6 BETTER DATA AND BETTER OUTCOMES: REDUCING

7 MATERNAL MORTALITY IN THE U.S.

8 THURSDAY, SEPTEMBER 27, 2018

9 House of Representatives

10 Subcommittee on Health

11 Committee on Energy and Commerce

12 Washington, D.C.

13

14

15

16 The subcommittee met, pursuant to call, at 10:00 a.m., in

17 Room 2123 Rayburn House Office Building, Hon. Michael Burgess

18 [chairman of the subcommittee] presiding.

19 Members present: Representatives Burgess, Guthrie, Barton,

20 Shimkus, Latta, Lance, Griffith, Bilirakis, Long, Bucshon,

21 Brooks, Mullin, Hudson, Carter, Walden(ex officio), Green, Engel,

22 Schakowsky, Castor, Schrader, Kennedy, Cardenas, DeGette, and

3

37 Mr. Burgess. And the Subcommittee on Health will now come  
38 to order. I recognize myself 5 minutes for purpose of an opening  
39 statement. And I want to thank everyone for joining us this  
40 morning to discuss a topic that is important to each and every  
41 one of us. This is a subject matter that has been brought to  
42 the forefront by members of this subcommittee, members of Congress  
43 generally, actions of state legislators, and the media.

44 Having spent 3 decades myself practicing OB/GYN, I believe  
45 it should be a national goal to eliminate all preventable maternal  
46 mortality. Even a single maternal death is too many. All too  
47 often we have read about the stories of seemingly healthy pregnant  
48 women who are thrilled to be having a child and then to everyone's  
49 surprise suffers severe complications, death, or near death  
50 during a pregnancy, birth, or postpartum. The death of a new  
51 or expecting mother is a tragic event that devastates everyone  
52 involved, and if there are preventable scenarios we need to do  
53 what we can to stop that.

54 The alarming trend in our country's rate of maternal  
55 mortality first came to my attention in September 2016 reading  
56 a copy of the American College of Obstetricians and Gynecologists,  
57 The Green Journal. The original research found that the maternal  
58 mortality rate had increased in 48 states and Washington, D.C.

4

59 from 2000 to 2014, while the international trend was moving in  
60 the opposite direction. Since reading that article, I have  
61 spoken to providers, hospital administrators, state task forces,  
62 and public health experts. The more I looked into this troubling  
63 issue, the more I realized that we have got much more we need  
64 to understand.

65 This subcommittee had an informational briefing last year  
66 on this topic to inform members and to start the road toward this  
67 hearing. This is an issue that we cannot solve without accurate  
68 data. There were efforts in our nation to address maternal and  
69 infant mortality in the first half of the 20th century and the  
70 data showed that these efforts were indeed successful.

71 But according to the Centers for Disease Control and  
72 Prevention the United States' maternal mortality rate, 7.2 deaths  
73 per 100,000 in 1999 and increased to 18 deaths per 100,000 live  
74 births in 2014. The Centers for Disease Control began conducting  
75 national surveillance of pregnancy related deaths in 1986 due  
76 to a lack of data on causes of maternal death.

77 In 2003, the Centers for Disease Control National Center  
78 for Health Statistics revised standards for certain death  
79 certificates and added a pregnancy checkbox. While this checkbox  
80 has led to increased data collection on maternal deaths, it does

**NEAL R. GROSS**

5

81 not provide enough insight as to why or how these deaths occurred.

82 Representative Jaime Herrera Beutler joining us this morning,  
83 the discussion draft that she has put forward will address the  
84 complex issue of maternal mortality by enabling states to form  
85 maternal mortality review committees to evaluate, improve, and  
86 standardize their maternal death rate.

87 This is a critical step in the right direction as physicians,  
88 public health officials, and Congress are unable to reach  
89 conclusions based upon current data as to what the causes for  
90 maternal mortality increases are. Once we establish what these  
91 are, there will be an opportunity to use the data to implement  
92 the best practices toward a solution. Texas is a good example  
93 of a state that has enacted legislation to create and sustain  
94 a Maternal Mortality and Morbidity Task Force. Texas has put  
95 time and effort in funding and to reviewing maternal deaths in  
96 order to find the trends in the increases and the causes of death.

97 The Task Force's September 2018 report, which I have here and  
98 later on we will ask unanimous consent to be made part of the  
99 record, stated that the leading causes of pregnancy-related death  
100 in 2012 included cardiovascular, obstetric hemorrhage, infection  
101 sepsis, and cardiomyopathy.

102 This report is just a snapshot of the national picture as

**NEAL R. GROSS**

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

6

103 causes do vary from state to state. Additionally, this May,  
104 various researchers involved in the review of Texas' maternal  
105 deaths published a paper, again in The Green Journal, detailing  
106 that unintentional user error and other issues led to inaccurate  
107 reporting of maternal mortality. The researchers concluded that  
108 relying solely on obstetric codes for identifying maternal deaths  
109 appears to be insufficient and can lead to inaccurate ratios.

110 The moral of this story is we must ensure accurate data to  
111 accurately pinpoint the clinical issues contributing to these  
112 tragic deaths. I would like to submit a statement for the record  
113 from Dr. Gary Hankins and, without objection, so ordered, the  
114 chairman of the Department of OB/GYN at the University of Texas  
115 Medical Branch in Galveston.

116 [The information follows:]

117

118 \*\*\*\*\*COMMITTEE INSERT 1\*\*\*\*\*

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

7

119 Mr. Burgess. And Dr. Hankins was one of those doctors who  
120 briefed us during the briefing last year. Dr. Hankins has  
121 subspecialty training in maternal fetal medicine and served as  
122 vice chair for the Texas Morbidity and Mortality Review Committee.

123 At one time we were scheduled to be joined by Dr. Lisa  
124 Hollier, also of Texas, who is also part of that committee. I  
125 think we had to postpone last week because of a hurricane and  
126 she could not accommodate the reschedule. But Dr. Hollier has  
127 also been integral in working on this at the state level.

128 So I certainly look forward to hearing from our panel of  
129 witnesses today as how we can address this vital and devastating  
130 issue. Mr. Burgess. The chair recognizes the ranking member  
131 of the subcommittee, Mr. Green, 5 minutes for your opening  
132 statement, please.

133 Mr. Green. Thank you, Mr. Chairman, for calling today's  
134 hearing on maternal mortality in the United States, and I would  
135 also like to thank our colleague who is in our distinguished  
136 panelists for joining us this morning.

137 I would like to take just a moment, Mr. Chairman. My deputy  
138 chief of staff, LD/LA, Sergio Espinosa, this will be his last  
139 committee hearing and he has been working with me on health care  
140 in our office for many years -- 8 years, it has been 8 or 9.

**NEAL R. GROSS**

8

141 This is his last hearing. And those of you who someday decide

143 will be losing staff members in the last 2 or 3 months. But I  
144 just want to thank Sergio for his work in the office on many issues,  
145 but particularly in the last number of months on health care.

146 So -- and I will continue with my statement.

147 [Applause.]

148 Mr. Green. The Centers for Disease Control and Prevention  
149 reports that more than 700 women in the United States die each  
150 year due to complications related to pregnancy and childbirth,  
151 and more than 50,000 women experience a life-threatening  
152 complication. Maternal mortality in our country has more than  
153 doubled between 1987 and 2014, from 7.2 to 18 maternal deaths  
154 per 100,000 live births. In comparison, a recent World Health  
155 Organization study found that maternal mortality is on the decline  
156 in 157 of the 183 countries.

157 These numbers are troubling as we are because even more acute  
158 when you look at the existing racial, socioeconomic, and  
159 geographic disparities, for example, African American women are  
160 nearly three times as likely to die of complications relating  
161 to pregnancy and childbirth compared to white women. In America  
162 in the 21st century, no woman should ever die of complications

**NEAL R. GROSS**

9

163 related to pregnancy and childbirth.

164 Congress has a duty to act and reverse this terrible trend.

165 I would like to thank my colleagues both Congresswoman Diane  
166 DeGette and Congresswoman Jaime Herrera Beutler for offering  
167 their discussion draft, The Preventing Maternal Deaths Act that  
168 will help protect pregnant and postpartum mothers. This  
169 legislation will provide grants to states and tribes to help  
170 establish and support already existing maternal mortality review  
171 committees, MMRCs, to identify and review pregnancy-related and  
172 pregnancy-associated deaths.

173 MMRCs which are currently operating in over 30 states have  
174 been helping strengthen public health surveillance by linking  
175 vital data to the multidisciplinary healthcare professionals  
176 practicing in women's health. I support the bipartisan  
177 legislation and hope our committee will recommend it in  
178 consideration before the full House before the end of the year.

179 My Preventing Maternal Deaths Act is an important first step.

180 Our committee can and must do more to protect our nation's  
181 mothers. Despite the gains made under the Affordable Care Act,  
182 nearly one in seven women of childbearing age remain uninsured.

183 The biggest barrier to women of childbearing age receiving  
184 healthcare coverage is continuing refusal of 19 states, including

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

10

185 my home state of Texas, to expand Medicaid. Continuing of a  
186 comprehensive health insurance is critical for expecting and  
187 postpartum mothers to receive the post and postnatal care they  
188 need for themselves and their babies.

189 Medical research shows chronic conditions such as  
190 hypertension, diabetes, heart disease, and obesity which are  
191 becoming more common for expecting mothers can increase their  
192 risk for complications during pregnancy. Ensuring continuing  
193 of coverage preceding pregnancy will help women of childbearing  
194 age best manage these chronic conditions before they become a  
195 problem.

196 Last year I introduced Incentivizing Medicaid Expansion Act,  
197 H.R. 2688, in order to incentivize states to provide critical  
198 Medicaid coverage for uninsured Americans and avoid the kinds  
199 of tragedy that has led to the rising rate of mortality in my  
200 home state. My legislation would guarantee that the federal  
201 government covers a hundred percent of expansion costs for the  
202 first 3 years for states that have not yet expanded, and no less  
203 than 90 percent afterwards. I ask the committee to give this  
204 legislation the serious consideration that it deserves and help  
205 reverse the public health crisis that maternal mortality and  
206 severe maternal morbidity have become too many for our communities

**NEAL R. GROSS**

11

207 and our country.

208 And in my last 39 seconds, UTMB in Galveston has been the  
209 catchment for most of the births in East Texas and South Texas  
210 and for decades, and I appreciate that university and that medical  
211 school for doing that for our families. In the Houston area we  
212 have a hospital district, but Medicaid would at least help get  
213 them reimbursed. But UTMB is the catchment for problem  
214 pregnancies in South Texas and East Texas.

215 Thank you, Mr. Chairman. I yield back. Mr. Burgess. The  
216 chair thanks the gentleman. The gentleman yields back. The  
217 chair recognizes the gentleman from Oregon, the chairman of the  
218 full committee, Mr. Walden, 5 minutes for your opening statement,  
219 please.

220 The Chairman. Well, thank you, Chairman Burgess.

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

12

229 devastating is that despite massive innovation and advances in  
230 health care and technology we have experienced recent reports  
231 that have indicated that the number of women dying due to pregnancy  
232 complications is actually increasing. It is actually going up.

233 According to the Centers for Disease Control and Prevention,  
234 maternal mortality rates in America have more than doubled since  
235 1987, and I think we are all asking how can that be? Well, this  
236 is not a statistic any of us wants to hear. There are questions  
237 as to whether the increases due to data collection are broader  
238 questions about healthcare delivery. The bill before us today  
239 will help us answer these really important questions and hopefully  
240 ensure that expectant newborn mothers receive even better care.

241 I want to thank Congresswoman Herrera Beutler, my neighbor  
242 to the north in Washington State, for bringing this issue to our  
243 attention. She has been a real leader on this effort for many,  
244 many months, if not years. And especially given what you have  
245 been through in your own situation, we are proud of you and of  
246 your children and so we are glad to have you before the committee.

247 I also want to thank my colleague and friend from Colorado,  
248 Diana DeGette, for her partnership on the draft legislation that  
249 is before us today. She has been a real leader on 21st Century  
250 Cures and other public health issues that are so important. And

**NEAL R. GROSS**

13

251 I want to extend a sincere thank you to the members of our second  
252 panel. Mr. Johnson, it is good to see you again. We appreciate  
253 you coming back here. I am sorry for what you have been through,  
254 but I appreciate your willingness to come share with us. Your  
255 testimony makes a difference in public policy.

256 The draft bill we are examining today is the Preventing  
257 Maternal Deaths Act of 2018. The bill would enhance our federal  
258 efforts to support maternal mortality review committees in each  
259 of our states. And earlier this year, the Oregon legislature  
260 passed a bill to establish such a committee in my home state which  
261 brings a wide range of medical providers together with community  
262 organizations and with public health experts to study maternal  
263 mortality and figure out its underlying causes. That information  
264 and lessons learned will then be shared with law enforcement and  
265 healthcare providers across Oregon. Congress should support and  
266 it should build off of these efforts and others across the country  
267 so many of these deaths could be prevented if best practices for  
268 maternal health care were followed and more widely understood.  
269 So that is what this hearing is all about. We appreciate you  
270 being here and we look forward to the testimony from our other  
271 panelists and of course from our colleague. I will tell you in  
272 advance we actually have two subcommittees going on

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

14

273 simultaneously, and as chairman of the overall committee I have  
274 to bounce back and forth between them. But thank you for being  
275 here and we look forward to moving forward to find solutions.

276 And with that, Mr. Chairman, I yield back.

277 Mr. Burgess. The chair thanks the gentleman. The  
278 gentleman yields back. The chair recognizes the gentleman from  
279 New Jersey, Mr. Pallone, the ranking member of the full committee,  
280 5 minutes for an opening statement, please.

281 Mr. Pallone. Thank you, Mr. Chairman. Hundreds of women  
282 die each year from pregnancy-related or pregnancy-associated  
283 complications in the United States, and more than 60 percent of  
284 these deaths are preventable. Shamefully, the maternal  
285 mortality rate in the U.S. has increased while most of the rest  
286 of the developed world has actually fallen. And this is not just  
287 alarming, it is unconscionable. We have a responsibility to  
288 understand why this is happening and what we should be doing to  
289 combat this crisis.

290 Mr. Green and I wrote a letter to Chairman Burgess and  
291 Chairman Walden on this issue in May and I am pleased we are finally  
292 holding a hearing today. Today we will discuss a draft of the  
293 Preventing Maternal Deaths Act which mirrors a version that passed  
294 out of the Senate Health Committee. This is a good bill. It

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

(202) 234-4433

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

15

295 is critical that we have the necessary data to understand the  
296 underlying causes of maternal deaths and identify strategies that  
297 can help us combat it.

298 This bill encourages states to implement maternal mortality  
299 review committees to study this data and make recommendations  
300 on ways to combat maternal death. Review committees that are  
301 diverse and interdisciplinary can identify trends, patterns, and  
302 disparities that contribute to preventable maternal deaths. And  
303 with this information, healthcare providers can monitor the  
304 effectiveness of their policy and practice changes.

305 Now my home state of New Jersey was the second state in the  
306 nation to institute a maternal mortality review committee which  
307 has worked extensively to review New Jersey's maternal death cases  
308 to better understand their root causes and prevent deaths in the  
309 future. However, New Jersey's maternal mortality rate remains  
310 much too high and much more work still needs to be done.

311 Extensive public reporting has vividly described the risks  
312 American woman face in childbirth and the postpartum period and  
313 has also highlighted the vast disparities in outcome. While  
314 women of all backgrounds are at risk for pregnancy-related  
315 complications, it is critical we also examine why maternal death  
316 rates are disproportionately higher for women of color,

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

16

317 low-income women, and women living in rural areas. And we must  
318 understand why, and work together to address these disparities.

319         However, we must also consider other ways we can combat  
320 maternal mortality, including by expanding health insurance  
321 coverage and ensuring all women have access to the reproductive  
322 health services they need. Unfortunately, efforts by the Trump  
323 administration to sabotage the Affordable Care Act, curtail the  
324 Medicaid program, and limit family planning services have only  
325 served to harm women and their families. Reducing maternal  
326 deaths in the United States must be a public health priority.

327         I look forward to working with my colleagues to advance this  
328 bill and to begin addressing this crisis in a meaningful way.

329         And I would like to now yield the 2 minutes to my colleague,  
330 the Democratic sponsor of H.R. 1318, Ms. DeGette. Ms. DeGette.  
331 Thank you very much for yielding.

