic that impacts families around the globe. Further, the committee is aware of reports that a significant number of children on childcare waitlists are age 3 and under. Therefore, the committee directs the Assistant Secretary of Defense for Energy, Installations, and Environment to submit a report to the House Committee on Armed Services not later than February 15, 2022, assessing at a minimum the following:

(1) a list of domestic installation childcare facilities including the average size of facility waitlist over a previous 3-year period;

(2) an assessment of efforts by the Department of Defense to identify solutions to improve childcare availability and reduce waitlist time;

(3) a review of the extent to which childcare facility staffing availability is a factor for childcare availability; and

(4) an assessment of whether including childcare facilities and their administration in agreements for new privatized military family housing projects would be a viable solution.

Conditions of Unaccompanied Personnel Housing

The committee is concerned that the military services have not allocated sufficient resources to the sustainment of unaccompanied personnel housing such as barracks and dormitories. The committee notes that for the last two decades the military services have taken risk in the the sustainment of their infrastructure portfolios writ large, and that quality of life infrastructure such as unaccompanied personnel housing has suffered considerable degradation. The committee is concerned that the military services do not have a plan to budget for the mounting costs of remedying the deficiencies in unaccompanied housing and that this will in turn have a detrimental impact on the retention of our best and brightest service members.

The committee notes that the Army has announced a 10-year, nearly \$10.0 billion plan to renovate or replace barracks so that none are in poor (Q3) or failing (Q4) condition. However, the other military services have not provided a similarly detailed assessment of the unaccompanied housing. Accordingly, the committee directs the Secretary of the Air Force, the Secretary of the Navy, and the Secretary of the Army to each submit a report to the House Committee on Armed Services by June 1, 2022, that includes at a minimum the following:

- (1) a listing of unaccompanied personnel housing facilities that are in a poor (Q3) or failing (Q4) condition;
- (2) the cost to renovate or replace each facility to bring it up to a good (Q1) condition; and
- (3) the service's 10-year plan to address its unaccompanied personnel housing discrepancies.

Dillingham Airfield Water System

The committee is aware of ongoing negotiations between the Army, U.S. Department of Transportation, and Hawaii Department of Transportation regarding the long-term lease of Dillingham Airfield. The committee is aware that Dillingham Airfield is primarily used for rotary-wing aircraft, but could serve as an emergency redirect airfield for Honolulu International Airport. The committee is aware that there is a water system co-located with the airfield that provided potable water to the airfield as well as certain city- and county-operated locations and several private residences. The committee directs the Secretary of the Army to provide a briefing to the House Committee on Armed Services by December 1, 2021, on the current status and potential long-term options for Dillingham Airfield. This briefing shall include options that would facilitate establishment of a water utility cooperative or other regime to manage the water system on the airfield.

Emergency Generators for Energy Resiliency

The committee continues to have concerns regarding the resiliency and efficiency of the Department of Defense's critical infrastructure, and specifically the slow pace at which the military departments are leveraging existing authority to improve their energy efficiency and improve resiliency, including the use of energy savings contracts such as those authorized under section 2913 of title 10, United States Code. The committee commends the military departments for expanding their use of technologies such as microgrids to reduce demand for backup generators, but remains concerned that the military departments continue to exclude consideration of more efficient and emerging technologies.

Given the concerns, the committee directs the Secretary of Defense to submit a report to the House Committee on Armed Services, not later than February 1, 2022, that includes at a minimum the following elements:

(1) a summary of current Department of Defense, military department, and Defense Agency guidance regarding the procurement of backup generators for military installations as part of a standalone procurement or as part of an Energy Savings Performance Contract;

(2) a list of the backup generators purchased by the military departments and Defense Agencies during the last 5 years, broken down by installation, with a breakdown of whether the purchased generators were powered by diesel, natural gas, propane, or some other alternative fuel; and

(3) business case analysis of assessment of various backup generator technologies as a means of improving efficiency.

Energy Infrastructure at Former Naval Air Station Barbers Point

The committee recalls that Naval Air Station Barbers Point was closed as a result of recommendations of the 1993 Base Closure and Realignment Commission. The committee notes that of the total 3,833 acres of land, the Navy retained 1,238 acres which included utilities infrastructure impacting the local community. The committee further notes that in the years following the initial land transfer in 1999, the Navy has worked with private entities to transfer the water and sewer infrastructure but continues to retain the electrical infrastructure. The committee is concerned that the electrical infrastructure in the Kalaeloa area has degraded over time and now requires significant and costly upgrades. Therefore, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than February 1, 2022, that at minimum addresses the following:

(1) a cost estimate of the design costs and required electrical utility infrastructure upgrades;

(2) the nature of the upgrades required, to include improvement in resiliency, reliability, and necessary upgrades to bring existing infrastructure up to current code requirements;

- (3) a summary of stakeholder engagement with local governments and utility providers;
- (4) a description of funding mechanisms that have been explored to include third-party financing and in-kind contributions; and
- (5) any statutory changes that would be required to support these upgrades.

