Subcommittee on Africa, Global Health, Global Human Rights, and International Organizations

Boston Scientific Corp Inc. is a U.S. manufacturer of medical devices. The BSCI facility located in Maple Grove, Mn produces Cardiovascular and Peripheral medical solutions for less-invasive treatment of arterial trauma and maladies. BSCI is recognized as a market leader in many technologies and specifically stents.

I am a Medical Device Specialist in the Metal Core Technologies group responsible for stent supply to all Boston Scientific manufacturing facilities spread throughout several countries.

Prior to working at BSCI, I worked as an independent business consultant after spending 20 years in a small manufacturing business located in Anoka, Mn.

I have a B.A. degree from University of Mn in Economics with extensive coursework in Japanese studies. Additionally, I have many course hours into an MBA from University of St. Thomas - Opus School and am a Certified Professional Project Manager.
