

Dr. Ben Schrag is an SBIR/STTR Program Director and Policy Liaison. He joined NSF as a Program Director in 2009, leading the Advanced Materials and Instrumentation portfolios. Prior to NSF, he was the Director of Research and Development at Micro Magnetics, where he led an effort to commercialize a new family of high-performance magnetic microsensor products. During this time, he also served as a visiting scientist at Brown University. Ben received his Ph.D. in Physics from Brown University.
