

**AMENDMENT IN THE NATURE OF A SUBSTITUTE
TO H.R. 4881
OFFERED BY MR. LATTA OF OHIO**

Strike all after the enacting clause and insert the following:

1 SECTION 1. SHORT TITLE.

2 This Act may be cited as the “Precision Agriculture
3 Connectivity Act of 2018”.

4 SEC. 2. FINDINGS.

5 Congress finds the following:

6 (1) Precision agriculture technologies and prac-
7 tices allow farmers to significantly increase crop
8 yields, eliminate overlap in operations, and reduce
9 inputs such as seed, fertilizer, pesticides, water, and
10 fuel.

11 (2) These technologies allow farmers to collect
12 data in real time about their fields, automate field
13 management, and maximize resources.

14 (3) Studies estimate that precision agriculture
15 technologies can reduce agricultural operation costs
16 by up to 25 dollars per acre and increase farm yields
17 by up to 70 percent by 2050.

1 (4) The critical cost savings and productivity
2 benefits of precision agriculture cannot be realized
3 without the availability of reliable broadband Inter-
4 net access service delivered to the agricultural land
5 of the United States.

6 (5) The deployment of broadband Internet ac-
7 cess service to unserved agricultural land is critical
8 to the United States economy and to the continued
9 leadership of the United States in global food pro-
10 duction.

11 (6) Despite the growing demand for broadband
12 Internet access service on agricultural land,
13 broadband Internet access service is not consistently
14 available where needed for agricultural operations.

15 (7) The Federal Communications Commission
16 has an important role to play in the deployment of
17 broadband Internet access service on unserved agri-
18 cultural land to promote precision agriculture.

19 **SEC. 3. TASK FORCE.**

13 sion that the Commission should issue to
14 achieve the goals and purposes of the policy rec-
15 ommendations described in subparagraph (B);

16 (E) recommend specific steps that the
17 Commission should take to obtain reliable and
18 standardized data measurements of the avail-
19 ability of broadband Internet access service as
20 may be necessary to target funding support,
21 from future programs of the Commission dedi-
22 cated to the deployment of broadband Internet
23 access service, to unserved agricultural land in
24 need of broadband Internet access service; and

1 (F) recommend specific steps that the