332         Mr. Chairman, thank you so much for having this hearing.

333         And I know my co-sponsor, Congresswoman Herrera Beutler, and  
334 I very much hope that we can mark this bill up and pass it during  
335 the lame duck session. In my opinion, it has been far too delayed  
336 given what we are seeing in this country. Maternal  
337 mortality rose in the United States between 2000 and 2014 by 26  
338 percent. This is really shocking to people who I talk to about

**NEAL R. GROSS**

17

339 this because other developed nations in the world have slashed  
340 their maternal mortality rates in half. And here is what is even  
341 worse, maternal mortality disproportionately affects women of  
342 color. Pregnancy-related death is nearly four times higher among  
343 African American women. And there are multiple factors that  
344 contribute to these maternal mortality rates -- the high incidence  
345 of preeclampsia, obstetric hemorrhaging, and mental health  
346 conditions.

347 Now to combat this trend, 33 states have established maternal  
348 mortality review committees. These panels bring together local  
349 healthcare professionals who collectively review individual  
350 maternal deaths and then target individual policy solutions  
351 towards them. The panels have been very effective. In  
352 California, for example, which established one in 2006, they have  
353 reduced their maternal mortality by more than 55 percent. And  
354 that is why what this bill does is it provides federal support  
355 for state-based maternal mortality review committees including  
356 for states, critically, that have not yet established these  
357 panels. It also promotes efforts to standardize data collection  
358 practices for maternal mortality which will help public health  
359 experts, researchers, and policymakers develop evidence-based  
360 solutions to address this crisis.

18

361           The bill has 171 co-sponsors and a number of organizations,  
362           some are which here in the audience today. The March of Dimes,  
363           the American College of Obstetrics and Gynecologists, and others  
364           all support it and so I really hope we can quickly advance the  
365           bill. I hope we can pass it by the end of the year and send it  
366           to the President's desk. Thank you and I yield back.

367           Mr. Burgess. The chair thanks the gentlelady. The  
368           gentlelady yields back and this concludes with member opening  
369           statements. The chair would remind all members that pursuant  
370           to committee rules, members' opening statements will be made part  
371           of the record.

372           We do want to thank our witness on the first panel for being  
373           here today and taking time to testify before the subcommittee.

374           I do want, as a housekeeping note, after Representative  
375           Herrera Beutler testifies we will move immediately to the second  
376           panel. We will not break in between the panels of witnesses.

377           And again as is the custom, when we have a Member at the witness  
378           table there will not be questions from the dais to the Member,  
379           so we will go right into the second panel after Representative  
380           Herrera Beutler testifies.

381           So our first witness is Representative Herrera Beutler from  
382           the state of Washington who is principal author of this

20

385 STATEMENT OF HON. JAIME HERRERA BEUTLER, A REPRESENTATIVE IN  
386 CONGRESS FROM THE STATE OF WASHINGTON

387

388 Ms. Herrera Beutler. Thank you, Mr. Chairman, for having  
389 this hearing and for your work in this field. This isn't an issue  
390 of the moment for you, but this is what you have dedicated your  
391 life to and we are very grateful.

392 Thank you, Ranking Member Green, for your support of this  
393 critical issue, and members of the subcommittee today for  
394 participating in this effort to reduce maternal mortality in the  
395 United States and for giving me this opportunity to speak in strong  
396 support of this discussion draft of the Preventing Maternal  
397 Mortality Deaths Act that is before us. So you either are  
398 a mom or you have a mom, so this issue impacts you. The very  
399 title of this bill speaks to why I have introduced this bipartisan  
400 legislation with my co-sponsor Ms. DeGette from Colorado. We  
401 have to take vital steps towards moving this bill in Congress  
402 and I believe we are going to save lives and prevent more families  
403 from suffering the profound loss of a cherished family member.

404 The testimonies today will shed light on a truly disturbing  
405 trend in our nation. More mothers die from pregnancy-related  
406 or pregnancy-associated deaths here in the U.S. than in any

**NEAL R. GROSS**

21

407 developed country in the world. Although the assumption is often  
408 that a nation with some of the most advanced obstetric and  
409 emergency care would also demonstrate low maternal mortality  
410 rates, tragically, an estimated 700-900 maternal deaths occur  
411 in the U.S. every year.

412 And not only does the U.S. rank 47th for maternal mortality  
413 globally, we have actually seen an increase in maternal deaths  
414 in recent years. This makes us one of only eight nations in the  
415 world with rising maternal mortality rates. It is unacceptable.

416 In fact, Iran has a better maternal mortality rate than we do  
417 here in the United States. In New Jersey where Mr. Pallone  
418 is from, and he knows this, if you are a woman of color, a black  
419 woman, you are 79 -- out of 100,000 deaths, 79 are likely to pass  
420 away from a pregnancy-associated or pregnancy-related death.  
421 You are three or four times more likely as a woman of color to  
422 experience this tragedy in our country. It is unacceptable.  
423 For families, single fathers, grandparents, and children who have  
424 all lost a mother, perhaps the most heart-wrenching of all of  
425 this is that according to the CDC 60 percent of these maternal  
426 deaths could have been prevented.

427 As a mother, as a citizen, and a lawmaker, I believe we can  
428 and we must do better. It is time for this to become a national

**NEAL R. GROSS**

22

429 priority, which is why I am proud to speak in support of the  
430 Preventing Maternal Deaths Act. This legislation would enable  
431 states to establish and strengthen maternal mortality review  
432 committees. MMRCs bring together local experts in maternal,  
433 infant, and public health to review each and every instance of  
434 a pregnancy-related or pregnancy-associated death. We are going  
435 to investigate every single one because these moms are worth it.  
436 This is going to give us the information to understand why it  
437 is happening and what we need to do to fix it. This is how we  
438 are going to save future mothers' lives.

439 As members of the committee are aware, we know many of the  
440 conditions that contribute to high maternal mortality rate such  
441 as preeclampsia, gestational diabetes, obstetric hemorrhage, as  
442 well as emerging challenges such as suicide and substance use  
443 disorder. However, the truth is that the available data is  
444 woefully inadequate, which greatly hinders our ability to  
445 understand why mothers are dying. The Preventing Maternal Deaths  
446 Act seeks to address this data deficiency by empowering states  
447 to participate in national information sharing through the CDC,  
448 allowing for increased collaboration and the development of best  
449 practices.

450 Now before closing, I want to note that the legislation

**NEAL R. GROSS**

23

451 before us was crafted from key policy recommendations made by  
452 multiple organizations supporting this bill including the  
453 Association of Maternal & Child Health Programs, the American  
454 College of Obstetricians and Gynecologists, the March of Dimes,  
455 Preeclampsia Foundation, the Society for Maternal-Fetal Medicine  
456 -- thank you to all of you tireless warriors in this fight.

457 Finally, and most importantly, I would like to extend my  
458 deepest gratitude to the families, fathers -- one of whom you  
459 are going to hear from today, sitting behind me. Charles Johnson  
460 is going to tell you the story of the preventable death of his  
461 hero and hopefully this will be a tribute to ending those  
462 tragedies. He wants no one else to go through what he has gone  
463 through.

464 And to every advocate who has spoken out, shared their  
465 stories, and called for change, these courageous individuals are  
466 the champions of this movement and this bill. With wide  
467 bipartisan support and well over a 160 co-sponsors in the House,  
468 I remain committed to passing the Preventing Maternal Deaths Act  
469 into law and I look forward to working with this committee, you,  
470 Mr. Chairman, and my colleagues in Congress to accomplish this  
471 imperative goal.

472 With that I thank you and I yield back.

**NEAL R. GROSS**

25

476 Mr. Burgess. We thank you, Representative Herrera Beutler,  
477 for, number one, putting forward the discussion draft and working  
478 on it so hard over this past year in bringing all of the different  
479 people together that had to finally come together to get this  
480 hearing a reality today. And I know it took a lot of work on  
481 your part and we really appreciate your dedication. So thank  
482 for being with us this morning and we will move immediately to  
483 our second panel.

484 And while the transition is occurring, I will just use this  
485 time to thank all of our witnesses for being here today and taking  
486 time to testify before the subcommittee. Each witness will be  
487 given the opportunity to deliver an opening statement followed  
488 by questions from members.

489 Mr. Green. Mr. Chairman?

490 Mr. Burgess. For what purpose does the gentleman from Texas  
491 seek recognition?

492 Mr. Green. I would like to submit the following letters,  
493 ask unanimous consent to submit the following letters for the  
494 record. From the Moms Rising, Alexis Joy Foundation, and the  
495 Society for Maternal Fetal Medicine into the record.

496 Mr. Burgess. Without objection, so ordered.

497 [The information follows:]

27

500 Mr. Burgess. Do we have copies of those?

501 Mr. Green. Yes.

502 Mr. Burgess. So today we are going to hear from Mr. Charles  
503 Johnson, founder of 4Kira4Moms; Ms. Stacey Stewart, president  
504 of the March of Dimes; Dr. Lynne Coslett-Charlton, Pennsylvania  
505 District Legislative Chair, The American College of Obstetricians  
506 and Gynecologists; and Dr. Joia Crear Perry, president of the  
507 National Birth Equity Collaborative. We appreciate each of you  
508 being here today.

509 And Mr. Johnson, you are now recognized 5 minutes for an  
510 opening statement. Please turn your microphone on. Pull it  
511 close. This is the premier technology committee in the United  
512 States House of Representatives and we have fairly rudimentary  
513 amplification devices.

514 So Mr. Johnson, you are recognized.

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

28

515 STATEMENTS OF CHARLES S. JOHNSON, IV, FOUNDER, 4KIRA4MOMS; STACEY  
516 D. STEWART, PRESIDENT, MARCH OF DIMES; LYNNE COSLETT-CHARLTON,  
517 M.D., PENNSYLVANIA DISTRICT LEGISLATIVE CHAIR, THE AMERICAN  
518 COLLEGE OF OBSTETRICIANS AND GYNECOLOGISTS; AND, JOIA CREAR  
519 PERRY, M.D., FOUNDER AND PRESIDENT, NATIONAL BIRTH EQUITY  
520 COLLABORATIVE

521

522 STATEMENT OF CHARLES JOHNSON

523 Mr. Johnson. I think I will manage. Thank you so much.  
524 So, first and foremost, to members of this committee, thank you.  
525 It is an honor to be here speaking on behalf of the tens of  
526 thousands of families that have been affected by this maternal  
527 mortality crisis and hundreds of thousands of women who have been  
528 affected by near misses.

529 So let me just begin by telling you about the woman that  
530 absolutely changed my life. My wife, Kira Dixon Johnson, was  
531 the closest thing that I had ever met to a superhero. She made  
532 me far better than I ever thought I could be and she was far better  
533 than I ever deserved. We are talking about a woman that ran  
534 marathons; that raced cars; that spoke five languages fluently.

535 So we were blessed to welcome our first son, Charles, on  
536 September 18th of 2014. We always wanted back-to-back boys,

**NEAL R. GROSS**

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

29

537 Chairman Burgess, and we were blessed to find out we were going  
538 to welcome our second son, Langston, in April of 2016. We walked  
539 into Cedars-Sinai Medical Center on April 12th of 2016 with a  
540 woman that just wasn't in good health, she was in exceptional  
541 health. This picture that you see on the screen is literally  
542 taken 10 days before Kira went in for the procedure.

543 We went in for what was supposed to be a routine scheduled  
544 C-section on what was supposed to be the happiest day of our lives  
545 and we walked right into what was a nightmare. Shortly after  
546 the procedure took place around 2 o'clock, shortly afterwards  
547 we went back to recovery. As I am sitting there reflecting in  
548 all this glow and pride of being a new father for the second time,  
549 Kira is resting, my new baby is resting, and as I look at her  
550 bedside I begin to see the catheter begin to turn red with blood.

551 I brought it to the attention of the staff, the nurses at  
552 Cedars-Sinai. They came in. They said we are going to do a  
553 couple of things. We are going to order a set of tests and we  
554 are going to order a CT scan to be performed stat. I was  
555 concerned, but I said you know what, my wife is healthy and we  
556 are at what is supposed to be one of the best hospitals in the  
557 world. I am concerned but we have got a plan, okay. Blood  
558 work comes back, it is showing that it is abnormal and she is

**NEAL R. GROSS**

30

559 hemorrhaging and they ordered a CT scan that was supposed to be  
560 performed stat. Keep in mind this is around 4 o'clock. 5 o'clock  
561 comes, no CT scan. Her blood level was continuing to drop. By  
562 this time she is beginning to shiver uncontrollably. 6 o'clock  
563 and no CT scan. She is beginning to become pale, she is in extreme  
564 pain. 7 o'clock, 8 o'clock comes, no CT scan. I am begging,  
565 I am pleading the staff to do something.

566           And around 9 o'clock as I continue to plea for my wife's  
567 life, the staff at Cedars-Sinai Medical Center tells me, sir,  
568 your wife just isn't a priority right now. 8 o'clock comes, 9  
569 o'clock, 10 o'clock. They said, well, we need to do a blood  
570 transfusion. I am saying, well, where is the CT scan? It wasn't  
571 until after midnight that they finally took my wife back to  
572 surgery, after I begged and pleaded for them to take action for  
573 more than 10 hours. When they took Kira back to surgery they  
574 opened her up and there were three and a half liters of blood  
575 in her abdomen and she coded immediately. Now I am here to  
576 tell you this. I am not here to tell you what I think. I am  
577 here to tell you what I know. There are people on this panel  
578 that are far more intelligent than I will ever be that are going  
579 to talk to you about the statistics and how horrifying they are.  
580       What I am here to tell you is this. That there is no statistic

**NEAL R. GROSS**

31

581 that can quantify what it is like to tell an 18-month-old that  
582 his mother is never coming home. There is no matrices that can  
583 quantify what it is like to explain to a son that will never know  
584 his mother just how amazing she was.

585 My wife deserved better. Women all over this country  
586 deserve better. I am so grateful to my shero, Congresswoman Jaime  
587 Herrera Beutler. Thank you so much, Congresswoman DeGette. And  
588 for those of you all who have supported this bill, I honest to  
589 goodness would love to come up there and just give you a big hug,  
590 but I have been explained that that is not protocol.

591 And let me say this for those that choose to stand in  
592 opposition of this bill, you don't owe me an explanation. You  
593 owe an explanation to my boys. You owe Tara Hansen's son an  
594 explanation. You owe Mustafa Shabazz and his son an explanation.

595 We have an opportunity to do something, here and now, to send  
596 a loud, definitive message to this country that women and babies  
597 matter.

598 Lastly, Kira and I always talked about raising men that would  
599 change the world. It is time for us to stop telling our children  
600 that they can change the world and show them how it is done.  
601 Thank you for your time.

602 [The prepared statement of Mr. Johnson follows:]

34

610 STATEMENT OF STACEY STEWART

611

612 Ms. Stewart. Thank you, Mr. Chairman.

613 Mr. Burgess. I know, he is tough to follow.

614 Ms. Stewart. Very hard to follow that so -- and I am known  
615 by my family to be one of the biggest crybabies, but it is for  
616 good reason.

617 So thank you for inviting me to testify at this very important  
618 hearing today. I am Stacey Stewart. I am president of the March  
619 of Dimes. March of Dimes is leading the fight for the health  
620 of all moms and babies. And I would like everyone in this room  
621 to take a look at this blanket. Just about everyone that has  
622 had a child will never forget the very moment when a doctor placed  
623 a precious baby boy or baby girl into our arms wrapped into one  
624 of these blankets. More than 700 times a year, beautiful  
625 babies are wrapped into these blankets, in one just like this  
626 one, but unfortunately there is no mother to hold a child that  
627 is wrapped in that blanket. So that is not just a statistic.

628 There are 700 mothers that die every single year and almost and  
629 over 50,000 who experience dangerous complications that could  
630 have killed them, making the U.S. the most dangerous place in  
631 the developed world to give birth.

35

632           And we think and we know that you agree that this situation  
633 is completely unacceptable. Our nation is in the midst of a  
634 crisis of maternal and child health. Across this nation,  
635 virtually every measure of the health of pregnant women, new  
636 mothers, and infants is going in the wrong direction. The number  
637 of babies born premature is rising in this country. In many  
638 communities, infant mortality, rates of infant mortality exceed  
639 those in developing nations. Nations such as Slovenia and French  
640 Polynesia have better infant mortality rates than here in the  
641 United States.

642           Women are tragically dying, women like Kira, from  
643 pregnancy-related causes and are suffering from severe health  
644 consequences like infertility. While other countries have  
645 reduced their infant mortality rates, the number of women who  
646 die from pregnancy-related causes in the U.S. has doubled in the  
647 last 25 years. And as we have heard this morning already, black  
648 women are three to four times more likely to die from  
649 pregnancy-related causes than white women, which is a truly  
650 shocking and appalling disparity.

651           Maternal mortality is also significantly higher in rural  
652 areas where obstetrical providers may not be available and  
653 delivery in rural hospitals is associated with higher rates of

36

654 postpartum hemorrhage. March of Dimes will release a report in  
655 the coming weeks that will show that maternity care deserts exist  
656 in this country and in these deserts pregnant women face serious  
657 challenges in receiving appropriate care.

