

115TH CONGRESS  
2D SESSION

# H. RES. 689

Expressing the sense of the House of Representatives that any infrastructure legislation that provides Federal funds to wireless broadband providers to promote wireless broadband deployment should prioritize funds for wireless broadband providers in States that have enacted streamlined siting requirements for small cells.

---

## IN THE HOUSE OF REPRESENTATIVES

JANUARY 11, 2018

Mr. HUDSON submitted the following resolution; which was referred to the  
Committee on Energy and Commerce

---

## RESOLUTION

Expressing the sense of the House of Representatives that any infrastructure legislation that provides Federal funds to wireless broadband providers to promote wireless broadband deployment should prioritize funds for wireless broadband providers in States that have enacted streamlined siting requirements for small cells.

Whereas wireless broadband brings extraordinary opportunities for economic growth and investment across every sector of the economy;

Whereas wireless broadband is in the midst of a revolution to fifth generation technology that will bring about speeds estimated anywhere from 10 to 100 times faster than existing LTE wireless technology;

Whereas the development and deployment of fifth generation wireless broadband will increase efficiencies for virtually every industry and economic sector of the United States economy;

Whereas the broader economic benefits of fifth generation wireless broadband may include 2.2 million jobs and add roughly \$420 billion in gross domestic product;

Whereas the United States is competing with other countries and regions around the world to deploy fifth generation wireless broadband first to reap the greatest economic gains from this technology;

Whereas cost estimates to deploy fifth generation technology across the United States exceed \$300 billion;

Whereas current siting regulations were designed for traditional large towers used by previous generations of technology, while fifth generation wireless technology will be enabled by a densified network of small cells; and

Whereas roughly a dozen States have already enacted legislation to streamline small cell siting regulations: Now, therefore, be it

1       *Resolved*, That it is the sense of the House of Rep-  
2       resentatives that any infrastructure legislation that pro-  
3       vides Federal funds to wireless broadband providers to  
4       promote wireless broadband deployment should prioritize  
5       funds for wireless broadband providers in States that have  
6       enacted streamlined siting requirements for small cells.
