

IMPACT OF ELECTRICITY RATES ON UTILITY BILLS

According to recent state data (April 2021) on electricity rates, usage, and average monthly bills:
(<https://www.saveonenergy.com/learning-center/post/electricity-bills-by-state/>)

If electricity rates in California were the same as electricity rates in Louisiana, the average monthly electric bill in California would be reduced by 52.7% - falling from \$124.33 per month to \$58.73 per month.