658 The state of maternal health in the United States is dire,  
659 but there are things we can do and we must do. Many factors are  
660 contributing to the maternal health crisis in this nation and  
661 our work to address it is important and it must be equally  
662 multifaceted. The bill before the subcommittee today is a  
663 critical step towards preventing death or serious health outcomes  
664 for pregnant women and new mothers.

665 The discussion draft of H.R. 1318, the Preventing Maternal  
666 Deaths Act, would provide grants to states and tribes to help  
667 establish or improve maternal mortality review committees or  
668 MMRCs. MMRCs are interdisciplinary groups of local experts that  
669 come together in maternal, infant, and public health to  
670 investigate the cases of maternal death, identify those  
671 systemwide factors that contributed to these deaths, and then  
672 develop recommendations that would help prevent future cases.

673 MMRCs are unique in that they identify solutions. Not just  
674 collect the data, but then identify solutions that are targeted  
675 to the needs of pregnant women and mothers in specific states,

37

676 cities, and communities. The discussion draft of H.R. 1318 would  
677 also establish a demonstration project to determine how best to  
678 address disparities in maternal health outcomes.

679 Mr. Chairman and members of the subcommittee, while this  
680 bill is extremely important, maternal mortality is not a single  
681 problem with a single solution. The causes of maternal mortality  
682 and severe maternal morbidity are diverse. They include physical  
683 health, mental health, social determinants, and much more. They  
684 can be traced back to the issues in our healthcare system including  
685 the quality of care as we just heard so passionately from Charles,  
686 systems problems, and of course the issue of implicit bias that  
687 exist in our healthcare system. They stem from factors in our  
688 homes, our workplaces, and our communities.

689 Mr. Chairman and members of the subcommittee, thank you for  
690 recognizing the urgency and the magnitude of this public health  
691 crisis. Our nation's mothers and babies cannot wait any longer.

692 We must act now to save the lives and the health of pregnant  
693 women, new mothers, and their babies. Thank you.

39

700 STATEMENT OF LYNNE COSLETT-CHARLTON

701

702 Dr. Coslett-Charlton. Chairman Burgess, Ranking Member  
703 Green, Chairman Walden, Ranking Member Pallone, and distinguished  
704 members of the Energy and Commerce Subcommittee on Health, thank  
705 you for inviting me to speak with you today on behalf of the  
706 American College of Obstetricians and Gynecologists at this  
707 hearing entitled, Better Data and Better Outcomes: Reducing  
708 Maternal Mortality in the U.S.

709 ACOG, with a membership of more than 58,000, is the leading  
710 physician organization dedicated to advancing women's health.

711 Today's hearing will focus on a discussion draft of H.R. 1318,  
712 the Preventing Maternal Deaths Act, sponsored by Representatives  
713 Jaime Herrera Beutler, Diana DeGette, and Ryan Costello. I want  
714 to extend a special thank you to the bill sponsors for working  
715 so diligently on this bipartisan legislation, a critical first  
716 step in improving maternal health outcomes for women in this  
717 country.

718 A special thanks also to you, Dr. Burgess, my colleague  
719 OB/GYN, for your leadership highlighting this critically  
720 important issue and making maternal mortality a top priority.

721 As many of you know, the United States has a maternal

40

722 mortality crisis. Too many women die each year in the United  
723 States from pregnancy-related and pregnancy-associated  
724 complications. We have higher maternal mortality rates than any  
725 other developed country. At a time when 157 of 183 countries  
726 in the world report decreases in maternal mortality, ours is  
727 rising. Black women are disproportionately affected and are  
728 three to four times more likely to lose their lives than white  
729 women. And for every maternal death in the United States there  
730 are a hundred women who experience severe maternal morbidity or  
731 near misses. This is all unacceptable and the time for action  
732 is now. We know that over 60 percent of maternal deaths are  
733 preventable. Common causes include hemorrhage, cardiovascular  
734 and coronary conditions, cardiomyopathy or infection. Overdose  
735 and suicide, driven primarily by the opioid epidemic, are also  
736 emerging as the leading causes of maternal mortality in a growing  
737 number of states including my own. If we have a clear  
738 understanding of why these deaths are occurring and what we can  
739 do to prevent them in the future, we can save women's lives.

740 The Preventing Maternal Death Act assists states in creating  
741 or expanding maternal mortality review committees through the  
742 Center of Disease Control and Prevention. MMRCs are  
743 multidisciplinary groups of local experts in maternal and public

41

744 health as well as patient and community advocates that closely  
745 examine maternal death cases and identify locally relevant ways  
746 to prevent future deaths. While traditional public health  
747 surveillance using vital statistics can tell us about trends and  
748 disparities, MMRCs are the vehicle best positioned to  
749 comprehensively assess maternal deaths and identify, most  
750 importantly, opportunities for prevention.

751 As ACOG's Pennsylvania Section Chair and incoming District  
752 III Legislative Chair and a practicing physician for over 20  
753 years, addressing maternal mortality is of critical importance  
754 to me. As an OB/GYN, seeing a woman die while pregnant or after  
755 delivering a baby is something that sticks with you for life and  
756 has stuck with me throughout my career. Preventing that kind  
757 of tragedy and ensuring the health and safety of the women we  
758 care for is central to our mission. When I took over as  
759 ACOG's Pennsylvania Section Chair, Pennsylvania did not have  
760 MMRC, though the city of Philadelphia did. And over the past  
761 2-1/2 years I have worked diligently to organize the campaign  
762 with other OB/GYNs and other advocates in my state and the  
763 Department of Health to urge the state legislators to pass  
764 legislation to form our first statewide MMRC. Finally, on May  
765 9th, Governor Wolf signed the Maternal Mortality Review Act.

42

766 Our first meeting is next week. Enthusiasm like this for MMRCs  
767 is growing all over the country. Today, approximately 33 states  
768 have MMRC and as many of those 33, including Pennsylvania, are  
769 brand new this year.

770 But states like ours need help. The CDC plays a vital role  
771 in assisting these states to ensure their MMRCs are robust,  
772 multidisciplinary, and using standardized reporting, which is  
773 why it is important to have this federal legislation as  
774 mechanisms. The Building U.S. Capacity to Prevent Maternal  
775 Deaths Initiative, a partnership between the CDC's National  
776 Center for Chronic Disease Prevention and Health Promotion, the  
777 CDC Foundation, the Association for Maternal & Child Health  
778 Programs, and Merck for Mothers has made tremendous progress  
779 giving technical assistance to states to help them establish MMRCs  
780 or ensure established MMRCs are operating with evidence-based  
781 practices.

782 In Pennsylvania we need to ensure that this type of technical  
783 assistance is amplified so that we can get our MMRC off the ground  
784 and working correctly. Once MMRCs are up and running they lead  
785 to opportunities for quality improvement. For example, to  
786 participate in the Alliance for Innovation on Maternal Health,  
787 or AIM, a state must first have an MMRC. AIM convened under ACOG's

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

43

788 leadership is a national alliance of clinicians, hospital  
789 administration, patient safety organizations, and patient  
790 advocates that work to reduce maternal mortality and severe  
791 morbidity by creating condition-specific bundles which are  
792 evidence-based toolkits to improve maternal outcomes. Some of  
793 these bundles include severe hypertension, maternal mental  
794 health, obstetric care for women with opioid use disorder,  
795 obstetric hemorrhage, and racial disparities in maternity care.

796 To participate in AIM, a state must first have MMRC. The data  
797 recommendations from MMRCs instruct states where they need to  
798 invest to address specific conditions that affect women in their  
799 community and ensure proper appropriate targeting of limited  
800 resources. For us to clearly understand why women are dying  
801 from preventable maternal complications across the country and  
802 make lasting improvements, every state must have a robust MMRC.

803 The Preventing Maternal Death Act will help us reach that goal  
804 and ultimately improve maternal health across this country.  
805 Thank you very much for the opportunity to speak to you about  
806 this pressing issue and in support of this very important  
807 legislation.

46

813 STATEMENT OF JOIA CREAR PERRY

814

815 Dr. Perry. So, thank you fellow ACOG member, Dr. Burgess.

816 Mr. Burgess. And if you will suspend for a moment, in the

817 interest of full disclosure I am a dues-paying member of

818 the American College of Obstetricians and Gynecologists.

819 Dr. Perry. Here we go.

820 Mr. Burgess. And I am current on that. And I don't do the

821 emeritus stuff, I pay the full freight. You may proceed.

822 Dr. Perry. And Ranking Member Green, thank you as well,

823 and to my fellow colleagues on the panel. I really feel like

824 going last is always a great way to go because you can hear what

825 the gap might be in explaining this.

826 I get to work with the 33 states who are doing the MMRCs.

827 As an organization we provide technical assistance. We also

828 get to work in places like Philadelphia. We have been doing it

829 for awhile. So a concrete example would be in Philadelphia they

830 had a lot of women who were dying from cardiomyopathy, which sounds

831 really medical, right, because your heart fails it won't pump

832 as well. When they actually reviewed the deaths, many of the

833 women had heroin addiction, right, so it was something you could

834 prevent if you actually put in mental healthcare services for

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

1323 RHODE ISLAND AVE., N.W.

WASHINGTON, D.C. 20005-3701

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

47

835 addiction. So it is important for us to have a broader view.

836           Someone brought up California, which is really important.

837           So California has decreased their deaths, but they still have

838 a racial disparity. Still, in California despite having these

839 great outcomes, they have had increased deaths for black women.

840           So what they are doing now is really going back to look at implicit

841 bias that was mentioned, making sure that their providers are

842 culturally cognizant and having really some rules around what

843 does it mean if you don't value a woman and she is not seen for

844 several hours, how does that system respond to that and what can

845 we do differently to ensure that people are seen in an appropriate

846 amount of time.

847           So just wanted to give some teeth to how important this is

848 and how having the ability to actually look at the deaths

849 individually and to talk to family members and to have mental

850 health there really can help us to get to some answers.

851           So now I want to tell you a little bit of my own story, so,

852 because every woman's story needs to be heard and this is what

853 the MMRC allows you to do. So when I was a third-year medical

854 student in my home of Louisiana after attending Princeton for

855 undergrad, my then-husband and I were expecting our planned second

856 child. At about 5-1/2 months pregnant, my water broke. My

48

857 mother, who is here and a pharmacist, still recounts how  
858 panic-stricken she was when she was counseled by my physician  
859 about the risk of infection to my son and I that included death.

860 I had access to excellent health care for him provided by  
861 my health insurance coverage, but the stress of racism was my  
862 only risk factor for the premature birth of my son. The hospital  
863 where I was training was named Confederate Memorial just 20 years  
864 prior to this. Luckily, my 22 year old son and I survived, but  
865 the sad reality is that my 25 year old daughter has a higher risk  
866 of dying in childbirth than I did when I had her. The same is  
867 true for all of us who have daughters in the United States. We  
868 are failing our daughters, especially our black daughters who  
869 are dying at three to four times the rate of their white  
870 counterparts.

871 So, ultimately, what we are asking for this bill, when you  
872 think about what Charles said and what all of us have said, is  
873 we can no longer delay acting. This bill has been reiterated  
874 many times in Congress and I am excited to hear that maybe we  
875 can have it done by the end of this year, because it is important  
876 for us to say that we as a country -- I mean I got to testify  
877 at the U.N. about this very issue -- the world is watching us.  
878 The world sees us. I get flown to Geneva to talk about how

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

49

879 important it is for the United States to actually value women  
880 and to pay for and look at why women are dying, so this is an  
881 opportunity for us to say yes, we do value women and yes, we do  
882 want to see what is actually happening to them.

883 So ultimately what women, especially black women, in the  
884 United States need is accountability. We need to know that our  
885 lives are valued. We need to know that this accountability might  
886 be difficult, it might be complicated, but government still has  
887 an obligation to act. Accountability is a value that all  
888 Americans can agree upon, yet racism, classism, and gender  
889 oppression are killing all of us from rural to urban America.

890 This is not about intentions. Lack of action is unintentionally  
891 killing us. It is a human rights imperative. We just ensure  
892 that prevention efforts and resources are being directed towards  
893 the areas of greatest need and be willing to name the problem  
894 directly. Much can be accomplished through improving  
895 monitoring and data collection.

896 Me and my big writing because my eyes are getting bad, I  
897 am getting old.

898 H.R. 1318 is a tremendous step forward in showing that we  
899 do recognize, yes, black mamas matter. That is it.

900 [The prepared statement of Dr. Perry follows:]

**NEAL R. GROSS**

51

903 Mr. Burgess. Thank you, Dr. Perry, Dr. Crear Perry. I  
904 appreciate your testimony and appreciate all of our witnesses  
905 for being here.

906 I will move to the question part of the hearing and I will  
907 recognize myself 5 minutes for questions. And Dr.  
908 Coslett-Charlton, let me ask you as a -- I mean, we have heard  
909 the stories and yes, the review committees are important,  
910 legislation is important. But honestly, doctor to doctor, it  
911 is decisions that are made at the bedside and I honestly don't  
912 know how you legislate correct decisions to be made at the bedside.

913 So as part of this effort and as a fellow member in the  
914 American College of OB/GYN, it is really incumbent upon our  
915 professional societies, medical societies, our specialty  
916 society. I mean this is where the rubber meets the road. We  
917 have to be -- I mean, I don't know how I can legislate something  
918 that stops what Mr. Johnson went through. I just don't know how  
919 I can do that. I mean, here was a situation where all the signs  
920 and symptoms pointed to exsanguination and he describes  
921 unfortunately in very painful detail what the natural consequence  
922 of exsanguination is, and I don't know how I write legislation  
923 to stop that from happening. I mean that is on the -- that is  
924 on us as a profession, right?

**NEAL R. GROSS**

52

925 Dr. Coslett-Charlton. I totally agree. And I think that  
926 is why we are here and that is why we are sitting beside Mr. Johnson  
927 because those stories, I think, affect. And I know, Dr. Burgess,  
928 because you practiced for so long, I look at my intern year, I  
929 was on my internal medicine critical care rotation, probably the  
930 second month of rotation and I was called for a code for one who  
931 had a very rare condition called an amniotic fluid embolism, which  
932 I don't know if you have seen one in your career, but I was like  
933 what could this be -- one in 300,000 -- and she died in front  
934 of me.

935 You know, I was an intern observing, I wasn't actively  
936 participating in the care at that time, but I seriously questioned  
937 whether or not I wanted to go into this field at that time because  
938 -- and I am so glad I did, because the joy of being an OB/GYN  
939 far outweighs the, you know, the unfortunate things that happen  
940 to patients sometimes. But I think seeing that, if we can prevent  
941 one death, if we can educate our members, and really the best  
942 way to do that is to understand where the problems lie.

943 And, you know, the AIM programs are a great success story  
944 and if we are able to roll them out across the country and really  
945 see where we can use best practices to prevent things from  
946 happening that couldn't otherwise, and really obstetric

53

947 hemorrhage is a perfect example where having, you know, the beauty  
948 of the AIM program is that it is, really, you know, readiness  
949 first, so the four Rs, readiness and then recognize that there  
950 is a problem. So the readiness includes things like having suture  
951 available, having medication available on the labor floor so that  
952 you are not calling a pharmacist to come, you know, I need this  
953 medicine now not an hour from now while you approve it.

954         So being ready, being able to recognize that there is a  
955 problem and educating staff members. Not just physicians, but  
956 also people that are on the front lines caring for the patients  
957 first. And also the response and having protocols for response  
958 that are appropriate, having blood products readily available  
959 for women when they are in transfusion protocols we have shown  
960 to be effective.

961         And, finally, reporting, because when we talk about maternal  
962 mortality and we talk about the deaths that is very important,  
963 but also the near misses are equally devastating and equally  
964 important that we know how to identify them. And not only, you  
965 know, we are seeing the iceberg, you know, if we can really get  
966 to the crux of that where we are truly going to improve the way  
967 we care for women in this country and I am positive we are going  
968 to see less maternal deaths.

54

969 Mr. Burgess. Well, and that I mean that is what is critical  
970 about this. Maternal mortality review committees, I think that  
971 is an excellent idea. I am all in favor of that. I will just  
972 say in the 1970s at Parkland Hospital it was called grand rounds.  
973 And you didn't ever want to present at grand rounds. That was  
974 -- probably meant your patient hadn't done well, but what it really  
975 meant was you weren't going to do well for the next couple of  
976 hours. And Dr. Jack Pritchard was the head of the department  
977 back then. He was pretty critical and had a way of asking those  
978 insightful questions that exposed any perhaps weakness in your  
979 clinical judgment or your thought process as you worked through  
980 a complicated issue.

981 Let me just ask you, I mean have we gotten away as a profession  
982 from that type of introspection that you probably were exposed  
983 to in residency, I know I was.

