

James Hasselbeck
Director of Operations
ReVision Energy, Inc.

James has been involved in the Sales, Development, Engineering, Construction and Operations & Maintenance of public and private renewable energy projects since 2006. After graduating from the University of Vermont, James went on to work at Waterline Alternative Energies (WAE), a startup focused on the design and construction of solar and wind projects. He was also a Project Manager for the Electrical Division of Waterline Industries, parent company to WAE and General contractor focused on the design and construction of water and wastewater treatment facilities throughout New England

Joining ReVision Energy in 2012, James maintains responsibilities for all construction operations for our Maine, New Hampshire and Massachusetts office locations. His primary role is to support ReVision Energy's Operations Managers, Commercial Project Managers, O&M teams and associated construction and engineering divisions to advance the mission, vision and values of the organization with a primary focus on safety, quality and execution. ReVision Energy's operations teams are responsible for permitting, designing, procuring, installing and servicing Photovoltaic, Thermal, Energy Storage, Electric Vehicle and other associated technologies in Residential, Commercial, Non-Profit and Municipal markets throughout New England.

James is a NABCEP Certified Installation Professional and has completed over 120 hours of Interstate Renewable Energy Council (IREC) certified Advanced Solar Design courses. James also serves as a Board Member of the Amicus Solar Operations and Maintenance Cooperative, a national cooperative focused on providing cost effective and high-quality O&M services nationwide. James lives with his 3 amazing and wild young children and incredible wife Stephanie in their 100% solar powered and carbon neutral home in a small town in New Hampshire.
