

CHRISTINE TEZAK
Managing Director

Christine Tezak is a veteran energy analyst who leads ClearView's coverage of electricity markets, interstate pipelines, energy infrastructure and U.S. environmental policy. Her two decades of experience in electric utility and natural gas pipeline sectors enable her to craft prescient, timely and impactful analysis, particularly as energy and environmental issues have converged.

Prior to joining the Firm, Ms. Tezak was a senior research analyst at Robert W. Baird & Co. and a senior vice president with the Washington Research Group. She has testified before the Federal Energy Regulatory Commission and the U.S. House of Representatives.

Ms. Tezak served eight-terms as a board member, including as President, of the Washington, D.C.-based Women's Council on Energy & the Environment. She remains active in WCEE and is a member of the Natural Gas Roundtable.

Ms. Tezak holds a bachelor's degree in Russian from Boston College and an MBA in Finance from the George Washington University.

About ClearView

ClearView Energy Partners, LLC is a Washington, D.C.-based research firm that identifies and quantifies non-fundamental energy risks for financial investors and corporate strategists. Our team of specialists relies on firsthand experience and proprietary models to provide forward-looking, transparent, data-backed assessments of emerging macro trends and the catalysts that can disrupt those trends.

We regard spreadsheet data as a starting point

We narrow the universe of possible results by filtering economic catalysts through political constraints. We validate and build on early conclusions by actively vetting our ideas with decision-makers in public forums and via proprietary channels.

We are analysts, not lobbyists

We do not represent corporate or partisan interests in any fashion. Instead, we use the strength of our research conclusions to open new doors and deepen existing, reciprocal ties with U.S. and international sources. As a result, we can often catch trends early and identify breakpoints in those trends as (and sometimes before) they happen.

We focus exclusively on U.S. and international energy and environmental policy

Our coverage of fuels, technologies and issues includes:

- Electricity
- Energy transportation
- Fuels, vehicles and refining (including fundamentals)
- Geopolitics
- Oil, gas and coal (including fundamentals)
- Power Alternatives
- U.S. energy policy, economics and tax policy.