Innovative Building Technologies

The committee is encouraged by innovative building techniques and materials that have the potential to provide enhanced resiliency and cost savings in military construction. The committee is particularly interested in the potential these techniques and materials have for building in polar regions and other challenging locations as well as lowering the cost of replacing degraded quality of life infrastructure. The committee is aware of precision manufactured building kits, three-dimensional printed concrete buildings, and materials such as mass timber that could help to reduce the number of unaccompanied housing facilities in poor and failing condition while at the same time enhancing installation resiliency.

Accordingly, the committee directs the Under Secretary of Defense for Acquisition and Sustainment to provide a briefing to the House Committee on Armed Services by April 1, 2022, on the potential these materials and techniques have for military construction applications. The briefing shall include at a minimum the following:

- (1) the results of the Department of Defense's review of innovative building techniques and materials to include the potential for cost savings, use in remote or challenging environments, and potential to increase installation resiliency;
- (2) any materials or techniques that have been or will be reviewed by the Environmental Security Technology Certification Program; and
- (3) should these materials and techniques prove promising, whether changes to the unified facilities code are planned.

Installation Security Improvements

The committee recognizes that the physical security of Department of Defense permanent domestic installations and forward operating bases is critical to the safety of our service members, and our national security. The committee believes it is imperative that Department entry control points be properly manned and monitored and that they should work diligently to fill any holes in coverage and awareness that might exist. Furthermore, the Department must keep domain awareness at the forefront and consider a diverse set of options when considering technological advances and other investments that will help secure installations including, but not limited to, counter unmanned aerial vehicle technology, sentry towers, and advanced cameras.

Therefore, the committee directs the Assistant Secretary of Defense for Energy, Installations, and Environment to submit a report to the House Committee on Armed Services by February 15, 2022, on viable options to increase the security

of Department facilities, both domestic and forward deployed, and provide recommendations on possible enhancements. This report shall include at a minimum the following:

- (1) a review of the standard security infrastructure currently in place at our domestic facilities and forward-operation bases;
- (2) a discussion of both traditional and technologically advanced multi-domain counter intrusion security options that the Department believes will improve security;
- (3) a description of the manpower needs for each option and whether technological solutions can alleviate manpower shortages;
- (4) a description of any concerns related to the surrounding domestic civilian communities and solutions for mitigating any civil liberty issues that might arise;
- (5) a cost comparison of the improvements considered; and
- (6) a list of recommended security improvements and estimated timeline for installation.

Intergovernmental Support Agreements

The committee is concerned about the continued degradation of Department of Defense facilities and tremendous backlog of current mission military construction requirements across the Department. The committee is also aware of the risk the Department has taken in infrastructure funding over the last 20 years and does not believe that facility risk will diminish. The committee further notes that many service members and civilian employees work in substandard and potentially unsafe facilities. This phenomenon has a significant impact on the Department's ability to recruit and retain the best and brightest talent and to accomplish the mission. The committee observes that section 2809 of title 10, United States Code, was initially included in the Military Construction Authorization Act, 1986 (Public Law 99-167) but due to Office of Management and Budget scoring implications has not been used to its fullest potential. This authority provides the Department with a much-needed alternative to military construction that could be used to upgrade facilities.

Therefore, the committee directs the Secretary of Defense, after consultation with the Director of the Office of Management and Budget, to provide a briefing to the House Committee on Armed Services by January 15, 2022, that assesses options to use the authority of section 2809, to include use limited to first-year operation and maintenance payment with termination liability, as an alternative method to accelerate military construction.

The briefing shall contain at a minimum an assessment of the operability and effect for achieving the aforementioned goals via the statutory language contained in sections 2809(c)(1)-(3) of title 10, United States Code, relating to obligations of the United States relating to requirements associated with the

obligation of funds for long-term facilities contracts for certain activities and services.

Land Exchange with the Nisqually Tribe of Indians

The committee commends the Army and Nisqually Tribe of Indians for restarting discussions to facilitate a mutually acceptable land exchange and mend an important relationship. The committee encourages continued good-faith negotiations to resolve this issue swiftly, and facilitate an improved relationship between the Army and the Nisqually Tribe of Indians. To that end, the committee directs the Secretary of the Army to provide a briefing to the House Committee on Armed Services not later than February 1, 2022, on the status of the negotiations, and, if agreed, a specific timeline for the exchange of land.

