

## Wayne L. Rogers

---

### Chairman and CEO

Wayne L. Rogers is the Chairman and CEO of Baltimore Washington Rapid Rail, LLC and The Northeast Maglev, LLC. The firms are dedicated to bringing the world's fastest, proven, mass transit technology, the Super-Conducting Magnetic Levitation (SCMAGLEV) train, to the Northeast Corridor, the most congested corridor in America. At 311 mph the SCMAGLEV will transport passengers from Washington DC to Baltimore in 15 minutes and DC to New York in an hour, connecting city centers and airports along the way. The project will create tens of thousands of jobs, combat climate change on a large scale and foster a climate of diversity, equity and inclusion.

Prior to his involvement in high-speed rail Mr. Rogers spent over 30 years in the renewable energy business, developing, designing, constructing, owning and operating wind and hydroelectric facilities in ten states and thirteen foreign countries. He has been involved in energy and infrastructure planning on a global scale. Mr. Rogers has received many awards including bringing new technology to solve infrastructure problems, successful groundbreaking and innovative project completions, and served in leadership positions in business, trade and export organizations.

Mr. Rogers received his Bachelor of Science from the US Naval Academy and his Juris Doctor from Georgetown University. He is a member of the Bar of Maryland, DC, Hawaii and the US Supreme Court.

Mr. Rogers serves as a member of the Board of Directors of CareFirst, Blue Cross Blue Shield, the largest healthcare insurer in the Mid-Atlantic region with 7,500 employees, 3.4 million members and revenues of \$9.6 billion. In addition, CareFirst has 628,000 members in the Federal Employees Health Benefit Plan.
