Personal Summary

I am a successful academic executive, research innovator, and entrepreneur who currently directs Virginia Tech's Hume Center. I joined Virginia Tech to help launch the Hume Center in 2010 and bootstrapped its growth with the award of \$100M in grants and contracts to now support over 75 professors, researchers, and staff, and engage over 400 students per year in national security and cybersecurity programs. Additionally I have worked with the venture community to spin four companies off from the university that have raised over \$75M since 2012. His enterprises have created over 200 jobs from Blacksburg to Boston.

Clancy is an internationally-recognized expert in wireless security, and has led groundbreaking programs in spectrum security, cryptographic authentication, and physical-layer resilience. He is currently working on security for IoT and 5G. He serves in leadership roles within the IEEE Communication Society (COMSOC) and Signal Processing Society (SPS), and has served on the editorial boards for *IEEE Transactions on Information Forensics and Security (TIFS)* and *IEEE Transactions on Cognitive Communications and Networking (TCCN)*. He is co-author to five books, over 20 patents, and over 200 academic publications.
