

Jeffrey Maguire is managing partner and co-founder of Clearly Clean Products, LLC, which invented, patented and manufactures 100% recyclable food trays. The company is based in Pennsylvania and has nine operational locations. Maguire is involved in all company decision-making, but his primary responsibilities include oversight of all financial, sales and logistics matters for the business. He is a serial entrepreneur as he also co-founded Tavy Tools, which manufactures tile installation tools that are available nationwide through Lowe's Home Improvement stores. Maguire is a Certified Public Accountant and a graduate of The University of Connecticut.

Clearly Clean is an innovative manufacturer that creates eco-friendly products with features that surpass their non-sustainable alternatives. The company has successfully broken the meat and grocery industries' dependency on plastic foam as it holds the world's only patents for a 100% recyclable PET overwrap food tray with a rolled edge; this is significant in overwrap packaging because it does not tear the overwrap film and makes the tray three times stronger than plastic foam. Clearly Clean has been named the fastest growing manufacturer in Northeast PA two years in a row and received the Ameristar Award and the DuPont Award for packaging innovation. The company is committed to protecting its patents for both its products and its manufacturing processes. [www.clearlyclean.com](http://www.clearlyclean.com)
