

Christina Sames is the Senior Vice President for Safety, Operations, Engineering, and Security for the American Gas Association.

In this role, she works with stakeholders to improve safety, resilience, efficiency, and security through sound regulation and legislation, programs that identify best practices and allow companies to be reviewed by their peers, forums to exchange information, and the development of publications related to the safe and secure delivery of natural gas.

Christina is responsible for AGA's initiatives on Pipeline Safety Management System (PSMS), pipeline safety integrity, excavation damage prevention, field worker assault prevention, National Mutual Assistance Program, and 20 technical and advocacy committees. In addition, Christina leads AGA's efforts on safety culture; *Commitment to Enhancing Safety, Environmental Stewardship, and Security*; the Executive Leadership Safety Summit; and is on several safety and advisory boards.

Prior to joining AGA, Christina worked for Pipeline Research Council International and spent 12 years with DOT's Office of Pipeline Safety. She holds a B.S. in Petroleum and Natural Gas Engineering from The Pennsylvania State University.