984 Dr. Coslett-Charlton. No, I think if you speak to any  
985 residents those processes still happen, but they happen mainly  
986 in academic centers. And, you know, really a part of this problem  
987 is that we have to better reach the communities. I practice in  
988 a small community hospital right now and it is very different.

989 You know, I think and educating practitioners in the community  
990 hospitals we know is equally as important, you know, and access

55

991 to care obviously as we have spoken to is equally important.

992 So I think being able to collect the data, being able to  
993 see where the deficiencies and having a mechanism and a vehicle  
994 and support, you know, nationally down to the state levels and  
995 the tentacles that can get, you know, the boots on the ground  
996 to make sure that none of these things happen anywhere in the  
997 United States is critical.

998 Mr. Burgess. Well, Mr. Green gets extremely critical of  
999 me if I run over, so I will yield back my time and recognize the  
1000 gentleman from Texas for 5 minutes for questions.

1001 Mr. Green. I just ask equal time, Mr. Chair. I want to  
1002 thank all our witnesses. And, Mr. Johnson, being a father of  
1003 two children and now a grandfather, I just, you know, and as the  
1004 chair said, I don't think there is anything we can do. Of course  
1005 there is no shortage. We have a lot of doctors in Congress but  
1006 we also have a lot of lawyers. And so people say well, you can  
1007 go to the tort system, and but that is not going to bring back  
1008 your wife or your second baby. And it just, you know, how do  
1009 you do that? But we understand, those of us who have children  
1010 and I know physicians particularly. So I want to thank all  
1011 of our witnesses today being here and discussing the U.S.'s  
1012 maternal mortality rate, which I would be remiss if I didn't

56

1013 acknowledge my home state's maternal mortality crisis as well.

1014 As widely reported in 2016, published in Obstetrics & Gynecology  
1015 found the Texas maternal rate was doubled between 2010 and 2012.

1016 The studies study's authors acknowledge these statistics were  
1017 unexplainably high.

1018 In the wake of this report, Texas' Maternal Mortality and  
1019 Morbidity Task Force underwent review of all pregnancy-related  
1020 deaths in Texas to determine the accuracy of these findings.

1021 What the task force found was that data collection errors and  
1022 lack of standardization in reporting has resulted in varying  
1023 statistics. If we can't depend on the research, that is a  
1024 problem.

1025 Dr. Coslett-Charlton, can you explain why the  
1026 standardization of data collection is so critical when discussing  
1027 maternal death rates?

1028 Dr. Coslett-Charlton. That is a very important question,  
1029 Representative Green. And I think the crux of the issue is that  
1030 the vehicles of looking at vital statistic records we are able  
1031 in the pregnancy checkboxes, if someone pregnant within a year  
1032 or 42 days in Texas of delivery that those measures certainly  
1033 can identify and are inherent to error.

1034 But the important thing and why we are here today is to make

**NEAL R. GROSS**

57

1035 sure that all of those deaths are reviewed so that we can have  
1036 accurate data. And that is why these maternal mortality review  
1037 committees are essential, because not only are they going to  
1038 review the deaths but they are going to be able to say, you know,  
1039 determine if they could have been preventable deaths and that  
1040 is where the impact truly could be made.

1041 Mr. Green. What can we learn from this study in Texas, and  
1042 tell me Texas is not the only state that has that kind of statistics  
1043 that you can't depend on. Is it other states, in Pennsylvania,  
1044 or other states in the country?

1045 Dr. Coslett-Charlton. Well, in Pennsylvania we have had  
1046 the checkbox for the past 5 years and I think that in Philadelphia  
1047 there has been a small community that they have been able to focus  
1048 on that data. But I think like I was saying, the essential part  
1049 of this is that having accurate data is really, really, truly  
1050 important and the Texas studies truly exemplify that how important  
1051 these MMRCs are.

1052 The Texas committee at that time was not as sophisticated  
1053 as it is now and their means of collecting aren't as sophisticated,  
1054 so I think that going forward it is a perfect example of why this  
1055 is essential.

1056 Mr. Green. The Texas Maternal Mortality and Morbidity Task

58

1057 Force put out a series of recommendations on ways to improve  
1058 maternal health and prevent pregnancy-related complications.  
1059 Just this last month, the task force released its joint biannual  
1060 report for our Department of State Health Services. Their first  
1061 recommendation is we increase access to healthcare services to  
1062 improve the health of women, facilitate continuity of care, and  
1063 enable an effective care transitions and promote safe birth  
1064 spacing.

1065 Dr. Crear Perry, would you agree with the recommendation  
1066 to improve maternal health we must improve the access to care?

1067 Dr. Perry. Sure. And I want to also piggyback on the last  
1068 question a little bit about the data because it is important that  
1069 we -- it is a common phenomenon across the country, so it is not  
1070 just Texas and it is not just Pennsylvania. A lot of states need  
1071 this money to help with collect more accurate data, it would be  
1072 really helpful.

1073 And as far as access it is a big barrier. We see that places  
1074 where closing rural hospitals in Texas, in Georgia, that when  
1075 women have to travel an hour to have a baby they are more likely  
1076 to hemorrhage. They are more likely to have a heart attack.  
1077 They are more likely to have these medical conditions. So if  
1078 you don't have a systemic review you can't look at the match

59

1079 between where your access is being denied and where women are  
1080 also dying in the same place. So having a more robust review  
1081 of the deaths will allow you to look at that.

1082 Mr. Green. From my perspective coming from Texas, one way  
1083 to improve access to care is expanding access to Medicaid and  
1084 ensuring low-income individuals have the care that they need.

1085 And do you agree with that?

1086 Dr. Perry. Sure. I mean I am from the great state of  
1087 Louisiana and so we have seen actual data since Louisiana expanded  
1088 Medicaid. We are one of the few deep southern states that  
1089 expanded Medicaid where we have had improved outcomes. Our  
1090 governor, really it was important for him to ensure that we had  
1091 access to Medicaid expansion. Women are getting preventive  
1092 services so you know that you have diabetes before you become  
1093 pregnant and you don't show up at the hospital pregnant with  
1094 uncontrolled blood sugars. So it is important that we have  
1095 expanded Medicaid.

1096 Mr. Green. And in my last 9 seconds, there is no replacement  
1097 for prenatal care and having a mother who has a relationship with  
1098 their doctor and that is why we need to have that access no matter  
1099 who pays for it -- Medicare, private sector or whatever.

1100 So, Mr. Chairman, thank you for your time.

60

1101 Mr. Burgess. The chair thanks the gentleman. The  
1102 gentleman yields back. The chair recognizes the gentleman from  
1103 Kentucky, Mr. Guthrie, the vice chair of the committee, 5 minutes  
1104 for questions.

1105 Mr. Guthrie. Thank you, Mr. Chairman, and I appreciate  
1106 everybody being here.

1107 Mr. Johnson, I appreciate you coming here and being willing  
1108 to share your story. I know that a lot of times we have policy  
1109 developed and things develop because people went through tragic  
1110 things and they are willing to bring that to our attention and  
1111 share. And I know it is difficult to do, but it is one way that  
1112 they live on and it is a way that it actually changes what is  
1113 going on in the country, so we appreciate that.

1114 And this is something that has been on the mind of the  
1115 committee, I know the chairman, I know from his background, but  
1116 also I remember being in a meeting earlier and we were trying  
1117 to just get down to the policy that needs to happen. And your  
1118 story, I remember one of the roundtables that the chairman has  
1119 talking about the -- it is not just access to care. It sounds  
1120 like your wife was in a fantastic hospital situation and  
1121 everything and it seems C-sections were something that could be  
1122 common.

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

61

1123           And we are the most, it is not that people aren't getting  
1124 care. A lot of people are getting C-sections. And my wife has  
1125 had -- I have three children, we have had three, so it really  
1126 made me cringe when I heard that in your story, because it seems  
1127 the second or third or whatever, C-sections seem to be something  
1128 that is something we need to address in moving forward and that  
1129 gets to just finding the right data. And Dr.  
1130 Coslett-Charlton -- Charlton or Charlton? Charlton. I know you  
1131 are with ACOG and in this bill today we are looking at data and  
1132 how to move data. I know ACOG has endorsed -- a number of medical  
1133 societies and ACOG has endorsed this bill and it is my hope that  
1134 we can get sound data to see exactly the actions that we need  
1135 to take. So can you speak to ACOG's perspective on the role of  
1136 data in your efforts to reduce maternal mortality?

1137           Dr. Coslett-Charlton. So I think to some degree when you  
1138 are speaking about specific situations like C-section rates and  
1139 talking about, you know, once a woman has a first C-section, second  
1140 C-section, third C-section, we know each time that a woman has  
1141 a C-section risk can increase with subsequent pregnancies. And  
1142 those are important reasons why, number one, we need access to  
1143 good care.

1144           But also, the part of the AIM bundles where we talk about

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

62

1145 preparedness or readiness is that when we know a woman has a third  
1146 C-section, knowing that you could -- if she has the ability to  
1147 have important prenatal care to recognize the potential  
1148 complications and be ready for those complications, that is  
1149 critical and essential.

1150 And the last thing, if we talk about the AIM bundles, one  
1151 of the bundles is looking at how to improve primary Caesarean  
1152 section rates so that is something that is -- that is good data  
1153 that is coming out of California that we hope can translate, you  
1154 know, sharing data across state lines. Women are women, you know,  
1155 in Pennsylvania the same as in Arizona. So, you know, it really  
1156 isn't rocket science. We should be able to share data and  
1157 establish best practices and the way to do that is to have the  
1158 vehicle or the mechanism to accurately be able to identify and,  
1159 you know, look through that data.

1160 Mr. Guthrie. It just seems standard -- not being a physician  
1161 at all, I am a manufacturing person -- but it just seems to be  
1162 standard now that if somebody is having their second or third  
1163 C-section that the symptoms your wife showed seems to be clear  
1164 from what you said that maybe there should be a team waiting to  
1165 see if something happens and being ready for any type of those.  
1166 You said you wanted -- I would love if you wanted to comment.

**NEAL R. GROSS**

63

1167 Mr. Johnson. Absolutely. I think that the astronomical  
1168 C-section rates are something that needs to be examined. When  
1169 we talk about Kira's case, there was a C-section, indeed, but  
1170 it wasn't the C-section that led to her ultimate passing. And  
1171 I will share this with the committee and I didn't share -- what  
1172 I had shared earlier was a very condensed version of what was  
1173 happening to Kira.

1174 But what we found subsequently when we go back and look at  
1175 the medical records, which I shared as part of my record, is that  
1176 in Kira's case she was exceptionally healthy, she went in for  
1177 a routine scheduled C-section. And from what I understand, and  
1178 Dr. Burgess and some of the medical people here, is what I  
1179 understand is that for a woman who is having a Caesarean section,  
1180 the cut timing and the time that they make the incision until  
1181 the time that the baby is born, for a healthy woman and the baby  
1182 is not under stress should be between 12 and 15 minutes. Is that  
1183 fair, Dr. Burgess? Okay. And in a situation where a woman  
1184 has had a previous Caesarean you should add another 3 to 5 minutes  
1185 so that you can cut around the scar tissue.

1186 Mr. Guthrie. The problems with scar tissue in the second  
1187 or third, Dr. Burgess explained that to me.

1188 Mr. Johnson. Yes. So I mean this is the point I would like

**NEAL R. GROSS**

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

64

1189 to make is, so we are talking about between 15 to 20 minutes,  
1190 ballpark, for a woman that is healthy, second Caesarean section,  
1191 the baby is not in distress. When we received the medical records  
1192 from Cedars-Sinai Hospital, the cut time on the delivery for my  
1193 second son, Langston, was less than 2 minutes. Less than 2  
1194 minutes. And in the process of him rushing he lacerated her  
1195 bladder.

1196 But once again, and so the way that has been described is  
1197 that this was not a medical tragedy, this was a medical catastrophe  
1198 meaning that everything that could have gone wrong did go wrong.

1199 So let's talk a minute about AIM which is a phenomenal  
1200 program. And I want to salute ACOG for the work that they are  
1201 doing in conjunction with AIM and being rolled out in various  
1202 states. California, where we were where my son was delivered,  
1203 is one of the trademark states for AIM and what they have done  
1204 to reduce the maternal mortality rate with their hemorrhage  
1205 bundle. But as long as we have these tools that are a suggestion  
1206 and they are not a protocol, women are going to continue to pass  
1207 away.

1208 So the AIM bundle was available in Kira's case. It is one  
1209 of the -- it is ground zero for the wonderful work they have done  
1210 reducing the maternal mortality rate in California, but they just

65

1211 chose to ignore it and I continued to beg and plead while her  
1212 condition deteriorated.

1213 So Caesareans are a challenge, but in Kira's --

1214 Mr. Guthrie. Different.

1215 Mr. Johnson. She was extremely healthy and they just let  
1216 her continue to deteriorate. So we have got to have a fundamental  
1217 standard of care that is not just a suggestion as AIM, as it is  
1218 in the situation with AIM -- and it is phenomenal -- but if we  
1219 can make a fundamental standard of care across the board that  
1220 will make a big difference.

1221 Mr. Guthrie. Thank you. Thank you for sharing and my time  
1222 has expired. I yield back.

1223 Mr. Burgess. Thank you, Mr. Guthrie.

1224 Mr. Cardenas, you are recognized for 5 minutes, please, for  
1225 questions.

1226 Mr. Cardenas. Thank you very much. And to Mr. Johnson it  
1227 is just amazing and incredible that you are doing what you are  
1228 doing and thank you so much. You are saving lives and I appreciate  
1229 that very much and so does everybody in this country and the world  
1230 who will benefit from hopefully good decisions that we make, all  
1231 of your efforts.

1232 First, I would like ask some questions if the doctors would

66

1233 -- I recently read about a program in California that has been  
1234 very successful since both the March of Dimes and the College  
1235 of Obstetricians and Gynecologists are part of the California  
1236 Maternal Quality Care Collaborative. I am hoping that both Dr.  
1237 Coslett-Charlton and Ms. Stewart can tell us more about this  
1238 program.

1239 But in California's private-public partnership it was  
1240 stressed that it was because of the views from a diverse panel  
1241 of experts that they could avoid missing important details on  
1242 women's deaths. And one of the things that I think it is important  
1243 for us to understand is -- I have been given a chart about the  
1244 red line shows the mortality rate across the country while the  
1245 highlighted yellow line actually shows California's. And we see  
1246 a dramatic drop since 2007 when California has implemented the  
1247 process of teaching each other, learning from each other, sharing  
1248 data. And you are looking at California that has a mortality  
1249 rate of 7.3 per 100,000 and across the country it is still up  
1250 at 22.

1251 So what I would like to see happen is we as Congress and  
1252 those of us who are involved, or those of you who are involved  
1253 on the day-to-day process that we can come together and create  
1254 a national best practices, and I hope that that is the outcome

67

1255 not only at this hearing but of this Congress. Dr.  
1256 Coslett-Charlton and Ms. Stewart, if you can, can you talk a bit  
1257 about how the diversity of these panels has changed and improved  
1258 the maternal outcomes?

1259 Ms. Stewart. Well, let me just start with a couple of  
1260 points, which is I think that it is notable that California has  
1261 had so much success, obviously, and I think the idea of the  
1262 committee that has been formed, the way they have come together  
1263 to look at data, to design interventions, identify where the  
1264 problems are within the state and really design interventions  
1265 that have made a meaningful difference has been important. And  
1266 that is important to say at a high level, but again when it comes  
1267 down to each individual person who still may be affected by the  
1268 gaps in the system like Charles and like his wife Kira, then we  
1269 still have a problem.

1270 I want to say one thing about diversity in general and the  
1271 importance of how this issue shows up and the disparate outcomes  
1272 that many women of color experience as a result of the gaps in  
1273 the system. And I agree with the chairman we can't legislate  
1274 morality, but what we can do is ensure that we are tracking the  
1275 performance of the system, we are tracking those women that are  
1276 impacted disproportionately by the system, and that we are

**NEAL R. GROSS**

68

1277 intentional in designing interventions that will make a  
1278 difference.

1279           The gaps in the system don't just start though when women  
1280 show up in the hospital. They start well before then. We know  
1281 that for example to make sure that we have healthier babies it  
1282 doesn't just happen in the 9 months of pregnancy. And I am not  
1283 a physician. I am not an OB/GYN, but I think I have known that  
1284 in my own experience having had two babies and leading the March  
1285 of Dimes, which is the leading organization in the fight for the  
1286 health of moms and babies. The same is true for healthier  
1287 mothers. We have got to make sure that women have access to health  
1288 care before they are pregnant especially if they have chronic  
1289 diseases, chronic health challenges that might risk their health  
1290 or the health of their baby. We have got to make sure they have  
1291 access to good affordable care during pregnancy and what we know  
1292 now is that is important that women have access to excellent care  
1293 after.

