NBPC Statement On President Biden's Proclamation

President Biden has released over 2.8 million people into the country (more than the population of Chicago, our third-largest city), claiming that he couldn't take executive action to fix the abuse of the asylum system.

Now, less than six months before the election, he claims he suddenly has the authority to act. Under his new rules, there is no cap on the number of people who can be let into the country through a port of entry on the southwest border.

At a minimum, his order will allow almost 1.5 million people – the population of San Antonio – into the country every year.

We don't call that a solution!
