

H.R. 7543, the Guard and Reserve GI Bill Parity Act of 2024

“The Citizen Soldiers and Airmen of the National Guard daily serve our nation, both at home and abroad. Every time they put on the military uniform, they represent dedication and loyalty to America. The GI Bill Parity Act represents gratitude for the commitment and sacrifice that these men and women exemplify in their service. Ensuring that the National Guard receives the appropriate credit for the education benefits that they enlisted for every time they represent this nation is more than just keeping a promise and saying thank you, it is giving each of them the chance to accomplish goals, reach potentials, and be their best outside of the uniform. The Enlisted Association of the National Guard of the United States is proud of this legislation, along with all the work of the committee, that continues to highlight the National Guard, our service members, the families of the Guard, and the importance of ensuring we have the best trained and qualified military in the world.”