1294           And it is especially important and we have had research and  
1295 studies to show that women of color also feel less trust and less  
1296 well-served by the system. They feel less listened to and  
1297 respected in terms of their symptoms when they articulate those  
1298 symptoms. And these are women that are not only low-income women

**NEAL R. GROSS**

69

1299 of color, these are women that are affluent women of color, women  
1300 that are highly educated who simply have reported -- and again  
1301 studies show this -- that their needs are not being met at the  
1302 same level at the same rate as white women and other women.

1303 So I just want to say that I think this issue of diversity  
1304 is really important not just in the panels but across the board  
1305 in listening to the issues of disparate outcomes that we see across  
1306 all communities.

1307 Mr. Cardenas. So best practices are something that we can  
1308 improve and hopefully will become more prolific so we can have  
1309 the outcomes that you just described. My time is limited, but  
1310 hopefully during the testimony some of you can talk about the  
1311 toolkits and how these toolkits are free.

1312 But a quick, quick question to Mr. Johnson is since you have  
1313 lost Kira, it has been 2 years, how has this affected you and  
1314 your family, if you could describe that for us, so we can  
1315 understand the true responsibility that we have and we can, we  
1316 can make sure that this happens less and less and less. Thank  
1317 you.

1318 Mr. Johnson. Well, you know, this has been the most  
1319 challenging experience that I could ever -- even more challenging  
1320 than anything that I could ever comprehend. That being said,

**NEAL R. GROSS**

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

70

1321 the true blessing in all of this is the two tremendous gifts that  
1322 Kira left us and that is my son Charles and my son Langston.  
1323 They really, truly are what keeps myself, my mother who is seated  
1324 behind me, all of us going. And, you know, it is difficult as  
1325 they mature and as they are, you know, now 2 and just turned 4  
1326 years old, their ability to process and understand the absence  
1327 of their mother evolves. And like I said, you know, when you  
1328 talk to a 2 year old he wants to know why his mommy is not coming  
1329 home. And you explain to him, well, your mother is in heaven  
1330 and she is doing important work with God. And he tells you, well,  
1331 I want to go to heaven too.

1332 And so there is nothing that I can prepare for, there is  
1333 nothing that I can do to fix that and I hope that over time that  
1334 -- you know, the heart is saying to just be completely honest  
1335 with you is I am proud to be here representing these families,  
1336 but at the end of the day I am just a father that whose heart  
1337 aches for his sons and a husband that misses his wife desperately.

1338 And so while there is every day I search for answers and how  
1339 to support these amazing gifts, what I am clear about is that  
1340 what I have to do is, although there is nothing I can do to bring  
1341 Kira back I have to do everything that I can whenever I can to  
1342 make sure that I send other mothers home with their babies.

**NEAL R. GROSS**

71

1343           And that if I can prevent another father from going through  
1344 this, if I can prevent another child from having to understand  
1345 why his mother isn't showing up at school -- and I will share  
1346 this with the committee. This is something that I have never  
1347 even shared with my family, is when a 3-year-old asks you, Daddy,  
1348 is Mommy mad at me? I want Mommy to come home. Why won't she  
1349 come home? And I have never shared that with anybody because  
1350 it is just too painful for me to articulate.

1351           But I am clear that the work that we are doing here is going  
1352 to prevent this to continue to happen to other women and it is  
1353 going to make sure that other women get to go home with their  
1354 babies.

1355           Mr. Cardenas. Mr. Chairman, if you will allow me a few  
1356 seconds to thank Mr. Johnson, my time has expired. Thank you  
1357 so much. Thank you for your courage, your strength, and your  
1358 commitment to community and to others and God bless you and your  
1359 family. And know that your wife is doing good work in heaven,  
1360 but you are doing tremendous work on earth. Thank you. I yield  
1361 back.

1362           Mr. Burgess. The chair thanks the gentleman. The  
1363 gentleman from California referenced the California Toolkit to  
1364 Transform Maternity Care. I did print off a copy of that and

72

1365 at the conclusion of the hearing I will ask unanimous consent  
1366 to make that as part of the record.

1367 The chair now recognizes the gentleman from Ohio, Mr. Latta,  
1368 5 minutes for your questions, please.

1369 Mr. Latta. Thank you very much, Mr. Chairman. And thanks  
1370 so much for our panel of witnesses and for being with us today  
1371 because it is so important for the work that you are doing in  
1372 getting this message out.

1373 Ms. Stewart, if I could start my questioning, I am also  
1374 concerned for soon-to-be mothers and new moms that live in our  
1375 rural areas of our country. The national data indicates that  
1376 more than half of all rural U.S. counties are without hospital  
1377 obstetric services. With an increase of women dying due to  
1378 pregnancy-related complications, how does access to care and  
1379 hospital services affect pregnancies and postpartum recovery and  
1380 is this issue exacerbated for women in our rural communities?

1381 Ms. Stewart. Thank you very much. It is a very serious  
1382 issue and thank you for the question. And as I mentioned in my  
1383 statement earlier, the March of Dimes is working currently on  
1384 a report that would really show this issue of maternity care  
1385 deserts. The issue of the closing of community hospitals in rural  
1386 areas has been well documented. One of the things that we are

**NEAL R. GROSS**

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

73

1387 missing is that it is not just the closing of hospitals. It is  
1388 the closing of hospitals compounded by the lack of obstetrical  
1389 services and OB/GYNs, the lack of midwives and doulas in areas,  
1390 the distance that women often have to travel just to receive care,  
1391 and it is particularly acute not just -- in rural areas there  
1392 is a major challenge, but one of the things we are looking at  
1393 is even where in urban areas there can be maternity care deserts  
1394 as well.

1395 I will give you a good example of this. Here in the District  
1396 of Columbia there is no hospital that provides obstetrical  
1397 services east of the river in Wards 7 and 8. So east of the  
1398 Anacostia River, tens of thousands of women who live there who  
1399 have no hospital to go to, who then have to travel. If they have  
1400 no transportation they have to go on the Metro often an hour or  
1401 more to even go to a prenatal visit. If you are a high-risk  
1402 pregnancy or you have a high-risk pregnancy, the complications  
1403 that are then exacerbated or the complications that can result  
1404 because of that distance, because that lack of access is increased  
1405 significantly.

1406 So one of the things that we really need to talk about in  
1407 the system is the fact that even in the District of Columbia,  
1408 for example, where there may be the number of beds may be

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

(202) 234-4433

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

74

1409 sufficient for the number of women, that doesn't mean that those  
1410 beds or that care is available to all the women that need it when  
1411 they need it, and that is a very significant problem.

1412 So I think one of the things that we are doing in the March  
1413 of Dimes is to try to work with our friends in health care, our  
1414 partners -- ACOG has been a longtime partner of ours -- working  
1415 with hospitals and others to make sure that services are  
1416 available.

1417 The last thing I will just mention is that because all these  
1418 issues that we are talking about today really just  
1419 disproportionately again impact women of color. Women of color,  
1420 African American women, are three to four times more likely to  
1421 die as a result of childbirth. We also need to look at other  
1422 ways in which services can be provided. We know that African  
1423 American women, for example, are far more likely to want to receive  
1424 services and care from a doula working within the formal  
1425 healthcare system. And we have got to make sure that those  
1426 services are also available so that women have places they can  
1427 go they can trust. They know they go to places that will listen  
1428 to them and that will respond to their needs and that will deal  
1429 with their situation if they have high-risk needs as well. And  
1430 what we are seeing today is that there are significant gaps in

**NEAL R. GROSS**

75

1431 rural areas as well as in urban areas too.

1432 Mr. Latta. Dr. Coslett-Charlton, you know, our country is  
1433 facing an opioid epidemic and especially in the state of Ohio  
1434 we are, unfortunately, about the third worst in the country.  
1435 And while Congress and especially this committee has done a lot  
1436 of work and we have passed a lot of bills trying to reverse this  
1437 devastation, I can't help but think of the pregnant women and  
1438 the new mothers who struggle with addiction.

1439 And how prevalent is opioid abuse in maternal deaths?

1440 Dr. Coslett-Charlton. Well, I would comment that it is very  
1441 significant and that is why it is so important that these maternal  
1442 mortality review committees include diverse members including  
1443 mental health professionals, substance abuse professionals and  
1444 I know when we established our panel in Pennsylvania it was  
1445 imperative that we had representatives from communities where  
1446 -- because that is a very significant issue and I know Philadelphia  
1447 has seen a large increase. That they have done a good job of  
1448 looking at their data, almost a doubling of maternal deaths over  
1449 a short period of time related directly to the opioid abuse  
1450 process.

1451 And, you know, ACOG really appreciates all of the work that  
1452 government is doing to make sure that -- pregnant women are a

**NEAL R. GROSS**

76

1453 special population that sometimes have different needs, so the  
1454 pregnant addicted mother, number one, it is a great population  
1455 to invest in because women that are pregnant that have opioid  
1456 use disorders are often motivated to get better. You have a  
1457 reason to get better. I mean, not that everybody doesn't, but  
1458 a pregnant woman is a special population.

1459           And the other thing that we have seen is that doing, not  
1460 only paying attention to different prescribing needs as we are  
1461 limiting prescriptions, I see in my state things like that to  
1462 make the special considerations for pregnant women that may have  
1463 difficulties with access and need and to make sure that they  
1464 continue on treatment during pregnancy and postpartum.

1465           The last thing is that there is special pilot projects that  
1466 are coming out of these committees looking at the special  
1467 population of pregnant women, and like soft landing centers where  
1468 we are not separating moms and babies, and, very importantly,  
1469 not making punitive decisions based on maternal care and that  
1470 because we know that women, the fear of losing their child or  
1471 going into a system are not going to seek prenatal care and how  
1472 imperative that is for the health of the woman and the child that  
1473 she is carrying. So those are all things that ACOG is working  
1474 very passionately on to try to improve the health care of women

**NEAL R. GROSS**

77

1475 related to opioid use disorder.

1476 Mr. Latta. Well, thank you very much. And, Mr. Chairman,  
1477 my time has expired and I yield back.

1478 Mr. Burgess. The chair thanks the gentleman. The  
1479 gentleman yields back. The chair recognizes the gentlelady from  
1480 Colorado, Ms. DeGette, 5 minutes for questions, please.

1481 Ms. DeGette. Thank you so much, Mr. Chairman, and I want  
1482 to thank all of our witnesses, but especially you, Mr. Johnson.

1483 I just can't even imagine what it must be like raising those  
1484 two boys and I am glad your mom is here to help you. But, you  
1485 know, I want to come over and help myself, but I am not sure what  
1486 I -- and I think probably most of us feel that way if there is  
1487 anything we can do.

1488 I think the first thing we can do is pass this bill. And  
1489 I have been working with my co-sponsor, Representative Herrera  
1490 Beutler to try to get this bill passed by the end of the year  
1491 and I think your testimony is what will bring us over the line.

1492 So if, you know, people wonder, does it make a difference that  
1493 answer would be yes, so thank you.

1494 I want to ask you -- am I pronouncing it correctly, Crear  
1495 Perry? Crear Perry, okay. I want to ask you, Doctor, according  
1496 to the CDC, the nation's maternal mortality rate rose by 26 percent

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

78

1497 between 2000 and 2014; is that correct?

1498 Dr. Perry. Yes.

1499 Ms. DeGette. One of the most striking aspects that I have  
1500 been researching of this uptake is that African American women  
1501 are nearly four times as likely to experience a pregnancy-related  
1502 death than other women; is that right?

1503 Dr. Perry. It is. In some places it is higher.

1504 Ms. DeGette. It is higher in some places?

1505 Dr. Perry. Yes. In New York City it was 12 to 1.

1506 Ms. DeGette. Wow. And can you explain to me why this is?  
1507 But it goes across --

1508 Dr. Perry. It does.

1509 Ms. DeGette. -- socioeconomic lines, which is stunning.  
1510 Can you explain a little bit about that for me?

1511 Dr. Perry. Well, and I think, for me, Charles' story really  
1512 reflects this idea, right.

1513 Ms. DeGette. Yes.

1514 Dr. Perry. Like in general in the United States we have  
1515 not really grasped the idea that women, when they are pregnant,  
1516 are special populations and it is important that we value them.

1517 So to have someone in the hospital for a long time without  
1518 evaluating them, it means there is a fundamental lack of valuing

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

79

1519 them as a person and wanting to come and check on them. And saying  
1520 she is not a priority right now and what we don't do when we just  
1521 look individually at the doctor, it wasn't just the doctor. So  
1522 a lawsuit, when you have an entire system and a structure --

1523 Ms. DeGette. Just the whole hospital.

1524 Dr. Perry. And it is the whole structure. So how do we  
1525 get to a space where black women and women in general, right?

1526 Because the reason that the gap is high in New York and not in  
1527 Texas is because white women in Texas are dying. So it is not  
1528 so much that black women are doing so great in Texas, so in general  
1529 across this country.

1530 Ms. DeGette. There is just fewer of them.

1531 Dr. Perry. Right, exactly. So across this country we don't  
1532 value women. We don't have paid leave. We have to go back to  
1533 work really quick, but we don't have child care so all those things  
1534 impact our ability to have a healthy pregnancy. So how we then  
1535 get into the hospital and need to rush out or if someone is doing  
1536 a fast, something quickly, it makes it more difficult for us to  
1537 live. So that happens really acutely for women of color and so  
1538 you see that impact of implicit bias.

1539 So what you can legislate is rules around training on  
1540 implicit bias. What you can legislate is accountability for the

80

1541 entire system to look at every death and make sure that all the  
1542 structures that they need to have in place are put there so there  
1543 is not just one individual nurse or doctor but it is the entire  
1544 structure.

1545 Ms. DeGette. Yes, yes.

1546 And Ms. Stewart, many nations have actually been able to  
1547 cut the rate of maternal mortality in half. I talked about that  
1548 in my opening statement. I wonder if you can give us some ways  
1549 that they have been able to do that, that we can model our own  
1550 behavior on in the U.S.

1551 Ms. Stewart. Well, in many of those countries,  
1552 Congresswoman, all of the outcomes relative to moms and babies  
1553 are far better than they are here in the U.S. So one the things  
1554 about what is going on here in the United States is we are focusing  
1555 on maternal mortality today as we should and maternal morbidity  
1556 as we should. But if you look at all the outcomes around moms  
1557 and babies, whether it is around premature birth, infant  
1558 mortality, our outcomes are far worse than many other, most other  
1559 developed countries in the world.

1560 Ms. DeGette. And many underdeveloped countries too.

1561 Ms. Stewart. And some in many underdeveloped, emerging  
1562 countries. I mentioned in my opening statement our maternal

81

1563 mortality rates are worse than even countries like Slovenia and

1564 --

1565 Ms. DeGette. So what are some of the things these countries  
1566 have done?

1567 Ms. Stewart. So I think it starts at the highest level of  
1568 a policy environment and an environment that respects and cares  
1569 for and prioritizes women and women's health and women and babies.

1570 So when you look at certain countries, Scandinavian countries  
1571 for example, there are a range of policies that are far more  
1572 supportive of women having a healthier lifestyle before being  
1573 pregnant, having healthier pregnancies, and then having the kind  
1574 of support even after pregnancy to make sure that they recover  
1575 from their pregnancies well, that they feel supported, that they  
1576 don't feel overwhelmed.

1577 And we know the issues of stress in this country. Chronic  
1578 stress, for example, can have a devastating impact on the health  
1579 of women and the health of moms that impact not only them but  
1580 their babies as well. So I think it starts with making sure that  
1581 women have the healthcare coverage that they need, have access  
1582 to the care we need. We have talked about that. Half of the  
1583 pregnancies in this country are covered by Medicaid. We need  
1584 to make sure that all women have the kind of coverage they need.

**NEAL R. GROSS**

82

1585 We need to make sure there are services in their communities  
1586 that are accessible as we mentioned earlier around the deserts  
1587 that exist.

1588 And then I think we need to make sure that postpartum,  
1589 Medicaid doesn't stop within 60 days of delivering the baby.  
1590 That it extends so that moms have the kind of care and health  
1591 care and support that they need even as they recover from their  
1592 pregnancies.

1593 Ms. DeGette. Thank you. Thank you so much. I yield back,  
1594 Mr. Chairman. Thanks to all of you.

1595 Mr. Burgess. The chair thanks the gentlelady. The chair  
1596 recognizes the gentleman from Virginia, Mr. Griffith, 5 minutes  
1597 for your questions, please.

1598 Mr. Griffith. Thank you very much, Mr. Chairman, and I thank  
1599 our panelists for being here.

1600 Mr. Johnson, I am just so sorry. Nobody should have to go  
1601 through that. And of course I am sitting there while you are  
1602 testifying thinking about my wife, her C-section with my first  
1603 son. So I am very, very sorry. And as Ms. DeGette said, if there  
1604 is anything that we can do I am sure we would try including passing  
1605 this bill.

