NEW: In response to my/@BuzzFeedNews/CNN #FOIA lawsuit, DOJ has provided us with this list of all individuals who were interviewed by the FBI in relation Mueller's probe and where a 302 summary was created. Many names redacted. See note

Link to index: documentcloud.org/documents/6596...

The FBI has redacted certain names from the list because revealing the names could affect the FBI's pending operation sensitivities, potentially reveal protected federal grand jury information, or infringe on individuals' privacy interests in not being associated with a criminal investigation. See *Stern v. FBI*, 737 F.2d 84, 91-92 (D.C. Cir. 1984). As you are aware, the FBI has not yet processed all the 302s on this list. Until processing is complete, it is not feasible to determine whether some of the redactions may be lifted in the future. Once the 302s have been processed, the FBI may be in a position to release the names of certain interviewees that are currently redacted on this list.

The FBI has diligently worked to ensure the list is complete and correct, but has very recently discovered an erroneous entry on page 33. The FBI has redacted an entry for a 302 that should not have been included on the list. Removal of that erroneous entry results in a total page count (for the typewritten narrative portions of the 302s) of 5368. The FBI continues to review the list to ensure that the remainder of the list is complete and correct. If the FBI discovers any additional errors, I will provide a corrected list to you.
