

CHARTER STATEMENT ON HOUSE E&C E-RATE PROPOSAL

“Charter applauds the work of Chairman Pallone and members of the House Energy and Commerce Committee to help schools and students struggling to participate in virtual learning by advancing legislation that will increase connectivity to reliable, in-home broadband. Over the last year, Charter has helped hundreds of thousands of Americans get and stay connected through our Remote Education Offer that provided two free months of internet to student and teacher households, as well as other programs, including our low-cost offerings, Spectrum Internet Assist and Stay Connected K-12. We look forward to continuing to work with Congress to help bring the benefits of broadband to those who need it most.”