1606 So here is a question for you all. I like the bill, and

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

(202) 234-4433

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

83

1607 I like the bill because it will have us looking at it from a  
1608 national perspective. If we just do it on a state perspective  
1609 it may not work. Because I represent the corner of Virginia that  
1610 is outside Appalachia and the Allegheny Highlands and so, you  
1611 know, I border four states.

1612 The Bristol Herald-Courier did a series of articles last  
1613 year on neonatal abstinence syndrome because we have a high number  
1614 at the hospital in Tennessee, but those are my constituents even  
1615 though they are going to a hospital in Tennessee. I believe that  
1616 hospital serves at least three states. And so if you are looking  
1617 at it from a state perspective, Virginia is going to look a whole  
1618 lot better on substance abuse and other things than Ohio. But  
1619 if you compare Ohio just with my section of the state, we are  
1620 probably in pretty good similarity. We are in sync along with  
1621 West Virginia because we have similar problems and similar  
1622 backgrounds. And I have got to have some of the deserts on your  
1623 map because I have an area that two of my counties have lost their  
1624 hospitals.

1625 And so, you know, I want to see this data from a regional  
1626 perspective not just a state perspective because my part of  
1627 Virginia is not like Arlington or even Virginia Beach or Richmond.  
1628 It is completely different and if you are just looking at it

**NEAL R. GROSS**

84

1629 from a state perspective you get a skewed picture from my region.

1630 So I like the bill.

1631 So then the questions become, you know, do we overload the  
1632 bill, and you don't want to do that. Sometimes you can put too  
1633 much on it. Do we overload it by trying to include prenatal and  
1634 neonatal care into the study? If we don't and if Ms. Beutler  
1635 is in agreement, I would say expand it. If it is going to overload  
1636 it and we might not get it passed by the end of the year, let's  
1637 get this one passed and do something else.

1638 But how, Ms. Stewart, how do we fix it? I mean I am a big  
1639 advocate of telemedicine. Obviously can't deliver the baby by  
1640 telemedicine, but maybe some prenatal or pre-birth care, some  
1641 neonatal care could be done that way. What do you think of that?

1642 Ms. Stewart. Yes. Actually, we think the prospects of  
1643 telemedicine especially for prenatal care can be very exciting  
1644 and very productive. There have been several studies to show  
1645 that rural, women in rural areas, in urban areas, low-income women  
1646 are very comfortable actually receiving care. And we also know  
1647 that in the postpartum, we have some programs going on right now  
1648 in the postpartum stages where uploading data, checking, taking  
1649 blood pressure at home, uploading that data has actually reduced  
1650 maternal deaths significantly in places like Philadelphia and

**NEAL R. GROSS**

85

1651 can do the same in rural areas.

1652           So we think the aspect of telemedicine in this space can  
1653 be extremely helpful to overcome some of the gaps and barriers  
1654 that we have. You know, I will say that we, for sure, believe  
1655 very strongly that this area and the period of time postpartum  
1656 is the most critical period for this bill and for these issues  
1657 that we are talking about. So whatever we can do to make sure  
1658 that women have the care they need during that period.

1659           We are measuring maternal deaths up to a year, so we need  
1660 to make sure that women have the support they need after the baby.

1661           We are so, we are rightfully so, and we still need to focus  
1662 prenatal, but what we are talking about now is the care postpartum  
1663 that is now so critical and is contributing to so many of these  
1664 deaths. So thank you for raising these issues.

1665           Mr. Griffith. Thank you all for being here. You know, I  
1666 think as technology moves forward we may have different answers,  
1667 but I do think we have to embrace everything we can for those  
1668 areas that are underserved or have deserts as you call it. And  
1669 I appreciate you all being here. Thank you all so much for what  
1670 you do and I yield back.

1671           Mr. Burgess. The chair thanks the gentleman. The  
1672 gentleman yields back. The chair recognizes the gentlelady from

86

1673 Florida, Ms. Castor, 5 minutes for questions, please.

1674 Ms. Castor. Well, thank you, Mr. Chairman, for holding this  
1675 very important hearing on maternal mortality. And I really want  
1676 to thank my colleague, Diana DeGette, and Congresswoman Herrera  
1677 Beutler, for their work on the Preventing Maternal Deaths Act.

1678 And thank you to all of the witnesses who, you all have all devoted  
1679 your careers to this, and Mr. Johnson, I take your story to heart  
1680 especially.

1681 This is a long overdue hearing and I do hope that this is  
1682 just a start on an important focus on policy regarding maternal  
1683 health because I don't believe that most people in the United  
1684 States of America today understand that we are not doing so well.

1685 That women in the United States are more likely to die from  
1686 childbirth or pregnancy-related causes than women in other parts  
1687 of the developed world. That is not acceptable and the racial  
1688 disparities are particularly disturbing. In Florida, we have  
1689 our Pregnancy-Associated Mortality Review committee. In Tampa  
1690 we are home to at the University of South Florida, the Lawton  
1691 and Rhea Chiles Center for Healthy Mothers and Babies, and I have  
1692 some wonderful experts there who help me. They have shared with  
1693 me the latest Florida pregnancy-related mortality rates.

1694 Since 1999, Florida's pregnancy-related mortality rate has

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

87

1695 been flat with no significant trend. How can that be that since  
1696 1999 things have not gotten better? I just, I think that is  
1697 outrageous. The committee found that hemorrhage-related deaths  
1698 are the leading cause of pregnancy-related deaths in Florida by  
1699 far. And of course we know that more than half of these deaths  
1700 are preventable. Florida's most recent review committee has the  
1701 statistics for 2016. They have identified 157  
1702 pregnancy-associated deaths, 21 died during the postpartum  
1703 period. That has been the focus of many of your remarks.

1704 Dr. Coslett-Charlton, I understand in May that ACOG released  
1705 a number of recommendations on ways to optimize postpartum care  
1706 for mothers including that new moms should have contact with their  
1707 OB/GYN or other obstetric care provider within 3 weeks postpartum  
1708 in a comprehensive, postpartum visit no later than 12 weeks after  
1709 birth. Why is focusing on that fourth trimester or postpartum  
1710 period important for the health of new moms and what are the  
1711 barriers? We talked a little bit about it, but let's go into  
1712 greater detail. What are the barriers that you and your  
1713 colleagues see to prioritizing the fourth trimester?  
1714 Transportation, child care -- give us a little update on that.

1715 Dr. Coslett-Charlton. So that is a wonderful question and  
1716 that is one of the exciting things that ACOG has developed, like

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

88

1717 you said, over the past several months is reevaluating the fourth  
1718 trimester or postpartum care. And we know that when we look at  
1719 preventable deaths that about half of those preventable deaths  
1720 occur within that year within delivery.

1721 So it is really important that we continue to engage patients  
1722 on the importance of postpartum care and also reduce those  
1723 barriers that you are discussing. Number one being access,  
1724 number two being, you know, in Pennsylvania I am fortunate to  
1725 practice in a state that I did residency and medical school and  
1726 practice in Pennsylvania, and in Pennsylvania when you are  
1727 pregnant you are covered. And I cannot imagine a woman not being  
1728 covered during pregnancy. But that coverage for Medicaid  
1729 patients ends at 6 weeks postpartum and we know that things can  
1730 happen afterwards. And it isn't just the issues with --  
1731 I have had plenty of women have preeclampsia or hypertensive  
1732 disorders that need very close follow up. I have seen women seize  
1733 6 weeks after delivery in the emergency room related to  
1734 preeclampsia. So those identification of patients that are at  
1735 risk, number one. Number two, having important communications  
1736 in a manner such as telemedicine within the first several weeks  
1737 after delivery and especially in high-risk patients is critical.

1738 And also, you know, we talk a lot about postpartum depression

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

89

1739 and mental health disorders and how important it is that we screen  
1740 women adequately and continue screening and keeping them within  
1741 that period and also educating patients of the importance of the  
1742 postpartum period. And we think that that might come during the  
1743 prenatal period and that we need to do work to emphasize the  
1744 importance of postpartum to women when they are having their  
1745 babies because, you know, I am a mother of four children.

1746 I don't think I -- I am embarrassed to say it. I don't know  
1747 if I went back for a postpartum visit. I know I am an obstetrician  
1748 and I know that, you know, are privy to knowing the signs, but  
1749 I was caring for children and having important maternal and  
1750 parental leave, it is very important having the transportation.

1751 So there are so many policy things that are exciting and that,  
1752 you know, going forward hopefully we can look to all of you to  
1753 make those favorable changes a reality.

1754 Ms. Castor. Yes. One of the major gaps I see in my state  
1755 and other states, Florida is one of -- in the minority of states  
1756 that did not expand Medicaid. And I worry about the continuity  
1757 of care for young families, for young women especially if they  
1758 are not taking care of themselves early on and then they reach  
1759 a gap after they have their baby. Has Medicaid been expanded  
1760 long enough for there to be any studies on the differences on

90

1761 maternal mortality in states that have expanded Medicaid and  
1762 states that have not, do you all know?

1763 Dr. Perry. I know for health in general, but not  
1764 specifically maternal mortality and that is why this bill will  
1765 be really helpful for us to be able to drill down on more details  
1766 on maternal mortality.

1767 Ms. Castor. Thank you very much and I yield back.

1768 Mr. Griffith. [Presiding.] The gentlelady yields back.  
1769 The gentleman from Missouri, Mr. Long, is recognized for 5  
1770 minutes.

1771 Mr. Long. Thank you, Mr. Chairman. And I have heard a lot  
1772 of testimony over my years on the committee here and, Mr. Johnson,  
1773 I don't know that I have ever heard any more heartfelt or any  
1774 more important testimony that what we heard from you here today.

1775 So thank you for being here and I know it is hard to do, and  
1776 but hopefully your voice will add a voice and will garner more  
1777 attention to this, so thank you for being here.

1778 A quick question for you, your first son, was that -- I  
1779 understand that was a C-section also?

1780 Mr. Johnson. Yes, sir. That was a C-section.

1781 Mr. Long. Was that a planned C-section like the next one  
1782 or an emergency?

**NEAL R. GROSS**

91

1783 Mr. Johnson. No, that was not. So that was an emergency  
1784 C-section so we went in for, we didn't expect it and so that was  
1785 part of the reason that the C-section was recommended during the  
1786 delivery of Langston, our second son.

1787 Mr. Long. Okay, okay. Because I am curious, but yes, I  
1788 am a little familiar with the emergency part of that situation,  
1789 so yes.

1790 Ms. Stewart, I just want to thank you for what you do at  
1791 March of Dimes and the big event you hold every year here in  
1792 Washington, D.C. The cook-off I call it. What is the official  
1793 name of it?

1794 Ms. Stewart. It is called a Gourmet Gala.

1795 Mr. Long. That is what I was going to say if you hadn't  
1796 interrupted me.

1797 Ms. Stewart. It is a lot of good food there.

1798 Mr. Long. Gourmet Gala.

1799 Ms. Stewart. Gourmet Gala.

1800 Mr. Long. It is a dandy and it raises a lot of money every  
1801 year for March of Dimes and I appreciate that.

1802 Ms. Stewart. Absolutely. And we appreciate all of your  
1803 support for that. Thank you.

1804 Mr. Long. Right. Dr. Coslett-Charlton, as you note, only

92

1805 33 states have a maternal mortality review committee, many of  
1806 which are newly created. Could you talk about the important role  
1807 the Centers for Disease Control and Prevention is giving technical  
1808 assistance to states to either help them establish MMRCs or ensure  
1809 that they are operating effectively and getting appropriate data?

1810 Dr. Coslett-Charlton. I would be happy to speak of that.

1811 As the state that has a very newly formed committee, I mentioned  
1812 earlier that our MMRC is meeting for the first time at the end  
1813 of October and I am very excited to see the outcomes of our getting  
1814 together and being able to collect this data effectively. The  
1815 CDC Foundation has actually reached out to us and has been integral  
1816 in not only determining the makeup of the committee and working  
1817 well with our Department of Health and members on the committee,  
1818 but also ensuring again standardization and by knowing best  
1819 practices from other states. So having that cooperation is  
1820 essential.

1821 The other thing is that through the CDC there is data  
1822 collecting tools, the MMRIA, collecting tools which will  
1823 standardize the reporting part of the MMRCs so that we would be  
1824 able, you know, if the reports are looking different from every  
1825 state it is a difficult task to try to come to a consensus. So  
1826 we keep talking about the importance of making sure we keep

93

1827 standardization and the support through the CDC with the MMRIA  
1828 application is an excellent example of that.

1829 Mr. Long. Okay. In your testimony you discuss  
1830 Pennsylvania's efforts to establish MMRC this year. What has  
1831 been your experience so far in getting it up and running?

1832 Dr. Coslett-Charlton. Well, fortunately we have an  
1833 extremely supportive Department of Health for this issue and some  
1834 of it has been, you know, similar to our efforts here is  
1835 recognizing that there is a problem. And some of the national  
1836 attention to the problem has really given some interest to members  
1837 that have been very interested in participating in this bill.

1838 Our bill was supported unanimously -- House, Senate, and  
1839 by the Governor's Office. So this was an easy ask at this time,  
1840 but it really, it was more momentum initiative and a lot of the  
1841 reports coming out that this truly is a problem that, you know,  
1842 opened the eyes of many and we realized that we need to tackle  
1843 this. And it is not a hard thing to tackle if you do it the right  
1844 way and there are best practices already established.

1845 Mr. Long. And getting data on why pregnancy-related deaths  
1846 are happening is essential of course, but what can we do to improve  
1847 outcomes once we receive that data and can you talk about the  
1848 role MMRCs have once that data is collected?

**NEAL R. GROSS**

94

1849 Dr. Coslett-Charlton. So some of collecting the data is  
1850 important so that we can use it to see where it needs not only  
1851 nationally but also in communities. And we talk about these  
1852 perinatal collaboratives that, you know, the CDC and the national  
1853 effort to collect data will be the mothership and hopefully we  
1854 will be able to send out the tentacles to go out in the communities  
1855 and find where there is deficiencies and where there is  
1856 disparities and do better to be able to connect patients and meet  
1857 those needs and to hopefully a realization where access really  
1858 is an issue.

1859 Maternity care is difficult to deliver and, you know, we  
1860 talk even about Philadelphia that has closed half of its maternity  
1861 hospitals in the past decade. The only hospitals that are  
1862 delivering right now are university institutions because a lot  
1863 of hospitals find the reimbursement not adequate for the care  
1864 and liability exposure and a multitude of things which is not  
1865 for the conversation here.

1866 But we -- it is really important that we are able to identify  
1867 where these deserts are -- I think that is wonderful -- in care  
1868 and be able to improve upon that.

1869 Mr. Long. Okay, thank you. And once again thank you all  
1870 very much for being here. I appreciate your time in taking time

95

1871 out of your day and week to come up here and testify. And, Mr.  
1872 Chairman, I yield back.

1873 Mr. Burgess. The gentleman yields back. The chair thanks  
1874 the gentleman. The chair recognizes the gentlelady from  
1875 Illinois, Ms. Schakowsky, 5 minutes for questions, please.

1876 Ms. Schakowsky. Thank you. I want to join my colleagues  
1877 who have thanked you so much for this, all of you. I want to  
1878 thank you, Mr. Johnson, for turning this tragedy into something  
1879 positive. It took a lot of courage and probably a lot of time  
1880 away from being a dad. And so I just want to express my  
1881 appreciation to all of you and just mention that in particular.

1882 I think that the WHO and the CDC reports, et cetera, were  
1883 really a wake-up call for people. I have been aware of  
1884 communities near me, in Milwaukee for example, where we have seen  
1885 this rise in maternal mortality, infant mortality as well, and  
1886 it has really been unacceptable that we in a country, the richest  
1887 country in the world, would see these kinds of results. It is  
1888 really, it is absolutely shameful. So I wanted to -- and  
1889 I think there is a lot of ways that we are failing mothers and  
1890 children, especially African American women who are three to four  
1891 times more likely to die from childbirth. We just simply have  
1892 to do better. But I am concerned about the new proposals, the

**NEAL R. GROSS**

96

1893 Trump Public Charge Rule that puts maternal and infant health  
1894 in grave danger. By targeting legal taxpaying immigrants in this  
1895 country, this rule seeks to discourage immigrants from using the  
1896 government services that pay for -- that are paid for with their  
1897 tax dollars -- Medicaid, CHIP, SNAP, WIC, and the Earned Income  
1898 Tax Credit, just to name a few.

1899 So let me ask Dr. Coslett-Charlton and Dr. Crear Perry, women  
1900 who qualify for Medicaid that would cover pregnancy care and labor  
1901 and delivery may face the impossible choice of jeopardizing their  
1902 legal immigration status in this country or go without needed  
1903 care. And let me just add that right now in my very diverse  
1904 district, we are finding that people who qualify are not signing  
1905 up for benefits, right now, because they are so fearful. So if  
1906 women are forced to go without needed prenatal care, what could  
1907 that mean to her health and risk of maternal mortality?

