

Casten #2
Amendment offered by Mr. Casten

On p. 5 line 1 before “Fannie” insert “Climate Change and Green Housing. The Committee will examine proposals to address historic and emerging effects of climate change and environmental hazards in housing and on communities living in areas at disproportionate risk. The Committee will also consider opportunities to incentivize greener and more energy efficient measures across the housing market and industry, including through community mitigation efforts and comprehensive risk and environmental assessments.”
