Narrative Report

Introduction

I am a psychiatrist who specializes in ethics and forensic psychiatry informed by my background in the care of psychosocially- and psychiatrically-complex patients. After completing my general and forensic psychiatry training at Massachusetts General Hospital (MGH) and McLean Hospital, I joined the faculty at MGH and HMS, where I have provided and overseen clinical care, taught and supervised trainees, served as a leader and consultant to hospital programs regarding forensic, legal, and ethical issues, and engaged in leadership, advocacy, and policy-making in local, state, and national professional organizations. My academic work and teaching at the intersection of psychiatry, medicine, law, ethics, and human rights focuses on enhancing our profession and advancing practice in a rapidly changing biomedical environment.

Area of Excellence: Clinical Expertise and Innovation

I have engaged in clinical, forensic, and academic roles related to law, psychiatry, and ethics. Since 2006, I have been actively involved in collaborative care work as a psychiatric consultant to the mental health team of the MGH Intensive Care Management Program and since 2008 have provided medical oversight to the MGH inpatient guardianship team, an innovative team repeatedly shown to reduce medically unnecessary length of stay, improve staff and patient outcomes, and generate cost savings. In addition to guardianship work at MGH, I serve as a liaison to the Probate Bar and Court to provide education about guardianship and to collaboratively hone practice and policy. I maintain a practice in the Outpatient Psychiatry Department at MGH, where I provide psychotherapy and psychopharmacologic management to complex patients, and have a forensic consulting practice in the Law and Psychiatry Service, where I receive referrals from colleagues locally, regionally, and nationally with recognized areas of expertise including decisional capacity evaluations in guardianship, probate and family matters, and specific intent assessment. I have also served as the Director of Law and Ethics for the MGH Center for Law, Brain, and Behavior since its inception, combining academic work and forensic experience with advocacy and interdisciplinary collaboration. In addition, over the past decade, I have developed and overseen two trauma-related clinical programs (first the Veteran's Clinic at the Home Base Program, later serving as Clinical Director of Home Base, and then as Medical Director of the One Fund Center for Boston Marathon Bombing survivors and their families).

Special Merit in Education as a Significant Supporting Activity

I have been actively involved in teaching and supervision of medical students and residents since I joined the MGH/HMS faculty. I have lectured regularly in the MGH/ McLean residency and forensic fellowship over the years and also served as a core faculty member of the MA 750 Ethics and Professionalism HMS course for first-year medical students. I have served as a tutor for and ethics group leader for the Patient-Doctor III series at MGH. I have served in the leadership of the Harvard Forensic Psychiatry Fellowship and participated in the expansion of this fellowship to include Brigham and Women's Hospital in 2020. I continue to teach on topics related to psychiatry, medicine, law, and ethics. My current teaching activities center on ethics education at HMS in the Center for Bioethics. As part of my role at the HMS Center for Bioethics, I am now in my seventh year of teaching and directing or co-directing the two-semester (8-credit) course Foundations of Bioethics I & II, which serves as the core required

sequence for the Master of Bioethics Degree Program and enrolled approximately 70 students in the 2021-2022 academic year in in-person and virtual class sections. In 2019, I was also program chair of the HMS Annual Bioethics Conference on physician-assisted death.

Supporting Activity: Administration and Institutional Service

Since 2014, I have served as the Director of the Master of Bioethics Degree Program at HMS, where I developed, gained approval for, and implemented a novel one-year, 36-credit Master of Bioethics Degree, which has now completed its sixth year, has more than 160 graduates, and has an anticipated enrollment of more than 80 part and full-time students combined in residence and in virtual instruction for the 2021-2022 academic year. This program is the first of its kind to combine classroom and didactic learning with a year-long capstone experience in the work of bioethics. In this role, I serve on the HMS Masters Oversight and Governance Committee, on which I have participated in the ongoing development and expansion of masters program offerings and student services at HMS. I also now serve as the Associate Director of the Center for Bioethics. I hold ethics leadership roles in organized psychiatry and medicine including as chair of the task force that produced the American Psychiatric Association Commentary on Ethics and Practice (2015), as the Vice-Chair (2018-2019) and then Chair (2019-2021) of the APA Ethics Committee, as a member (2014 – present), then Vice-Chair (2018 – 2021), and now chair (2021-present) of the Massachusetts Medical Society Committee on Ethics, Grievances, and Professional Standards, and, as a seven-year appointee to the American Medical Association Council on Ethical and Judicial Affairs (CEJA) from 2019 – 2026. In addition, I served on the Board of Directors of the Academy of Consultation-Liaison Psychiatry (the largest professional organization of consultation-liaison psychiatrists) for a decade, including as president from 2018-2019. Most recently, I was nominated for and elected to the position of President-Elect of the American Psychiatric Association, the largest psychiatry professional organization in the world with nearly 38,000 members.

Summary

Since my appointment as an Assistant Professor of Psychiatry at HMS, I have endeavored to provide excellent clinical care, administrative oversight, and teaching, while also contributing to academic development and teaching of ethics. Through my lecturing (at a local, regional, national, and international level), my written works (e.g., peer-reviewed original research, topical reviews of the literature, and book chapters in well-regarded texts), my curricular and program development, my administrative leadership in ethics at psychiatric and medical professional societies, and my national leadership roles in psychiatry, I have sought to improve care for psychosocially-complex patients, to advance the ethical practice of our profession through teaching, scholarship, service, and leadership in professional organizations, to advocate for our profession and our patients, and to contribute to the teaching and development of the field of bioethics.