1908 Dr. Perry. So it is an opportunity for us to use the same  
1909 empathy we have when we talked earlier about with the opioid  
1910 addiction moment we are having where we don't want to criminalize  
1911 moms who are addicted to opioids so we ensure that they have access  
1912 to health care. If we criminalize women for using SNAP or  
1913 Medicaid, we are also harming their ability to have a healthy  
1914 pregnancy.

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

97

1915           So we should be able to use that same feeling of empathy  
1916 for all mothers that everyone who is in the United States deserves  
1917 to have a healthy pregnancy and a healthy baby and so how do we  
1918 make sure that they don't miss their prenatal care? For example,  
1919 in Louisiana we didn't for a long time cover immigrant mothers  
1920 and after Katrina it was a big push of new immigrants.

1921           Ms. Schakowsky. This is even legal.

1922           Dr. Perry. Yes. And so we had to add that to the bill when  
1923 we got more citizens coming because it was important for us to  
1924 ensure that the babies had access and the babies had care. We  
1925 saw an uptick in baby --

1926           Ms. Schakowsky. But this would prohibit even citizen  
1927 children of those parents from getting the benefits.

1928           Dr. Perry. Right. So we have to think about what are value  
1929 is, right, so if we don't value citizen children, what do we value?

1930           If we don't think it is important for them to have treatment  
1931 from a physician then what are we asking for as a country. So  
1932 it is just we have to think about our own values as a country.

1933           Ms. Schakowsky. I agree.

1934           Yes, Doctor.

1935           Dr. Coslett-Charlton. And I would just like to add, ACOG  
1936 strongly opposes any efforts to provide any barriers to any kind

98

1937 of care for pregnant women and postpartum and prenatal, and this  
1938 rule obviously would do such. So and as a practitioner too, you  
1939 know, the woman is going to deliver the baby no matter what, so  
1940 she is going to deliver. You can't -- no matter what she is going  
1941 to deliver. And, you know, it is common sense that she needs  
1942 prenatal care or, you know, for fear of having rising morbidities  
1943 and mortalities related to this.

1944 Ms. Schakowsky. Yes, go ahead.

1945 Ms. Stewart. I was going to say, Congresswoman, we have  
1946 made a strong statement against that Public Charge Rule as well.

1947 Ms. Schakowsky. Thank you. And I yield back. Thank you  
1948 so much, all of you.

1949 Mr. Burgess. The chair thanks the gentlelady. The  
1950 gentlelady yields back. The chair recognizes the gentleman from  
1951 Florida, Mr. Bilirakis, 5 minutes for your questions, please.

1952 Mr. Bilirakis. Thank you, Mr. Chairman. I appreciate it.  
1953 Thanks for holding this very important hearing.

1954 Ms. Stewart, as a parent I remember the birth of my children  
1955 was such a joyful event. The idea that rates of maternal  
1956 mortality are on the rise is horrifying as far as I am concerned.

1957 In our state it is on the rise. I read that women are dying  
1958 from hemorrhage complications in the state of Florida. How does

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

99

1959 the Preventing Maternal Deaths Act help reverse the trend of women  
1960 who are losing their lives to these typical medical complications?

1961 Ms. Stewart. Well, I will defer to my medical colleagues  
1962 to describe the issues around hemorrhage and how it is  
1963 contributing, but I will say that what this bill is designed to  
1964 do is to establish across the country maternal mortality review  
1965 committees that are designed to collect data on every maternal  
1966 death and to make sure that every state understands the underlying  
1967 causes of death for each woman that dies as a result of childbirth.

1968 But even beyond that what it is designed to do is to not  
1969 just collect the data but to help states and to help the  
1970 participants and the healthcare system design interventions that  
1971 can actually eliminate deaths in the future. And that is one  
1972 of the things that is really important about this bill is not  
1973 only collecting the data, but then designing interventions.

1974 And of course if we collect data consistently across the  
1975 country and if the sharing of interventions can also be shared  
1976 we can certainly accelerate our ability to reduce and even  
1977 eliminate maternal deaths. I will give you a couple of examples  
1978 of how collecting data in MMRCs has been really helpful.

1979 In Colorado, for example, data was collected and what was  
1980 found is that women that experienced maternal death had also been

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

100

1981 experiencing suicide and depression and they were, in Colorado,  
1982 able to find and identify where there were gaps in mental health  
1983 services and actually close those gaps and give more mental  
1984 healthcare services to women where they needed it.

1985 In Ohio, they actually did something, which I think is really  
1986 important, which is do additional training for hospital staff  
1987 beyond just the doctors themselves, hospital staff where they  
1988 went through simulations of training in obstetrical emergency  
1989 situations so that they could actually be more responsive in the  
1990 event of an emergency situation. So MMRCs are not only about  
1991 collecting the data, but actually putting into action the things  
1992 that can actually eliminate maternal deaths. And that is why  
1993 this bill is so important and that is why a national bill and  
1994 a national effort is also so important, so the data can be  
1995 consistent, can be collected, we can see the data, we can actually  
1996 track the interventions more successfully.

1997 Mr. Bilirakis. Thank you very much for that answer.

1998 Dr. Coslett-Charlton, according to the Centers for Disease  
1999 Control and Prevention, it lists indicators. Severe maternal  
2000 morbidity has steadily been increasing in the years. What are  
2001 the key drivers of this increase and how can it be addressed?

2002 Dr. Coslett-Charlton. Well, some things are recognizing

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

(202) 234-4433

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

101

2003 and be able to maintain proper prenatal care and care of women  
2004 throughout their reproductive years and identifying  
2005 comorbidities such as, you know, we talk about obesity and smoking  
2006 cessation and where we see a rise in comorbidities with heart  
2007 disease. So having active interventions before a pregnancy we  
2008 find is critical to having a healthy labor and delivery for all  
2009 women.

2010 Mr. Bilirakis. So you feel that they are increasing. I  
2011 mean, in this day and age with all the technology we have or is  
2012 it just that we are getting more data on this or there definitely  
2013 are increases in maternal deaths?

2014 Dr. Coslett-Charlton. Well, so far that is part of the  
2015 purpose of this review is so that we were talking earlier about  
2016 the accuracy of the data. So some speculation has been made that  
2017 perhaps because for the past 5 years we were actually recording  
2018 on death certificates whether or not a woman was pregnant when  
2019 she died, or within a year after delivery whether or not that  
2020 has caused a rise in the actual numbers that we are seeing. But  
2021 when comparing to other countries that have had similar checkboxes  
2022 on their certificates where they have seen a stabilization or  
2023 a decrease, we have actually seen an increase.

2024 So these committees are really imperative to really, exactly

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

102

2025 what you are saying, really know and be able to assess and  
2026 accurately determine if those disease entities as well as, you  
2027 know, maternal death if there is a change and make sure that we  
2028 have accurate data so that we can successfully, you know, portray  
2029 appropriate interventions.

2030 Mr. Bilirakis. Yes, exactly. So, you know, whether it is  
2031 increasing or what have you, we have to focus on the issue. There  
2032 is no question.

2033 And, Dr. Johnson, you have my sympathies. I was in the VA  
2034 Committee so I didn't get a chance to hear your testimony, but  
2035 I know how difficult it must be for you.

2036 Let's see, Dr. Crear Perry, please, our maternal mortality  
2037 data has been described again as limited, unreliable, and even  
2038 embarrassing by top researchers. Do you agree with these  
2039 characterizations? And I know, let's expand upon this. Are  
2040 there concerns with the research community regarding the  
2041 integrity of the data being collected in states? What are those  
2042 concerns and how might they be addressed federally?

2043 Dr. Perry. That is me. That is okay. Hi.

2044 Mr. Bilirakis. Oh, you are over here. I am sorry.

2045 Dr. Perry. And so it is important, Dave Goodman and the  
2046 folks at CDC are doing a great job of doing the data. They have

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

(202) 234-4433

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

103

2047 been doing it for a very long time. They have dedicated their  
2048 life to it. And they have looked at if the increase is due to  
2049 error in data versus if it is an increase, that is true, and all  
2050 the studies so far have come back saying no, there is an increase  
2051 and it is from the data.

2052 And so the robustness with which the CDC is working on to  
2053 look at this issue is something that we should all value. And  
2054 if they are part of this bill, they are not here testifying, but  
2055 CDC is a really integral to getting this work done and it is  
2056 important that we understand that they are -- that yes, there  
2057 have been researchers that have given us pushback around the data  
2058 over the years, but we have gotten better and better and this  
2059 is just another way to get even more clear about how women are  
2060 dying, because beginning at a granular level and look at the  
2061 hospital level what is happening.

2062 So yes, it has been -- there have been a lot of articles  
2063 about the data, but we truly know through the CDC that the rates  
2064 are increasing and that we can do something together to do it  
2065 better with this bill.

2066 Mr. Bilirakis. Very good. Thank you and I yield back, Mr.  
2067 Chairman.

2068 Mr. Burgess. The chair thanks the gentleman and the

104

2069 gentleman yields back.

2070           The chair would just make the observation that I believe  
2071 it was Dr. Callaghan from the CDC who came and spoke at one of  
2072 our roundtables about a year ago. And you are correct. They  
2073 are very thorough and they have been at this for a long time.  
2074 They have a lot of good insights.

2075           The chair recognizes the gentleman from Massachusetts, Mr.  
2076 Kennedy, 5 minutes for your questions, please.

2077           Mr. Kennedy. Thank you, Mr. Chairman. I want to also thank  
2078 you for your, obviously lifelong and personal dedication to this  
2079 issue given your profession before coming to Congress and still  
2080 the work that you do. I want to also thank Representative Herrera  
2081 Beutler who was here earlier and obviously our distinguished panel  
2082 for joining us.

2083           Dr. Johnson -- Mr. Johnson, excuse me. I will apologize.  
2084 I have been in and out. Your words are extremely powerful, sir.  
2085 Kira sounds like quite a woman. I have two kids under 3. I  
2086 was in a delivery room about 9 months ago. Thoughts are with  
2087 you and your family, sir.

2088           In 2018, the United States of America has the highest rate  
2089 of maternal deaths in the developed world. Every single year  
2090 we mourn roughly 700 mothers who are lost to complications during

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

105

2091 their pregnancy, and at least 350 of those deaths are preventable.

2092 Most alarmingly, profound racial disparities exist in these  
2093 statistics. Black women today are three to four times more likely  
2094 to die of pregnancy or delivery complications than white women.

2095 Before we try to explain that away on socioeconomic terms,  
2096 just access to care, access to education, and higher income, we  
2097 have to be clear that even when you control for those factors  
2098 a wealthy black woman with an advanced degree is still more likely  
2099 to die or to have a baby die than a poor white woman without a  
2100 high school diploma. In the United States, a black woman is 22  
2101 percent more likely to die from heart disease than a white woman,  
2102 71 percent more likely to die from cervical cancer. Those are  
2103 haunting statistics, but they still pale in comparison to the  
2104 one we discussed here today, for black women are 243 percent more  
2105 likely to die from pregnancy or childbirth-related causes, 243  
2106 percent. So we can't have a discussion about how to address a  
2107 larger crisis in maternal mortality without having a discussion  
2108 about how to confront the pervasive, systemic inequities that  
2109 are buried deep within our system of health care in America.

2110 And the last point I have to make is this, that there are,  
2111 as we speak, 20 Republican Attorneys General that are attempting  
2112 to repeal the Affordable Care Act in our court system after most

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

106

2113 of my Republican colleagues have voted to do the very same thing  
2114 more times than I can count. So let's remember 9.5 million.  
2115 That is the number of previously uninsured women that gained  
2116 healthcare coverage including maternity care which is an  
2117 essential health benefit under the Affordable Care Act. Coverage  
2118 for women of color grew at more the twice the rate of women overall  
2119 in 2013 to 2015. So to have a conversation about maternal  
2120 mortality at a time when my Republican colleagues are using every  
2121 tool in the book to roll back access to guaranteed maternal care  
2122 and maternal coverage is a bit much.

2123 And with that I want to direct my questions to Dr. Crear  
2124 Perry and by the work that you have done, Doctor, in discussing  
2125 how we need to move away from seeing race as a risk factor in  
2126 maternal health and call the real risk factor what it is, racism.

2127 So can you extrapolate that a bit for the committee and,  
2128 specifically, what do you believe to be the leading cause of those  
2129 racial disparities I mentioned in maternal mortality rates?

2130 Dr. Perry. So we have done quite a bit of focus groups and  
2131 work in hospitals around how patients feel disrespected and not  
2132 heard and not listened to and not valued. And, you know, a great  
2133 example of that is Serena Williams, right. She gives an amazing  
2134 story around how she had symptoms. She knew who she was. She

**NEAL R. GROSS**

107

2135 is a very wealthy and healthy person as well and she still was  
2136 not heard or valued.

2137 So what we miss in this country is really being honest about  
2138 when you don't see someone as being fully equal to you, you are  
2139 less likely to think about their care in a very serious manner.

2140 You are less likely to address their issues in a serious manner,  
2141 and you are less likely to spend the time that they need ensuring  
2142 that they are healthy.

2143 And so what we have to be able to do is have some truth around  
2144 that conversation first and not act as if that is not a true --

2145 Mr. Kennedy. And so is there data that you would point to  
2146 on this or is this something that is a bit bigger than fits into  
2147 an Excel spreadsheet and a pie chart and how --

2148 Dr. Perry. This is going to be both a policy fix and a  
2149 cultural shift, right. Like we have had policy shifts. We have  
2150 had the civil rights movement, we have had -- we have a lot of  
2151 things of policy we can have, but as long as the culture still  
2152 believes that black people are less valuable or inferior, and  
2153 women, we are going to keep having the same conversations over  
2154 and over and over again. So we have to have both a policy  
2155 conversation and a culture shift.

2156 Mr. Kennedy. Anybody else want to comment on that? Mr.

108

2157 Johnson?

2158 Mr. Johnson. So just talking about this from a personal  
2159 experience and having an African American, extremely vibrant  
2160 woman who was not in good health but in exceptional health at  
2161 one of the top hospitals in the world, and to be quite honest  
2162 with you, when this first happened and I was asked a question,  
2163 do you think that this would have been different if your -- do  
2164 you think this is because your wife was black, or do you think  
2165 the outcome would have been different if your wife was Caucasian,  
2166 I was in so much pain I couldn't process that and the thought  
2167 that the color of my wife's skin contributed to her death?

2168 But what I am clear about is that she was not seen or valued  
2169 as human. She wasn't. And the people who were responsible for  
2170 her care that I trusted with her care failed to look at her in  
2171 the same way that they would their daughter or their sister or  
2172 their mother. And the reality of the situation is I am asked  
2173 the question and people sometimes, and, you know, the more I have  
2174 spent with wonderful groups like Black Mamas Matter and the more  
2175 I look at the data, people -- and I am very clear about this issue  
2176 of implicit bias and the contributing factors or racism. And  
2177 people say you are making it a racial issue. I didn't make it  
2178 a racial issue, the statistics did.

109

2179           So what we have got to do is figure out how these women are  
2180 valued and looked at as human, because what I said at night, you  
2181 know, thinking about my wife and I have to think about that  
2182 question about would she be here today if she was Caucasian?  
2183 Let me be clear that this is an epidemic that affects all families  
2184 from all backgrounds and all walks of life, and unfortunately  
2185 I know that personally because I have talked to these families  
2186 and I have become very close to some of these fathers and some  
2187 of these families and they are from all walks of life.

2188           But we cannot address this issue without head-on facing the  
2189 way that it is disproportionately and horrifyingly affecting  
2190 African American mothers.

2191           Mr. Kennedy. Thank you, sir.

2192           Chairman, thank you for the extra time. Thank you all for  
2193 being here.

2194           Mr. Burgess. The chair thanks the gentleman. The  
2195 gentleman yields back. The chair recognizes the gentleman from  
2196 Georgia, Mr. Carter, 5 minutes for your questions, please.

2197           Mr. Carter. Thank you very much, Mr. Chairman, and thank  
2198 all of you for being here. And, Mr. Johnson, thank you for your  
2199 efforts and your work on this especially, and I echo the comments  
2200 of all of my colleagues here today. We appreciate your courage.

110

2201 Mr. Chairman, I believe this hearing was set for another  
2202 time and I requested and I am sure others did that it be delayed  
2203 so that we could have it. It is important to me and I am sorry  
2204 if it disrupted any of you all or inconvenienced you.

