

**Sharon Squassoni** is Research Professor of Practice in International Affairs at the Institute for International Science and Technology Policy, Elliott School of International Affairs, the George Washington University. Her research and writing focuses on reducing risks from nuclear energy and nuclear weapons. Prior to joining the faculty at GW, she directed the Proliferation Prevention Program at the Center for Strategic & International Studies in Washington, DC and was previously a senior scholar at the Carnegie Endowment for International Peace. She joined the think-tank world in 2007 from a long career in the U.S. government, including the State Department, the Arms Control and Disarmament Agency and the Congressional Research Service. She is a member of the Science and Security Board of the Bulletin of Atomic Scientists, which helps set the Doomsday Clock, a member of the Board for the Center for Arms Control and Nonproliferation, and on the advisory board of the PIR Center in Moscow. She has published widely and provides expert commentary for domestic and foreign news media.