Lualualei Naval Road/Kolekole Pass

The committee commends the Navy for entering into a memorandum of understanding with the State of Hawaii for emergency access to Lualualei Naval Road/Kolekole Pass. The committee is concerned that portions of the Navy-controlled road are in a hazardous condition that presents risk to both service members and emergency responders. Accordingly, the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services not later than March 1, 2022, which shall include at a minimum the following:

- (1) the result of engineering assessment of the hazards present on the Navy-controlled portions of the road to include potential rockfall areas;
 - (2) an assessment of the cost and feasibility of mitigating these hazards;
 - (3) the timeline for executing the mitigation measures for these hazards;
- and
- (4) a description of how these efforts have been coordinated with local authorities including the Hawaii Department of Transportation.

Naval Air Weapons Station China Lake Modernization

The committee recognizes the significance of Naval Air Weapons Station (NAWS) China Lake and the important research, development, acquisition, test, and evaluation of U.S. military weapon systems conducted throughout the base. The committee understands that as threats develop, NAWS China Lake faces obstacles in fulfilling its mission. These challenges include funding for maintenance and repair of critical research, test facilities, and ranges to maintain mission effectiveness; key sustainment, restoration, and modernization of research and test capabilities and equipment; effectively supporting multiple tenants and their applicable missions; development and growth of manned and unmanned aerial system capabilities; the installation's water security efforts; and increasing workforce recruitment, retention, and expertise. The committee notes that in

addition to these challenges, NAWS China Lake is recovering from the 2019 earthquake that caused significant damage to the installation. As NAWS China Lake continues its reconstruction process, the committee acknowledges the close coordination with supporting communities to maximize these rebuilding efforts and continues to encourage open communication with the supporting communities to ensure the projects stay on track for timely completion.

The committee believes that given the current growth of requirements, the extensive reconstruction efforts, and the need for state-of-the-art weapon systems development capabilities, an assessment is necessary to provide relevant information on the challenges confronting NAWS China Lake. Therefore, the committee directs the Secretary of the Navy to submit a report to the House Committee on Armed Services by February 1, 2022, that details at a minimum the following related to NAWS China Lake:

- (1) projected mission growth requirements;
- (2) anticipated personnel and facilities plan to meet these requirements;
- (3) water security planning;
- (4) anticipated construction milestones to complete earthquake recovery efforts; and
- (5) a description of any other challenges that NAWS China Lake faces in the next 5 years.

Three Rivers Levee Authority

The committee commends the Air Force for working with the Three Rivers Levee Authority to provide an easement to help facilitate their Goldfields 200-year levee project for southern Yuba County. The committee understands that the easement is associated with a 0.218 acre parcel of land that is geographically separated from Beale Air Force Base and is not currently being used by the Air Force nor is there any planned use for this parcel. Given that the levee project is a life-safety project, and fee simple ownership would allow the Three Rivers Levee Authority maximum flexibility in conducting their flood control mandate, the committee encourages the Air Force to continue to work expeditiously with the Three Rivers Levee Authority to explore the possibility of a public benefit land transfer of this parcel. Accordingly, the committee directs the Secretary of the Air Force to provide a briefing to the House Committee on Armed Services on November 1, 2021, January 1, 2022, and March 1, 2022, to provide detailed updates on the progress being made toward a transfer of this parcel.

Update on Tenant's Bill of Rights Implementation

The committee is aware that full implementation of the tenant's bill of rights by Department of Defense's privatized military family housing partners is expected in fiscal year 2021. The committee considers full implementation a major step toward ensuring safe and quality housing for our service men and women as well as their families. The committee views safe and quality housing as a critical

component to the readiness, morale, and retention of the entire force. As such, the committee directs the Assistant Secretary of Defense for Energy, Installations, and Environment to provide a briefing to the House Committee on Armed Services by February 15, 2022, on the implementation of the tenant's bill of rights across the privatized military family enterprise. The report shall include at a minimum the following:

- (1) a description of how the tenant's bill of rights implementation functioned during the summer 2021 permanent change of station season;
- (2) a description of any barriers to full implementation or executability challenges observed;
- (3) a review of the next steps privatized military family housing partners can take toward improving tenant satisfaction; and
- (4) a discussion on the feasibility of privatized military family housing partners voluntarily providing 7-year histories to all prospective tenants.