2205 But I am from the state of Georgia. In 2010, there was an  
2206 Amnesty International report that flagged Georgia as being the  
2207 number one state in maternal mortality. And that is why I  
2208 expressed to the chairman, Mr. Chairman, I want to be at this  
2209 hearing because this is real to me. In fact, when I served in  
2210 the Georgia State Legislature and we passed Senate Bill 273 that  
2211 created the MMRC and put it into the Georgia Department of Public  
2212 Health.

2213 And I wanted to ask you, Dr. Perry, because when we created  
2214 that, you know, we followed the guidelines and we did what we  
2215 were supposed to do. But I believe that your group was involved  
2216 in a study, When the State Fails: Maternal Mortality and Racial  
2217 Disparity in Georgia; so you are familiar with that?

2218 Dr. Perry. Yes, sir.

2219 Mr. Carter. I know you are. And, you know, I had the chance  
2220 to look at it and study it and one of the things that it pointed  
2221 out was the racial disparity in Georgia was the fact that even  
2222 though the four categories -- access to and quality of care,

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

111

2223 insurance access and pricing funding, and accountability around  
2224 data analysis and use, even though we had those in there we are  
2225 still failing on those, particularly access.

2226 And my question is, what can we do? Tell me what I can take  
2227 back to my state because this is important to me. I served in  
2228 legislature. I was in Health and Human Services, vice chair of  
2229 that committee, and I helped with this legislation. If, you know,  
2230 and the point has been made by my colleagues today, you know,  
2231 what can we do legislatively, but what can I do? What can I take  
2232 back to the state of Georgia?

2233 Dr. Perry. Thank you so much. And I do work with Dr.  
2234 Lindsay and the folks at Grady around the Georgia work and they  
2235 are specifically trying to look at their mental healthcare service  
2236 structure. So supporting mental healthcare services in Georgia  
2237 is important. Supporting Medicaid expansion in Georgia is  
2238 important. Supporting rural hospital closures in Georgia is in  
2239 support and like supporting support systems that include midwives  
2240 and doulas in Georgia is important.

2241 All the social structures that we see, all the states where  
2242 we allow for us to disinvest in women honestly have poor outcomes.

2243 Even though you can look and do the study and see, we have, we  
2244 are working on things inside of hospitals because you have some

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

112

2245 great doctors in Georgia. You have some phenomenal people and  
2246 some nurses and midwives. But until we build a structure that  
2247 holds the entire state together, right, like from rural Georgia  
2248 from -- then we are not going to be able to see an improvement  
2249 and we are being separated around ideals that don't allow us to  
2250 come together. And it is important that we know we value all  
2251 the moms in Georgia, rural moms, urban, they all need access to  
2252 insurance.

2253 Mr. Carter. Well, thank you for mentioning that because  
2254 as you well know, knowing the state we have a disparity between  
2255 rural and urban.

2256 Dr. Perry. Exactly.

2257 Mr. Carter. I mean to say Georgia is Atlanta and everywhere  
2258 else. So it really is.

2259 Dr. Perry. Exactly.

2260 Mr. Carter. Well, another part of that study that I was  
2261 very interested in, because I am a big advocate of this, is the  
2262 proposition that the state could develop ways to help religious  
2263 organizations in leadership engage and advocate for quality  
2264 health education and services.

2265 And I am really big with wanting to include the religious  
2266 community. And can you give me examples of how we can do that

**NEAL R. GROSS**

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

113

2267 or examples of how that has worked before?

2268 Dr. Perry. Including, because if you think about mental  
2269 health it is a great example, right, so a lot of religious  
2270 organizations have access to therapy, access to group places where  
2271 women can come to make sure they have grievance counseling.

2272 So there has been a lot of work that religious organizations  
2273 are there to be a safety net and a support for women. They can't  
2274 replace medical care, but they can be, serve as a safety net.

2275 They can provide transportation. They can help with child care.  
2276 Like all these other things that we are looking for that a  
2277 community provides, because we know that women who have access  
2278 to a community and to each other, the connectedness, have better  
2279 outcomes.

2280 So how do we create connectedness and community across this  
2281 country and across Georgia.

2282 Mr. Carter. Right. And one last question and this could  
2283 go to just about any of you. But the thing that I am wondering  
2284 here is I know we are accumulating the data and we are, and I  
2285 believe you said earlier the data is going to CDC. Are they  
2286 crunching the science of it? I mean can we tie anything into  
2287 this genetically, regionally?

2288 Ms. Stewart. I will try and then others. You know, CDC

**NEAL R. GROSS**

114

2289 has had a surveillance system in place for a number of decades  
2290 and thankfully we are able to collect a lot of data mainly coming  
2291 from death certificates. And just recently now, death  
2292 certificates now include whether or not a woman was pregnant  
2293 within the last year, and so that information has been helpful.

2294 But what we don't get from all of that -- and by the way  
2295 that voluntary system, CDC asks states around the country to  
2296 voluntarily submit the data. There are epidemiologists that then  
2297 review the data and we learn as much as we can from death  
2298 certificates. But what we don't understand is that a death  
2299 certificate does not necessarily tell the full story of how a  
2300 woman may have died and what were the underlying causes and what  
2301 were the potential interventions that could have been in place  
2302 to prevent that.

2303 And that is what this is about is taking the data we collect,  
2304 improving it, improving the collection, making it consistent,  
2305 having committees that then can design interventions and having  
2306 them well-funded so that they can actually see meaningful  
2307 improvement over time. So that is the difference.

2308 Mr. Carter. Good. Again, thank all of you. And, Mr.  
2309 Johnson, thank you and God bless you.

2310 Mr. Johnson. And I would just like to say that I am actually

115

2311 a native of Georgia and currently --

2312 Mr. Carter. Did this happen in Georgia?

2313 Mr. Johnson. It actually happened in California but I am  
2314 a native of Georgia.

2315 Mr. Carter. Okay.

2316 Mr. Johnson. Kira grew up in Decatur, Georgia and I grew  
2317 up in East Point and we are back living in Georgia.

2318 Mr. Carter. Right.

2319 Mr. Johnson. So we look forward to working together with  
2320 you --

2321 Mr. Carter. Absolutely.

2322 Mr. Johnson. -- to see how we can help out too.

2323 Mr. Carter. Can I ask you, was your wife originally from  
2324 Georgia?

2325 Mr. Johnson. Absolutely. Decatur, Georgia. Born and  
2326 raised.

2327 Mr. Carter. Okay, see this is the point I am getting at  
2328 here. I mean, you know, we are the Cardiac Belt. Has anybody  
2329 looked at any of this to kind of try to tie this into it?

2330 Ms. Stewart. There is a lot of work being done on what is  
2331 going on that is that are sort of the underlying causes to why  
2332 so many women of color especially are dying, and there are a bunch

**NEAL R. GROSS**

116

2333 of issues. I will mention one of them. By the way I am from  
2334 Atlanta too. Don't hold that against me.

2335 Mr. Carter. I see a pattern here.

2336 Ms. Stewart. We have known each other a long time.

2337 Look, there is a very important study and we could go through  
2338 a laundry list of things, but there is a very important study  
2339 that has really helped all of us understand what are some of the  
2340 underlying causes to why we see so many disparities among African  
2341 American women in particular.

2342 A study that was done by a researcher who is now at the  
2343 University of Michigan but she started this study in New Jersey,  
2344 I believe, where she started to look at this as your weathering.

2345 The fact that African American women's health tends to, and  
2346 African American women tend to have more challenges the older  
2347 they get, challenges in pregnancy, challenges in childbirth,  
2348 challenges maybe post childbirth may be due to this issue of  
2349 weathering, which is that the impact of chronic stress that may  
2350 be coming from racism and discrimination over a long period of  
2351 time.

2352 This issue of weathering which tends to deteriorate one's  
2353 health may be a big contributor why we see so many disparities.

2354 The fact that women are getting, are older as they are getting

**NEAL R. GROSS**

117

2355 pregnant and the fact that if black women are older having babies  
2356 and they are experiencing this impact from this weathering effect  
2357 that that could explain in part why we are seeing so many outcomes.

2358           Having said that, we still need to address the fact that  
2359 we don't specifically have to accept that that is the case, we  
2360 can actually do something about it. We can actually address those  
2361 issues. We can actually deal with the underlying stress that  
2362 exists. We can actually deal with the systems that may be  
2363 creating the stress in the first place, and we can make sure that  
2364 we understand when interventions are really effective across all  
2365 communities.

2366           Mr. Carter. Thank you, Mr. Chairman. I yield back.

2367           Mr. Burgess. As the gentleman's time has expired, the chair  
2368 recognizes the long-suffering Mr. Engel from New York, 5 minutes  
2369 for your questions, please.

2370           Mr. Engel. Thank you, Mr. Chairman. I appreciate those  
2371 words, thank you.

2372           Thank you, Mr. Chairman, for holding today's hearing. Just  
2373 in listening, it is just shocking that right here in the United  
2374 States women are dying from preventable pregnancy-related  
2375 complications. That alone is shocking, but that women are more  
2376 likely to die from those complications here than in other parts

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

118

2377 of the developed world, that is shocking. And the fact that this  
2378 risk is three to four times higher for black women than white  
2379 women, that is shocking.

2380 So it is a tragedy and it is an emergency, and thank you,  
2381 Mr. Johnson, for sharing your story with us.

2382 I want to thank my colleagues, Congresswoman Herrera Beutler  
2383 and Congresswoman DeGette, for introducing the Preventing  
2384 Maternal Death Act legislation which I am a proud co-sponsor of.

2385 And I hope that after today our committee can move forward on  
2386 solutions to this problem that we really need to move quicker,  
2387 more quickly. It is long past time we acted to reverse this  
2388 horrible trend once and for all.

2389 So let me ask this question. I have long supported  
2390 investments in family planning and reproductive health and I am  
2391 particularly interested in the impact that such investments can  
2392 have on maternal mortality. As the ranking member of a House  
2393 Foreign Affairs Committee, I have seen that impact on a global  
2394 scale. In fiscal year 2016 alone, U.S. investments in family  
2395 planning worldwide provided contraceptive services and supplies  
2396 to 27 million women and couples, which in turn helped to prevent  
2397 11,000 maternal deaths.

2398 So let me ask Drs. Crear Perry and Coslett-Charlton, would

**NEAL R. GROSS**

www.nealrgross.com

**This is a preliminary, unedited transcript. The statements within may be inaccurate, incomplete, or misattributed to the speaker. A link to the final, official transcript will be posted on the Committee's website as soon as it is available.**

119

2399 you each explain why meeting unmet need for contraception helps  
2400 to prevent maternal deaths?

2401 Dr. Perry. So there has been some data that shows that the  
2402 safety and security you get from having access to family planning  
2403 and not having to worry about if you are going to get pregnant  
2404 again because you are not planning to be pregnant at that moment  
2405 really decreases your stress and your weathering and ensures that  
2406 you have a healthier pregnancy. We know that we have looked  
2407 at the states that have more supportive policies around family  
2408 planning also have better infant mortality rates and better  
2409 maternal mortality rates. So it is not a coincidence that when  
2410 you invest in family planning and when you invest in  
2411 infrastructure for moms and babies, you actually create a safety  
2412 net where people can live longer and be healthier. So it is  
2413 important that these policies that are created in this House  
2414 improve the ability for moms and babies to live.

2415 Dr. Coslett-Charlton. And I would certainly echo that  
2416 response. But also it has been shown that women that are able  
2417 to plan their pregnancies by, you know, spacing interval between  
2418 pregnancies and having access to adequate contraception that it  
2419 improves the safety. There is very clear data to show that it  
2420 improves outcomes in pregnancy and delivery also.

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

120

2421 Mr. Engel. So thank you. But along those lines, let me  
2422 ask you if either of one of you would explain why women in the  
2423 United States specifically have unmet need for contraception.

2424 By that I mean they want to use modern contraception but are  
2425 not currently.

2426 Dr. Perry. Well, because the -- it is a state and local  
2427 issue, usually, around access to family planning and reproduction  
2428 and because when we allow that to be made state-based wide people's  
2429 personal, you get gaps in what states pay for, things like sex  
2430 education, what states allow for, things like having birth control  
2431 inside of high schools.

2432 Once again I will say for my great state of Louisiana, we  
2433 struggle with getting sex education in the schools. We struggle  
2434 with getting access to family planning for the people who actually  
2435 need it very desperately. So I think in an attempt to make for  
2436 a safe environment for our state sometimes we mislabel what safety  
2437 looks like. Safety looks like having access to choice when it  
2438 comes to your reproduction. And when you have that access to  
2439 choice and information, you can have a safer pregnancy and a safer  
2440 outcome.

2441 Mr. Engel. Well, thank you. Obviously there is a lot more  
2442 work to do on this front. Let me mention this. A December report

121

2443 from the Guttmacher Institute estimated that globally, and I  
2444 quote, fully meeting the unmet need for modern contraception would  
2445 result in an estimated 76,000 fewer maternal deaths each year.  
2446 That is 76,000.

2447 So I want to ask either one of you doctors to please, if  
2448 you agree is it fair to say that improving access to contraception  
2449 for American women could help address the rates of maternal death  
2450 in the United States?

2451 Dr. Perry. Yes.

2452 Dr. Coslett-Charlton. Yes.

2453 Mr. Engel. That is a loaded question, but I wanted to put  
2454 it out on the record. I want to also take this opportunity to  
2455 briefly talk about legislation. I have introduced with  
2456 Congressman Stivers, the Quality Care for Moms and Babies Act.  
2457 The legislation would bring together diverse stakeholders to  
2458 identify care quality benchmarks, care quality benchmarks for  
2459 women and children in Medicaid and CHIP as well as fund new and  
2460 existing maternity and infant care quality collaboratives.

2461 These collaboratives bring together local stakeholders such  
2462 as doctors and nurse midwives to best share the best practices  
2463 in improved care for patients, and I am grateful to both the ACOG  
2464 and March of Dimes for supporting this legislation.

2465           And let me ask you, finally, both -- let me ask perhaps Ms.  
2466 Stewart. I will ask you this. Wouldn't you agree that we should  
2467 be measuring and evaluating performances of Medicaid and CHIP  
2468 caring for America's moms and babies as well as investing in  
2469 perinatal quality collaboratives which work to implement maternal  
2470 mortality review committee recommendations at the state level?

2471           Ms. Stewart. Congressman, we are very involved across the  
2472 country in perinatal collaboratives and they are very effective  
2473 and we would very much support them. And I would just add just  
2474 at this point which is that 60 percent of all births are covered  
2475 by Medicaid and that is a lot of women and a lot of babies.

2476           And whatever we can do to make sure that the quality of care  
2477 exists for those women as it does for women in the private  
2478 insurance market to make sure we are collecting the kind of data  
2479 to understand what is effective and what is not and that we are  
2480 sharing that data across states, we would firmly support that.

2481           Mr. Engel. Thank you. Thank you very much. Thanks, Mr.  
2482 Chairman.

2483           Mr. Burgess. And the gentleman's time has expired.

2484           Seeing no additional members wishing to ask questions, I  
2485 want to thank all of our witnesses again for being here today.

2486           I have some documents I need to read into the record, a statement

2487 for the record from Sean Blackwell, M.D.; momsrising.org; and  
2488 Alexis Joy Foundation. I also have the September report for the  
2489 Maternal Mortality and Morbidity Task Force from the state of  
2490 Texas; a letter from Dr. Gary Hankins who participated in one  
2491 of our roundtables -- Dr. Hankins is from the University of Texas  
2492 Medical Branch in Galveston; and Dr. Cardenas had mentioned the  
2493 Obstetric Hemorrhage Toolkit in California and I do have a copy  
2494 of that I am going to submit for the record.

2495 Also, documents from the March for Moms; Postpartum Support  
2496 Virginia; Association of Maternal & Child Health Programs; Heart  
2497 Safe Motherhood; Massachusetts Child Psychiatry Access Program;  
2498 a letter signed by 1,000 Days and other patient groups; Americans  
2499 United for Life; Alexis Joy Foundation; Nurse-Family Partnership;  
2500 Preeclampsia Foundation; Society for Maternal and Fetal Medicine;  
2501 a letter from Timoria McQueen Saba; American College of Surgeons;  
2502 KSM Consulting; more California PPH; SAP America; and Forbes  
2503 Insight Study.

2504 And just to end on a somewhat positive note, my grandfather  
2505 was an OB/GYN, an academic OB/GYN at McGill University in Montreal  
2506 and practiced obstetrics during the decade of the 1930s when the  
2507 maternal mortality fell from all-time highs to all-time lows,  
2508 certainly indicative that if we put our minds to it, it has

2509 happened before, it can happen again.

2510 Pursuant to committee rules, I remind members they have 10  
2511 business days to submit additional questions for the record.

2512 I ask the witnesses to submit their responses within 10 business  
2513 days upon receipt of the questions. Without objection, the  
2514 subcommittee is adjourned.

2515 [Whereupon, at 12:23 p.m., the subcommittee was adjourned.]
